There are very few shareholders of Tramway. Practically the entire issue of common stock has been exchanged for the stock of the Tramways and Power Company, which is the holding company formed for the purpose of taking over the Tramways Company, the Canadian Light and Power and other smaller power concerns of the city. The total issue of Tramways common stock amounts to about $2,000,700 while the total issue of Tram-Power stock is in the vicinity of $15,753,700. It is believed that almost the entire issue of Tramways stock has been exchanged for Tram-Power stock, so that nearly the entire dividend payment would go to that concern. When divided over the entire stock of the Tram-Power, it will be seen that the percentage will have shrunken from 5 per cent. to between one-half and three-quarters of one per cent. It seems to be the general opinion that the Tram-Power Company is hardly likely to make a distribution of such a small percentage, and as this is the first revenue the concern has ever received out of the earnings of its subsidiaries and it is likely to be in need of funds, possibly for the new stock issue, it is thought no distribution will be made to shareholders at the present time.

Neither Tramways stock nor Tram-Power stock is very widely held among shareholders on the street. Almost all the Tramway stock, as already said, has been exchanged, and even the ownership of Tram Power is thought to be mainly among the Robert McConnell group.

◆

PAPER MANUFACTURERS MAY REMOVE

The placing of newsprint on the free list will result in the removal of all the International Paper Company's plants from United States to Canada, according to Mr. P. T. Dodge, president. The company already has an option on half an interest in a large Canadian water-power concern, as a preliminary step towards removal to the Dominion.

Not only will this apply to the International Company, says Mr. Dodge, but to all paper manufacturers at present located in the United States.

WESTERN CANADA

Immigration from United States—Financial Conditio —Winnipeg Real Estate Exchange

Monetary Times Office,
Winnipeg, April 2nd.

If the expectations of Mr. J. Bruce Walker, Domini immigration commissioner, are realized, nearly 200,000 Unit States people will make their homes in Western Canada th year.

Mr. Walker, as is his annual custom about this time, h given out his anticipation of the prospects for immigr tion from the south. He thinks the increase will be 20 or per cent. over that of 1912. Last year there was practica 150,000 American immigrants.

With regard to immigration work from the United Sta I do not know, remarked Mr. Walker, that it differs v much from previous years, excepting that probably those w are going now take with them more money. They are mo inclined to go into the districts where land can be purchas than to go back the distance that is now necessary in ord to secure free homesteads.

Improving Commercial Conditions.

Western business conditions are generally improving Spring weather has come and there is great activity on th part of those, implement houses and others engaged in supplying the needs of the farmers.

Tight money is still in evidence and is curtailing expansions in some lines of business.

Building in the west will not equal last year's return as loans are not easily available.

Optimistic business men state that this tight mo situation will have disappeared in a month or two, they sa this without considering conditions. It will be some tim before the money market will be very greatly improved. C lections are undoubtedly poor and the loaning business i quiet.

There is a good demand for loans on farm as well a city property, but the local companies admit that they h not the necessary supply of money, when the European situation clears up more will be available for investment purpos The opening of navigation and the resumption of indust activity will also help matters. There is a satisfactory wholesale movement of general merchandise. Drygoods and millinery houses especially are busy. Much hardware is bein shipped to country points, although builders' supplies ar not as active as was anticipated.

Winnipeg Real Estate Exchange Annual Meeting.

The Winnipeg Real Estate Exchange elected the following officers at its annual meeting:—President, Dr. T. H Crotty; first vice-president, Mr. Fred. H. Stewart; secon vice-president, Mr. George A. Metcalf; and secretary treasurer, Mr. Philip Langley. Directors: Ex-mayor Waugh Messrs. George H. Balls, J. A. Dart, C. D. Chepard, William Grassie, W. W. Hancock, T. J. Langford, A. H. Oakes, Jame Scott, C. E. Simonite, and L. A. Walch.

Mr. A. H. Oakes, the retiring president, spoke particularly about the forthcoming National Convention which is t be held in Winnipeg this year.

Mr. Oakes in reviewing some of the conditions, said th building permits for the past year were approximately $20,000,000, which was an increase of $3,000,000 over last year

◆

MR. J. P. MORGAN'S LAST PUBLIC STATEMENT

Some of the epigrams in Mr. Morgan's testimony before the Pujo committee on December 19 last were follows:—

"The control of credits is not the control of money."

"What I call money is the basis of banking."

"England comes nearer than any country in the world to having outstanding obligations supported dollar for dollar in gold. This country's trouble is with greenbacks."

"Men who control credits control money. You can control money but you can control business."

"If one man had the credit and I had the money, man would be badly off."

"Money cannot buy character, and commercial cr is based principally on character."

"If a man is not satisfactory to me, I call his loan."

"I think stock manipulation is always bad."

"I favor the English system of full publicity and absolutely correct prospectus of all concerns to be listed."

"Stock Exchange members would say regulation interfered with their business. There would be another Exchange."

"I never in my life sold short, but I don't see how y can get along without short selling."

INSPECTIO.N OF BANKS

thods and Thoroughness Require to be Considered—Loans—Protection of Depositors

"To contend for external examination is no longer ne-
sary; only the method and the thoroughness of inspec-
 require to be considered," remarked Mr. H. C. McLeod,
ner general manager of the Bank of Nova Scotia, at the
umed consideration of the Bank Act by the banking and
nmerce committee. "The privilege of enlarging the
vers of circulation by the deposit of gold in a proposed
tral reserve, and the clarifying of the government state-
nt should prove beneficial."

Banking profits were not excessive. Canada's difficulty
procuring sufficient new capital to keep pace with de-
opment would not exist if banking held out the prospect
good profits.

Bank capital and reserve profits now had a ratio of
8 per cent. to gross assets, a percentage that should not
reduced. "The return from bank capital is moderate,
n the double liability is taken into account," he opined.

The machinery of the Canadian banking system was ex-
ent, but in many individual cases it had been used with-
 skill, or recklessly.

From the outset the finance department had failed to
rcise effective control over the banks.

tection of Depositors.

"We are told the government is afraid to assume re-
nsibility lest attempts to conserve the interest of bank
ositors should be construed as an obligation. It is not
in other countries," he said. "If efficient supervision
not be provided in any other way the department of fin-
e should organize a bureau for the purpose."

The new act had few provisions for the protection of
ositors. In most countries savings depositors were the
cial wards of legislators.

e Load in Banking.

He suggested that the committee look into statistics to
ertain the extent to which banking prudence may go in
ing loans.

They would find that the limit of safe load is far more
rly defined in banking than in bridge engineering; they
ld also find that this limit had been persistently exceed-
n Canadian banking. At the end of February, the total
ets of Canadian banks were $1,491,553,448, and the loans
94,304,485, or 73 4/10 per cent., which was not far from
 average percentage of some years.

"External inspection will clear away false accounting
 have a salutary influence, but there are causes of fail-
 that it may not obviate," he continued. "It may not
e banks from over-expansion of loans, nor prevent the
itable consequence of running without sufficient cash
rves and liquid resources. The banks should be requir-
o keep a fixed cash reserve in gold and legal tender.
e years ago I advocated ten per cent. of a bank's lia-
ies to the public. I now advocate 15 per cent., as pre-
 conditions show the need of a large reserve. There
ld be a provision that in case the percentage is impair-
he banks should pay to the government a tax equal to
n per cent. per annum on the deficiency.

ibit from Underwriting Certain Flotations.

"Banks should be prohibited from underwriting flota-
 schemes or investing in any security with which a
k bonus is either directly or indirectly given. They
ld be prohibited from including in their assets any
es of the stock of any corporation, unless such stock
cquired in the liquidation of an existing debt.

"Every bank should be required to annually publish a
 of its so-called investments, and this list should bear
verification of the auditor."

CANADA'S CREDIT

"The Dominion is almost entirely dependent for fresh
tal upon this country, yet I am impelled to say ignorance
ill existing among men holding high positions in Canada.
 quite surprising to some of my countrymen who go forth
ather money, thinking it falls from heaven," remarked Sir
lerick Taylor, when presiding at the Canada Club dinner
ondon. "Criticism has been levelled quite naturally against
in phases of Canadian borrowing. Let Canadians be
 to themselves, remembering that the maintenance of
ada's credit in the London money market is vital. Cur-
ent would be serious, so let us join in crushing the
lor of spurious Canadian goods in this market."

RATE OF BANK INTEREST

Discussed in Senate—Increase Not Likely—Conditions Not Changed

An increase of one per cent. in the rate paid savings depositors would practically wipe out the profits now earned, said Senator Dandurand at a discussion on bank interest in the Senate at Ottawa. Banks had to charge themselves with at least three-quarters of one per cent. for administration, and another three-quarters of one per cent., which represented the loss of interest on money the banks had to hold to meet the demands of depositors. The banks did not average more than 6 per cent. on commercial advances, and not more than 5 per cent. on call loans. As depositors seemed satisfied, why should the government interfere?

Senator Cloran said Mr. Dandurand had spoken as a shareholder. Savings deposits were made by working men and women, and should not be manipulated to their disadvantage by the banks.

Government Should Pay Value.

If money was worth 4 per cent. the government should pay that sum for it, remarked Senator Domville.

Senator Edwards opined that an increase by statute would result in a financial collapse. It should be governed by supply and demand. Few holders of bank shares, who took all risks, got more than 5 per cent. on their investments. Banks had been the greatest factor in Canadian development and no institutions rendered such great service for so small compensation.

Senator Powers, who is responsible for the discussion, said the high price of bank stocks indicates that banking has been exceedingly profitable, and the depositors should share the prosperity.

Science of Finance.

Finance was a science, stated Senator Lougheed. It would not be fair to non-depositors in the Post Office Bank if the government paid more than the depositors were worth. For 40 years the government had been borrowing at 3½ per cent. It cost the government something for administration and to hold the required gold reserve for deposits. Demand money was worth less than time money. In 1898 Hon. Mr. Fielding had reduced the interest rate from 3½ per cent., saying that more than half the deposits with the government were owned by people who could be regarded as wealthy. This condition had not changed.

The marketing of government securities in small amounts to Canadians, was suggested by Senator Bostock.

MONTREAL BROKERAGE HOUSES

Monetary Times Office,
Montreal, April 3rd.

Montreal brokerage offices have shown a marked disposition of late towards the admission of partners of the younger generation. Messrs. C. Meredith and Company, of the Montreal Stock Exchange, now announce the admission of Mr. A. T. Shaughnessy into partnership. This is the second or third announcement within a very few months past of new partners in the Meredith firm. Mr. D. E. Crutchlow became a partner as did Mr. Hartland Macdougall not very long ago. Mr. Shaughnessy is the son of Sir Thomas Shaughnessy, president of the Canadian Pacific Railway.

The firm of Greenshields and Company recently took in two new partners from the younger generation also, these partners being Messrs. R. O. Johnson and R. D. Bell. Mr. Johnson was formerly with Laidlaw and Company, of New York, and came here shortly after the Greenshields firm was organized. Mr. Bell arrived about the same time from New York, having been there a member of the staff of The Sun.

Quite a number of brokerage firms are being organized in Montreal, and in a great many cases the members of the firm are still in the twenties in the matter of age.

Mr. A. T. Shaughnessy, who has just joined the firm of C. Meredith and Company, has purchased the Stock Exchange seat formerly owned by Mr. J. R. Meeker. Mr. Meeker has just retired from the Stock Exchange, being one of the oldest members. For many years he appeared daily on the floor and his disappearance marks the severing of another link between the old and the new.

Mr Basil Jones has been admitted to the firm of Messrs. W. A. Henderson and Company, Winnipeg. Mr. Jones is a member of the Institute of Chartered Accountants of Manitoba and will now be resident partner of the firm at Medicine Hat, Alta.

MARCH FIRE LOSSES

Total Destruction Amounts to Nearly Two Million Dollars and Twenty-two Lives

The Monetary Times' estimate of Canada's fire loss during March amounted to $1,710,756, compared with February loss of $2,037,386 and $2,261,414 for the corresponding period of last year. The following is the estimate for March losses:—

Fires exceeding $10,000	$1,128,500
Small fires	359,115
Estimates for unreported fires	223,141
	$1,710,756

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,045	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	....
May	2,735,536	2,564,500	2,251,815	....
June	1,500,000	1,151,150	4,229,412	....
July	6,386,674	5,384,300	1,741,371	....
August	1,667,270	920,000	1,164,760	....
September	894,125	1,123,550	883,949	....
October	2,195,781	580,750	1,416,218	....
November	1,943,708	1,506,500	1,184,010	....
December	1,444,860	2,866,950	1,769,905	....
	$23,593,315	$21,459,575	$22,900,712	$ 7,661,527

Many Heavy Losses.

The fires at which loss was estimated at $10,000 and over were as follows:—

Montreal, Que.	Machinery plant	$ 75,000
Winnipeg, Man.	Oil storage	15,000
Winnipeg, Man.	Two residences	10,000
Montreal, Que.	Hunt Club kennels	10,000
Montreal, Que.	Business block	100,000
Montreal, Que.	Shipping building	75,000
Madoc, Ont.	Business section	20,000
Montreal, Que.	Business block	43,500
Owen Sound, Ont.	Drill shed	20,000
Springhill, N.S.	Store	10,000
Palmerston, Ont.	Malting plant	100,000
Merritton, Ont.	Paper mills	50,000
Vulcan, Alta.	Business section	20,000
Sunderland, Ont.	Business block	25,000
New Liskeard, Ont.	Business block	15,000
Ottawa, Ont.	Woodworking plant	70,000
Charlottetown, P.E.I.	R.C. Cathedral	300,000
Edson, Alta.	Business block	150,000
Govan, Sask.	Store	30,000

The fire waste in each province for the first three months of this year has been estimated as follows:—

Alberta	$2,257,800
Ontario	1,892,688
Manitoba	813,740
Quebec	768,774
Saskatchewan	618,510
Nova Scotia	497,554
Prince Edward Island	371,222
British Columbia	268,533
New Brunswick	172,706
	$7,661,527

Many Fires Were Preventable.

The structures damaged and destroyed were 82 residences, 33 stores, 13 factories, 8 barns and stables, 7 hotels, 7 business blocks, 4 lumber mills, 4 churches, 3 business sections, 2 warehouses, 2 schools, 2 hospitals, 2 blacksmiths' shops, 2 bakeries, 1 each drill shed, industrial bureau, café, brewery, garage, hunt kennels, station, lime kiln, smoke house, pool room, Young Men's Christian Association, mine plant, malting plant, city hall and icehouse.

There were destroyed 37 horses, 2 mules, 21 cows, 30 sheep, 4 pigs, 120 chickens, 25 tons hay, 10 box cars, 2 passenger cars, 1 oil tank car, 3 street cars, 4 motor boats, 1 steamer.

Of the presumed causes, 9 were attributed to overheated stoves, 8 defective chimneys and flues, 6 furnaces, 3 incendiary, 4 electrical defects, 4 matches, 2 lamps, 2 overheated ovens, 2 overheated stovepipes, 2 oil stoves, 2 spontaneous combustion, 1 each to overheated ironing board, hot poker, ashes, overheated grate, gas heater, gas explosion, sparks, thawing out pipes, gas jet and stove ignited towel.

During March twenty-two lost their lives through fi
The following are the monthly totals compared wi
1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	191
January	16	27	27	27	
February	8	15	12	11	
March	16	20	18	24	
April	18	37	20	15	
May	21	15	28	18	
June	16	52	13	6	
July	4	15	110	9	
August	17	11	22	16	
September	10	10	13	6	
October	26	16	17	21	
November	34	19	20	22	
December	33	19	17	28	
Totals	219	256	317	203	

The fires at which fatalities occurred were:—

Huntingdon, Que.	Burning building
Ottawa, Ont.	Burning building
Valcartier, Que.	Burning building
Tisdale, Sask.	Burning building
Saskatoon, Sask.	Burning tent
Vancouver, B.C.	Clothing set alight
Montreal, Que.	Clothing set alight
Westville, N.S.	Burning building
Skagway, Y.T.	Burning building
Desbarats, Ont.	Burning building
Cornwall, Ont.	Burning building
Boakview, Ont.	Burning building
Montreal, Que.	Lamp explosion
Edmonton, Alta.	Clothing set alight
Standon, Que.	Clothing set alight
Unity, Sask.	Burning building
Oshawa, Ont.	Clothing set alight

MAY BUILD CANADIAN FACTORY

The directors of the Chicago Pneumatic Tool Compar are said to have under consideration plans for building large plant in Canada, possibly in Windsor, for the purpo of handling its orders in the Dominion. If the plan is d finitely decided upon it will necessitate an expenditure around $350,000, which amount will be taken out of the ear ings. The company now has a plant in Montreal, but th is only equipped for repair work and its geographical loc tion is not so well adapted to the requirements of a man facturing plant as the one the board now has under co sideration.

MANCHESTER TAKES CANADIAN GRAIN

The total quantity of wheat to the ports of Liverpo and Manchester for 1912 was 33,785,188 cwts., an increas over 1911 of 4,079,288 cwts., and Canada's share of th trade for 1912 was a total of 8,099,200 cwts., an increas over 1911 of 2,594,700 cwts.

Barley has also increased to Liverpool during the pa year, and Manchester received in 1912 its first shipment barley for several years. The total value of barley fro Canada to Lancashire last year was £13,482, and the Ma chester share of this amounted to £9,317.

Another grain that shows an increase is oats, the tot for Lancashire in 1912 being 2,205,000 cwts., an increas over 1911 of 586,462 cwts. Canada's total consignment oats to these two ports was 551,200 cwts., an increase 199,400 cwts. over 1911. The total value of oats from Ca ada to Lancashire for 1912 amounted to £198,775, and Ma chester's proportion of this was £111,775.

Manchester as a grain market has practically no lim for Canadian grains, states Mr. W. G. Egan, trade commis sioner at Manchester, owing to the standard of grading an recognized superior quality over all other grains. This i repeated time after time by both the grain dealers and th milling trade, which continues to increase here in Traffor Park at the Manchester docks, and the management of th Manchester Ship Canal Company continue to increase thei facilities for the handling of all prospective increased shi ments. There is no doubt that in the very near future th Manchester port will be a close rival to Liverpool in th grain trade, which will mean for Canada the second an third largest milling districts in the world within forty mile of one another, and on the one direct trade route fro Canada to Great Britain.

IPMENT OF GRAIN FROM WESTERN PORTS

vator Proposals—Railways, Mines and Labor—False Creek Improvements

(Staff correspondence.)

Vancouver, March 31st.

That preparations are being made to facilitate the ment of grain from the western ports of Canada is in- ted by the recent statement made by the chief com- sioner of the board of grain commissioners. The d visited Vancouver to secure information relative to the rt of grain, and incidentally the announcement was e that three months ago the commission recommended he government that an elevator be erected on Burrard t. This shows that the possibilities of this trade have considered. Once a start is made in bringing grain via the western ports, it will soon be seen if conditions as favorable as by the eastern route. If so, it will not ong before the three railways which run across British mbia from Alberta will be carrying a considerable unt of grain from the prairie provinces.

One of those who spoke before the commission was Mr. I. Heaps, who recalled the fact that some time ago a pany had been formed here with a capitalization of $3,- oo to build an elevator with a capacity of a million and arter bushels. The capital was available, but the pro- was not carried out because of freight rates not being too favorable, and also there was doubt as to what government intended to do. Mr. Heaps suggested that e government were to erect an elevator it should be on Burrard Inlet. If it were known that this was a shipping port, vessels would seek cargoes and rates d not be so high.

The shipment of grain by the western route has been ssed at length from time to time, and both growers in ern Alberta and business men of the coast cities are ous to see if the many arguments in favor of exporting by the Pacific will be borne out by actual practice.

hern British Columbia.

Considerable of a trek has started to the reported gold in the northern part of the province, and while there be much mineral there the older heads are urging cau- One of the most prominent in this respect is Mr. W. gilvie, who has had much experience in the further es of the unsettled interior.

There is further talk of a railway to the north continu- n to Alaska, and it is stated that one of the objects of ichard McBride's trip to the United States is to bring natter to the attention of leading railway auhorities. e the line is built it is probable that a detailed report e made on the districts through which the line will run at it may be seen what the revenue will be. It is a ion if it would pay, though undoubtedly it might be in opening up, or at least providing transportation to ern fields. But as yet there are no operating mining sitions there, and no settlers, and the land is so far that it is somewhat doubtful if, apart from the Peace Valley district, conditions are favorable for successful ulture.

With the Spring advancing, something is heard of the g field in the Hazleton district, on the Skeena. Spo- and Butte men are largely interested. Considerable has been done on different properties, and by the end summer an idea may be formed of the possibilities of istrict.

abor seems to be choosing a bad time to try and dis- its strength by quitting work. At the Britannia Mine, owe Sound, everything was going well, with a large working and extensive development planned. The any objected to a representative of the Miners' Union on their property, and they requested that the man off. The men struck, with the result that the mine is down, and will continue so for some time.

ion for Wharves, etc.

here may be conflict between the Dominion and Pro- l Governments over the Indian reserve at the mouth lse Creek, a valuable piece of property in the centre of uver City. This reserve would be an excellent loca- or wharves and warehouses, and Mr. H. H. Stevens, had such a scheme in mind when he brought the mat- the attention of the government at Ottawa. The de- ent of public works was in favor of securing the loca- but it has been found that the province refuses to re- sh the reversionary rights in the reserve, which they is theirs.

he rumor that the Canadian Northern Railway was the site when taken in connection with the terminals of the Canadian Northern Railway to be located at the head of False Creek appears somewhat reasonable. It will only be about a mile and a half's run between the two and with a site at the mouth of the Creek, the railway would have a fine location for ocean wharves, which it will need, and which cannot be provided at the head of the Creek.

No by-law was ever given such a substantial majority as that to give the Canadian Northern rights on upper False Creek, the vote being two to one in favor. Times are such that the people are glad to be able to bring in any large company that promises to do something, and with the assistance given by the government and the city, much is expected from Messrs. Mackenzie and Mann. They will not have any time to lose to carry out all the improvements contained in the agreement within the time specified.

Mr. George Bury, vice-president of the Canadian Pacific Railway, who has returned from a trip to Japan, states that great development is taking place in the Orient, which should mean greater trade with Canada.

◆

VALUE OF LIFE INSURANCE

VI.

Value of Goodwill and How to Preserve It

By C. A. Hastings.

No man, whether he is in business or not, would dream of having his premises uninsured against fire, yet there is only one absolute claim in every twelve hundred. In business, many houses insure also against bad faith, accidents to employees; plate glass, burglary and so on, but when it comes down to insuring against the one loss, which is bound to occur sooner or later, we find that, it is not appreciated and either no insurance is carried or only a very small amount to ease their consciences. I refer, of course, to the one note or bill—after all what else is it?—that so many try to dishonor.

This note increases in value, as a man's income does, and it can only be met promptly with a policy in a reputable life office. It is a debt of honor, and a man owes it to his family, to his business, to the community at large, to meet that note, promptly: and is the crime any the less if he escapes meeting this note, than if he refused to meet a bill of sale?

But there are many who do escape, and leave their families in dire straits and force them to exist in totally different circumstances than they had been accustomed to during his lifetime.

Magnitude of Personality.

It is a very difficult matter to judge the capital value of a manager or partner, but it is common knowledge that a large part of the goodwill of any business belongs to certain individuals, in spite of the fact that there are many business houses with a reputation which is secure.

However, the magnitude of personality is not denied, and, in many instances, arrangements are made with managers and others so as to secure the continuity of their services. How often is the machinery of life assurance taken advantage of to protect employers? Anyone can be bound by an agreement to serve for a stated length of time, but, he cannot guarantee to live all that time.

Policy Covering Period of Agreement.

To cure this possible catastrophe is simple: an endowment policy, covering the period of agreement, will guarantee a fixed sum to the employer, either at a fixed time or at premature demise. Now as to the uses of the money:—

(1) If the valued employee is still alive he can be induced to continue in the service at an increase of salary.

(2) It can be used as a pension to the faithful servant without hampering the business.

(3) It is a most useful compensation in the event of early demise.

(4) It can provide an offer of partnership or otherwise.

By this means the goodwill of a business is assured: the goodwill of every business is personal, and when that person is the channel through which the business comes in, dies—rival concerns may capture that goodwill if necessary and adequate precautions have not been taken in time to protect it.

The following articles in this series have already appeared:—

(1) March 1st.—How to become one's own master.
(2) March 8th.—How depreciation of assets can be met.
(3) March 15th.—How to borrow at a profit.
(4) March 22nd.—The automatic production of capital.
(5) March 29th.—How to redeem debentures.

NEW WESTMINSTER

Commencement of Harbor Improvement—Salmon on Fraser River—Grain Interests

(Special Correspondence.)

New Westminster, B.C., April 1.

The first active step was taken on the extensive harbor development scheme adopted by the city last year, by passage in the council of the contracts for material and equipment aggregating over $130,000. The items going to make up this sum include dredge, tug boats, scows and piling. Immediate activity on this enterprise will commence.

The inspection of the Fraser River adjacent to this city by the Dominion grain commission for the purpose of locating Dominion Government-owned elevator facilities resulted in a statement made by Mr. E. J. Fream, vice-president of the Grain Growers Grain Company, of Alberta, that this district contained locations embodying all the requirements of the grain commission. These were enumerated as follows:—

(1) Ready access to deep water.

(2). Mutual access by transcontinental railway lines.

(3). Switching, storage track facilities.

(4). Suitable foundations.

(5). Price of land.

The grain commission are withholding any decision pending their official report.

Year of the Big Run.

It is estimated by the salmon canners that a catch of 1,000,000 cases will be secured this season of which the Fraser River will secure 600,000 cases. The balance will be canned in northern waters. What is commonly called the "big run" is the schedule for this year. In the last "big run" in 1909 the total pack was almost 1,000,000 cases. Preparations for the season's activity are being rushed in all the canneries.

Facilitate Grain Traffic.

The appointment of a grain weigher and the construction of trackscales in New Westminster, will obviate the difficulty experienced in the past by reason of leakage from cars en route and will provide facilities to take care for the future increase of the grain traffic at this distributing centre.

Eastern grain interests represented by Mr. J. L. Davidson, of Vancouver and Fort William, have secured a site at Port Coquitlam in which they propose erecting a large grain elevator and a flour mill of a three thousand barrel capacity.

Building operations will not be commenced until after the decision of the grain commission is announced.—W. L. D.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Cessford, No. 2566, $1,200. F. A. Straud, Steveville.
Bollard, No. 2474, $1,000. W. Barber, Medicine Hat.
Blindman Valley, No. 1645, $450. M. C. Platt, Rimby.
Akenstad, No. 1995, $400. A. J. J. Weijers, Strathmore.
Meeting Creek, No. 842, $600. F. Beyerstein, Meeting Creek.
Conquervill, No. 2684, $1,400. J. H. Larson, Windy Ridge.
Ribstone Creek, No. 2861, $1,200. W. A. Romane, Talbot.

◆

PERSONAL NOTES

Mr. H. James has been appointed city treasurer of Fort William.

Mr. William Wainwright was elected as a director of the Dominion Bond Company, Toronto.

Mr John Macdonald, president of the well-known firm of J. Macdonald and Company, has been elected as a director of the Guarantee Company of North America.

Mr A. T. Shaughnessy has been admitted into partnership in the firm of Messrs. C. Meredith and Company, Montreal. The admission of Mr Shaughnessy as a partner gives the firm four seats on the stock exchange, Mr Chas. Meredith, Mr J. J. Reed and Mr H. B. MacDougall, all holding seats

PROOF OF AGE IN LIFE INSURANCE

Companies' Opposition to McKeown Amendment—Change Was of International Importance

The amendment to the Ontario Insurance Act, in rega to proof of age, submitted to the provincial legislature by M C. R. McKeown, M.P.P., was considered by a special con mittee presided over by Hon. W. H. Hearst on Wednesda The following is the amended provision that Mr. McKeow desires adopted:—

"When the age of a person is material to a contract insurance such age shall be inserted in the policy issued the time of application and in the absence of fraud shall binding upon all parties to the contract of insurance unl within one year from the date of the said issue, an error the age so inserted is discovered, when the said policy m be rectified accordingly."

The insurance companies were represented by a stro delegation numbering nearly one hundred and includ Messrs. D. E. Kilgour, North American Life; George Westo Imperial Life; Z. Goldman, North American Life; W. A. Wood, Canada Life; Mr. Somerville, Manufacturers Lif T. G .McConkey, Canada Life; H .C. Cox, Imperial Lif George Wegenast, Mutual Life of Canada; Thomas Hilliar Dominion Life; J. A. Tory, Sun Life; M. Grant, Capi Life, and others.

Evidence for Amendment.

The time to prove age of insured was when the ins ance is entered into, and not 10, 15 or 20 years after, when evidence is almost gone, remarked Mr. McKeown.

"I have letters here from undertakers. They are calle upon to fill out forms. They say people are called upo time and time again to prove the age. Some die, and th age proven is several years different," said he. "The ins ance company wants the age proven. I want in my bill avoid trouble. Proof should be secured at time of writing insurance."

He asked for an insertion that proof be secured wit the year after the policy is written. Let the company not the insured within the year, and if he has paid a premium will secure proof. If this is not furnished, the policy will cancelled. With the added clause the sting is removed. they accept a proof, no matter how flimsy, they will not d pute the proof thirty years later."

Mr. W. G. Wright also spoke in favor of the bill. In case the age could not be proven, and the company said will give you what we like. Under the present act, if wrong age is given the survivors do not receive full amoun A reduction is made according to the error.

From the Underwriters' View Point.

Mr. J. K. Macdonald of the Confederation Life Insuranc Company spoke on behalf of the insurance men. He sai they were opposed to the amendment. If carried it would de prive men of a living and have a bad effect on business. people read their policies they would find a notice regardi age.

Hon. W. H. Hearst thought few people read the policie

Mr. George Pattinson suggested that if the proof is n given in five years then let the age given be the legal an acknowledged.

Mr. Macdonald contended that wrong ages were delibe ately given in many cases, but in others unintentionally. was shown that notice was given on the bottom of some paper that the insured must prove age.

Hon. W. H. Hearst thought special notice should be give either at the time of the writing of the policy or shortly after ward.

Mr. Lyman Lee of Hamilton, representing fraternal so cieties, stated they had found no hardships. He could n understand why the legislation was proposed. He said th time when young men drop out was in the first year or and this would irritate them. Any little irritation causes the to drop out.

Mr. Cox, of New York, appeared for American compa He said this legislation was entirely new .

"We regard the law as it now stands as fair. We are prised, on the other side, that this question has arisen hope that it will not be passed. We regard this as an i national question, even reaching far beyond your jurisdi tion."

An adjournment was made for a week

◆

The representatives of all the hail insurance compani doing business in Western Canada held a meeting at Reg recently. A bureau has been established, with headquarte at Regina. One of the decisions of the meeting was to ad a standard policy form.

FROM THE WESTERN WHEAT AREA

ing Will be General in Two Weeks' Time—Good Seed Available—Percentage of Grain Unmarketed is Small

With a view to ascertaining the general conditions in country and the probable date of the beginning of seed- the Manitoba Free Press sent out to some 260 points egram, asking the following questions: What amount ow, if any? Probable date of seeding? What was date year? Is there any shortage of good seed grain? What nt of wheat, oats, barley or flax still in farmers' hands ale?

Jp to the time of going to press replies were received 200 points, and a summary of these show that while now is deep at a number of points, varying from 13 s to 3 feet, that on the whole the country is very clear, that seeding will be general between April 15 and 20, while this is on an average from ten to twelve days than the beginning of seeding in 1912, it may easily better record; as the early seeding of 1912 was follow- two weeks of very heavy frosts, which damaged a con- able amount of grain in the ground, which had to be ded.

The snowfall throughout the whole of the three pro- s has been unusually heavy, and there is an abundance oisture, in some sections, so much moisture that it will d plowing.

Cultivated Land Ready.

Many districts, especially in Manitoba, report that plow- s behind, but, on the other hand, a very large number e districts report a larger percentage of cultivated land for seed this year; this has been the case for the last ears, taking this dry connection with the newly broken and the area promises to be large.

There is apparently no lack of good seed this year. In to that question the answer was almost invariably that was plenty of good seed. There were a few excep- , however. Six points reported an actual scarcity of and two places reported poor seed and the inability e farmers to get money from the banks to buy better Very many points reported that large quantities of uis wheat would be seeded this year.

Percentage Unmarketed.

With reference to the last question: "What percentage e crop of 1912 is still to be marketed?" the replies re- d would indicate that from 15 to 20 per cent. of the is still in the hands of the producer; one point report- per cent. of their crop still in farmers' hands. One or places reported as high as 35 and 40 per cent., but on whole the reports would indicate that the volume of the to come forward after seeding is comparatively light. e matter of unthreshed grain it is principally confined x, and of the points heard from only 18 report thresh- o be done, and at these the percentage varies from 5 per cent. of the crop.

To sum up there is an abundant supply of moisture. a amount of ground ready for seeding, plenty of good and the season not unduly late, if present favorable er continues.

arch	487,507	427,000

◆

HALIFAX TRAMWAY COMPANY

Mr. A. E. Robert, of Montreal, president of the Halifax way Company, at the meeting of the city council of ax, submitted a new proposal to the city of having it don its plans for a municipal system. At present, be- the city tax on the company's real estate,, the company a 4 per cent. tax on the gross earnings of the tramways per cent. on the lighting. Under the new plan the any offers to pay 5 per cent. all around, an increase of oo a year. A reduction in the charge for light of $35,000 r is also promised after hydro-electric energy is brought

EXTERNAL AUDIT OF BANKS

Board of Inspectors Appointed by General Managers of Canadian Banks, Suggested Mr. H. C. McLeod

Mr. H. C. McLeod, former manager of the Bank of Nova Scotia, in his evidence before the banking and commerce committee, said he considered that the appointment of a board of inspectors, nominated not by the shareholders, but by the general managers of Canada, would be about the ideal system.

Hon. W. T. White asked if he would favor the Clearing House inspection system in force in Chicago, New York, and other United States cities.

"I do not think it would be advisable," said Mr. McLeod. "It would give the big banks power to prey upon the smaller by picking them out for inspection."

Questioned as to the external bank inspection, Mr. McLeod stated that with a well managed bank, and a good system of accounting, there would be no difficulty for a good auditor to ascertain within a short time whether a bank were sound or not, and just what quantity of stock it possessed.

External audit had been instituted by him concerning the Bank of Nova. He believed the system better than either the Scotch audit or the shareholders' audit proposed in the bank bill.

Fewer Failures Since Inspection.

The general manager of the small bank, he declared, would have just as much to say in the appointment of the inspectors, as the general manager of the large bank.

The system of government inspection in the United States was very imperfect. They had a small number of inspectors over a large number of banks, and the consequence was that the inspection was inadequate.

"This national bank inspection, however," said Mr. McLeod, "imperfect, unscientific, and inadequate as it is, has probably done more to save the United States from financial disaster. Since it was inaugurated there have been fewer failures than in Canada."

"If the Canadian Bankers' Association should inaugurate an inspection would that be analogous to the Clearing House system in the United States?" asked Mr. White. "Would it be desirable?"

"It would not be desirable," said Mr. McLeod. "It would never work."

Referred to Finance Minister.

Mr. McLeod explained that in the system of inspection advocated by him, the auditors nominated by the general manager should be in the nature of an advisory board.

"Supposing any particular bank refused to take the advice given, what then?" asked Mr. White. "To whom then should the matter be referred?"

"Preferably to the finance minister," said Mr. McLeod. "He could take it up with the bank. I don't suppose he would have to use drastic action. Taking it up with the bank would be sufficient."

"Could the matter be referred to the Bankers' Association?" asked Mr. White.

"I should think it would be better to refer it to the minister," said Mr. McLeod.

Mr. McLeod urged that the auditors comprising the board should be men of high ability with a thorough knowledge of banking. They should be principals.

"The average inspector appointed by banks," he said, "has had less experience than an ordinary three-year clerk."

◆

COST OF LIVING ADVANCING

The report just issued by the Department of Labor shows that wholesale prices went up over 9 per cent. in 1912, due allowance being made for the varying importance in trade of the several communities. Retail prices did not advance so rapidly, but the department estimates that a weekly family budget, worked out at average prices, cost $12.24 in 1910, $12.89 in 1911, and $13.63 in 1912. In the terms of the department's index number, a level indicated by 127.4 in 1911 rose to one of 134.4 in 1912, the numbers being percentages of the average prices prevailing during the decade 1800-1899, the period adopted by the department as the standard for comparison throughout its investigation. This brings prices higher than they have been before in a generation; certainly a like situation has not been seen since the early seventies when prices were very high throughout America and Europe. Since 1897, the report shows that prices have advanced by very nearly 60 per cent. in Canada.

VALUABLE ORES BEING DEVELOPED

Platinum and Palladium Ores—Nickel Supplies and Iron Ore

It is well known that platinum is associated in small quantities with the chalcopyrite in the nickel-copper ores of the Sudbury district. Accompanying the platinum is palladium, a silvery-white metal of the same group, which finds its chief uses in the manufacture of astronomical instruments, watch-making and dental work.

There were recovered by the Orford Copper Works, New Jersey, in refining the nickel-copper mattes produced at Copper Cliff during the six years 1907 to 1912 inclusive, 2,864 ounces of platinum and 4,896 ounces of palladium, together with 15,675 ounces of gold and 459,250 ounces of silver.

It cannot be specifically stated that this entire production was from the nickel-copper ores, since certain residues from other mines are treated along with the matte in the process of refining. Doubtless, however, a large proportion is traceable to the nickel and copper-carrying pyrrhotite. The value of the production was about $817,030, according to an advance bulletin of the Ontario bureau of mines.

In Excess of Previous Year.

Leaving out of account the nickel constituents of the ores raised from the silver mines of Cobalt, the production of nickel in 1912 amounted to 22,421 tons, being 5,372 tons, or 31.5 per cent., in excess of the production of 1911. There were 725,065 tons of ore smelted, the matte produced aggregating 41,925 tons.

The mines operated by the Canadian Copper Company were Creighton, Crean Hill, and No. 2, and by the Mond Nickel Company, Victoria No. 1 and Garson. About 2,000 tons of ore were treated by the latter company from the Alexo mine, a new deposit in the township of Dundonald on the Temiskaming and Northern Railway, now being opened up.

Systematic and extensive operations with the diamond drill by the several companies in the Sudbury region have proven the existence of very large reserves of nickel ore.

An Extensive Body Discovered.

At the Murray mine, the Dominion Nickel Copper Company discovered a large body of ore some distance away from the outcropping of the former workings; at the Frood mine, the property of the Canadian Copper Company, the drill revealed what is believed to be the most extensive body yet discovered; and the Mond Company have located an extension of the Frood on their side of the boundary line.

The Dominion Company, which had large holdings on the Northern Nickel range, including the Whistle mine, after acquiring the Murray mine, formerly owned by the Vivians, and the Gertrude and Elsie mines, which belonged to the Lake Superior Corporation, have sold out to a new company, said to represent the Rothschild interests. The prospects are for a large expansion in nickel mining in the near future.

Copper was produced to the extent of 11,116 tons, almost wholly from the Sudbury district, where it occurs associated with nickel. The output for 1911 was 8,966 tons, the increase for the year being about 24 per cent.

Iron Ore Mined.

The quantity of iron ore mined in Ontario in 1912 was less than in 1911 by 58,274 tons. Shipments were from the Moose Mountain, Helen and Bessemer mines. The Grondal concentration plant at Moose Mountain and the roasting equipment at the Magpie mine (Lake Superior Corporation) are now both nearly completed, and if successful in practice will inaugurate the utilization of the low-grade iron ore deposits of the province.

Of pig iron the output was 589,593 tons, as against 526,610 tons in 1911. The number of blast furnaces in operation was eight, as follows: Algoma Steel Company, Sault Ste. Marie, 3; Canada Iron Corporation, Midland, 2; Steel Company of Canada, Hamilton, 2; Standard Iron Company, Deseronto, 1.

◆

CONTROLLED BY LATE J. P. MORGAN

Wall Street and financiers generally have been interested in the various estimates of the late J. P. Morgan's controlling power, one of which shows that Mr. Morgan's one-man power was as follows: Own companies, $6,133,427,000; affiliated companies, $2,752,095,000; banking interests, $1,000,000,000; partners' holdings, $500,000,000; total, $10,386,482,000.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—Dividend Changes

DIVIDEND CHANGES

The dividend of Freeman's, Limited, has been raised from 6 to 8 per cent.

The Smart-Woods Company have announced that a quarterly dividend of 1¾ per cent., or at the rate of 7 per cent., on the preferred stock of the new company, and of 1¼ per cent., or at the rate of 5 per cent., on the common stock, has been declared. This is the first dividend declared on these stocks.

The Montreal Arena Company has declared a stockholders' bonus of 10 per cent. on the past season's profits. This is in addition to the regular 7 per cent. declared some time ago.

The Securities Corporation, Limited, recently organized at Saskatoon, declared a dividend on February 22nd, at the rate of 25 per cent. per annum.

The dividend on the common stock of the City Dairy Company has been increased from 2 to 4 per cent. per annum.

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during March:—

Canadian Loan and Mercantile Company, Limited.—Offering of 50,000 shares. Par value $1. Authorized capital $250,000.

Smith Silver Black Fox Company, Limited, Montague, P.E.I.—Offering of shares at par, $100. Capital, $150,000.

Canadian-British Land Company, Limited.—$150,000 8 per cent. preference shares at par, with bonus of 100 per cent. common stock.

Montreal-Welland Land Company.—$300,000 7 per cent. preference stock at 95, with 50 per cent. common stock bonus.

Rocky Coulee Brick and Stone Company, Limited.—$79,000 capital stock at par.

A. MacDonald Company, Limited.—$2,100,000 7 per cent. cumulative participating preference stock at 95.

Hotel Cecil, Ottawa.—$275,000 capital stock at par.

Harris Abattoir Company, Limited.—$750,000 6 per cent. first mortgage 15-year sinking fund gold bonds at par.

Montreal Tramways Company.—$2,000,000 5 per cent. first and refunding mortgage gold bonds at 99 and accrued interest.

Brighton Black Fox Company, Charlottetown, P.E.I.—$20,000 capital stock at par.

Canadian Silver Black Fox Exchange, Charlottetown, P.E.I.—$10,000 worth of stock for $100 per share.

Progressive Mining Company, Limited, Ottawa.—Treasury shares at 20 cents each. Capital, $500,000; par value of shares, $1.

NEW LISTINGS.

The following securities of the Calgary Power Company, Limited, have been listed on the Montreal Stock Exchange: 18,500 shares common stock, and £460,000 ($2,238,666.67) 5 per cent. 30-year first mortgage bonds, due January, 1940.

Five hundred thousand additional bonds of the Steel Company of Canada have been listed on the Montreal Stock Exchange.

The Toronto Stock Exchange has listed $3,000,000 capital stock of the Hollinger Gold Mines, Limited.

Ten thousand additional shares of the Dominion Bank have been listed on the Montreal Exchange.

An additional 620,000 shares of the common stock of the Canadian Pacific Railway have been listed on the Montreal Stock Exchange.

The A. MacDonald Company, Limited, have listed 30,000 shares common stock on the Montreal and Toronto Stock Exchanges.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during March:—

Pacific Great Eastern Railway.—£1,000,000 first mortgage 4½ per cent. guaranteed debenture stock at 99.

A. MacDonald Company.—$2,100,000 7 per cent. cumulative participating preference shares at 95½ per cent.

Mexico North-Western Railway Company.—£1,600,000 6 per cent. 15-year prior lien bonds at 93½ per cent.

◆

The capital stock of the Trussed Concrete Steel Company of Canada, Limited, has been increased from $200,000 to $500,000.

MARCH MUNICIPAL BOND SALES

Provinces Were in the Market—Issues Totalled Over One Million Dollars

The municipal bond sales in Canada for March, as com by The Monetary Times, amounted to $1,083,826, ared with $1,038,806 for February, and $1,920,710 for corresponding period last year, and making a total for ear of $3,460,132.

Five provinces were in the market. The largest issue made by Maisonneuve, Que.

The following are the particulars by provinces:—

Quebec	$ 700,000

TORONTO'S MARCH FIRE LOSS

Toronto's fire loss during March amounts to $8,180. ber of alarms, 126; false alarms, 9; unknown causes, himneys on fire, 8; plasterers' heaters, 5; children and nes, 4; overheated stoves, etc., 14; grass fires, 7; elec- wires, 5; thawing water pipes, 3.

March was a light month for the fire-fighters. The to- amage estimated for the whole month was only a tenth e total for the previous month. Not only that, but the en had fewer calls.

The number of false alarms for the month was fewer for the first two months of the year.

The figures for the three months compared are:—

	January.	February.	March.
Damage	$42,828	$81,806	$8,180
Alarms	154	217	126
False alarms	26	18	9

This month there were 61 calls where there was no dam- t all, or in only 50 per cent. of the cases was there lamage. The greatest damage was $2,000 when a boat- e caught fire and several motor boats were partially oyed.

BOND ISSUES

Canadian Flotations in London—South Africa to Float Loan—Scotia Steel

Manitoba leaves the ranks of four per cent. borrowers by an issue just underwritten of £400,000, 4½ per cents., issue price 102, redeemable in 1953, states Windermere in a cable to the Montreal Star.

Many Canadian borrowers are now preparing to take advantage of the better market conditions. Following the Manitoba government loan, the city of Prince Albert issue of £100,000 4½ per cents. at 86 is being underwritten.

The underwriters have disposed of nearly ninety per cent. of the Algoma Central terminal's issue of £527,500 first mortgage year gold bonds.

The following issues have been listed on the London Exchange: Grand Trunk Pacific branch lines, £240,700, fours, guaranteed by the province of Saskatchewan, and £238,600, fours, guaranteed by the province of Alberta.

Market for the Empire.

The Union of South Africa is shortly to join the already crowded ranks of the colonial borrowers seeking financial accommodation in the London market, remarks the London Financial Times. The minister of finance states that further borrowing powers to the extent of £1,936,000 will be required for the year 1913-14, and that he proposes in the near future to raise money in London, but he does not mention how much he will raise, though the amount will apparently be under £2,000,000. The Union has not hitherto borrowed in London, but, of course, the component States have done so, with the exception of the Orange Free State Province. The Transvaal, having the advantage of the Imperial Government's guarantee, naturally enjoys the highest credit. The prices of Cape and Natal stocks, carrying the same rates of interest and subject to the same terms of redemption, are approximately identical. No doubt, as a result of its absence from the London market, the Union has within the past few years accumulated a floating debt of £3,699,000, and this, it appears, is now to be funded into a single loan, to be floated locally. But it is satisfactory to note that though a large floating debt has accumulated, £1,736,000 has been applied to the sinking fund since the establishment of the Union, while £2,260,000 has been paid out of revenue towards the redemption of debt.

To Open Up New Colliery.

It is stated that the firm of Messrs. F. B. McCurdy & Company has underwritten the forthcoming 6 per cent. debenture issue of the Nova Scotia Steel and Coal Company. The issue, it is said, will be offered publicly around par.

According to the statement of President R. E. Harris, K.C., the proceeds of the sale will be used for the opening up of a new colliery at Sydney Mines, and also for the enlargement of the company's plant at Wabana.

MARINE INSURANCE COMPANIES AND CANADIAN PORTS

The agitation which has been going on in Canada respecting differential rates of marine insurance now seems likely to become effective. The Times states that a number of underwriters for leading London insurance companies have met one of the foremost representatives of Canadian insurance and discussed the position.

It was decided to appoint a small committee to consider whether any amendment could be made in the clauses governing the insurance of steamers trading with British North America. At present vessels on which additional rates are paid are permitted to trade with British North America between April 1 and September 1, and the suggestion is now made that this period could be altered so as to include the months from May 1 to October 1. This alteration would enable a large quantity of the crops which are available for shipment in September to be exported.

It was also suggested that the Canadian government might be willing, in order to encourage owners to send their vessels to Canadian ports, either to compensate the owners direct for the additional premiums charged, or that it should assume responsibility for 50 per cent. of the claims, due to negligence of the pilotage service in the St. Lawrence River. It was proposed also to call the attention of the Canadian government specifically to the defects of the pilotage system as disclosed by the findings of recent courts of enquiry.

◆

Peterborough, Ont., electors will vote on a by-law granting a free site and exemption from a business tax for ten years to assist the Vermont Marble Company on April 23rd. The company agrees to employ 20 hands and a building costing $20,000 is to be erected.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Duluth-Superior Traction Company. Earnings of the Duluth-Superior Traction Company show gross for the third week in March of $22,472, which is an increase of $2,041, or 10 per cent. over the corresponding week of last year. Earnings for the month to date are $64,394, a gain of $4,435, or 7 per cent., and for the year to date $240,154, a gain of $11,719, or 5.1 per cent.

A. Macdonald Company.—The placing of the A. Macdonald Company's common stock on a five per cent. dividend basis meets the expectation of investors as it has been evident that the earnings were such as to permit a dividend. The dividends just declared are at the rate of 7 per cent. for the preferred and 5 per cent. for the common, payable 15th April to shareholders of record 5th April. The transfer books will be closed 5th to 14th April, both days inclusive.

Nova Scotia Steel and Coal Company.—The Nova Scotia Steel and Coal Corporation is working at full capacity in all directions. The question of extending the capacity of the plant is being considered, it is said, and before long some announcement may be forthcoming. The following are the figures of output for the month of March:—Coal mined, 64,000 tons; ore mined, 7,000 tons; pig-iron made, 7,200 tons; steel ingots made, 7,300 tons.

Dominion Coal Company.—The output of the Dominion Coal Company's collieries for the month of March is approximately 350,000 tons, a substantial increase over the output for March, 1912. With the earlier opening of navigation it is expected that the April output will also be large.

The various departments of the Steel Company ran almost to capacity last month, and, though figures are not yet available, the output will be very probably above the average.

Cape Breton Electric Company, Limited.—The following are the earnings of the Cape Breton Electric Company, Limited, for the seven days ending March 8th, 1913, and for the corresponding days of the preceding year:—

1913	$3,864.61
1912	3,498.86
Increase	$ 365.75

Or 10 4-10 per cent.

Richelieu and Ontario Navigation Company.—Mr. James Carruthers, president of the Richelieu and Ontario Navigation Company, denies the story that his company is to take over other boat lines.

Mr. Carruthers stated that when the Richelieu and Ontario Company thought of enlarging its present fleet of boats it would build new boats rather than pay the premium which would be asked by any companies owning lines.

"There is nothing to it at all," declared the Richelieu and Ontario president. "When we want new steamers we intend to build them."

City Dairy Company.—Common stock certificates of the City Dairy Company are now worth only half their face value. The shareholders of the company have unanimously adopted the new financing plan by which the common stock is reduced from $565,000 to $282,500. After the meeting supplementary letters patent were issued authorizing the transaction.

Shareholders of record March 31st are given the right to subscribe share for share at par to $282,500 new stock, which will be placed on an eight per cent. basis, dividends to date from to-day. Subscription books will be open until April 15th.

The managing committee of the stock exchange has made a ruling that good delivery of common stock of the City Dairy Company can be made only in certificates dated April 1st and afterwards. Certificates dated March 31st and previously will represent holdings to the extent of only one-half of the face value. Shareholders have been asked to send in their old certificates for exchange.

The president stated at the meeting yesterday that sales of milk for January and February this year showed a gain of [illegible] per cent. over those for the same period last year, and that sales of ice cream for the same two months showed this year a gain of 54 per cent. over last year. He further stated that net profits for the same time showed an important increase. It was stated that the directors felt satisfied of being able to maintain the dividend of 8 per cent. on the common stock.

Canadian Rogers Company.—In a circular on the newly-formed Canadian Rogers Company Messrs. A. E. Ames & Company say: "While not suggesting that the Canadian Rogers Company will equal in prosperity the parent company, it is expected that the earnings from the time that the company is well started in Canada will be sufficient to meet the dividends on the preferred stock, and that a steadily increasing surplus will be earned upon the common stock. The preferred stock, therefore, with its guarantee of dividends for ten years by the parent company, will be a high-class investment stock, and the right to exchange for common stock at the option of the owner may be expected to prove a valuable right.

Brazilian Traction Company.—February was a quiet month for the Brazilian Traction Company, the net earnings being $982,015, the smallest of any month since last September. Gross earnings are the smallest since November. Still the increase of net earnings over February, 1912, is $171,277, or 21 per cent. Net earnings for January and February incrased $356,147. Following is the comparative statement for February:—

	1913.	1912.	Increase.
Gross earnings	$1,821.715	$1,544,802	$276,91
Operating expenses	839,700	734,064	105,63
Net earnings	982,015	810,738	171,277
Aggregate gross from January 1st	3,734,670	3,128,147	606,52
Aggregate net from January 1st	1,995.498	1,630.351	356.147

Hollinger Gold Mines, Limited.—The second annual report of the Hollinger Gold Mines, Limited, shows that the sale of the balance of the treasury stock has cleared the mines from indebtedness, and has left the company in possession of its mines and mill in a productive condition.

The balance sheet shows that on December 31st the total assets amounted to $3,440,877.89. of which the mining properties are valued at $2,500,000, and the plant at $606,223.54 The current assets, including cash in the bank and on hand, supplies, and accounts receivable, are given as $123,627.17 Bullion sent to smelters, but not yet paid for, come to $62,752.72; bullion on hand, $12,000, while gold in precipitates, slags, and solutions estimate at $62.498. The surplus carried forward comes to $351,801.69, while the balance of profit and loss account carried forward is $101.801.69. During the year $498.862.73 was paid out in dividends.

General Manager Robbins' report shows that profits amounting to $600,664.42 were earned during the last six months of the year. During this time the work was carried on under difficulties, as a labor strike occurred, and both the mine and mill had to be worked up to a condition of running smoothly, as operations were considered to have begun on July 1st when the mill went regularly into commission. The work accomplished during the year was large, and prospecting by means of a diamond drill has been carried on with beneficial results.

The value of the ore reserves is placed at $11,271,400, and during the year $970,304.480 has been milled.

Canadian Consolidated Rubber Company.—At the annual meeting of the Canadian Consolidated Rubber Company, Mr. D. Lorne McGibbon, the president, reported that the combined profits of the company and its subsidiary companies, amounted to $832,846.86. Bond interest, interest on borrowed money, pre-payment allowances to customers, dividends on preferred and common stocks, as well as dividends to minority shareholders of the Canadian Rubber Company, amounted to $813,843.86.

The sum of $19,003 was carried forward to surplus, bringing the latter up to $1,991,627.

Total sales for the year amounted to upwards of $8,000,000, business in rubber footwear showing an increase of [illegible] per cent. and in general rubber goods of 28 per cent. Mr. McGibbon stated that a new warehouse had been built at Winnipeg during the year at a cost of $113,000 and a modern tire factory was being built at Berlin at a cost of $600,000. This plant would be operated by the Dominion Tire Company as a subsidiary.

Owing to the decline in the price of crude rubber during the last two years, the directors have decided to commence the coming year by a complete revaluation of not only raw materials, but all manufactured stocks and goods in process. This has been done on a most conservative basis, Mr. McGibbon stated.

"The outlook for the coming year is very satisfactory," said the president. "The organization of the company cturing and selling staffs is most complete and effective. an of dealing direct with the retail trade has been sfully carried out and your directors feel that the re- or the coming year will demonstrate in a most tangible he wisdom of adopting this policy.

e board was elected as follows: Messrs. D. Lorne oon, president; J. H. McKechnie and T. H. Reider, esidents; Shirley Ogilvie, Victor E. Mitchell; D. Coul- oronto; E. W. Nesbitt, Woodstock, Ontario; W. R. Winnipeg; A. J .Kimmel, Berlin, Ontario; F. H. Ward, al; S. P. Colt, H. E. Sawyer and E. S. Williams, New

the annual meeting of the Canadian Express Com- fficers were elected as follows: Mr. E. J. Chamberlin, an; Mr. John Pullen, president; Mr. Frank Scott, ry and treasurer. Directors—Messrs. E. J. Chamber- in Pullen, M. M. Reynolds, Hugh Paton, Frank Scott n. Wainwright.

nadian Mining Exploration Company.—The first annual of the Canadian Mining Exploration Company for the hs ended December 31st, 1912, shows that some 428 tions have been submitted to the company since its on. They are classified according to nature of the pro- d geographical distribution as follows:—

estos, 2; antimony, 1; coal, 14; copper, 52; copper- ; copper-silver, 2; diamond, 2; gold, 201; gold and 4; gold and iron, 1; graphite, 6; iron, 18; lead, 12; nese, 2; mica, 1; nickel, 21; oil and gas, 3; platinum, elite, 1; silver, 37; silver-lead, 6; talc, 1; tin, 3; n, 2; zinc, 5; miscellaneous, 24.

e location of properties was: Canada, 285; United 110; Mexico, 21; Central America, 6; South America, erated Malay States, 1; South Africa, 1.

he Canadian Mining and Exploration Company have pointed Consulting Engineers to the Canadian Copper ny, Copper Cliff, Ontario, and to The Dome Mines ny, Limited, Porcupine."

e company's capital consists of 1,000 shares of $5,000 ue, of which 500 have been issued, realizing $2,500,000.

e balance sheet as at December 31st, 1912, shows:

nds purchased	$1,858,878.92
tes purchased	99,000.00
mand loans (secured)	150,000.00
rued interest	26,958.32
ounts receivable	2,255.92
h	387,153.13
Total	$2,524,246.29

And liabilities as follow:—

Capital stock	$2,500,000.00
Accounts payable	3,793.71
Surplus:	
Profit and loss, balance as per attached statement	20,452.58
Total	$2,524,246.29

The profit and loss statement for eight months ended December 31, 1912 follows:

Gross Income:	
Bond interest	$47,917.93
Interest on loans	4,591.66
Miscellaneous interest	6,171.36
Engineering services	1,250.00
Total	$59,930.95
Expenditures:	
Organization	$ 4,025.09
Salaries	12,819.75
Examinations	12,717.84
Travelling	4,154.77
General office expense	3,749.70
Branch office expense	1,081.16
Directors' fees	930.00
Total	$39,478.37
Transferred to balance sheet, December 31st, 1912	$20,452.58

The Canadian Board of directors is comprised as follows:—Messrs. D. Coulson, D. Fasken, H. S. Holt, D. Lorne McGibbon, Sir Wm. Mackenzie, P. J. McIntosh, Wallace Nesbitt, Sir E. B. Osler and Sir Edmund Walker.

The United States board:—Messrs. T. L. Chadbourne, jr., E. C. Converse, W. E. Corey, J. R. DeLamar, C. L. Denison, P. A. Rockefeller, C. H. Sabin, A. Monell, R. M. Thompson and A. H. Wiggin.

The executive committee:—Messrs. D. Lorne McGibbon, E. C. Converse, Percy A. Rockefeller, Wallace Nesbitt, Ambrose Monell, J. R. DeLamar and C. H. Sabin.

Mr. Monell is president; Mr. McGibbon, vice-president; Mr. C. L. Denison, vice-president; Mr. William Wallace Mein, consulting engineer; Mr. James L. Ashley, treasurer and assistant secretary; Mr. F. S. Jordan, assistant treasurer and assistant secretary; Mr. Britton Osler, secretary; Mr. W. A. Bostwich, assistant secretary.

◆

CHARTERS AND CAPITAL

"Should bank charters be extended longer than ten years?" asked Mr. Ames.

"It is a matter of indifference. There has been a feeling that the question should come up at least every ten years," replied Mr. H. C. McLeod, former general manager of the Bank of Nova Scotia, at the banking and commerce committee's consideration of the Bank Act.

"A branch of a large bank could serve the community better than a local bank. With the way banking is run today," he said, "I do not think a local bank could exist at all. It could not compete in exchange."

"To start a bank, $500,000 was a small sum. A bank must have branches, and it took four or five years before the institution could make profits."

The Weyburn Security Bank was mentioned by Mr. Turriff. In 1907 it was a private bank, and did more to relieve needs of business than all the chartered banks in Weyburn put together. Mr. McLeod said this was a case of exceptionally good management.

Mr. Thornton gave the Western Bank, Oshawa, as an instance of a small bank which had done much good.

A local bank under good management would succeed in some places, but in others had to serve only depositors or only borrowers, said Mr. McLeod. The management of banks was more important than the amount of capital.

"What are your opinions of limitations of capital?" asked Major Sharpe.

"Banks should not be allowed to go beyond their present limits."

"Would you limit the branches?"

"No, I think not."

"Would you permit limitation of competition?"

"It could not be brought about, save by agreement."

SATISFACTORY BUSINESS CONDITIONS IN NEW BRUNSWICK

Natural Resources Are Being Extensively Developed—Railways and Shipping—New Companies and Their Prospects

(Special correspondence.)

St. John, N.B., April 2nd.

The general business outlook in New Brunswick continues to be satisfactory, with a larger volume of trade than in the corresponding period last year. Tightness of the money situation is, however, complained of.

The necessary legislation having been secured, the American and St. John capitalists, who are said to have $10,000,000 behind them, will proceed to develop hydro-electric power at points within fifty miles of St. John and transmit the current to this city for light and power purposes, and for the operation of suburban lines of railway. They are called upon to spend $50,000 in construction work this year, a like amount next year, and $100,000 the third year, besides developing the necessary power. Their engineers will be on the ground within a week. Just what steps the St. John Railway Company will decide to take as a result of the advent of this new company remains to be seen. The latter has offered to buy out the old company and the offer still remains open. The city stands to gain, whatever the result may be, since it needs street railway extension into the suburbs.

Railway Accommodation Grows.

The Intercolonial Railway again finds it necessary to enlarge its accommodation at St. John. Last year provision was made by laying down new sidings for three hundred additional cars, and as much more must be done before next winter. The Intercolonial grain elevator has thus far handled half a million bushels more grain than in the corresponding period last winter, or more than 2,000,000 bushels to date this season.

Premier Flemming told the legislature when the new Crown lands policy was under discussion that he expected to see between $10,000,000 and $15,000,000 invested in pulp and paper mills in New Brunswick within five years, giving employment to thousands of men. The Bathurst Lumber Company is promoting an enterprise which will result in the development of water power near Bathurst at a cost of about $1,000,000, and the erection of pulp and paper mills at Bathurst requiring a capital of about $5,000,000.

Export and Import Trade.

The exports from St. John during the winter season thus far have amounted in value to considerably more than $20,000,000. While there has been a falling off in the value of American goods, there has been a greater increase in the value of Canadian goods, and the season will make a new record. Not only will the exports be greater in value, but the import business shows an increase of about 25 per cent. On several occasions so many steamers have been in port that there was some slight delay before all of them could be provided with berths. There should be at least one new berth, and the new Canadian Pacific Railway elevator ready for the beginning of the next winter's ship business.

The New Brunswick Coal, Iron and Clay Company, which was lately incorporated with a capital of $298,000, has held its organization meeting. Three members of the provincial legislature—H. W. Woods, who is president; Hon. George J. Clark, and George B. Jones, are on the directorate; and the secretary-treasurer is D. King Hazen, son of the Hon. J. D. Hazen, Minister of Marine and Fisheries.

Engineers are at work prospecting at a mica mine which has been discovered at Kouchibouguac, in Kent County, and they are said to be well pleased with the developments.

The contract has been awarded for laying a special water main from the Marsh Bridge to the site of the new sugar refinery, so that it will have an independent supply. The cost of the work will be about $70,000.

◆

NEW COTTON COMPANY

The Canadian Connecticut Cotton Company has been incorporated at Ottawa with a capitalization of $1,750,000, and will shortly begin building operations at Sherbrooke, Que.

A number of Canadian and American financial men are behind the new venture. A bond issue of $350,000 will, it is said, be shortly offered locally and in United States centres. Messrs. McCuaig Brothers and Company will have charge of this phase of the promotion.

The company will manufacture cotton fabrics used in the manufacture of motor cars.

FEBRUARY RAILWAY RETURNS

Eight months' operations of the Canadian Pacific Railway during the current fiscal year, shows a gain of 18 per cent. in gross and of 12 per cent. in net earnings over the same period, 1911-1912. A somewhat large increase in working expenses, more than 21 per cent., which was due probably in large part to wage concessions within the year, is shown. The leading figures for the eight months compare as follows with those for the same period a year before:

	1912-13.	1911-12.	Increase.
Gross	$92,953,484	$78,827,054	$14,126,43
Exp.	61,639,889	50,890,082	10,749,80
Net	$31,313,595	$27,936,972	$ 3,376,62

The February earnings were, of course, affected by the fact that there was one day less in the month than a year ago. Notwithstanding this, gross earnings were 9 per cent ahead of last February's and net showed a gain of over 5½ per cent. The February figures make a good showing in comparison with those of January this year, gross being $67,078 larger despite the difference of three days in favo of January, and net greater by no less than $721,493. Gross and net earnings by months so far this year follows:—

	Gross.	Net.
July	$12,052,298	$4,448,176
August	12,251,715	4,717,925
September	11,570,733	4,250,303
October	13,060,397	5,060,887
November	12,362,666	4,258,139
December	12,219,278	4,305,719
January	9,679,607	1,662,373
February	9,747,685	2,383,866

The February statement follows:

	Feb., 1913.	July 1 to Feb. 28, 191
Gross earnings	$9,747,685	$92,953,48
Working expenses	7,227,01	61,639,88
Net profits	2,520,009	31,313,595

In February, 1912, the net profits were $2,383,866, and from July 1 to February 29, 1912, the net profits were $27,936,972. The gain in net profits is therefore, for February $136,202, and from July 1 to February 28, $3,376,623.

The Grand Trunk's February statement shows net profits as follows:—

Grand Trunk proper, increase	£11,000
Canada Atlantic, decrease	2,400
Grand Trunk Western, decrease	1,950
Grand Haven	Unchanged
Whole system, increase	11,650

One working day less.

The Canadian Northern Railway Company's comparisons for the month of February are as follows:—

	1913.	1912.	Inc.
Gross	$ 1,308,700	$ 1,203,400	$ 195,30
Expenses	1,130,200	965,800	164,40
Net	268,500	237,600	30,90
Mileage	4,297	3,981	31

The figures for the eight months ended February 28 are as follows:—

	1913.	1912.	Inc.
Gross	$15,152,000	$12,766,200	$2,385,80
Expenses	11,160,300	9,359,800	1,800,50
Net	3,991,700	3,406,400	585,3
Mileage	4,207	3,802 avg.	4

◆

CANADA'S TRADE HAS GROWN

The fiscal year for the Dominion of Canada clos on March 31st. For the first time in Canadian annals th trade has passed the billion dollar mark, an increase o some $150,000,000 for the year. The revenue for the yea will be around $170,000,000, an increase of about $35,000,0 The expenditure will be in the neighborhood of $154,000,000, leaving a probable surplus which Hon. W. T Whi will be able to announce in his budget of from fifteen twenty million dollars.

Mr White has not had to float a loan in the Britis market during the whole of the past year In addition h paid off last fall a loan of six million dollars. With the surplus inherited from Mr. Fielding he has also purchased fro ten to twelve millions of bonds of the Grand Trunk Pacific which would otherwise have had to be implemented by th government.

)CK RAISING IN SOUTHERN ALBERTA

ıd for Breeding Stock—Packing House Interests Making Many Purchases—Farmers Are Marketing Hay

(Special correspondence.)

Lethbridge, March 31st.

ıere is much competition going on throughout South-
berta in the purchasing of live stock for packing
interests.

ices of hogs have risen from around 6¾c. to 8c.
on the hoof, while sheep which had been bringing
l 6c. are now being purchased around 6¾c., and in
ase ½c. better is offered the producer if delivery is
at Calgary.

is week some 20 carloads of sheep and hogs have
purchased in Southern Alberta for immediate ship-
and contracts have been made for fully as many more
vith a view to shipment in a couple weeks or so as the
is finished off.

rmers are engaging more extensively in hog raising
ere is a large demand for pure bred stock for breed-

ttle are somewhat scarce but several small herds are
finished for marketing early in April.

y Facilities Required.

ippers are urging better facilities for handling of live
destined to Pacific coast points and will be well repre-
at the conference to be held in Calgary early in the
at which it is proposed to urge upon the railway com-
the adoption of new regulations which will provide
icker handling in transit, fewer stops for feeding and
ng, and the double decking of cars by the railway
ny. This is important to the producers of Southern
a in view of the fact that in most cases it will be de-
to ship one deck of hogs and the upper deck of
approximating 75 hogs and 100 sheep to a carload.
been compulsory upon the shipper to deck the cars,
entails an expense of $16 or $17 for lumber and labor,
e decks are torn out at destination and never return-
the railway company. It is claimed that in other por-
of the country and throughout the United States where
ents are made that the railways provide double deck
pon request, thus facilitating the profitable handling
products of the mixed farmers and this is what is de-
by the live stock men of Southern Alberta.

r. G. W. Field, buyer for the Vancouver-Prince Rupert
any, reports that his concern is making large pur-
of range cattle in Mexico and Texas for shipment to
ranch at Cayley because of the scarcity of cattle in
ortion of the province, and it is his opinion that cattle
still scarcer during the next five years. He remarks
progress of the live stock industry, practically hogs
eep, and looks forward to the establishment of a pack-
ant.

tatistics are Interesting.

he efforts of the associate boards of trade in conjunc-
vith the South Alberta hay growers' association to
hay inspection throughout the province, are meeting
ncouragement and the statistics that have been gather-
w the requirements for such inspection are somewhat
urprise even to those who are engaged in the business.
elops that there has been shipped from the Lethbridge
t, and to the south of it, through this city, in the
borhood of 1,500 tons of hay the past season, while the
er Creek district has shipped upwards of 10,000 tons
, more than 8,000 of this having been handled by the
Alberta hay growers' association. Among the largest
asers of recent date in south-east of British Columbia.
een the Crow's Nest Pass Coal Company, which bought
ns; the Crow's Nest Pass Lumber Company which
t 500 tons; the East Kootenay Lumber Company,
bought 400 tons; and the Canadian Pacific Railway,
bought 800 tons.

here is very little hay left in the Cardston country or
south of Lethbridge, and the price is steadily advanc-
Most of the hay that has been sold through the Crow's
Pass has brought around $14 per ton, which has made
istribution of a large sum of money among the farm-
f Southern Alberta.

he matter of securing hay inspection has been taken
ith the grain commissioners, and the department of
lture at Ottawa, and most encouraging reports have
received.

he associate boards of trade is preparing a suggested
of grades for hay and straw which will be submitted
commissioners at a future date with a view to their
dering the establishment of such grades and any others
vill be beneficial to the trade of Southern Alberta.

POWER DEVELOPMENT ON PACIFIC COAST

Western Canada Power Company's Extensions—Shipping Proposals—Vancouver May Raise Bond Interest

(Staff Correspondence.)

Vancouver, April 1st.

The Royal Mail Steam Packet Company, of London, is about to operate steamers to this coast, and Mr. E. J. M. Nash points out that in view of the increasingly large boats that will shortly find their way to the North Pacific preparation should be made to take care of them when repairs are needed. Mr. Nash considers that the need of a dock is imperative, and he has gone so far as to bring the matter before the Vancouver board of trade. Several dry-dock schemes have been discussed at different times, and have progressed so far as to get the support of the government at Ottawa. Evidently it was not considered that the time was ripe for the investment of a large amount of money in an undertaking of this kind, but now with the business offering it is not improbable that something will be done. It has to be considered, however, that money is not plentiful this year, and this may be a deterrent in the consummation of any project that might be proposed.

It is evident that large steamers are to be placed on the Pacific trade routes by the Royal Mail Line, for Mr. Nash states that double-deck piers will be necessary which are equipped with winches and other devices for the more rapid loading and unloading of the boats. This new type of pier is used in New York, and it has been found that it greatly shortens the stay of big ships in port. Mr. Nash has spent some time getting expert opinion on trade matters, and believes that a large portion of the surplus products of Canada can be exported to Europe via Vancouver. The service will be both by way of the Panama and the Suez.

Preparation for Shipment of Grain.

Dr. Magill, head of the grain commission, has been saying things which have called forth a protest from principals of the grain exchange. He said that little had been done in the way of diverting grain through this port, and that those who wanted the wheat to come this way would have to get busy. Mr. J. E. Hall, president of the grain exchange, replied that the exchange had looked into the matters mentioned by Dr. Magill some time ago. Portland might be a competitor for the traffic, but the grain men are confident that Vancouver can hold its own. The object is to provide cargoes for ships both ways, so that there will be an inducement for them to load at Canadian ports. Wheat has been shipped already under very handicapping conditions, and it is expected once that facilities are installed that this port will soon have a wheat shipping business, both to the Orient and to Europe. The commission, during their stay here, visited points on Burrard Inlet and along the Fraser River to examine possible sites for elevators.

Power Development in British Columbia.

The fact that three millions of dollars are to be expended by the Western Canada Power Company in development indicates large schemes. The company has agreed to supply 40,000 horse-power to the British Columbia Electric Railway Company, which is a considerable item, and besides it has in view the construction of the line between Vancouver and Mission Junction, which will be operated by electricity. This will be a subsidiary company. It is rather odd that the British Columbia Electric should now come to the Western Canada Power Company for power after it having once refused the Stave Lake proposition. The British Columbia Electric has spent an immense amount of money on its schemes at Lake Buntzen and Lake Coquitlam, and even now has not enough power for its necessities, although it was at first thought it would have an abundance. The Western Canada Power Company is steadily coming to the fore, but since it began to assume dimensions the British Columbia Electric has got busy and is extending its lines wherever possible to get first crack at the territory.

To effect an advantageous sale, the five million dollars of four per cent. bonds, approved by Vancouver ratepayers at the first of the year, will be resubmitted at a higher rate of interest. It is expected to put the by-laws before the people in July next.

At the same time it is not improbable that the city will also put up for approval the proposition to purchase areas in the Seymour Creek watershed. This purchase has been discussed before, and it is regarded as absolutely essential that the city get complete control of the whole watershed to protect its water supply. It is figured out that if the private owners are bought out, the government will grant its holdings, and altogether a very large area will be secured at really a nominal figure.

Branches of the Canadian Bank of Commerce have been opened at Comox, B.C., under the supervision of the manager of the Cumberland, B.C., branch, and at Peace River Crossing, Alta., under the management of Mr. Allan McKenzie.

Montreal harbor commissioners are to spend $2,000,000 on improvements this year.

SUTHERLAND, SASK.

We wish to call attention in this issue to an offering of Debentures of exceptional value, namely, that of Two Hundred Thousand Dollars at 5% of the Town of Sutherland, Saskatchewan.

Sutherland is an incorporated Town with a population of 1,500 people at a conservative estimate, immediately adjoining the City of Saskatoon to the East. The nearest point of the limits of the Town to the West being about one mile from Saskatoon City Post Office.

Sutherland is, in fact, the Saskatoon Terminal of the Canadian Pacific Railway, on their main line from Winnipeg to Edmonton, Saskatoon to Brandon, Regina and Moose Jaw.

Sutherland is the Head Quarters of the Canadian Pacific Railway for Districts Numbers Two and Three Saskatchewan Division, and is the largest Divisional Point between Winnipeg and Edmonton.

Sutherland has a Canadian Pacific Railway Pay Roll at the present time of over Fifty Thousand Dollars per month.

There are, including Engineers, Firemen, Conductors, Brakemen, and Shopmen, between 450, and 500 men working in the local Shops and Yards.

Sutherland is the Headquarters of the Building and Bridges, Mechanical, Car, and other Departments of the Canadian Pacific Railway.

Sutherland has twenty-eight miles of Track, shortly to be much increased, a Twenty-Car Stock Yard, Ice House with a capacity of 2,000-ton, Sixteen Stall Round House, Machine Shops and Car Repair Tracks.

Sutherland is only Three-Quarters of a Mile from the Saskatchewan Provincial University and Experimental Farm Buildings, 1,333 Acres of the best of land are absorbed by the above institutions, a great part of which forms the South-West Boundary of the Town. Over Three Million Dollars have been spent to date, on the above Buildings and Grounds, and before they are completed, it is estimated that over Ten Millions will be spent. These institutions are planned for the eventual accommodation of Five Thousand Students. Of great value to Sutherland, is the fact, that the new City Hospital, costing over Three Hundred Thousand Dollars, is being placed on the University campus, bringing this valuable asset also, within Three-Quarters of a Mile and easy reach of the Town.

Sutherland has the Dominion Forestry Reserve, comprising 320 Acres of Land located with 160 Acres of it, within the Town limits.

Improvements forecasted for this year, will total Five Hundred Thousand Dollars, including the present issue of Debentures.

Appropriations have already been sanctioned, for the expenditure immediately, of Fifty Thousand Dollars by the Canadian Pacific Railway, mainly for a Freight Shed and construction of Trackage in the local Yards, and it is known positively, that the Railway authorities intend double-tracking from Sutherland into Saskatoon, this year if possible.

The Dominion Government have appropriated in their last estimates, Thirty Thousand Dollars, for work on the Forest Reserve this year.

The Royal Bank of Canada have also purchased a valuable site, and intend erecting a substantial Building for their use at an early date.

The Saskatoon School Board, in whose district Sutherland is located, are just completing a magnificent brick School at a cost of One Hundred and Twenty Thousand Dollars.

At the present time, certain Financial Agents of Saskatoon are dealing with the City Council for the construction of an extension of the Street Railway to Sutherland, and have actually placed securities to the amount of Fifty Thousand Dollars for the construction of the line as an unreserved Gift. This is expected to be done this year.

Certain industrial enterprises will commence the erection of their plants at an early date. The Provincial Government have material now on the ground to install a local telephone system and exchange.

Last Year's assessment totalled $1,835,255, and this year will be well over Two Million Dollars.

The present Debenture Debt is the insignificant total of Five Thousand Four Hundred Dollars, none of which is in arrears.

By the Financial Statement appended, it will be seen there is a Surplus credit to the Town of $16,452.38 on December 31st, 1912.

There is every evidence that large investors are only waiting for the utilities to be provided, to force the pace for Sutherland, and put it in the front ranks of any Division of the Saskatoon Area. This issue of Debentures is absolutely Gilt Edged. It is a virgin field for investment of unequalled quality and will bear the strictest investigation Advertisement).

SQUARE TIMBER SHINGLES AND LATHS

Exports to Great Britain—What the Provinces Produced —No Laths Produced in Manitoba

Since 1877 the square timber trade of Canada has been declining on account of the increasing scarcity of clear timber of large enough dimensions for squaring. The export of 34,847 tons in 1911 is a decrease of 9 per cent. from 1910, due to the great decrease in white pine.

Ever since 1868, when the maximum quantity of white pine was exported, the amount has steadily decreased, but this material has always headed the list.

In 1911 the quantity of birch exported increased by 5,562 tons and exceeded the quantity of white pine, putting birch at the head of the list. The quantity of oak and red pine also increased, while elm and ash decreased. Maple was not exported in this form in 1911.

The average price of square timber was reduced from $25.95 to $21.99, the three leading kinds of wood decreasing in price.

Out of the total of 34,847 tons exported, about 33,716 tons (almost 97 per cent.) were shipped to Great Britain and 632 tons (about 2 per cent.) to the United States.

British Columbia Cut Half of Total.

The shingle cut in Canada in 1911 showed a decrease of 7 per cent. from 1910. This decrease is evident in the two leading provinces, British Columbia and Quebec, which together cut almost 70 per cent. of the total production. British Columbia cut almost half of the total, as it did in 1910. The decrease in cut in this province amounted to 7 per cent. Quebec, cutting one-fifth of the total, decreased its production by 32 per cent. New Brunswick's cut increased by 60 per cent., exceeding Ontario's production, and putting New Brunswick third on the list. Ontario's shingle cut decreased by about 14 per cent., according to the returns compiled by Mr. R. G. Lewis of the Dominion forestry branch.

The cut increased in Nova Scotia and the increase in Prince Edward Island and Manitoba moved each of these provinces up one place on the list. The decrease in Saskatchewan and Alberta caused these provinces to drop one place on the list.

The general price of shingles increased by 11 cents a thousand in 1911, following slight decreases in 1910 and 1909. The most expensive shingles were made in Saskatchewan at $2.25 per thousand and the cheapest in Prince Edward Island at $1.25.

The United States in 1910 manufactured over 12,000,000,000 shingles, or six and a half times as many as Canada in that year.

An Increase in Lath Production.

The lath production in Canada in 1911 increased by 13 per cent. from 1910. This increase was caused by the increase in Ontario and British Columbia, which cut over half the total amount.

The lath cut in Ontario increased by 7 per cent. over 1910, Ontario thus retaining her place at the head of the list for Canada. New Brunswick's production decreased by less than one tenth of one per cent. and this province retained second place. British Columbia increased by 45 per cent. and Quebec decreased by 11 per cent.; consequently these two provinces exchanged places on the list. The cut in Nova Scotia and Alberta almost doubled during the year and Prince Edward Island also increased its production. Saskatchewan, reporting for the first time since 1909, took sixth place on the list. Manitoba did not report any lath produced in 1911

The average price of lath remained the same as in 1910, changing but little in any province. Laths were most expensive in Alberta at $3.47, and cheapest in British Columbia at $1.84.

In 1910 the United States manufactured over 3,000,000,000 lath, or four times as many as Canada in the same year

◆

BANK STAFF CHANGES.

The following changes have taken place on the staff of the Imperial Bank of Canada:—Mr. James Walker, formerly manager Kenora branch, has been appointed assistant manager at Vancouver; Mr. D. G. Roy, manager Listowel branch, has been appointed manager at Kenora; Mr. A. F B. Murray, manager Fonthill branch, has been appointed manager at Listowel; and Mr. F. A. Black, accountant at Fergus branch, has been appointed manager at Fonthill, Ont.

CANADA'S NEWLY FORMED COMPANIES

clude Several Large Corporations — Foxes Still Attract Attention—Capital for Mining

Companies have been incorporated in Canada this week headquarters in eight provinces. Their total capitaliza- amounts to $22,253,000 the number of companies being ty-seven the largest ones being:

Company.	Capital.
Fensom Elevator Company, Toronto	$3,500,000
lerton Gold Mines, Toronto	3,000,000
nlan and Robertson, Montreal	2,000,000
r Addison Mines, Toronto	2,000,000
adian Connecticut Cotton Mills, Sherbrooke	1,750,000
rtgage and Investment Corporation of Medicine Hat, Medicine Hat	1,500,000

Grouping the new concerns according to provinces in ch the head offices are situated, we have the following re- s:—

Province.	No. of Companies.	Capitalization.
ish Columbia	24	$ 1,685,000
ario	22	10,920,000
erta	19	2,785,000
bec	11	4,759,000
Brunswick	5	944,000
nitoba	4	910,000
nce Edward Island	1	150,000
katchewan	1	100,000
Total	87	$22,253,000

The following is a list of charters granted during the t week in Canada. The head office of each company is ated in the town or city mentioned at the beginning of h paragraph. The persons named are provisional direc- s:—

Carstairs, Alta.—Hays and Company, $210,000.

Berlin, Ont.—Young Women's Christian Association of lin.

New Westminster, B.C.—Fraser Valley Motor Company, ,000.

Grand Forks, B.C.—Grand Forks Garage Company, ,000.

Myrnam, Alta.—Ukrainian Farmers' Trading Company, ,000.

Yale County, B.C.—North Kamloops Syndicate, $160,000, al estate).

Fort George, B.C.—Rock Lakes Water and Power Com- y, $100,000.

Alberni, B.C.—Alberni Advocate Publishing and Printing mpany, $15,000.

Sackville, N.B.—Tantramar Black Foxes, $200,000. F. Tingley, R. Duncan, E. M. Copp.

Three Rivers, Que.—Enterprise Realty, $50,000. lton, H. T. Ham, L. J. N. Page.

Moncton, N.B.—E. A. Fryers and Company, $5,000. P. Fryers, A. H. Fryers, J. E. Fryers.

St. Ulric de la Riviere Blanche, Que.—Roy Company, ,000. J. E. Roy, J. B. Roy, C. Roy.

Fort William, Ont.—Rex Amusement Company, $40,000. Ross, H. L. Palmer, J. C. Matheson.

Amherstburg, Ont.—Bar Point Land Company, $75,000. G. Pitts, E. J. LeHeup, A. Burrows.

St. John, N.B.—John Kimball and Son, $40,000. G. A. mball, J. H. Kimball, Mrs. E. Kimball.

Bothwell, Ont.—Bothwell Manufacturing Company, $10,- . G. Mahler, J. C. Dent, H. Brewer.

Canora, Sask.—Canadian-American Egg Company, $100,- . S. Korbin, C. R. Graham, E. L. Hayes.

St. Boniface, Man.—Progress Construction Company, 50,000. F. Deniset, T. Bockstael, M. Deleeuw.

St. Tite, Que.—Compagnie D. Rouleau and Fils, $99,000, awmills), D. Rouleau, E. Rouleau, M. Rouleau.

Dunnville, Ont.—Independent Natural Gas Company, 00,000. F. R. Lalor, J. A. Burns, W. J. Aikens.

Sherbrooke, Que.—Canadian Connecticut Cotton Mills, ,750,000. F. G. Bush, G. R. Drennan, M. J. O'Brien.

Albert, N.B.—Lumsden Mining Company, $499,000. G. Prescott, I. C. Prescott, W. A. McPherson, Hopewell.

Port Elgin, N.B.—Westmoreland Black Foxes, $200,000. Magee, C. H. Read, Port Elgin; A. B. Copp, Sackville.

Wiarton, Ont.—Northern Tire and Rubber Company, $160,000. T. A. Fleming, C. S. Fenton, A. G. Roberts, Cleveland.

Prince Edward Island.—Smith Silver Black Fox Company, $150,000. J. W. Carruthers, A. E. Smith, R. A. Taylor, Montague.

Tweed, Ont.—Pine Grove Cheese and Butter Company, $10,000. L. Cournoyer, F. Meraw, N. Lajoie, Hungerford Township.

St. Cyrille de Normandin, Que.—Compagnie des Eaux Electriques de St. Cyrille de Normandin, $40,000. N. Trottier, J. Dufour, C. Dufour.

Hamilton, Ont.—Miller Construction Company, $40,000. R. W. Miller, A. Weeks, G. Weeks. Edgewater, $40,000, (real estate). F. D. Gage, J. G. Gauld, G. E. Goodale.

London, Ont.—Finch Fashens, $500,000. W. A. Finch, W. E. Watson, H. Adams. E. Leonard and Sons, $600,000, (machinery). G. S. Gibbons, F. F. Harper, E. I. Leonard.

Calgary, Alta.—Victor Clay Products, $50,000. Alberta Washington Investment Company, $50,000. Victor's Confectionery, $5,000. Calgary Oil Syndicate, $100,000. Montana Investors, $350,000.

Medicine Hat, Alta.—Riverdale Realty, $50,000. Mortgage and Investment Corporation of Medicine Hat, $1,500,000. Alberta Bottling and Extract Manufacturing Company, $20,000. Gillies, $30,000. Burnside, $135,000. Clifton Heights, $120,000.

Winnipeg Man.—British Canadian Investments, $500,000. H. R. Drummond-Hay, J. P. Crepeau, W. J. Chalk. Canadian Building Corporation, $100,000. J. T. Whitlaw, C. H. McFayden, A. W. Allum. Shepley Construction Company, $60,000. L. H. Shepley, I. E. Shepley, E. Loftus.

Edmonton, Alta.—Lancashire-Alberta Investment Corporation, $50,000. Standard Securities, $25,000. News Company, $20,000. Stucco-Ornamental Company, $10,000. Dominion Ballast Injecting Machine Company, $10,000. McLaughlin Automobile Sales and Garage Company, $50,000.

Victoria, B.C.—British Columbia Mexico Company, $250,000, (tea planters). Forager Transportation Company, $10,000. Wightman Company, $25,000, (brokers and builders). Cascade Transportation Company, $10,000. Alliance Fishing Company, $50,000. Benson Land Company, $10,000.

Montreal, Que.—Compagnie de Mecanique Forestiere Agricole et Industrielle, $200,000. L. P. Renaud, L. Grenier, G. S. De Ber. Realty Agencies and Contracting Company, $20,000. A. H. Duff, W. A. Merill, H. E. Walker. St. Larence Parks, $50,000. A. E. Harvey, C. H. Stephens, G. S. Gittleson. Anglo-Canadian Bond Corporation, $500,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. Quinlan and Robertson, $2,000,000, (builders). R. Taschereau, T. Rinfret, J. E. Billette. F. Schnaufer, $200,000, (tanners). L. A. David, L. J. M. Dugas, E. C. Baker.

Vancouver, B.C.—Chamberlain-Downey Company, $40,000, (importers). Pacific Coast Land Company, $30,000. Graham Island Company, $50,000, (agents). Grenville Channel Fish and Cold Storage Company, $250,000. Standard Finance Corporation of Canada, $60,000. Rourke, McDonald and Moncrieff, $100,000, (builders). Peace River Townsites Company, $50,000. Fraser Valley Townsites, $10,000. Gas Purifier, $50,000. C. E. McKeen Shoe Stores, $100,000. Conservative Investment Company, $250,000. Foreign Investors, $10,000. E. and J. Patterson Company, $20,000, (drygoods).

Toronto, Ont.—Florica Mining and Milling Company, $400,000. J. P. MacGregor, A. E. Wilson, M. Ballea. Kerr-Addison Mines, $2,000,000. W. Hancock, H. S. Tracy, A. H. Nicholson. Millerton Gold Mines, $3,000,000. J. B. Holden, G. A. Grover, J. Y. Murdoch. William Marshall, $40,000. W. Marshall, G. P. Reid, J. Jennings. Central Collection Agency, $10,000. A. J. Thomson, R. H. Parmenter, W. S. Morlock. Toronto Helmet and Cap Company, $40,000. W. A. Proudfoot, A. A. Macdonald, E. E. McColm. Beaver Brass Manufacturing Company, $40,000. F. L. Burton, E. H. Edwards, H. P. Edwards. Sims Postal Supply Company, $40,000. J. G. Smith, N. Sinclair, S. Watson. Bassano Land and Building Company, $75,000. W. R. Wadsworth, W. J. Tubman, Miss I. Rouse. Otis-Fensom Elevator Company, $3,500,000. G. H. Sedgewick, G. E. McCann, A. E. Langman.

◆

The number of directors of the International Light and Power Company, Limited, has been increased from five to fifteen.

The name of the Abitibi Pulp and Paper Mills, Limited, has been changed to that of Abitibi Lands and Forests, Limited.

Canadian plants of the Kelsey Wheel Company and Detroit Steel Products Company will be established in Windsor within a short time.

MINERAL PRODUCTS OF COMMERCIAL VALUE

Building Materials — Gas and Petroleum — Minor Substances

The building trade was brisk in the cities and towns of Ontario, and there was an increased output of construction materials as compared with 1911, notably in brick and stone, also a small increase in Portland cement. Lime showed a falling off. The beautiful marbles afforded by the quarries at Bancroft are coming into use for decorative purposes, especially in public buildings. Trap rock is also quarried in Hastings county and used in the making of good roads near Toronto and elsewhere. The whole production of building materials amounted in value to $8,641,369, according to the latest returns of Provincial Bureau of Mines.

Petroleum and Natural Gas.

The yield of petroleum again shows a decline, the quantity raised from the wells of Lambton and Kent counties being 8,432,730 imperial gallons as against 10,102,081 gallons in 1911. Natural gas shows an increase, the output in 1912 having a value of $2,267,897 as compared with $2,186,762 the previous year.

There is a long list of mineral substances produced in Ontario, none of them of prime importance, yet contributing to the aggregate output, and constituting the basis of considerable industries. Among these are corundum, which shows an increased production in 1912 of $86,054; graphite, increase $28,584; feldspar, decrease $27,194; gypsum, increase $17,711; iron pyrites, decrease $47,763; mica, decrease $6,424; pottery, increase $1,945; quartz, increase $115,171; salt, increase $19,416, and talc, increase $5,393. In most cases the raw material is abundant and could easily respond to a much larger demand.

Shareholders' Dividends, etc.

The profits derived from the mineral industry of Ontario are considerable. Taking the province as a whole, dividends to shareholders in 1912 would approximate 14 or 15 million dollars. They were obtained principally from the silver ores of Cobalt and the nickel-copper mines of Sudbury, but were contributed to also by the building materials, oil, natural gas, salt, feldspar, talc and other substances raised principally in eastern and south-western Ontario.

◆

MANITOBA'S ISSUE WAS SUCCESSFUL

The Union Bank of Canada offered to investors in London four hundred thousand pounds of Manitoba Government 4½ per cent. registered stock. The issue was a pronounced success and was quickly over-subscribed. The price was 102, and the yield is 4.41 per cent.

◆

HAMILTON SELLS BONDS

Hamilton has disposed of an issue of $435,000 4½ per cent. debentures.

Messrs. N. W. Harris, Boston, having purchased $267,000; Messrs. Wood, Gundy, Toronto, $118,000 and Messrs. G. A. Stimson and Company, Toronto, $50,000.

◆

WORKMEN'S COMPENSATION IN ONTARIO

Some of the salient features in the draft bill on workmen's compensation, prepared by the commissioner Sir William Meredith, and laid on the table before the Ontario Legislature this week follow:—

Necessary expenses for burial of the dead workmen, not exceeding $75.

Where the sole dependent is a widow or invalided husband, $20 per month.

Where the dependents are a widow or invalided husband and one or more children, the monthly payments are to be $20, with $5 additional for each child up to the age of 16 years, the total not to exceed $40 per month.

Where the dependents are children, the monthly payments are to be $10 per month for each child under 16 years, total payments not to exceed $40.

Where the workman is under the age of 21 years and is killed, his parents are to receive $20 per month up to the time when he would have been 21 years of age, when the payment shall cease.

In the case of permanent disability or death the amount of compensation is graded up to 55 per cent. of the salary for the last couple of years, and in case of partial disability the amount may be graded down to $20.

The Canadian Manufacturers' Association will oppose the bill.

CANADIAN GENERAL ELECTRIC COMPANY SAID TO BE PURCHASER

Monetary Times Office,
Montreal, April 3.

The belief is expressed at Montreal that the Canadian General Electric may purchase the entire plant of the Allis-Chalmers-Bullock, Limited. The shareholders of the latter company have been called to a special meeting to be held on April 14th to consider a proposal which will be made to them for the purchase of the entire property and plant of the company.

Up to the present it is not possible to find out the particulars of the offer which has been made to the Allis-Chalmers-Bullock people. It will be remembered, however, that an announcement was made some time ago concerning an arrangement which had been reached between the two concerns and by which each was to manufacture a portion of the lines made and sold by the Canadian General Electric, the idea being apparently that in this manner the operation of the companies could be carried on more economically and the sale of the goods and their distribution be conducted at a lower cost. Although the announcements concerning this arrangement contained a number of details, there was no evidence of finality in it, so that it was not surprising that denials of some nature shortly appeared.

There is little doubt, however, that relations were at that time established between the two companies and that these relationships are now to be altered by the amalgamation of the two concerns—or rather by the purchase of the Allis-Chalmers by the Canadian General Electric. The former company has now been established here a dozen years or more. It owns a well-equipped and modern plant at a convenient point along the banks of the Lachine Canal a few miles west of the city.

◆

ST. LAWRENCE FLOUR MILLS, LIMITED

Monetary Times Office,
Montreal, April 3.

The announcement is made that the St. Lawrence Flour Mills, Limited, has passed the dividend on its preference stock.

This company was formed a few years ago, it being assumed that the financial promotion was being carried out by Sir Rodolphe Forget, M.P. Sir Rodolphe had previously made an attempt to purchase control of the stock of the Lake of the Woods Milling Company. It was thought that Sir Rodolphe was desirous of obtaining control of the company for the purpose of bringing about a merger with the Ogilvie Flour Mills, Limited. When, later, the formation of the St. Lawrence Flour Mills, Limited, was announced, with Sir Rodolphe, presumably, as its financial head, it was thought that he had in view a further extension of his plans. In this connection, also, was announced the resignation from the Ogilvie Flour Mills Company, of Lieutenant-Colonel A. E. Labelle and Mr. T. Williamson, the former to become managing director and the latter to become secretary-treasurer. The board consists of these two names, the latter being also vice-president, together with Sir Rodolphe and Mr. C. J. Fleet. Mr. G. A. Grier is president

The capital is $525,000 of 7 per cent cumulative preferred shares, $1,200,000 of common, and $300,000 bonds, and it is stated the dividend is passed in order to permit of the company accumulating a surplus. The milling business has not been as profitable since the company began operations as it was previously.

◆

Mr. J. Dodds, self-confessed originator of at least 92 fires in the city of Winnipeg and St. Boniface, has been sentenced by Magistrate MacDonald at the central police court to fifteen years' penal servitude on each of ten charges of arson, terms to run concurrently.

The owners of the Donaldson line of steamships operating between Glasgow and Canadian ports have registered themselves as a limited liability company with a capital of £200,000 in £1 shares. The registration embodies an agreement between members of the Donaldson family, the firm of Donaldson Brothers, and R. M. Maclay, to carry on the company as a business for owning ships and managing steamship lines. The first directors who are to number not less than three or more than seven are Messrs. W. C. Donaldson, C. Donaldson, W. B. Donaldson, and N. P. Donaldson. This is of interest to Canadians in view of the rumor that the Grand Trunk Railway had acquired this line of steamships.

LEGAL NOTICES

HENRY HOPE & SONS OF CANADA, LIMITED.

3LIC Notice is hereby given that under the First Part of chap-
ter 79 of the Revised Statutes of Canada, 1906, known as "The
panies Act," letters patent have been issued under the Seal of
Secretary of State of Canada, bearing date the 4th day of
h, 1913, incorporating Henry Donald Hope, of the City of
ingham, in that part of Great Britain and Ireland called Eng-
manufacturer; Alexander Liddell Young, manager, and James
o Sinclair and Thomas Edward Aikenhead, gentlemen, of the
of Toronto, in the Province of Ontario; and David McGill, of
ity of Montreal, in the Province of Quebec, gentleman, for the
ving purposes, viz.:—(a) To carry on the business of manu-
rers of and dealers in steel window sashes, door and window
nents, fanlight opening gear, leaded lights, stained glass, glass
ows, glass doors and glass roofing; window and door locks
asteners, door knobs and latches and all manner of door and
w fittings; cast lead, cast iron and other metal rainwater
and accessories, and all manner of contractors' and builders'
es and material; (b) To carry on any other business, whether
facturing or otherwise, capable of being conveniently carried
connection with its business or calculated directly or indi-
to enhance the value of or render profitable any of the com-
s property or rights; (c) To acquire or undertake the whole
y part of the business, property and liabilities of any person
npany carrying on any business which the company is auth-
to carry on or possessed of property suitable for the pur-
of the company; (d) To apply for, purchase or otherwise
e any patents, licenses, concessions and the like, conferring
exclusive or non-exclusive or limited right to use or any
or other information as to any invention which may seem
le of being used for any of the purposes of the company or
quisition of which may seem calculated directly or indirectly
nefit the company, and to use, exercise, develop or grant
es in respect of or otherwise turn to account the property,
or information so acquired; (e) To enter into partnership
o any arrangement for sharing of profits, union of interest,
eration, joint adventure, reciprocal concession or otherwise
any person or company carrying on or engaged in or about
ry on or engage in any business or transaction which the
ny is authorized to carry on or engage in, or any business
nsaction capable of being conducted so as to directly or in-
y benefit the company; to lend money to, guarantee the
cts of or otherwise assist any such person or company, and
e or otherwise acquire shares and securities of any such
ny, and to sell, hold, re-issue with or without guarantee, or
vise deal with the same; (f) To take or otherwise acquire
old shares in any other company having objects altogether
part similar to those of the company or carrying on any
ss capable of being conducted so as directly or indirectly
efit the company; (g) To enter into any arrangements with
thorities, municipal, local or otherwise, that may seem con-
to the company's objects, or any of them, and to obtain
any such authority any rights, privileges and concessions
the company may think it desirable to obtain and to carry
xercise and comply with any such arrangements, rights,
ges and concessions; (h) To establish and support or aid in
tablishment or support of associations, institutions, funds,
and conveniences calculated to benefit employees or ex-
yees of the company, or its predecessors in business, or the
lants or connections of such persons, and to grant pensions
llowances, and to make payments towards insurance, and
oscribe or guarantee money for charitable or benevolent
s, or for any exhibition or for any public, general or useful
; (i) To promote any company or companies for the pur-
f acquiring or taking over all or any of the property and
ies of the company, or for any other purpose which may
directly or indirectly calculated to benefit the company; (j)
rchase, take on lease or in exchange, hire or otherwise ac-
any personal property and any rights or privileges which
mpany may think necessary or convenient for the purposes
business and in particular any machinery, plant and stock-
le; (k) To construct, improve, maintain, manage, carry out
trol any roads and ways, tramways, branches or sidings on
owned or controlled by the company, bridges, reservoirs,
es, manufactories, warehouses, electric works, shops, stores
ther works and conveniences which may seem calculated
y or indirectly to advance the company's interests and to
oute to, subsidize or otherwise assist or take part in the
uction, improvement, maintenance, working, management,
g out or control thereof; (l) To lend money to customers
hers having dealings with the company, and to guarantee
rformance of contracts by any such persons; (m) To draw,
accept, endorse, execute and issue promissory notes, bills
hange, bills of lading, warrants and other negotiable or
rable instruments; (n) To sell or dispose of the undertaking
company or any part thereof for such consideration as the
ny may think fit, and in particular for shares, debentures
rities of any other company having objects altogether or in
imilar to those of the company, if authorized so to do by
te of a majority in number present or represented by proxy
eneral meeting duly called for considering the matter and
not less than two-thirds of the issued capital stock of the
ny; (o) To adopt such means of making known the pro-
of the company as may seem expedient and in particular by
sing in the press, by circulars, by purchase and exhibition
ks of art or interest, by publication of books and periodicals
granting prizes, rewards and donations; (p) To sell, im-
manage, develop, exchange, lease, dispose of, turn to ac-
or otherwise deal with all or any part of the property and
of the company; (q) To do all or any of the above things
things authorized by the letters patent or supplementary
patent as principals, agents, contractors, trustees or other-
nd either alone or in conjunction with others; (r) To do all
hings as are incidental or conducive to the attainment of
ove objects. The operations of the company to be carried
oughout the Dominion of Canada and elsewhere by the
of "Henry Hope & Sons of Canada, Limited," with a capital
of two hundred and forty thousand dollars, divided into 2,400
of one hundred dollars each, and the chief place of business
said company to be at the City of Toronto, in the Province
rio.

ted at the office of the Secretary of State of Canada, this
y of March, 1913.

THOMAS MULVEY,
Under-Secretary of State.

CORLEY, WILKIE & DUFF,
Solicitors for Henry Hope & Sons of Canada, Limited.

INTERNATIONAL LIGHT AND POWER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 25th day of February, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To underwrite, subscribe for, purchase or otherwise acquire and hold either as principals or agent, and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign or otherwise dispose of or deal in the bonds or debentures, stocks, shares or other securities of any government or municipal or school corporation or of any bank or of any other duly incorporated company or companies or corporation or corporations; (b) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and power to develop therefrom any power, electrical or other energy, and to use the same in connection with their business, and to transmit the same, and sell, lease or dispose of lands or interests therein or power, and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant, and to sell and dispose of electric, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances, and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purpose of the company; (e) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (g) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (h) To issue and allot, as fully paid up, shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (i) To draw, make, accept, endorse, discount and execute promissory notes, bills of exchange, warrants and other negotiable or transferable instruments; (j) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (k) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (l) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (p) To amalgamate with any other company having objects similar to those of this company; (q) To distribute among the shareholders of the company, in kind, any property of the company and in particular any shares, debentures or securities belonging to the company or which the company may have power to dispose of; (r) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (s) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "International Light and Power Company, Limited," with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 4th day of March, 1913.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

SOVEREIGN COTTON MILLS, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 19th day of March, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in all kinds of cotton, woollen, linen and other goods, cloths, yarns, and materials and all by-products thereof and to build, acquire, erect, maintain and operate all kinds of mills, dye houses, print works, bleacheries and other buildings and plant in connection with any part of the company's business or undertaking; (b) To acquire and operate cotton plantations and interests therein and generally to carry on the business of a cotton planter; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and power and to develop therefrom any power, electrical or other energy and to use the same in connection with their business and to transmit the same, and to sell, lease or dispose of lands or interest therein or power and to enter into working arrangement with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power, provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purposes of the company; (e) To construct, maintain, alter, make, work and operate on the property of the company and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other work and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats, or shares or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry docks and terminals, and for such purposes generally to carry on the business of shipbuilding, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminal company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To purchase or otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To issue and allot as fully paid-up shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (o) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (p) To procure the company to be registered and recognized in any foreign country and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (q) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (r) To amalgamate with any other company having objects similar to those of this company; (s) To distribute among the shareholders of the company in kind any property of the company and in particular any shares, debentures or securities belonging to the company, or which the company may have power to dispose of; (t) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking; (u) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Sovereign Cotton Mills, Limited," with a capital stock of six million dollars, divided into 60,000 shares of one hundred dolla
each, and the chief place of business of the said company to be at th
city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 20th da
of March, 1913.

THOMAS MULVEY,
Under-Secretary of State.

such corporation, and to guarantee the performance of contracts by a
such corporation, or by any person or persons with whom the company m
have business relations; (j) To lease, sell or otherwise dispose of t
undertaking of the company or any part thereof for such consideration
the company may deem proper and in particular for shares, debentures
securities of any company having objects in whole or in part similar
those of this company; (k) To acquire, hold, sell, assign or otherwise di
pose of shares in the capital stock, bonds, debentures or other securiti
of any other corporation or corporations carrying on a business in who
or in part of a similar nature to that of this company, notwithstanding t
provisions of section 44 of the Companies Act; (l) To acquire, hold, leas
sell, assign, grant licenses in respect of or otherwise dispose of patent
patent rights, licenses and privileges, inventions, all improvements a
processes, trade marks and trade names relating to or useful in conne
tion with any business of the company, and to pay for the same either
cash or in shares of the company, or part in cash and part in shares
the company; (m) To pay for any business, right, franchise or proper
acquired by the company by full paid-up shares of the capital stock
the company, or otherwise howsoever; (n) To consolidate or amalgama
with any other company having objects similar in whole or in part to tho
of this company; (o) To enter into partnership or into any arrangement f
sharing of profits or union of interest with any person or company carryi
on or engaged in any business or transaction which the company
authorized to carry on or engage in, or germane thereto, and to ma
advances to, guarantee the contracts of, or otherwise assist any su
person or company, and to take or otherwise acquire shares and securiti
of any such company, notwithstanding the provisions of section 44 of t
said Act, and to sell, hold or otherwise deal with the same; (p) To
all acts and exercise all powers and carry on all business incidental
the due carrying out of the objects to which the company is incorporate
and necessary to enable the company to profitably carry on its underta
ings. The operations of the company to be carried on throughout the D
minion of Canada and elsewhere by the name of "Canadian Ice Machi
Company, Limited," with a capital stock of seventy-five thousand dollar
divided into 750 shares of one hundred dollars each, and the chief pla
of business of the said company to be at the city of Toronto, in t
Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 28th d
of February, 1913.

(Signed) THOMAS MULVEY,
Under-Secretary of State.

WHITE & BUCHANAN,
Solicitors for the Applicants.

In a recent circular sent by the Western Canada Fi
Underwriters' Association to their Calgary agents, a fl
surcharge of 25 cents on all published rates excepting dwe
lings unexposed by mercantile risks, in the district boun
ed on the north and east by the Bow River and on the we
by the Elbow River, has been authorized. The reason gi
for this step is the serious nature of the present situatio
governing the water supply in the east portion of the cit
and the consequent lack of adequate protection from fire

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Grandview, Man.—Until April 15th for $16,350 20-year 5 per cent. debentures. Wm. Dickie, secretary-treasurer.

North Vancouver, B.C.—Nine by-laws of a total value of over half a million dollars were passed by the electorate.

Elmsthorpe R.M. No. 100, Sask.—Until April 20th, for $12,000 6 per cent. 20-year general improvement debentures. Thomas H. Clay, secretary-treasurer, Avonlea.

Clinton, Ont.—Until April 11th for $25,000 5 per cent. 25-year electric light debentures. D. L. Macpherson, treasurer. (Official advertisement appears on another page).

Sutherland, Sask.—Until April 24th for $200,000 5 per cent. 20 and 30-year debentures, S. Appleby, secretary-treasurer. (Official advertisement appears on another page).

Grass Lake Rural Municipality No. 381, Sask.—Until April 7th for $10,000 20-year 5 per cent. general improvement debentures. J. T. Roper, secretary-treasurer, Salvador, Sask.

Thorold, Ont.—Until April 18th for $15,000 5 per cent. 20-year consolidated debentures, and $9,527.37 5 per cent. 10-year local improvement debentures. D. J. C. Munro, treasurer.

Herbert, Sask.—Until April 15th for $7,850 fire hall and fire apparatus, and $1,150 local improvement debentures, repayable in 15 years; interest 6 per cent. J. E. Unruh, secretary-treasurer.

Newmarket, Ont.—Application will be made to the Ontario Legislature at its present session for an act to validate and confirm a by-law authorizing the town to borrow $7,660 for sidewalks.

Weston, Ont.—Until April 12th for $10,000 5 per cent. 10-year waterworks, and $40,000 4½ per cent. 30-year sewerage debentures. J. H. Taylor, clerk. (Official advertisement appears on another page).

Hazeldean S.D. No. 105, Man.—On April 5th the ratepayers will vote on a by-law to issue $2,000 debentures for school purposes. D. L. Livingstone, secretary-treasurer, Winchester Municipality, Deloraine.

Blairmore, Alta.—Offering of the following debentures at 90: $15,000 6 per cent. 20-year waterworks extension debentures. C. E. F. Hiscocks, secretary-treasurer. (Official advertisement appears on another page).

Woodstock, Ont.—Until April 16th for $37,800 5 per cent. 30-year school and collegiate debentures; $1,629.79 5 per cent. 30-year waterworks debentures; and $7,000 4½ per cent. 30-year consolidating debentures. John Morrison, city clerk.

Lacombe, Alta.—Until May 1st for $6,500 5 per cent. 15-year skating and curling rink, and $7,135.50 6 per cent. 20-year local improvement debentures. E. J. Tett, secretary-treasurer. (Official advertisement appears on another page).

St. Clements Rural Municipality, Man.—Until April 15th for $12,000 4 per cent. 30-year highways improvement debentures, guaranteed by the Manitoba Government. Thomas Bunn, secretary-treasurer. (Official advertisement appears on another page).

South Vancouver, B.C.—A special by-law for the borrowing of $575,000 for the improvements of the streets was read and approved by the council. The money is to be borrowed for fifty years at 5 per cent. Other by-laws read a first time were: Waterworks loan, for borrowing $130,000; sidewalks, $30,000; fire hall sites and police, $85,000; hospital and equipment, $35,000, and school loan, $450,000. Last year's by-laws were all amended to allow of the raising of the rate of interest from 4½ per cent. to 5 per cent.

◆

The name of the Canadian Klondyke Mining Company, Limited, has been changed to Yukon Exploration, Limited.

The capital stock of the Moose Jaw and Montreal Investment Company, Limited, has been increased from $60,000 to $150,000, such increase consisting of 900 shares of $100 each.

MUNICIPALITIES REQUIRE MONEY

Regina May Issue Consolidated Stock—Four Per Ce Bonds—Maritime Provinces Are Developing

Regina's municipal financing plans include a proposal issue a new form of security.

This security is a consolidated stock, which it is said find a more ready market in financial centres than the deb tures whose place it is arranged to take. The debentu come in denominations of $1,000 each, while the consolida stock can be split up in smaller amounts, as small, if nec sary, as $5. This fact will make Regina securities m easily sold on a market where people of small capital are lo ing for permanent investment which is safe.

The stock will carry the same interest and run the sa term of years as the debentures voted by the burgesses, only difference being, perhaps, that all the debentures, un the several money by-laws, will be grouped together as c and the stock issued on the consolidated total.

The principal argument urged in favor of its adoptio Regina is that it will enable Regina to sell her securities i wider market which will include both the banking inter and the smaller British investor.

Re Four Per Cents.

"The day of four per cent. bonds is past," a Vancou city official recently stated discussing the bond market sit tion.

It is understood that a representative of the Brit financial firm of Brown, Shipley and Company, will sho visit Vancouver and while in Vancouver he will confer with civic authorities upon the question of bond issues, and it be possible that the city will arrange through him for flotation of the debentures authorized by the passage of 000,000 worth of by-laws at the beginning of the year. its charter rights the city can pay as high as 6 per cent. interest, it is said, although some doubt has been expres as to the power of the council to raise the interest rate on issue already authorized under by-law.

Growth of Towns in Maritime Provinces.

The following borrowing bills have been introduced the Nova Scotia legislature:—

Town of Digby, $8,000. Interest rate 5 per cent.
Town of New Glasgow, $118,000. Interest rate 5 per ce
Town of Truro, $44,985. Interest rate 5 per cent.

The proceeds of most of the proposed debentures are be used in building permanent roads and sidewalks, constru ing sewerage and water systems, and building schoolhous. With the rapid growth of such towns as New Glasgow a Amherst, especially towards the suburbs, it is evident t large and increasing expenditures will have to be made meet the demands of the residents for the above mentio services. It is likely, therefore, that several more munic bond issues will be made.

Battleford, Sask., has disposed of $25,000 6 per c bonds to, Messrs. Wood, Gundy, Toronto and given the sa firm a 30 day option on the remaining $75,000 of the issu

Five bids were received for the $15,000 5½ per cent. year road improvement debentures of Mariposa Rural Mu cipality No. 350, Sask. All the offers, with the exception the Flood Land Company, Regina, were from Toronto b firms. The award was made to the Flood Land Company

◆

DEBENTURES AWARDED

Prince Rupert, B.C.—$90,491 to Messrs. Terry, Brig and Slayton, Toledo, Ohio.

Battleford, Sask.—$25,000 6 per cent., to Messrs. Wo Gundy and Company, Toronto.

Mariposa R.M., Sask. $15,000 5½ 20 instalments. Flood Land Company, Regina.

Welland, Ont.—$75,000 5 per cent. 30 years; $45,00 per cent. 30 years; $17,480 5 per cent. 10 years; $12 5 per cent. 10 years, to Messrs. Spitzer, Rorick and C pany, Toledo, Ohio.

ANADIAN PACIFIC RAILWAY'S FINANCING AND THE MONETARY SITUATION

t was noted, in connection with the February bank ement, that the increase of $8,500,000 in the de its elsewhere than in Canada served to enable the ks to avoid reporting a large net decrease of their osits in that month. Furthermore, it was noted t this increase of outside deposits occurred nearly gether in case of the Bank of Montreal. So the inence was drawn that the increase of deposits took ce chiefly in the books of the London branch of the k of Montreal and that it was due to the re pt by the Canadian Pacific Railway Company of first instalment of $21,000,000 on its recent issue of stock.

As the increase of the deposits outside Canada in bruary did extremely useful service in bringing ut a slight improvement in the ratio of available erve to net liability, shown by the banking institu ns of this country, it will be worth while to coner whether it is reasonable to expect that the posin of the banks will be similarly strengthened when railway company receives the remaining instalnts, one of which is due on the 14th of this month. st of all, it will be interesting to refer to the Canian Pacific Railway's stock issue of $18,000,000 in 12 in order to see what effect, if any, was produced the bank position. The 1912 issue was at a premium 50 per cent., so the total amount received was $27,-0,000—$5,400,000 on each of the instalment dates. in the case of the 1913 issue, the instalments fell e in February, April, June, August and October.

On referring to the 1912 bank returns it is seen that February the deposits outside Canada increased ,300,000; in April they increased about $1,000,000; in June they increased $4,200,000; in August they increased $300,000, and in October they decreased $3,400,000. The payments to the Canadian Pacific appear to have influenced the bank returns in 1912, especially in February and June. As about 85 or 90 per cent. of the company's stock is supposed to be held abroad, the amount paid into the Bank of Montreal, London and New York, by the stockholders resident abroad would be about $4,800,000 on each instalment date. Of course the Canadian banks in London would also be receiving proceeds of other security issues; and their deposits would be subject to deduction on occasions from causes entirely apart from the Canadian Pacific Railway transactions here referred to. Those other movements of funds would serve to obscure or offset the effects of the Canadian Pacific payments.

But this year each instalment payable to the big railway company is of commanding size—$21,000,000—and unless the company makes haste to disburse the funds or to transfer them to Canada, the balance of deposits outside the Dominion is likely to be swollen considerably at the end of April, June, August and October. At each instalment date, the stockholders resident in Europe and the United States are required to pay to the company's bankers about $18,000,000. With conditions in Canada as at present the arrival or receipt every two months of such a large amount of funds from outside must prove very welcome indeed. Although the funds pass in the first instance into the coffers of the Bank of Montreal, they do not stay there permanently. The London branch of the bank transfers them to Canada, via New York; the funds next figure in the railway company's accounts at Montreal, Winnipeg, Calgary, Vancouver, and from those resting-places they are scattered far and wide over the country. Much of the money will go in the ordinary course to settle the claims of the contractors who are engaged on the company's works. These contractors have their accounts with various banks: and in most cases they carry on their operations by means of bank loans. Payments to them by the company, therefore, serve to reduce their indebtedness to the banks, and in that way the monetary stringency may be slightly alleviated.

Probably there is no record in Canadian history of any single operation in securities resulting in bringing into the country so large an amount of new money. It is to be remembered, however, that of the total proceeds of this issue, something over $30,000.000 will be retained in London to retire bonds maturing shortly. But allowing for that there will be some $60,000.000 new money coming into the country from this one source within a period of eight months. It would be quite possible to throw this vast sum into Canada's monetary system in such a manner as to do harm. For example, it is generally conceded that the monetary stringency, through which the country has been passing, indicates that credit has been stretched perhaps unduly, and that there has been too much speculation in some directions. The cure or correction is already in operation. What is needed is a period of restraint, or abstention from speculation or excessive borrowing. The bankers are advising the business men to go slowly and carefully, to keep their lines of credit well within control, and to postpone extensions of plant or of business activity.

Well, if through the sudden injection of a large amount of new funds, which will only be at the disposal of the banks for a short time, the monetary position should get abnormally easy, speculators and business men might be tempted to strike out boldly—to their own danger and to the peril of the country. However, the executive heads of the railway company are probably well aware of the responsibility thus resting on them. And the bankers are not likely to give much encouragement to those of their customers who wish to plunge. Perhaps the new funds, or a considerable part thereof will be kept in London or New York until the occasions for expending them arrive. This influx of money, regulated and controlled as the bankers are likely to regulate and control it, and taken with other receipts of capital from abroad, should offer a reasonable assurance that Canada's commerce and trade in 1913 will proceed prosperously and satisfactorily.

THE FINANCIAL INDICATOR

During January, February and March the prosperity of the Dominion has shown no diminution.

Conditions of a generally favorable character have prevailed from coast to coast. World-wide factors have been felt and have influenced the situation somewhat, as the stringency which has existed in the financial centres of the world has done. High interest rates and slow collections have been particularly noticeable, as well as a lack of interest in speculative enterprises. Among the main financial indications can be taken the bank clearings and other statistics of Toronto and Montreal. The bank clearings were as follows:

Toronto.

	1913.	1912.
January	$196,761,436	$157,827,099
February	162,899,405	147,595,624
March	171,305,591	157,906,947

Montreal.

January	$247,912,102	$219,256,570
February	210,727,399	189,650,913
March	207,856,733	195,780,541

The number of bank branches opened and closed during the first quarter of 1913 and of 1912 is as follows:

	1913		1912.	
	Opened.	Closed.	Opened.	Clo
January	34	5	20	
February	29	16	19	
March	25	6	14	

The state of the investment situation is revealed the following table showing the stocks and bonds on the Toronto and Montreal exchanges during first three months of this year compared with th sold during the same period of last year. The sale stock were:

Toronto.

	1913	1
	Shares.	Sha
January	111,771	69.
February	69,506	69.
March	76,235	53.

Montreal.

	Shares	Sha
January	157,574	204.
February	171,852	144.
March	255,346	141.

Bond sales for the first quarter of 1913 and 1 were:

Toronto.

	1913	19
January	$ 57,000	$141.
February	123,000	101.
March	180,600	191.

Montreal.

January	$553,843	$463.
February	413,260	340.
March	901,700	805.

Railway earnings are also indicative of progress expansion.

The following tables give the gross railway ea ings:

Canadian Pacific Railway.

	1913	1912	Incre
January	$9,519,000	$7,201,000	$2,318.
February	9,526,000	8,743,000	783
March	10,965,000	10,389,000	576.

Grand Trunk Railway.

	1913	1912	Increa
January	$4,048,248	$3,422,286	$625.
February	3,763,463	3,259,943	503.
March	4,678,681	4,076,230	602.

Canadian Northern Railway.

	1913	1912	Incre
January	$1,513,400	$1,228,100	$285.
February	1,308,700	1,203,400	195.
March	1,685,900	1,572,700	113.

London continues to be Canada's banker. The lic loans for the first quarter of each year since 1 are appended below:

1905	$8,787,287
1906	3,345,000
1907	1,595,000
1908	10,328,700
1909	9,756,172
1910	10,466,657
1911	8,063,088
1912	10,157,190
1913	9,603,524

Quebec is the only province which has made a p lic loan during the quarter, this being to the extent £400,600. Canada's municipal financing for the three months of the year has been as follows:

Issues in London amounted to £3,663,900 as pared with £1,817,923 during the first quarter of 191

Municipal bond sales in Canada as compiled by T Monetary Times for the first quarter of the year, ed with those of the corresponding period in 1912, as follows:

	1913	1912
uary	$1.337,500	$2,133,531
ruary	1.038,806	2,596.378
rch	1,035,496	1,926,716
	$3,411,702	$6,656,625

oronto, Vancouver and Wetaskiwin bonds to the nt of $2.177,334 were disposed of to United States l firms, so that total municipal borrowings are as ows:

In London ($5 to £1)	$18,319.500
In Canada	3,411,702
In United States	2,177,334
	$23,908,536

the industrial world the outlook is encouraging. iness activity in all lines is at a normal rate of ease; industries are operating at capacity; the rails are ordering equipment largely. Company incorporation proceeds at a rapid rate, there being no less than 1,269 companies incorporated during January, February and March, their total capitalization amounting to $285,362,899.

Building construction is brisk, but western returns have not shown the proportions attained during last year. Agricultural conditions in Ontario and Western Canada are favorable, and a fair amount of ground is ready for seeding. Immigration is as satisfactory as in former years. The economic waste by fire is one that cannot be omitted from a financial indicator, and this is increasing in the Dominion as the following figures from The Monetary Times Record show:

	1913	1912
January	$3,913,385	$3,002,650
February	2,037,386	1.640,153
March	1,710,756	2,261,414

The second quarter of the year may be perhaps a more critical period, and a policy of caution and care is generally considered advisable.

PROOF OF AGE IN LIFE ASSURANCE

Experience of English Companies - Citizens of the Dominion Born in Many Foreign Lands

By R. W. Barton.

The question of compelling life assurance companies to it proof of age when issuing a policy is being warmly ted. It is of interest to note that at least one large pany in England has adopted the practice for some s. The result in this particular case has been on the e satisfactory, both to the company and to the policyers. A consideration of the difficulties the company from time to time had to deal with is, however, instruc- It also shows how serious any drastic legislation on subject would be for Canadian companies. In England pulsory registration of births has been in force since and was adopted in Scotland and Ireland some years . For about ten years after the act became law, how- , it was not strictly enforced and it has been found many persons born in England as late as 1845 in Scotland and Ireland as late as 1860 were not regis- l. This difficulty, of course, is a decreasing one. Given date of birth, a copy of the birth certificate of anyone stered under the act can be obtained at the chief regis- s office on payment of three shillings and seven pence.

Every applicant was therefore asked to obtain such a ficate, but if any strong objection was raised, rather press the point, the company obtained the certificate nselves at their own-cost. It was usually found that the ction arose from a disinclination on the part of the apnt to reveal the fact that he was illegitimate, or that the nt registering was unable to write. These facts being aled by the certificate. The father's name being omitted ne former case and the mark, instead of the signature, ne parent registering being shown in the latter. If a ficate of birth could not be obtained, the company had e courses open. A certificate of baptism, or an extract— factorily certified—from a family record of births, or, ng that, a statutory declaration by an older relative or ble person well acquainted with the facts, corroborating applicant's statement.

ossible if Law was in Force.

In the case of persons born in India, in the colonies, or oreign countries, the position was not so simple. It ld be stated here that there were not a large number of e cases, as the company did not desire to do business ide the British Isles. The cases written in this class also usually on lives of persons in the army, Navy and service and reliable evidence was soon obtainable. n time to time, however, no satisfactory evidence could btained at all. These cases were carefully gone into on merits and if any doubt was in the minds of the ofls, invariably declined. A difficulty also arose where a cy was required in a hurry—as security in a loan transon—and proof of age could not be immediately obtained. system here broke down. The policy was issued on an ertaking by the persons interested to furnish proof in onable time and a conspicuous endorsement was made he face of the policy to this effect. Very few policies so issued, but had the company had to deal with law, ead of voluntary practice, this relief could not have been granted. The case would either have to be declined or an extra premium charged. The practice, therefore, is not without difficulty and danger, even in a country where records are comparatively easy to obtain, and in an office where the great majority of lives assured were not only born in the country, but whose families for generations could be traced in the districts of their births.

From Many Nations.

These conditions do not exist in Canada. No compulsory registration of births has ever been ordered by the Dominion Each province acts for itself. The Ontario Act only came into force in 1869, and in the other provinces still later. Nor is there yet much evidence to show how long it was be- [illegible]

Probably, too, at least half of the lives written by Canadian companies are not born in Canada at all. Africa and the Indies, Asia and Europe, every continent and every country therein has sent us our population, and all these peoples may need life assurance. It must in many instances take months, it may well be more than a year, to obtain the proof needed. The fear that the law might later make it compulsory to dispense with proof of identity, say of a dead Chinaman, may make companies hesitate to write this nationality. Again, in some of the greatest Canadian companies more than half the policies written drop before the third year. Neither the assured nor the company should be put to any expense that can be avoided in these cases. It is the wish of the managers to popularize assurance in every way. Competition between companies impels them to give their clients the most liberal treatment, so that should an error in age, or any other disagreement arise, the parties interested can rely upon equitable treatment. No one would welcome proof of age at the time a policy is written more warmly than the managers, and they are prepared to go to trouble and expense to obtain it, but to make it compulsory is to bring hardship upon both applicants and companies.

Not an Essential.

The life assured should certainly be, and is, urged to prove his age in his lifetime. It may be that something more can be done in the future with regard to this than has been done in the past, and so far as this results, this discussion will have done good. Every policy issued should bear on its face in red ink a statement whether or not the age has been admitted by the company and every renewal receipt should bear some similar marking. The annual report might draw attention to the urgency of proving the age during the lifetime. In many ways the point can be emphasized. Drastic legislation, however, especially in life assurance, has so conspicuously failed in the past—the Armstrong Act in New York is a recent and a striking example—that we should do well to give publicity a chance. As was urged when the commission was sitting, which resulted in the act of 1910, a light in dark places is a more effective deterrent of crime than a policeman. Proof of age is certainly not an essential at the time a policy is written, and it is well said "In essentials let us have unity, in non-essentials individuality, and in all things charity."

BANKERS AND BANKING

Consideration of Currency Agricultural Loans — Protection of Depositors

Canada was growing so rapidly, said Mr. J. Henderson, vice-president of the Bank of Toronto, that circulation, which at present averaged $15 per head of the population, would have to be greatly increased, and it would be necessary for the banks to increase their capital.

On the general question of circulation, Mr. Henderson said: "I think it quite possible, if our country goes ahead rapidly, that the whole question of currency may come to be a subject of very serious consideration. We may have to reconsider the basis and the nature of it, if circulation conditions that do not exist now should be created; but until it becomes a serious question and difficulties emerge, this provision made in section 61 (for the establishment of gold reserves) is going to serve a very useful purpose in keeping us out of trouble."

Mr. J. A. M. Aikins raised the point of loss to Canada through Canadian notes being issued in other Dominions, to which Mr. Henderson answered that there would not be any hardships unless Canada was requiring the whole of the circulation.

Bank Profits Considered.

Mr. Henderson sought to correct the impression that bank profits were unduly high, and in this connection referred to the Bank of Toronto as a moderately large bank. Last year, he said, was fairly prosperous and loans were relatively small. The total gross profits shown on capitalization of five millions were $835,787, which on the average capital looked like 17 per cent. He showed, however, that in reality the gross profit was 14.57 per cent., and that the actual return on shareholders' money was 5.45 per cent. "I think," he said, "the banks have been foolish the way they have declared their profits as on the amount of capital rather than upon the amount of shareholders' funds."

Answering questions by Mr. D. C. Ross as to protection of depositors, Mr. Henderson said: "The only franchise the banks have in this business is the right of note issue. In return for that privilege we have made it a first charge upon assets. Instead of putting responsibility upon the minister of finance or upon the Canadian Bankers' Association, which has no powers, though in the minds of the people it has, would it not be better for people to make inquiries themselves as to the character of the men who conduct the bank?"

In regard to loans by banks to mining companies and to companies in which bank officers were interested, Mr. Henderson did not favor legislation, and pointed out that the shareholders had power to make their own regulations.

Loans and Landlords.

On the clause relating to loans to banks outside Canada, Mr. Henderson saw no objection but possible benefit by having call money in New York, where recall would not interfere with the business of the country.

On the clause relating to banks acting as landlords, Mr. Henderson laid it down that the more closely banks adhered to the requirements of the act the better. As a general rule the aim should be only to provide a suitable building for the bank's business.

Chairman Ames asked whether the buildings being erected in Montreal and Toronto were owned by the banks, or were there subsidiary companies, and had not the Bank of Toronto leased part of a building in Toronto.

Mr. Henderson could not answer on the first part of the question. As to the building in Toronto, he said that banks' solicitors had premises upstairs, and were the only outside tenants. He further said that it was wise to arrange for a commodious and well-situated building, and this was more difficult in large cities.

The Requirements of Farmers.

On the subject of loans to farmers on thrashed wheat, Mr. Henderson said if they wanted it they should have it, but he would hesitate to make such loans.

In regard to the amount of legal interest, Mr. Henderson said money was like any other commodity in finding its own level, and he argued that the rate must vary according to district and circumstances. The average rate of interest was, he found, [illegible] per cent. higher in the Prairie Provinces, but the average rate of expenses was also 2.58 per cent. higher. Farmers gladly pay eight or nine per cent. interest for mortgage loans, giving as security their farms to the extent of half rent, yet they made a grievance because after the loan company had got the best security, the bank, which trusted the farmer on his personal credit, charged over seven per cent.

Mr. H. N. Mackenzie, general manager of the Bank of British North America, stated that his bank for 70 years had had a shareholders' audit. It was not only bookkeeping that was inspected, but securities. He admitted that the auditors of his bank were appointed largely by directors ing upon shareholders' proxies.

Questioned by Mr. W. F. Maclean as to government spection of banks, Mr. Mackenzie thought it undesirable, cause it would leave the government exposed to recrimina every time there was trouble or failure. Government ins tion also would involve as large a staff as that of all banks put together.

It was possible, however, to devise a system of inspec that would deter fraud before it was committed, but he did think this system could be effective unless completely du cating the inspection system of the banks.

"Take a bank with 200 branches from the Yukon to West Indies. Could an inspection worth anything be m unless individual accounts were inspected up?" asked Mr. White.

Mr. Mackenzie replied there was a wide difference tween inspection and audit. The auditor did not go to branches, whereas the inspector did.

"Could not a government inspector have ascertained 24 hours that there was something wrong in the Farm Bank, judging from its return?", asked Mr. Maclean.

Mr. Mackenzie thought he would have done so.

In reply to Mr. Nickle, Mr. Mackenzie said the Eng system of audit by chartered accountants of high stand was in his opinion desirable. A government audit might as good or it might not. He could recall no failures from falcations at branches alone.

Answering Mr. Sharpe, the witness thought a fair i of the position of the bank would result from inspection the head office. In his bank, however, all the losses that occurred were at the branches. "We have had our fair sh of them," the witness admitted. "I would recommend system of audit by chartered accountants appointed by shareholders as preferable."

Tight Money Period.

Mr. Mackenzie admitted that money is rather tight. own directors had considered inviting depositors in Eng but had taken no action. At the same time an amount British capital had been brought to Canada. Mr. Macken thought it desirable to base circulation upon assets instead capital. If Dominion notes were increased against gold, circulation would not be materially augmented. He would recommend any system of increasing the Dominion no save upon gold deposits.

"Is there any need for it?" asked Mr. Ames.

"I should not say so.'

If the Banks of England and the United States did bu ness in Canada, it would increase the available funds of country, providing they brought in more than they took in deposits.

Mr. Mackenzie said that until lately the restriction o bank circulation to the extent of its capital had worked sa factorily. Some new provision must be made very shortl

Mr. W. F. Maclean wondered how the banks' credit-g powers might be increased.

"Well, we can't loan money till we get the money loan," replied the witness.

The point, however, which Mr. Maclean was making that banks might increase the credits if allowed, though th assets remained the same. Mr. Mackenzie was not enamo with the idea.

New York Loans.

Concerning call loans in New York, the witness said net revenue from this source did not exceed three per ce The market for this class of loan in Canada is very restrict

"What is the opposition to our Canadian banks receivi deposits in New York?" asked Mr. McCurdy.

"I fancy the objection must come from the Bankers' sociation of the state."

Mr. Mackenzie admitted that in some instances the Ba of British North America had charged as high as ten per ce In Dawson City twelve had been paid.

"What would be the result if you were held to the rate of seven per cent.?" asked Chairman Ames.

"We would have to close up several branches. "It unwise for a bank to lend too much to any one institut but I do not think it would be advisable to restrict banks' powers by legislation."

Did Not Believe in Small Local Banks.

Mr. James B. Forgan, president of the First Nat Bank of Chicago, in giving evidence before the banking commerce committee, said he did not believe in the form of a further system of local banks with small capital. could not, he believed, compete successfully against the banks.

"Small local banks," he remarked, "are usually organ and controlled by local borrowing interests. This lead borrowers lending the banks money to themselves and coming the judges of the limit of their own credit."

Mr. Forgan stated that the weaknesses of the bank system in the United States are attributable to the diffic ge number of small local banks experience in individually ntrolling and carrying their cash reserve. "A reasonable justment of the rights of all the interests involved," he d, "would be accomplished by permitting the banks to ue new stock on such terms as are fixed by the directors. would leave the fixing of the rates in the hands of the ectors as now."

Mr. Forgan did not believe the Government should have ything to do with the question of bank inspection. It would ve a tendency to shift the responsibility.

fficult To Start.

Mr. W. F. Maclean asked if there was not a money trust the United States.

"No," said Mr. Forgan. "I'll be honest with you, howr. I am supposed to belong to the trust."

Mr. J. G. Turiff asked if in order to prevent two or three nks controlling the financial business of Canada, it would be necessary to establish small banks.

Mr. Forgan stated that if amalgamation continued till it ched the danger mark, he could see the necessity for so ing. He believed, however, that it was difficult to start w banks in Canada. He did not believe that any system of ernal audit which could be organized could equal the innal system in force. He advised the Canadian government keep its hands off bank supervision or anything approach- it. The minister's suggestion for a shareholders' audit emed to be what was wanted.

He considered that the proposal to establish central gold serve agents to which banks may issue their notes in excess capital was a worse one. The proposal to tax circulation d money loaned in foreign countries was unwise.

Mr. Maclean asked if the American Government did not ve the situation in the United States in 1907.

"The Government was not worth a hill of beans," swered Mr. Forgan with refreshing frankness.

Mr. Maclean then referred to the fact that in the recent n on the Montreal District and Savings Bank, the Canadian vernment came to its assistance.

◆

LA ROSE CONSOLIDATED MINES, LIMITED

Monetary Times Office,
Montreal, April 10th.

The shares of the La Rose Consolidated showed a tenncy to sell down after the appearance of the annual report. hether this was an indication that the report was not condered favorable or not is hard to say. Other mining ocks, such as Hollinger, Jupiter, Pearl Lake, etc., were rather easier to-day, so that it might be that La Rose was ly acting in sympathy. The street is commenting on the ct that the ore reserves are showing a marked falling off. would almost seem from the report that no discoveries ving the effect of adding greatly to the reserves had been ade during 1912, the evidence of the following comparisons eing that the reserves were not added to or maintained but at they fell off rather more than one-half the production r the year:—

	1911.	1912.	Decrease.
re reserves, December 31, given in ounces ..	4,250,861	2,796,650	1,454,211
et value	[illegible]	[illegible]	[illegible]
roduction, in ounces...	3,691,797	2,816,597	875,200

Production profits, 1912, $1,023,142; surplus, $1,578,592; vidends paid, $936,642.

The surplus mentioned showed an increase of $27,171, vidends-paid showed an increase of $337,291. The profits r the year were only $50,513 less than the value of the ore serves remaining at the end of the year. The total of the e reserves and the surplus had a value of $2,662,247, or out 35 per cent. of the par value of the stock of the comany. The par value of the shares is $5 and the present arket price is $2.75.

There was a drop in the grade of the ore during the ar, the contents of the high-grade ore falling from 1,731 unces per ton to 1,307 ounces. Accompanying this was an crease in the cost of mining per ton, rising from 19.20 nts in 1911 to 25.93 cents in 1912. This would have been more serious matter had it not been for the fact that the rice of silver rose at the same time to 61.66 cents per ton. his rise of 8.11 cents in silver more than off-set the advance f 6.73 cents in the cost of mining.

The company was in a strong cast position at the end f the year, having at that time no less than $500,000 out n call.

The results of the year have justified the policy of mainaining the surplus, adopted by President McGibbon many onths ago. The only question now is as to what is to be one with the surplus It has been maintained for the purse of re-investment in some other mining property. As exlained in the report, no satisfactory property has yet been resented

ONTARIO'S ESTIMATES

Large Appropriation for Hydro-Electric Commission—Bridges and Roads—Additional Sources of Revenue

The total of the further estimates of the Ontario legislature tabled this week is $3,264,327.13, and in addition to those brought down a few weeks ago of $1,639,522 and the main estimates, which were introduced at the last session, total of estimated expenditure for 1913 will be $13,784,345.88.

The largest item in the supplementaries is $2,500,000 for the Hydro-electric Power Commission, which includes $150,000 for a new office building to be erected in the vicinity of the parliament buildings, which will contain offices, laboratories and testing equipment to carry on work that now is scattered in several places.

There is another large item of $95,000, representing a refund of timber dues to the Algoma Central Railway under an agreement dated December 7th, 1905.

Further appropriations are to be made to enable the immediate organization of the new judicial district of Timiskaming. The equipment of the registry office at Haileybury is to cost $3,500. The registry office itself will cost $8,000. The sum of $20,000 is to be voted for a new court house for the district of Rainy River, and $2,000 for a new registry office for the district of Kenora. A Hydro-electric underground service at the parliament buildings is to be installed at a cost of $1,200 and a fire alarm equipment for $3,500. New dormitories for the Deaf and Dumb Institution at Belleville and the Institution for the Blind at Brantford are to cost $20,000 each. Hydro-electric installation in the Ontario Agricultural College runs into $3,400.

For Bridges and Roads.

In the Public Works Department a sum of $132,900 is set aside for new bridges and repairs to existing bridges in the unorganized districts, and $337,432.42 for colonization roads, which make up a total for this branch of $470,332.42. The grant for colonization roads is somewhat less than that of last year, due more or less to the work being conducted by Mr. J. F. Whitson under the $5,000,000 appropriation, which will amount to about $1,000,000 this year. The colonization road work is organized under four headings: North Division, $150,592.55; West Division, $35,073.87; East Division, $100,766; Timiskaming, $51,902.37.

For charges on Crown lands there is an additional vote of $15,000; $4,000 of this is for the purchase of launches for forest reserve work, and $10,000 for investigation and purchase of lands, nursery work, replanting, labor, purchase of seeds and stock.

Under the charge administration of justice the Attorney-General receives an additional sum of $16,292.19. Of this amount $1,200 is for a police magistrate at Porcupine, and $4,000 additional for the maintenance of prisoners; $500 is to maintain a police magistrate at Matheson.

The additional amount required by the Department of Education is $5,967.

Among the miscellaneous items there are a number of gratuities. Dr. Helen MacMurchy gets $450 for a report on the feeble-minded, and a further amount of $5,000 is to be voted for enforcing the liquor act.

Supplementary Revenue Act.

On the motion to go into Committee of Supply on the further supplementary estimates Mr. Rowell pointed out that the apparent debt, with the $2,500,000 it was proposed to spend on the Hydro-electric, was $6,000,000. He would like to know where the Acting Provincial Treasurer proposed to get the money.

Hon. Mr. Lucas explained that the estimates for 1913 showed an increased expenditure of $437,902 as compared with last year. He intimated that a supplementary revenue act would be introduced by the government shortly. They were always on the lookout for additional sources of revenue, and proposed taxing interests which at present were not contributing their share to the province.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the week ended March 31st:—

	1913.	1912.		Increase or decrease
Canadian Pacific	[illegible]	[illegible]		$115,000
Grand Trunk ...	[illegible]	[illegible]		[illegible]
Canadian Northern	636,500	[illegible]		[illegible]
Temiskaming and Northern Ontario	36,209	42,482	—	6,273

The Quebec Bank, it is said, will open a number of new branches throughout the west during the coming months.

IN THE INSURANCE ARENA

President Sills Banquetted — Brandon and Winnipeg Underwriters—Japanese Insurance Act and Canadian Companies

Nearly three hundred members of the Life Underwriters Association of New York and their guests met recently to greet President Neil D. Sills and the executive committee of the National Association of Life Underwriters. The meeting was one of the best-attended and most enthusiastic which has been held in many months.

The chief speaker of the evening was President Neil D. Sills, who was most cordially received on being president to the audience. He stated that the association movement was entering on a new era of prosperity and expansion, that all over the country the benefits of association were more widely appreciated, and that the agents were getting closer together. The speaker pointed out that combative competition had been eliminated since the association work began, and that salesmanship, so far as life insurance was concerned, was on a higher plane than in any other line of business. A number of comparisons were made by Mr. Sills of the life insurance figures with well-known returns dealing with currency in circulation, the national debt, and the receipts of the government.

Insurance in New York State.

A publication including the financial returns of 374 insurance organizations is compiled from the sworn statements of the companies as rendered to the insurance department, has been issued by the State of New York Insurance Department. The aggregate assets of the various insurance organizations carried in the pamphlet are $4,476,028,552, the insurance in force $24,450,347,410.

Copies of these advance tables may be obtained by all persons interested upon application to the New York State Insurance Department at Albany.

Brandon and Winnipeg underwriters met recently at a debate. Resolved that the system of compulsory insurance in force in Great Britain would be beneficial to Canada, was the subject. The debate [illegible] a banquet given by the Brandon Life Underwriters' Association.

Two Canadian Companies in Japan.

The most important change embodied in the new Japanese insurance ordinance affecting the foreign life insurance companies, is the provision compelling the foreign companies to deposit Japanese securities or cash, to the extent of 60 per cent. of the legal reserves, on all business in force in Japan, as at December 31, 1912, reports Mr. G. A. Harris, Canadian trade commissioner at Yokohama.

As this ordinance was made retroactive, the initial deposit required from the foreign companies electing to continue business in Japan constitutes a very considerable sum.

There were at the close of the year 1911 four principal foreign life companies, including two Canadian Companies, their reserves totalling 11,960,000 yen. In addition to the above, a Chinese life insurance company, organized under Hong Kong charter, have also been doing business in Japan for about a year, and their reserves amount to yen 1,186,000.

The Sixty Per Cent. Basis of Reserves.

In arriving at the 60 per cent. basis of reserves required to be deposited, the Japanese Government made allowance for 40 per cent. of these reserves as constituting loans against policies. Credit for the yen 150,000, the amount of the deposit made under the old law, will be allowed in computing the amount of the reserves required by each life company.

Had to Cable Decision.

The managers of two Canadian companies, it is said, were compelled to submit to their head offices the principal features of the Act by cable, as their decision had to be given by February 1st, and upon such information as they could impart to their companies in this way, they at the last moment agreed to comply with the Act, but under protest.

Of the five foreign life companies doing business in Japan only one has withdrawn.

There are [illegible] foreign fire and marine insurance companies doing business in Japan. These companies are required to keep deposited in cash or Japanese securities three-fifths of the amount of their annual premium income on their Japanese business, but in no case shall the amount so deposited be less than yen 150,000.

In lieu of a cash deposit, the government will accept all Japanese [illegible] Government bonds at their face value, [illegible] and municipal bonds at 90 per cent. of their face value, debentures and shares in banks, and other approved industrial securities at 80 per cent. of their market value.

NORTHERN ATLANTIC SHIPPING

Location and Movements of Ice Along Routes to Reported—For Safety of Vessels—St. Lawrence Route

Hon. J. D. Hazen, (minister of marine and fisheries), plying to a question in the house of commons, remarked t the Imperial Board of Trade, had concluded arrangements reporting the location and the movements of ice along route of trans-Atlantic steamships during the spring mont This announcement is one of very great importance shipping interests. The Titanic disaster of last spring the subsequent inquiry respecting it made the desirability this step abundantly clear. For this purpose the Scotia w despatched on the 8th instant to latitude 44° north, longitu 60° west, with instructions to report on the way any ice and also to endeavor to note its southern limit. After havi done so, the Scotia will proceed to St. John, Newfoundla noting and reporting ice conditions met with. While at John, the Scotia will get into communication with all wirel stations on the Newfoundland, Labrador and Canadian coas and as accurately as possible ascertain existing conditions a the direction in which the ice has commenced to move. Fr St. John, the patrol boat will proceed to and report the sou ern limit of the drifting ice. Having located and reported t southern limit, the patrol will be northward to report i bergs or field ice along the coast of Newfoundland, and a as Hamilton inlet. From this point, a return will be ma locating the eastern and southern limit of the ice and co stantly advising in respect to the same.

Observance of Ice Near Routes.

The patrol is specially charged to be vigilant in th servance of ice nearing the steamship routes. The ch object of the expedition is to give warning to the steam lines of the probable quantity of ice that will be in the vic of the track, and to give them any information that will ass them to form a judgment as to the advisability of giving instructions for the greater safety of their vessels. On b the Scotia there are three scientists, the senior of whom w direct the movements of the vessel. They will take obser tions of the directions, velocity and depth of currents, tog with the temperature and salinity of the water. In additi meteorological observations of the upper air, including the vestigation of the currents and temperature, will als carefully taken. Acting in conjunction with the board trade, I have concluded an arrangement whereby all mess from the patrol boat will be forwarded to the signal offi Quebec and from there promptly furnished to all inter parties. In this way the shipping interests at all the river S Lawrence and Atlantic ports will be kept informed of the p vailing ice conditions.

All Shipping Interests Kept Informed.

To supplement the work done by the Scotia under direction of the board of trade, I have made arrangen whereby the Marine and Fisheries Department will, imm ately after the opening of navigation on the River Lawrence, despatch the C.G.S. Montcalm to patrol C strait, at the entrance to the gulf, from Sydney harbor to south coast of Newfoundland.

To Safeguard St. Lawrence Navigation.

The location and movements of the ice in this region w be reported and full information will be furnished daily, more frequently if found necessary, to the steamship co panies. I have also arranged that Professor H. T. Barnes, McGill University, who has, during the past several yea conducted experiments on one of the departmental steame shall be on board the Montcalm while it is engaged in this service in Cabot strait. By means of his invention, the mic thermometer, Professor Barnes has demonstrated the pos bility of determining the approach to ice by any ves equipped with his apparatus. Eager to avail myself of scheme that promises to further safeguard navigation to River St. Lawrence, I have directed that Professor Barn with a staff of assistants shall join the ship in order to furth demonstrate the utility of the invention and with a view to general adoption by shipping interests.

* * *

Owing to the advance made in the shipping freights the North Atlantic, a deputation from the wholesale dr section of the Toronto board of trade waited upon th mini of trade and commerce some time ago and impressed upon government the necessity of controlling ocean rates of fr This was done, said Mr. J. C. Douglas, the chairman, at annual meeting of the section, with a view to restraining rapacity of the shipping combine. The minister received deputation sympathetically, and the government has been co sidering the question.

LONDON'S FINANCING DURING MARCH

Total Issues Amounted to Over Seventy Million Dollars —Purposes for Which Capital is Used

The new issues of capital in March were much smaller han in the two previous months. Indeed, they were only a ittle larger than in March of last year when they were affectd by the uneasiness concerning the great coal strike. The amount raised was only about one-half as large as in March, 911. The total was nearly £14,000,000 against £12,500,000 ast year, nearly £27,000,000 in 1911 and over £27,000,000 in March, 1910. The greater portion of the borrowing was for governments, municipalities and railways. The issues for miscellaneous companies were small. Of course, the smallness of the amount raised was due to the delay in concluding peace in the Balkans and to the stringency of the international money markets. The large amount of new capital issued in anuary and February shouldered by the underwriters has lso to be taken into account. A reduction in the new issues n March was essential having regard to the overstocked condition of the investment market. How soon the existing spirit of caution will disappear no one can predict. If peace is quickly restored in the Balkans the investment market may esume its normal condition without much delay as most of he reasons for caution will then disappear. The financial ituation on the continent has, of course, to be taken into account, and this may tend to restrict the new issues of capital.

First Quarter's Total Was Large.

However, it is essential to note that the British public hows no signs of having lost its nerve. Notwithstanding the grave situation on the continent during the last six months here have been no evidences of distrust in this country. All hat has happened has been that for the last month or two the nvestment public has shown a desire to await the termination f the war before subscribing freely to new issues, opines The Statist. It is quite possible that when the war is over the public will be quite as willing as hitherto to find capital for all nterprises reasonably safe. Although the new issues in March have been small, for the first quarter of the year they ave been very large, having reached over £80,000,000 in comparison with less than £60,000,000 in the first quarter of last ear, £63,000,000 in the corresponding quarter of 1911, and £75,000,000 in the first three months of 1910. In this total of 913 is included the issue of new capital for the Canadian Pacific Railway, which will be paid up gradually during the ear. Having regard to the international political and nancial situation this market may well be proud of its ability to find £80,000,000 of new capital in the past three months, and sum of no less than £118,000,000 of capital in the six months in which the war in the Balkans has been fought to a nish and the public mind on the continent has been so eriously disturbed. The manner in which British financial houses and British investors have acted during the last six months show clearly that the characteristics which have so largely contributed to the wealth of this country are still rominent.

Purposes of Issues.

The purposes for which the new issues of capital have een made in March for the last three years are shown in the following statement:—

Description of Security.	1913.	1912.	1911.
Government	£2,940,000	£1,044,495	£7,500,000
Municipal	1,537,300	1,022,062	348,363
Railways	3,623,208	2,969,000	7,921,621

Total	13,798,393	12,385,034	26,831,766

Most of the money borrowed during M [illegible] the over-seas dominions. The capital supplied to Canada has been over £4,000,000, and to New South Wales about £3,000,000. The capital provided for foreign countries has reached £3,500,000, of which the greater part has been for Brazil and the United States. Out of the £80,000,000 of capital subscribed for the quarter nearly £43,000,000 has been for British possessions, £27,000,000 for foreign countries and £10,000,000 for the United Kingdom. The destination of the capital we have provided during the past month and quarter is shown by the statement presented below:—

	1913.	1912.	1911.
United Kingdom	£2,687,729	£2,144,750	£1,496,751

VALUE OF LIFE INSURANCE

VII.

How to Protect Capital in Land or Other Property

By C. A. Hastings.

How, in the hands of a reputable life office, a small sum of money, deposited annually, will increase, will prove astounding to those who will give a little thought and careful scrutiny to the subject. An intellectual reader can, if he will give thought to the matter, easily find out how a policy can be made to suit his own requirements. For instance, a Sinking Fund policy—issued by any first-class life office—in the case of even any successful land or any other company, let alone the unsuccessful, always proves a first-class investment.

Take mining companies, for example; most of them provide a sinking fund for some purpose or other, but, as we all know, there is a possibility of loss on all investments and it is common knowledge that no individual or syndicate can possibly obtain anything like the same benefits from that sinking fund as they can from an assurance company—the reasons are too obvious to recall here.

No Capital Depreciation.

Looking at the matter at its very worst, there is no doubt that there is no shadow of possibility of capital depreciating in a Sinking Fund policy issued by a first-class life office. The principal point is that the individual or syndicate who takes out such a policy makes his money do two things at the same time, namely:—

(1) Earn compound interest.

(2) Provide immediate and permanent protection.

So many look upon the divident they receive as revenue, and do not for one moment think that, unless the concern is taking adequate steps for depreciation of its principal assets, the dividend is nothing more nor less than returned capital.

Soundness of Protection Given.

The only way to treat it is to apply a proportion of the dividend for the annual premium of a Sinking Fund policy, which will guarantee that the capital does not melt away. Figure this out, and you will observe that the sum that each shareholder pays, in proportion to his holding, is a mere bagatelle, having regard to the absolute soundness of the protection required, which can be obtained by no other conceivable means.

"The more speculative the nature of the business, the more necessary the protection, and there is no excuse for any concern who neglects to take this precaution," is the sound advice of the Joint Stock Companies Journal.

The following articles in this series have already appeared:—

(1) March 1st.—How to become one's own master.

A license has been issued to the North Western Insurance Company, Limited, authorizing the company to transact the business of fire insurance in British Columbia. Messrs. Loewen, Harvey & Humble, Limited, Cotton Building, Vancouver, are the company's attorneys.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensic s, Dividends and Future Plans

Twin City Rapid Transit Company.—For the last ten days of March the earnings of the Twin City Rapid Transit Company were $229,903, an increase over the corresponding period last year of $21,328, or 10.23 per cent.

Richelieu and Ontario Navigation Company.—Four steamers of the Jacques [illegible] line will fly the Richelieu and Ontario pennant this year. "These four steamers are the only boats that have been purchased by the Richelieu and Ontario," said Mr. Carruthers.

Cape Breton Electric Company.—Total railway earnings of Cape Breton Electric Company, Limited, for seven days ending March 22, 1913, and for the corresponding days of preceding year are: 1913, $4,044.47; 1912, $3,894.38; increase, $150.09, or 3 8/10 per cent.

Thor Ironworks, Limited.—The Thor Ironworks, Limited, have been awarded the contract by the Dominion Government for the building of three scows for dredging purposes. The contracts awarded are for three scows to cost $18,500, the first two to be delivered in Quebec City by June 15.

Russell Motor Car Company.—Explanation of the recent rapid decline in the common stock of the Russell Motor Car Company was forthcoming, when after a meeting of the directorate it was announced that no further dividends would be declared on the common stock until the results for the full year ending July 31 are known. Dividends of 3½ per cent. already have been paid during the current year. The regular quarterly dividend on preferred stock at the rate of seven per cent. per annum was declared payable May 1.

Consumers' Gas Company.—Shareholders of the Consumers' Gas Company approved of the by-laws that were submitted to allow the company to dispose of new stock by calling for tenders, as well as by public auction. In reply to questions, President A. W. Austin assured the shareholders that opportunity would be given for small investors to take stock offered, although none might take less than ten shares in a block. Mr. Austin said that no issue was contemplated at the present time, owing to the unfavorable financial condition. Legislation will be sought to confirm the by-laws.

Dominion Manufacturers, Limited.—Mr. Lorne C. Webster has been elected the first president of Dominion Manufacturers, Limited, the new consolidation of the principal casket companies of Ontario and Quebec. The balance of the board is composed as follows:—Mr. W. Marshall, vice-president; and Messrs. F. W. Coles, London, Ont.; A. J. H. Eckardt, Toronto; J. S. Elliott, Prescott; H. L. Godin, Three Rivers; and F. J. Knox, of the Montreal Securities Company. The capitalization of the new company is $3,000,000, divided into $2,000,000 common and $1,000,000 preferred stock. The head office will be in Montreal.

Dalton Silver Black Fox Company.—The first general meeting of the Dalton Silver Black Fox Company, in which many people in the Maritime Provinces are interested, was held recently. The directors reported that options on the young of 1913 have been taken up to the extent of $265,000. A suggestion was made to increase the number of breeders in the ranch and breed more valuable animals than black foxes. Hon. Charles Dalton, president of the company, who had sold out his ranch, agreeing to deliver fifty pups this spring or forfeit $5,000 for each one short, said that almost that number had been born this season already.

International Coal and Coke Company.—The profits of the International Coal and Coke Company for the past year were $[illegible] compared with $[illegible] in 1911, during which latter period, however, the mines were closed for nearly eight months on account of the general mining strike in Southern Alberta. For the four years next preceding the profits ranged annually between $[illegible] and $[illegible]. Dividends were relinquished during 1912, $100,000 being appropriated instead toward strengthening reserves.

During the year current liabilities were reduced by almost $1[illegible], and the company thus put in a stronger financial position. The [illegible] now [illegible] under $[illegible], [illegible] of almost $[illegible] during the year.

Mr. A. C. Flumerfelt is president of the company, and Mr. R. W. Riddle, managing director.

United Drug Company.—The United Drug Comp has experienced a year of great expansion. The developm of the company's business throughout Canada is evide by the fact that there are now four hundred Rexall agen throughout the Dominion.

The new board of directors follows:—President, Mr J. J. Allan, of Allan and Cotton; vice-president, Mr. F. Davis, Toronto; second vice-president, Mr. W. F. Str g, London; directors, Messrs. J. S. McKeown, Belleville; K. Liggett, Boston; John Parker, Owen Sound; and Cha R. Wasson, New Brunswick.

The retiring president of the company, W. P. Ne who held office since the company's inauguration, was sented with a gold watch and chain by the shareholders his fellow-directors as a token of their esteem and reg d.

Consolidated Mining and Smelting Company.— Consolidated Mining and Smelting Company of Cana Limited, ore received at Trail smelter for week end March 28, and from July 1 to date, in tons:—

Company's Mines—	Week ended March 28.	July 1 to date.

Other Mines	1,708	62,231
Total	7,364	244,675

Porto Rico Railways Company.—Porto Rico Railw for 1912 showed a decrease in net earnings of $6,379, aggregate for the year being $373,404, as against $3 783 in 1911. The gross earnings for the year were $828,0 an increase of $79,282, but this was more than neutrali by the heavy operating expenses due to the contin drought and the consequent necessity of operating an au ary steam plant.

The company's new storage dam, which will be finis in August, will, it was pointed out by the president, Max Aitken, enable the company to cope with similar c ditions to those of last year in a more economical way.

After the payment of the 7 per cent. dividend on preferred, 4 per cent. on the common, and bond interest the year, a balance of $134,060 was carried forward to

The following were also appropriated: Contingen count, $25,919; written off property account, $65,000; $135,000 applied to depreciation reserve.

It is understood that about $500,000 will be expen by the company during the present year on capital acc

Illinois Traction Company.—The comparative statem of earnings and expenses of operating companies of Illi Traction Company during February follows:

	1913.	1912
Gross earnings:		
Interurban lines	$211,1[illegible].16	$21[illegible]
Electric lighting	1[illegible]2,032.24	142,5[illegible]
Steam heating	[illegible],40[illegible].18	[illegible]
City lines	15[illegible],[illegible]48.74	148,75[illegible]
Gas	[illegible]	[illegible]
Miscellaneous	[illegible]	11,3[illegible]
Total city properties	[illegible],404.[illegible]	[illegible]
Total gross earnings	[illegible]2,[illegible].90	5[illegible].55
Per cent. of increase over previous year	3.26	[illegible]
Expenses	[illegible]	332,48[illegible]
Taxes	[illegible].08	18,211
Total expenses and taxes	349,441.37	350,[illegible]
Net over expenses and taxes all companies	25[illegible],150.[illegible]	[illegible]
Per cent. of increase over previous year	8.[illegible]	[illegible]
General expense Illinois Traction	[illegible].47	4,04[illegible]
Net earnings	24[illegible].15	[illegible]

Canadian Northern Prairie Lands.—The net profi the Canadian Northern Prairie Lands in 1912 amounted $232,[illegible]. Of this sum $180,000 was absorbed in the ment of two half-yearly dividends at the rate of 12 per ce er annum, leaving the balance of $52,094 to be carried for- ard.

Added to the balance brought in of $370,905, the total t the credit of this account at the end of the year was 422,999.

The directors point out that now that a substantial cre- it balance has been accumulated and the interest revenue rom land sales already made, investment, etc., is sufficient o guarantee a dividend of 12 per cent. per annum, the ecessity no longer exists for disposing of the balance of ie company's lands at current prices.

The directors are of the opinion that farm lands must ontinue to improve in value, and it is their policy to con- erve the area still unsold and to make sales to only a limit- d extent where it appears to be of ultimate advantage to ie company.

The revenue from investments, loans, interest on de- erred instalments of land purchase money, etc., more than rovides for the regular dividends without in any way dis- urbing the net revenue from land sales.

During the past year 5,600 acres of land were disposed at an average price of $15.21 per acre, as against $13.17 the previous year, leaving a balance of land in hand of ,319 acres.

La Rose Consolidated Mines Company.—La Rose Con- lidated Mines Company's sixth annual report to December, 12, shows the production of silver for the year amount- to 2,316,597 ounces, compared with 3,691,797 unces in 1911. The net value of this production was $1,- 3,969.50, compared with $1,810,470, the value of the 1911 oduction.

The net profit for the 1912 production was $1,023,142.54.

Ore reserves on December 31st amounted to 2,796,650 unces, of an estimated net value of $1,083,655. Ore reserves ecember, 1911, amounted to 4,250,861, of an estimated net lue of $1,643,938.

The president, D. Lorne McGibbon, says the ques- on of investing the surplus funds in the acquisition of her mining enterprises has received the earnest considera- on of the board during the year just completed, but as yet opportunity has presented itself which, in the opinion of e board, was a proper investment for the company's funds d in the interests of the shareholders.

In 1912 the cost of production was 25.93c. per ounce, mpared with 19.20c. per ounce in 1911. The net selling ice in 1912 was 61.66c. per ounce contrasted with 53.55 nts the previous year. The market price of silver is now out 61¾ cents per ounce.

Mr. R. B. Watson, general manager, points out that e increase of 8.11 cents per ounce in the price received for lver was largely offset by the increase of 6.73 cents per nce in the cost of production.

The latter, he points out, is due to the fact that more velopment work was done than ever before, and that while e amount of ore produced was practically the same, the erage grade of the high grade ore dropped from 1,731 nces to 1,307 ounces per ton. The profit on the production s 58.35 per cent. of the gross value of the ore produced.

◆

The Otisse Mining Company, Limited, Toronto, are re- esting unrecorded holders of the company's shares to have eir stock registered in their own names, so that they may informed as to steps taken for resumption of mining erations, etc.

Debentures of the city of Sorel, Cartierville, and the hool municipality of Youville, in Quebec, bearing 5 per nt. interest are being offered by the bond house of Messrs. Cyr, Gonthier and Frigon, Montreal. Sorel is at the ad of the only inland water navigation between Montreal d New York. Cartierville has recently been incorporated a town. It is situated on the Island of Montreal, near e Canadian Northern Railway's model city. The school unicipality of Youville will, it is expected, be consolidated th the other Roman Catholic school municipalities of ontreal.

An interesting map, showing the waterpowers, minerals d transportation facilities within a radius of sixty miles of e city of Ottawa, has been issued by the Publicity and In- strial Bureau of the city of Ottawa, of which Mr. H. W. ker is commissioner. According to the map, there is own the low-water estimate of nearly 2,300,000 horse- wer within a radius of sixty miles of the city, of which ly 150,000 horse-power is developed. It furthermore shows at twelve steam lines radiate from Ottawa with two elec- c lines proposed, as are shown on the map. The water- wers, as shown on the map, indicate the horse-power avail- le and their location in respect of the city of Ottawa. e commissioner will be pleased to send a copy of this eful publication to any interested person.

TORONTO'S HYDRO-ELECTRIC PLANT

Commissioners Have Met Problems and Difficulties—City's Growth Makes Future Enlargement of Plant Necessary

After charging up $212,643.88 against interest on current operations, management and repairs, and providing for the meeting of the sinking fund, the net profits of the Toronto Hydro-Electric Commission for the year ending December 31, 1912, were $13,555.41. Together with this statement, which appears in the annual report, is one to the effect that next year the debt incurred last year in construction work will be wiped out, and there will undoubtedly be a decrease in the rates charged by the commission.

The gross earnings of the commission for the year were $726,763.55. The cost of the electric current, operation, management and repairs for the year amounted to $500,564.26, leaving a balance of $226,199.29. It is noticeable that the expenses and charges which have been defrayed out of the year's income include the cost of getting new business. The cost of advertising, canvassing and promoting new business was over $53,000. The commission preferred to follow the conservative course of charging the total expenditure for the year against the income for the year.

Conducted Under Share Capital.

The sinking fund accruing to the construction period ending December 31, 1911, and carried from that date as against future profits, amounts to $50,985.49. Only $37,430.08 of this is carried forward as an obligation against future earnings. The net earnings are continuing to improve, and this prompts the commission to make the statement in connection with the report that the surplus for 1913 should discharge the balance of the sinking fund and justify the reduction of the rates at least in 1914.

The report says: "It is perhaps worth noting that had the enterprise been conducted under share capital as an ordinary commercial corporation instead of under debenture capital subject to repayment, the provision that has been made out of the income for interest and sinking fund instalments, together with the surplus carried forward to next year (amounting to nearly $158,000), would have been available for dividend and would have permitted the payment of a dividend at the rate of over five per cent. for the whole year on the average capital of $3,000,000 employed during the year."

Estimated Cost of Completed Plant.

The estimated cost of the completed plant as finally decided upon by the commissioners was $4,500,000. Of this amount $3,734,911.33 was expended to the end of 1912, leaving an unexpended balance of over $765,000.

The number of meters increased in 1912 by 255 per cent., lamps 244 per cent., street lanterns 80 per cent., connected load 405 per cent., and the peak load 190 per cent. The commission calls attention to the fact that the rapid growth of the city will make necessary the enlargement of the plant and expansion in other ways commensurate with the acquisition of new lands by the city and the increase in the population. The original by-law provided for 13,000 services, and at present nearly 17,000 are established.

These results have been achieved by Toronto's electric commissioners in face of difficulties and problems of perplexing nature, which have been encountered during this period of arduous preliminary work, and reflects considerable credit on the commission and its chairman, Mr. P. W. Ellis and Mayor Hocken, together with the efficient staff gathered together. The auditing work in connection with the commission's report has been performed by the well-known firm of Messrs. John Mackay and Company, chartered accountants.

BANKERS' AND BROKERS' DIRECTORY

A publication of practical value and for everyday usage is Elliot's Bankers' and Brokers' Directory, containing as it does a directory of all coupons payable in Boston, New York, Philadelphia and several other cities. The transfer offices of stock certificates and registered bonds and a directory of bankers and brokers of Boston, New York, Philadelphia and Baltimore. This directory is issued in June and December, and monthly bulletins are supplied with it. Elliot's Bankers' and Brokers' Directory, $10. Arthur F. Elliot, New York.

◆

The head office of Dominion Manufacturers, Limited, has been changed from Toronto to Montreal.

The name of A. E. Rea & Company, Montreal, Limited, has been changed to Goodwins, Montreal, Limited.

The number of directors of the Canadian Rogers Company, Limited, has been increased from five to seven.

BRITISH COLUMBIA

Emissaries of Trade – Lumber Outlook is Good – Development in the North

(Staff correspondence.)

Vancouver, April 7th, 1913.

With two such prominent men as Hon. G. E. Foster and Mr. Richard Grigg investigating trade possibilities for Canada in countries bordering on the Pacific Ocean, results should be forthcoming. Hon. Mr. Foster is now in Australia, and after investigating conditions in the Antipodes will go to Japan, where he will be met by Mr. Grigg. Trade between Canada and Japan and between Canada and Australia and New Zealand is increasing. Bigger ships are being put on the run south, and shortly the big "Niagara" will be sounding her whistle in these waters. Australia offers particular advantages for trade, for it is producer of just what is wanted in this province, dairy products and tropical fruits. All this winter New Zealand butter has sold for three pounds for one dollar in Vancouver and the quality has been excellent. Local creamery butter was ten cents higher. British Columbia, though developing rapidly along certain lines, will not be producing much in an agricultural way for a long time yet.

Railways Need Producers.

The railway companies see the necessity of having producers along their routes, and it looks as if they will have to do most of the work of settlement. In the meantime, the needs of the province are increasing, and if reciprocal arrangements can be made between Canada and the Antipodes trade should greatly expand. It has been acknowledged that there are possibilities in trade with Japan, but about the only development that has taken place along this route has been because numbers of Japanese are located in British Columbia and have taken advantage of the opportunities in their home market. Once in a while hints of what might be done are heard and good work should be accomplished by Canada's representatives when they get into that field.

Lumbering and Land.

Indications are that this year will be even better for the lumber industry in British Columbia than last, at least as far as activity is concerned. Fees for timber royalties, etc., for the coast district alone amounted to $37,423 for March, while for the same month last year they were $24,088 for the whole of the province.

Mr. H. C. Waterfield, of the Kootenay district, states there are undoubtedly good opportunities for Englishmen in British Columbia at the present time. Mr. Waterfield points out, however, that the man who takes up life on a fruit ranch must be careful in buying, and after evading the many pitfalls he must work hard. Nothing should be taken for granted, and figures and statements should be verified by the intending purchaser. Mr. Waterfield concludes: "I venture to express my firm conviction that there is more profit to be made by fruit growing in British Columbia than by farming in England."

Prince Rupert's Possibilities.

Reports from the north are that Prince Rupert is steadily going ahead and that the city will have made a good start when through trains are run over the Grand Trunk Pacific next year. If anything should develop in the new gold diggings Prince Rupert will reap considerable benefit. Outside of the Hidden Creek proposition of the Granby Company and the prospects around Hazelton, mining is not particularly active, but there are probabilities other ways. At Portland Canal, progress is being made with the big tunnel, by the construction of which it is hoped to disclose rich mineral veins, but Stewart is very quiet. Last summer exploration was made in the Naas River valley by land seekers, and there are some excellent areas there adapted for agricultural purposes. The first heavy frost was in latter September, which shows that the mildness of the coast extends there. If the land is any good, it will not be long before speculators get their hands on it, even as they have secured all other good areas in the province.

◆

The Dominion government has announced that a branch of the receiver-general's department will be established in Regina within the near future. The assistant receiver-general will keep Dominion notes of all denominations here, sufficient to provide the needs of all the banking offices and branches in the province. Regina will also become a point of redemption and settlement, which means that all banks who have no branches in this province will have to appoint other banks in the city to pay their bills and to act as agents for them for clearing purposes.

REVENUE AND EXPENDITURE OF THE DOMINION

A total revenue of $165,528,137, and a total expenditu of $124,383,469 is revealed by the figures of the Finance D partment. This is not the complete statement, and thes totals will be considerably increased, especially in regard t expenditure, by the returns of revenue and expenditure n yet reported to the department. It will be two or three mont yet before the books for the year are finally closed.

According to the estimate of the department addition revenue still to come in will bring the total for the year u to approximately $170,000,000, while total expenditures w run close to $154,000,000. The net reduction of debt durin the twelve months should therefore be about $16,000,000.

On March 31st the net debt of the Dominian was $297 588,095, a nominal decrease of $24,410,845, as compared wit the corresponding date of last year. Several large items expenditure are still to be entered up.

The largest item of revenue increase is in the custom department. The total customs revenue for the year has bee $112,533,528, an increase of $26,726,391 over the precedin twelve months, and practically double the increase of 1911-1 over 1910-11.

Excise revenue for the year, when all returns are in, wi be close to $22,000,000, an increase of some 2½ million over the preceding fiscal year. Postoffice revenue promis to reach $12,500,000, an increase of two millions.

Expenditure on consolidated fund account as entered u to the end of March is given as $95,625,013. Bu approximate by $15,000,000 of expenditure on thi account still remains to be entered, thus bringing th total amount spent on the ordinary business of administratio during the year up to a little over $110,000,000, or an increas of about $13,000,000 over 1911-12.

Capital expenditure for the year will total nearly fort millions.

The Forks, Sask.	Union Bank of Canada.

REVISION OF UNITED STATES TARIFF

hairman Underwood's Explanatory Statement—Comparative Table Showing Changes

The new Democratic tariff bill was introduced in the ouse of Representatives by Representative Oscar W. Under- ood on Monday. It will be popularly designated as the nderwood bill, taking the name of the chairman of the ays and means committee in accordance with custom and adition.

Chairman Underwood, in a statement accompanying the ll, said the measure would, in the opinion of its makers, vise the tariff "to a basis of legitimate competition, such will afford a wholesome influence on our commerce, bring lief to the people in the matter of the high cost of living, d at the same time work no detriment to properly con- cted manufacturing industries."

"In its tariff revision work the committee has kept in ind," he said, "the distinction between the necessities to e lowest points commensurate with revenue requirements, d making the luxuries of life bear their proper portion of e tariff responsibilities. Many items of manufacture con- olled by monopolies have been placed on the free list.

"The idea of the large extension of the free list for the manufactured products has been the fundamental concep- on, while the effort has been made to improve the status of e manufactured lumber.

"Thus sawed boards, other than cabinet wood, have been rried to the free list, while sawed cabinet woods, which re 12.75 per cent. in 1912, are now 10 per cent.; casks, rrels, etc., which were 30 per cent., are now 14.77 per nt.; and house furniture, which was 35 per cent., is now per cent.

orough Revision Made.

"Tobacco and spirits have been found to be good pro- cers of revenue and have, therefore, been left at the same es as in the present law.

"In the effort to relieve the consumer and to mitigate e high and rising cost of living, schedule G, which deals th agricultural products, has been thoroughly revised and portant reductions have been made.

"For instance, the duty on horses has been reduced from per cent. to 10 per cent., cattle from 25.07 per cent. to 10 r cent., sheep from 16.41 per cent. to 10 per cent., barley om 43.05 per cent. to 23.07 per cent., hay from 43.21 per nt. to 26.67 per cent., fruits from 27.21 per cent. to 15.38 r cent., live poultry from 13.10 per cent. to 6.67 per cent.

"Other changes are in proportion, and the general effect s been to reduce in a very material proportion the heavy xes upon imported foodstuffs.

hen Tariff is Competitive.

"Print paper, whose cost of production is as low in the ited States under favorable conditions, as it is anywhere the world, has been transferred to the free list when rth less than 2½ cents per pound, while the higher grades ve been given a tariff of 12 per cent. in place of 15.80 per nt.

"Copying paper has been cut from 42.32 per cent. to 30 r cent., bag envelopes, etc., from 49.92 per cent. to 35 per nt., parchment papers from 47.92 per cent. to 35 per cent., otographic paper from 28.99 per cent. to 25 per cent., iting paper from 45.13 per cent. to 25 per cent., common apping paper from 35 per cent. to 25 per cent., and books om 25 per cent. to 15 per cent.

"Where the tariff rates balance the difference in cost of oduction at home and abroad, including an allowance for e difference in freight rates, the tariff must be competitive, d from that point downward to the lowest tariff that can levied will continue to be competitive to a greater or less tent. Where competition is not interfered with by levying e tax above the highest competitive point, the profits of manufacturer are not protected.

come Tax Proposals.

"On the other hand, when the duties levied at the custom re high enough to allow the American manufacturer make a profit before his competitor can enter the field, we ve invaded the domain of the protection of profits. In the mmittee's judgment the protection of any profit must of cessity have a tendency to destroy competition and create onopoly, whether the profit protected is reasonable or un- asonable."

The income tax, which will transfer indirect taxes levied rough the tariff into a direct tax upon the incomes of in- vidual citizens and corporations, exempts all sums below ,000. Incomes in excess of that amount will pay one per nt. tax up to $20,000; two per cent from $20,000 to $50,- o; three per cent. from $50,000 to $100,000, and four per nt. above that figure. The bill also includes in its provisions the property and earnings in the United States of persons living abroad. The present corporation tax, levying one per cent. on corporation incomes above $5,000, would be retained as part of the income tax.

To encourage trade with foreign countries, the bill would reverse the maximum and minimum provision of the present tariff law. The new tariff rates would be the maximum tariff, and the president would be given authority to negotiate reciprocity treaties and make concessions to countries that grant favors to American exports.

Present and Proposed Laws.

Chairman Underwood, of the United States ways and means committee, in his statement accompanying the new tariff bill, gave the following comparative table to show reductions in tariff duties made up on necessaries. In each item, both the present tariff and the proposed tariff had been reduced to an ad valorem basis:—

Article.	Present Law.	Proposed Law.
Lime	9.17	5.00
Grindstones	9.21	8.33
Bicycles	45.00	25.00
Pocket knives	77.68	35.00 and 55.00
Razors	72.36	35.00 and 55.00
Scissors and shears	53.77	30.00
Knives and forks	41.98	27.00
Furniture	35.00	15.00
Cattle	27.07	10.00
Eggs	36.38	14.29
Stocks, etc., of fruit trees	54.44	27.58
Cotton, cloth	42.74	26.69
Cotton, clothing	50.00	30.00
Stockings, hose and half-hose, selveged	75.38	50.00
Men's and boys' cotton work gloves	89.17	35.00
Knit shirts, drawers, etc., and underwear	60.27	25.00
Collars and cuffs	49.10	30.00
Blankets	72.60	25.00
Flannel	93.29	30.00
Clothing, ready-made	79.56	35.00
Women's and children's dress goods	99.70	35.00
Sewing silk	25.00	15.00
Wrapping paper	35.00	25.00
Books	25.00	15.00
Brooms	40.00	15.00
Matches	27.59	14.00
Harness and saddlery other than leather	35.00	20.00
India rubber, manufactures of	35.00	10.00
Lead pencils	39.00	25.00

Other important changes are:—

Wheat, from 25 cents to 10 cents a bushel.
Butter, from 6 cents to 3 cents a pound.
Cheese, from 6 cents a pound to 20 per cent. ad valorem.
Beans, from 45 cents to 25 cents a bushel.
Eggs, from 5 cents to 2 cents a dozen.
Nursery cuttings and seedlings, from 25 per cent. to 15 per cent.
Fresh vegetables, from 25 per cent. to 15 per cent.
Apples, peaches, etc., from 25 cents to 10 cents a bushel
Raisins, from 2½ cents to 2 cents a pound.
Barley malt, from 45 to 25 cents a bushel.
Buckwheat, from 15 to 8 cents a bushel.
Oats, from 15 cents to 10 cents a bushel.
Rice, cleaned, from 2 cents to 1 cent a pound.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended April 4th:—Bailey Cobalt, 44,700; Drummond, 61,649; Chambers Ferland, 64,000; Trethewey, 47,848; La Rose, 65,622; Nipissing, 98,150; McKinley-Darragh, 84,133; City of Cobalt, 69,000; Cobalt Townsite, 164,000; Coniagas, 151,265; Kerr Lake, 60,620; total, 910,987 pounds or 455 tons. The total shipment since January 1st are now 10,438,015 pounds or 5,219 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,08[illegible] tons; 1912, 21,509 tons.

◆

The Waneta Development Company, in which Nelson people are interested, must expend $75,000 on their power proposition at the junction of the Salmon and Pend d'Oreille Rivers this year, having put up $10,000 as a bond with the provincial government that they will do so.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

PROOF OF AGE IN LIFE ASSURANCE

The article on this subject on page 695 of this issue was in type prior to the decision of the select committee of the Ontario legislature. The members of this committee are to be congratulated, thinks the writer, Mr. R. W. Barton, on their recognition of the dangers of restrictive legislation in regard to life assurance.

The modern craze for legislation on every subject upon which men differ has resulted in acts of parliaments that are more than a menace to our vaunted freedom.

FIRE PREVENTION DAY IN TORONTO

On April 19th, 1904, Toronto was visited by a conflagration in which $10,350,000 of property was destroyed.

We urge you on or before the anniversary of that day to see that YOUR premises are clean and in proper condition as regards fire hazard.

Remove all inflammable litter, giving special attention to basements and cellars.

Inspect your lighting, heating and power equipment. Also your fire escapes and fire protective appliances.

This is an appeal issued by the Ontario Fire Prevention Association, and is one to which *The Monetary Times* gives its co-operation. For the first three months of the year Ontario's fire waste has been $1,892,688 according to *The Monetary Times'* fire record, and the loss throughout the Dominion amounts to $7,661,527 for the same period.

One half of this fire loss is preventable, thinks the association. How? By the enactment of laws empowering fire marshals to hold investigations and prosecute offenders. By systematic inspection of buildings, proper building laws and in many other ways, but most important of all, by creating a public sentiment that will demand that our forests, our properties and our lives, be given every possible safeguard that law can give them.

Therefore the need of every preventive measure is clearly shown and every citizen of Toronto and of the province and throughout the Dominion should heed this appeal and follow the instruction given.

The membership of the association is growing, Mr. W. Walker, the secretary, will supply any information regarding the association's propaganda. His office is 706 Lumsden Building, Toronto.

The following bodies are represented on the executive or are giving their support to the association and its work:—Associated Boards of Trade, Association of Fire Chiefs, Canadian Credit Men's Association, Canadian Bankers' Association, Canadian Fire Underwriters' Association, Canadian Manufacturers' Association, Canadian Society of Civil Engineers, Mutual Fire Underwriters' Association, Retail Merchants' Association, Toronto Board of Trade, Toronto Guild of Civic Art.

The fee for membership of individuals and firms is $2 per annum.

ONTARIO BULK SALES BILL LAID OVER

At the meeting of the legal committee of the Ontario legislature on Thursday, a large body representing the principal wholesale houses of Toronto and Hamilton, together with a number of prominent legal men appeared in support of the bulk sales bill. Mr. Dargavel, of Leeds, representing the retail interests, led the opposition and succeeded in having the bill thrown out. It was then urged in opposition to the measure that it was firstly class legislation giving powers to the wholesale trade that were not or probably could not be given to retail merchants, that every man selling out his business would practically have to make an assignment, that the wholesalers were reckless in giving credit.

The commission appointed by the Saskatchewan Government to investigate the cheaper money problem left on Thursday for Europe. The members are:—Hon. George Langley, C. A. Dunning, of the Co-operative Elevator Company; Dr. Oliver, University of Saskatchewan; J. H. Haslam; A. P. Mantle, Deputy-Minister of Agriculture.

CAPITAL FROM LONDON

Demands of Overseas Dominions—Prince Albert's Rate of Interest—South Africa's Loan

The Province of Saskatchewan is shortly to become a borrower to the extent of $1,000,000 four per cent. debentures in the London market.

The over-subscription of Manitoba's loan recorded in last week's issue of The Monetary Times has been followed by several other issues.

Prince Albert, Sask., made an issue of £102,700 4½ per cent. debentures at 86. This rate of interest attracted the investor and the issue was fully subscribed.

Port Arthur, Ontario, is to issue £400,000 5 per cent. debentures at 99.

Other Issues Pending.

Other Canadian issues pending are those of the Southern Alberta Land Company £250,000 6 per cent. debentures at 95, and the International Light and Power Company is to offer $1,000,000 cumulative preferred 6 per cent. preferred stock with a bonus of $60 in common.

The charter of this company states: "The operations of the company are to be carried on throughout the Dominion of Canada and elsewhere by the name of 'International Light and Power Company, Limited,' with a capital stock of twenty million dollars, divided into 200,000 shares of one hundred dollars each, and the chief place of business of the said company to be at Toronto.

South African Loan Failed.

The result of the new South African issue has been received with surprise, state Capetown cables. The issue was four millions at four per cent. at par, and 94 per cent. was left with the underwriters. The result is regarded with surprise, especially as the South African union, because of the infrequency of its appearance in the London market, has a high repute as a borrower.

Hobart, Tasmania, has made an issue of a quarter of a million in 20-year 4½ per cent. debentures at 100½. This was oversubscribed and closed before time.

The following issues have been listed on the Stock Exchange in London:—Dominion Iron and Steel Corporation, 368,959 shares; city of Lethbridge, £128,100 4½; city of Montreal, £1,438,000 4½; Pacific Power and Light, $590,400 fives, and Spanish River Pulp and Paper Company, £30,000 sevens.

◆

MONTREAL AND WATER COMPANY

Monetary Times Office,
Montreal, April 10th.

After many negotiations, it began to look as though the city was about to complete the deal whereby it is to enter into the possession of the Montreal Water and Power Company, a private corporation which performs the water service in a number of the wards of the city.

Now it is announced that the matter may go to the courts. Members of the board of control are credited with the statement that unless the company, after the city council has sanctioned the board's recommendation to take over the St. Henri Ward service, consents to permit the expropriation, the matter would be carried to the courts.

According to Controller Godfrey, the charter of the Montreal Water and Power Company provides that the city has the right to expropriate the plant of the company in any municipality which becomes a portion of the city of Montreal by annexation. The recommendation of the board of control that the city expropriate the plant of the company in St. Henri Ward for the furnishing of water to the citizens of that ward, is now before the city council. The matter has been delayed, but if the council concurred in the recommendation and the company refused to acquiesce, the matter would be taken to the courts.

Speaking of the matter, Mr. Edwin Hanson, president of the company, declared that expropriation by wards would be neither just nor legal. It was true that the company had refused the city permission to audit the books of the company, but it had consented to allow a reputable firm of auditors to examine them and report to the city.

Trenton, Ont., recently passed by-laws fixing the assessment of Canada Creosoting Company at $10,000, and to purchase the armory site at a cost of $6,000

The Firemen's Fund Insurance Company has been registered in Ontario for the transaction of fire, inland transportation and automobile insurance. Mr. John H. Hunter, Toronto, is the chief agent for Ontario

CORPORATIONS FINANCING

Bond Issues — Public Services Corporation — Ce ral Railway Company of Canada

An offering of $600,000 of first mortgage 6 per cent year sinking fund gold bonds, at 100 and interest, J. C. Wilson, Limited, paper manufacturers, is being by The Montreal Securities Corporation. Back of bonds the company possesses total fixed assets of $1,60 and net current assets of $552,000, or total assets of $2,128,000. The profits for the year 1912 were give $205,000, equal to almost six times the annual bond int

Devoted to Payment of Franchises.

An issue of $1,250,000 5 per cent. gold mortgage b is being arranged for by the Montreal Public Service poration, of which Mr. E. A. Robert, president of the M real Tramways Company, is the head. The bonds carry with them a bonus of 100 per cent. common stoc the company.

The proceeds of the issue, it is understood, will b voted to the payment of the franchises of the Dom Light, Heat and Power Company and the St. Paul El Light and Power Company, recently acquired by the P Service Corporation. The capital stock of the latter pany is authorized at $5,000,000.

Central Railway Company of Canada.

A special general meeting of the shareholders of Central Railway Company of Canada will be held at th fice of the company, Montreal, on Tuesday, April 22nd the purpose of considering an issue of first mortgage b on the company's line between Montreal and Midiand branches, the redemption of the outstanding bonds o company and matters connected therewith, the increa the share capital of the company, and changes in the a ments entered into between the company and other panies.

This is the railway which has been projected from M real to Midland with a branch to Goderich, one of the ures of the scheme being a proposal that the Intercol should be given running rights over the new line to Geo Bay. In February the railway committee of the hous commons rejected the Central Railway Company of Can Bill.

The Otis Fensom Elevator Company, Limited, was incorporated last month with an Ontario charter to over the business of the company which had been oper under the same name, has sold $1,000,000 seven per cumulative preferred stock to Messrs. Blair and Compa New York. The stock is being offered by the New York underwriters at par and accrued dividend.

The company has offices in Quebec, Montreal, Tor Winnipeg, and Hamilton, owns properties appraised at $1,500,000, and has total assets of $2,700,000. The com has no funded debt. Its issued capital, apart from the 000,000 preferred stock, consists of $1,500,000 com stock, of which the Otis Elevator Company of the U States owns upwards of eighty per cent.

◆

PROOF OF ACE IN LIFE INSURANCE

The select committee of the Ontario legislature appo to deal with Mr. C. R. McKeown's bill to amend the ance act, have decided to redraft the measure in a wa will practically eliminate its principle.

The redraft will compel the sending out of a notic the policy when issued notifying the insured person that of age is required, the printing in red ink of a similar on all receipts for premiums, and a separate notice each until proof of age is furnished.

While this will put added obligation on the insuran panies, it by no means disturbs the present arrangeme the insured person is unable to present proof of age some reason neglects to do so the company may still, the death of the insured, compel the submission of pr age before paying the insurance.

The committee was almost unanimous in the view the bill went too far, and Mr. J. K. MacDonald, gene ager of the Confederation Life Insurance Company, this conviction along by declaring on behalf of Can British and American companies that there had been no plaints as to the present method of settling claims by ment in cases where it was proven after the death of sured person that a wrong age had been given whe policy was taken out.

The bill, when redrafted, will come before the hou an amendment to the Insurance Act

The subject of "Proof of Age in Life Insurance" discussed in an article appearing on another page of issue.

NTARIO'S AGRICULTURAL CONDITIONS

ops Are Favorable – Live Stock – Supply of Fodder

luch of the new wheat entered the fall of 1912 rather the usual height, owing to late planting as a result e delayed harvesting and the general wet weather preg during the season There was a light covering of during the winter, especially in January and a part of uary, when in certain sections of the province fields were ically bare for several weeks together. Notwithstanding drawbacks the comparatively mild temperature preg during the winter kept the crop from serious injury, damage being done by floods on low fields than from other cause. The present outlook for fall wheat is on hole favorable, although it is rather too early to speak assurance, as several correspondents point out that is a most critical period in the history of the crop, owo the possibility of cold winds and alternate freezing hawing, which prove very trying to the young plants, the Ontario department of agriculture's bulletin.

Clover made a good catch, and entered the winter in a forward condition than fall wheat. Some heaving has reported, but as a rule opinions regarding the present fields are more or less favorable, notwithing the light protection of snow, especially during midr. Like fall wheat, clover has yet to pass through the time of April.

The heavy wind storm of March 21st (Good Friday) did injury to orchards in many counties of the province, trees being uprooted, and a severe sleet about a week also broke many limbs off fruit trees. Otherwise the ually open and mild winter has been favorable to orconditions

es, Cattle and Sheep.

The wintering of live stock has been a comparatively task, owing to the mildness of the weather and the dance of fodder.

Horses have been in good demand, and have consely commanded high prices. No serious disease has pre-, although some of the usual lighter forms of distemper been reported. Several correspondents state that too straw was fed, and as some of the straw and oats was owing to the dampness of the season indigestion was the result.

Both beef and dairy cattle have been well cared for, and enerally in good health. The chief trouble reported he tendency of cows to abort, more especially in the breeds. The big steer is a thing of the past, as one spondent puts it, most of the beeves being finished earlier; but while individual animals may not rank as as the best in other years, the general form and quality ose sold to butchers, drovers, and graziers show an ovement.

"Scarce, but have done well," is a fair summary of the ge return regarding sheep. Several correspondents attention to the necessity of more dipping for the tick.

Swine are now receiving the general care and feeding they deserve. There is a brisk demand for pork owing e great scarcity of animals on hand. Hogs that are finished off for market are in excellent condition, but laints are made that many of the litters are not coming rong as usual.

er Supplies.

The comparatively mild winter helped fodder supplies farther than usual. There has been a sufficiency of -in some cases it was plentiful—and the experience of t years of close feeding enabled stockmen to handle it ood advantage. With the exception of peas, all the s and roots have been more than sufficient for all calls; corn for the silo has been hardly up to the mark either eld or quality. Straw also has been short in quantity more or less poor in quality, having been unfavorably ted by the rainy weather during and after harvest. Sevcomplaints were made of its scarcity for bedding. Taken ether, however, fodder supplies in general have been than necessary to carry the average farmer through y and leave a fair margin for emergencies.

ONTARIO BULK SALES BILL

Province Has Been Slow in Legislation—Retailers' Opposition—Agreement Suggested

"The only provinces in which there are not now acts of this character in force or in the course of adoption are Ontario and Prince Edward Island.

"The province of Ontario is commercially the most important in the Dominion.

"It is highly anomalous, apart from the handicap placed upon business men of Ontario, that this province should have lagged so far behind in the adoption of a salutary measure of this class.

"The legislation is in reality ancillary to the assignments and preferences act and other legislation for the prevention of fraud and fraudulent preferences.

Such Legislation is a Necessity.

"Conditions have arisen during the past few years rendering such legislation an absolute necessity, as many branches of retail trade have fallen into the hands of foreigners not trained in Anglo-Saxon ideas and business methods, and often unscrupulous and dishonest," was the statement of Mr. A. C. McMaster, K.C., Mr. F. A. Wegenast and Mr. Eric N. Armour, who appeared on behalf of the Canadian Manufacturers' Association, the Toronto Board of Trade, the Canadian Credit Men's Association and the Ontario Associated Boards of Trade, before the legal committee of the Ontario provincial legislature.

When the bulk sales bill introduced by Mr. W. D. McPherson was considered Mr. E. M. Trowern, who appeared on behalf of the Retail Merchants' Association, declared that the bill was "thought out along wholesale lines, and is unfair to the retail merchants of the province." The cure was worse than the disease. Nine per cent. of the retail merchants did not know the conditions of the bill.

Mr. J. R. Dargavel, M.P.P., a retail merchant, made vigorous protests. The bill was a reflection on the retail merchants of the province. Replying to Mr. Wegenast, counsel for the Canadian Manufacturers' Association, who remarked that the bill was not a reflection on retailers, but was the reverse, Mr. Dargavel reiterated that the bill did reflect on the retail merchants, and went on to say that wholesalers might exercise greater care in extending credit. He knew people who could not get a pair of boots from him on credit and in less than four weeks they had secured a store full of goods.

Lagging Behind Other Provinces.

It is a matter of great regret and mortification to the Canadian Manufacturers' Association that Ontario is lagging behind the other provinces in legislation of this kind, said Mr. Wegenast.

Mr. Dargavel urged the committee to defer action in the matter in order that the retailers and the wholesalers might get together and agree on something. He said there were 500 retailers to every one wholesaler, and it was for the committee to do the greatest good for the greatest number.

The Toronto Board of Trade, the Ontario Associated Boards of Trade, the Canadian Manufacturers' Association and the Canadian Credit Men's Association were represented by Messrs. Henry Brock, president, Toronto Board of Trade; F. G. Morley, secretary; Eric N. Armour; R. S. Gourlay, president, Canadian Manufacturers' Association; W. P. Gundy, vice-president, board of trade; Chas. Marriott, treasurer, board of trade; A. R. Clarke, chairman, Toronto branch Canadian Manufacturers' Association; A. G. Malcolm, president Canadian Credit Men's Association, and J. A. Catto.

* * *

DEMAND FOR STATE LIFE INSURANCE NOT GENERAL

It was reported that up to the date of the meeting of the Association of Life Insurance Presidents on Friday, April 4, none of the twenty-five bills introduced in thirteen states during the winter to create State life insurance funds had been enacted into law. In seven States in which twelve of these bills were pending, the legislatures have adjourned and the measures were actively defeated or died in committee.

Six States in which the remaining thirteen bills of this character were introduced were still in session at the time the report was made, but none of the measures had made substantial progress, while several had been formally defeated.

General Counsel Robert Lynn Cox stated that this result, in view of the fact that these twenty-five measures did not receive the opposition of insurance men, seems to indicate that there is as yet no general demand on the part of the public for State life insurance.

INVESTMENT OF LIFE INSURANCE FUNDS

I.

The Importance of a High Rate of Interest

BY M. P. LANGSTAFF, A.I.A., F.A.S.

What practical life insurance manager does not realize the vast importance of investing his company's funds at the highest rate of interest, compatible with absolute safety? Life insurance managers cannot afford to adopt the supine policy of investing in the most readily obtainable security that yields a fair rate of interest with absolute safety. They "must be up and doing," with a vigilant eye for every opportunity that may present itself. In this connection Mr. T. E. Young says, "The administrators of life assurance finance should remember that surplus interest (the principal being protected) furnishes the basis not merely of increasing profit, but also of more stringent reserves; and they are supported by the fact that since the policyholders expect them to provide bonuses, augmenting, if possible, with the extended duration of their assurances, those policyholders have implicitly entrusted them with the duty of vigilantly and widely exploring and utilizing all promising sources of investment which will contribute safely and enhancingly to the contemplated end.

Earnest, enterprising and sagacious search, with remunerative results, in general, is more to be recommended, even though some unhappy experience should occasionally intervene, than a supine and easy adherence to routine course, which demands no special ability or knowledge to pursue." With the keen competition that prevails at the present time, those companies who can prove that they are furnishing insurance at the lowest net cost, will obtain the great bulk of business, and the interest rate earned on a company's funds is perhaps the greatest factor in the reduction of this cost.

The late Mr. J. W. Deuchar says, "It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of the company will, on an average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3 per cent. it might reduce its premiums some 30 per cent., or double its bonuses." Mr. W. S. Nicholls in his paper on the "Probable Future of the Interest Rate," states that ". . . a difference of one per cent. in the prevailing rate of interest may add from ten to fifteen per cent., or even more, to the cost of an insurance policy."

Profit Small but Rapidly Increases.

Again, in Transactions Faculty Actuaries, Volume 3, Mr. James Chatham, after analyzing the profits from mortality, loading, and surplus, in the case of endowment assurances, says, "The profit from interest is small at first, but it rapidly increases, until in the later years it becomes the most important of all the sources of profit. It is the one that counteracts the decreasing tendency of the other two, and it is to it, therefore, that we must look for the maintenance of the rate of bonus in this class of assurance.

"The investment of the funds of an office has always been an important duty, demanding much skill and judgment, but it looks as if it were destined to become more important in the future, and to require even more attention than it has hitherto received." And we must remember that Mr. Chatham had in mind the comparative low rates of interest earned by British companies.

But the importance to a company of a high interest rate is too self-evident to need further exposition. Take the vast premium receipts of some of our large companies and accumulate them at varying rates of interest, and you get differences almost beyond belief.

As is well known, the three main sources of profit to a life insurance company, arise from savings in loadings, savings in mortality, savings from excess interest, these three —but the greatest of these is savings from excess interest. And it is a matter beyond dispute that this profit from excess interest covereth a multitude of shortcomings in the management of other items in a company's balance sheet.

Percentages in Different Investments.

The stereotyped way of approaching a subject of this nature, is to investigate more or less thoroughly the practices of the companies in the past, and from these practices deduce reasons, from these reasons draw inferences, and from these inferences point suggestions for guidance in the future. This method has been ably followed by various writers in recent years, and, therefore, while giving a few ratios showing the investment policies of companies in the past, I will deal with them only in a superficial way. Figures taken from the insurance reports of New York State will probably be as representative as any. The follo table gives the percentages in different investments du the year 1885, and quinquennial years up to and inclu the year 1910, of life companies reporting to the insur department of New York State:

Year	Real Estate	Real Estate Mortgages	Stocks	Bonds	Collateral Loans	Premium Notes and Loans	Cash	Deferred and Unpaid Premiums	Other Assets
		%	%					%	%
1885 . . .	11.1	40.5	3.0	31.8	3.3	3.6	4.3	1.3	1.1
1890 . . .	10.6	39.9	.9	34.7	4.6	2.5	4.2	1.7	.9
1895 . . .	10.8	35.2	1.4	40.0	2.6	2.9	4.1	1.9	1.1
1900 . . .	9.0	28.7	.4	45.9	3.7	5.1	4.3	1.8	1.1
1905 . . .	6.2	26.6	.1	51.7	1.7	8.1	2.7	1.7	1.2
1910 . . .	4.5	30.7	.1	47.6	.4	12.7	1.5	1.2	1.3

A similar list, in connection with Canadian compa follows:

Year	Real Estate	Real Estate Mortgages	Loans on Collateral	Cash Loans, Premium Obligations, etc.	Bonds, Debentures and Stocks	Cash	Interest and Rents due and accrued	Outstanding and Deferred Premiums	Other
	%	%	%	.	%	%	%	%	%
1890 . . .	7.4	45.5	6.7	8.3	23.9	1.6	2.0	3.8	.8
1895 . . .	9.0	37.2	8.1	10.2	26.8	2.7	2.0	3.8	.2
1900 . . .	8.2	30.8	6.6	10.1	37.0	1.8	1.6	3.6	.3
1905 . . .	4.8	26.1	3.4	9.4	48.7	2.6	1.3	3.3	.4
1910 . . .	3.9	31.1	1.0	11.9	46.4	1.3	1.6	2.5	.3

Real Estate Holdings.

Taking real estate, we see that the percentage of estate holdings of the United States companies has dec from 11.1 per cent. in 1885 to 4.5 per cent. in 1910, whi the case of Canadian companies, the percentage rose 7.4 per cent. in 1890 to 9 per cent. in 1895, from whic has declined to 3.9 per cent. in 1910. The large percen of real estate held by the United States companies in is probably accounted for by the large number of closures on real estate mortgages that took place in eighties. The decline has been caused partly by restri laws and partly by the lessons taught in the low int rates shown by those companies whose real estate hol were large.

The comparative large holdings of real estate in nineties as shown by the Canadian companies can, I th be largely ascribed to the fact that so many new comp were being formed, a good percentage of whom invest substantial head office buildings. Present restrictive estate laws, which are practically the same in bot States and Canada, will keep real estate holdings at a percentage.

Mortgages and Bonds.

Coming to mortgages on real estate, we explain th cline in the percentages in the nineties to the fall, at time, in the interest rate on mortgage loans. As mor loans run for only a short time, falling rates of would naturally be followed by a rush for long term ties. Bonds and stocks have certain advantages over gages, a point which will be discussed later. One obj to real estate mortgages may be stated here, viz., th preciation of land values might mean a great l prestige to a company with large holdings of such gages, due to the fact that they have no market valu hence at such a time neither the company nor the would be quite sure of their true value. Holdings in estate mortgages now appear to be taking an upward due to the good rates that can be obtained on safe gages in many sections, for example, in Western Can

A rise or fall in the proportion of bonds held is l explained by the fall or rise in the real estate mor holdings. Certain bonds, for example, United States have increased enormously in value, and are now littl by life companies. To compensate for this, other such as those of railways and public utilities, have more favorably considered. While the percentage of held will never fall very low, one reason for which being they are required for government deposits, yet so lo good real estate mortgage loans, with their gratifyi sence of price variations, can be obtained, we may b that they will form a goodly percentage of the comp total holdings.

In the above figures, I have given the percentage ings of all the companies reporting to New York State

* * *

Mr. Howard W. Berry, president of the Asso Chambers of Commerce of the Commonwealth of Aus arrived at Vancouver from Australia. He will visit the cipal cities of America and Europe on business

ISING PRICES ARE ECONOMIC PROBLEM

ditions Which Were Factors in the Advance--No Immediate Change Looked For

High as was the general level reached in 1911 by whole- prices in Canada a still further and pronounced advance place in 1912.

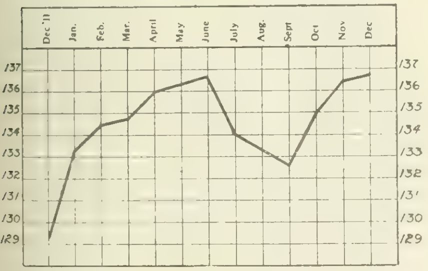
The third annual report issued by the department of r and compiled by Mr. R. H. Coats, B.A., F.S.S., editor e Labor Gazette, shows in the terms of the department's x number, which is based on weekly or monthly quota- for 272 commodities selected over the entire field of uction and consumption, a level indicated by 127.4 in 1911 risen to one of 134.4 in 1912, a gain of seven points—the bers being percentages of the average prices prevailing ng the decade 1890-1899, the period adopted by the de- ment as the standard of comparison throughout its in- gation. These figures probably minimize to a degree the tical bearing of the increase on cost of living, inasmuch as are reached by averaging all the commodities on an equal s, whereas some of the most notable advances of the past were in foods, fuel and other articles of great importance omestic consumption. A calculation which assigns to the ous groups their approximate relative weight from this dpoint shows the rise in 1912 to have been well over 9 per . In retail prices the advance was approximately 5.8 per

ee Marked Periods.

It will be seen from the following diagram that the year into three periods: (1), the first six months, in which e was a steady and at times rapid advance; (2), the ths of July, August and September, during which the eral level fell to a point approximately the same as at the nning of the year; and (3), the final quarter, in which line again turned abruptly upward, regained the loss of previous three months, and ended at the highest point of year. The index number which in January stood at 133.1, une had reached 136.6; by September it had fallen to 7, and by December it had remounted to 136.8. For the as a whole the number was 134.4, compared with 127.4 911.

The Course of Wholesale Prices, Canada, by Months, 1912.

Number of Commodities 272 Average Prices, 1890-1899=100



Conditions specially noteworthy in Canada, though not eneral peculiar to this country, which were regarded as ors in the very pronounced rise indicated by these figures e, (1) the comparative world crop failure of 1911, which ed the price of farm and food products; (2) the exception- severe winter of 1911-12, which intensified the effect of ; and (3) the industrial and trade expansion which set s the year advanced.

cially in Canada.

The last was a feature in Great Britain and the United es as well as in Canada. In the latter, however, it was icularly comprehensive in character, being stimulated in earlier stages by the prospect of good agricultural yields later by the realization of this prospect, and evidenced by incidents as, the heaviest immigration movement on rd; the passing for the first time of the billion dollar k by Canadian foreign trade; a record domestic trade, cially at the "holiday" season; buoyant public revenues: unprecedentedly active year in railway construction, public rovements and general building; and exceptionally heavy ing and manufacturing outputs. At the same time ncial conditions remained favorable.

The following table shows the index numbers for Janu- and December also, for the year:—

	January.	December.	Year.
Grains and fodder	168.5	144.8	167.3
Animals and meats	144.6	162.2	160.8
Dairy products	176.3	174.0	158.9
Fish	159.4	163.7	155.7
Other foods:—			
(a) Fruits and vegetables	149.9	128.0	134.1
(b) Miscellaneous	118.3	115.7	118.3
Textiles	114.7	126.8	120.7
Hides, leather, etc.	143.8	165.3	152.4
Metals and implements:—			
(a) Metals	113.2	123.1	117.4
(b) Implements	104.7	105.1	104.7
Fuel and lighting	106.0	125.6	115.3
Building materials:—			
(a) Lumber	165.0	170.9	166.5
(b) Miscellaneous	102.6	112.0	105.4
(c) Paints, oils, glass ..	148.4	146.1	148.6
House furnishings	112.4	118.1	114.5
Drugs and chemicals	114.0	117.2	115.5
Miscellaneous:—			
(a) Furs	290.6	358.0	297.3
(b) Liquors and tobaccos.	167.7	135.0	155.2
(c) Sundries	100.2	109.5	104.3
All commodities	133.1	136.8	134.4

Two Influences in Opposition.

As to the outlook, no immediate change in price tendencies was foreshadowed at the close of 1912, though the rapid upward movement of the autumn appeared to have spent its force. In general, two leading influences appeared in opposition: the prevailing trade prosperity, and the growing restriction in the supply of money, flowing in part from disturbed political conditions in Europe,—the latter a consideration of importance to a country which has been borrowing so freely as Canada for industrial undertakings, railway enterprises and municipal purposes.

◆

COMMISSIONER REMOVES TO SOUTH AFRICA

Canadian trade commissioner W. J. Egan, formerly at Manchester, Eng., is now in Canada on leave of absence prior to his departure for South Africa, where in future he will have charge of the office at Durban. He will sail from Montreal for South Africa about the end of April in order that he may be prepared to take up his duties there on June 1.

Commissioner Egan has had three years' experience in the Manchester office, where he has done effective work. While in Canada he will endeavor to get in touch with firms interested in South African trade, and all communications for him should be addressed care of Department of Trade and Commerce, Ottawa.

◆

CANADA'S OCEAN MAIL SERVICE

The terms of a new contract for mail service between Canada and Great Britain have been announced in the house by Hon. L. P. Pelletier. The contract has been made with four steamship companies, the Allan Line, the Canadian Pacific Railway Company, the White Star-Dominion Line, and the Canadian Northern Steamship Company. Under it there will be three mails weekly in each direction in summer and two mails a week in winter. Twelve steamships will be engaged in the summer service and eight in the winter service. The contract is made for one year at a cost of one million dollars.

At present the contract for the trans-Atlantic mail service is with the Allan Line. Four ships are employed, and there is one mail weekly in each direction. Mr. Pelletier said that the mails would be landed at Montreal or Quebec in summer, and at Halifax or St. John in winter, and that during the summer months mails for the Maritime provinces would be landed at Rimouski, as at present.

The postmaster-general explained that a large portion of Canadian mail to and from Britain was now carried by way of New York, and that between $180,000 and $185,000 was paid to the United States by the Canadian government for its transportation. This year the census made every six years [illegible] the International Postal Union would be made, and, while Mr. Pelletier did not expect that Canada would save the whole of the sum paid to the United States, yet he expected there would be a saving. He thought, moreover, that the contribution by the British government would be increased.

The new service, he concluded, would commence on May 1st next.

Toronto Hydro

Second Annual Report of T

Commissioners' Report

To His Worship the Mayor and the Members of the
Council of the Corporation of the City of Toronto:
Toronto.

Gentlemen,—

Your Commissioners beg to submit their Second Annual Report, accompanied by the Revenue Account and the Balance Sheet of the Toronto Hydro-Electric System for the year ended 31st December, 1912.

The accounts have been audited by John Mackay and Company, Chartered Accountants, Toronto, under the joint appointment of the Provincial Hydro-Electric Commission and your Commissioners. Their certificate is appended to the accounts in question.

FINANCIAL POSITION AS AT 31ST DECEMBER, 1912.

The operations for the year 1912 have yielded satisfactory results. From the Revenue Account annexed hereto it will be observed that:

The gross income amounted to the sum of	$726,763.55
The cost of electric current and the expenses of operation and management, including repairs and maintenance, absorbed the sum of	500,564.26
Leaving a balance of net income of	$226,199.29
The interest chargeable against current operations for the year, the sinking fund instalments for the year, and provision for the depreciation reserve fund, absorbed the sum of..........	212,643.88
Leaving a balance of net surplus earnings for the year 1912, after meeting all charges applicable thereto, to carry forward to 1913 of	$ 13,555.41

It is to be especially noted that the expenses and charges generally described above, and which have been defrayed out of the year's income, include the total cost of getting business and promoting new business. The expenditure for advertising and for canvassers, etc., in prosecuting this important work amounted to over $53,000 for the year. In view of the volume of continuing business which has been procured as a result thereof, it would have been quite in accordance with commercial practice to carry forward as a charge against future profits a part of this expenditure. Your Commissioners, however, preferred to follow the conservative course of charging the total expenditure of the year against the income of the year.

The sinking fund accruing to the almost purely construction period ended 31st December, 1911, and which is carried as from that date as a charge against future profits, amounts as per the Balance Sheet to $50,985.49. The final result, therefore, of the operations for 1912 has been that of discharging in full the deficiency that accumulated during the earlier part of the year, when the revenue was smaller, and of accumulating a surplus of $13,555.41 to apply on the sinking fund obligations of the construction period. thus leavi $37,430.08 of that obligation to carry forward future earnings.

The net earnings are continuing to improve the current year in a satisfactory ratio, and yo missioners therefore feel warranted in stating surplus for the present year 1913 should, in the ion, discharge the balance of sinking fund arising from the construction period, and leave gin that will justify a reduction of rates in 1

The net result of the 1912 operations is more able than was anticipated from the interim imate accounts prepared from time to time dur year. A very gratifying increase of business latter part of the year, together with the pleas duction of rates made by the Provincial Com a reduction in the rate of interest from that the interim accounts were based, and other contributed to the ultimate satisfactory result

It is perhaps worth noting that had the ent been conducted under share capital as an commercial corporation. instead of under de capital subject to repayment, the provision th been made out of income for interest and sinkin instalments, together with the surplus carried to next year (amounting to nearly $158,000 have been available for dividend, and would ha mitted the payment of a dividend at the rate 5 per cent. for the whole year on the average of $3,000,000 employed during the year. An result has been effected on a scale of rates very lower than the City. and the Citizens had prev enjoyed, and on a volume of business that is the infancy stage of development.

The estimated cost of the completed plant as decided upon by your Commissioners was $4. Of this amount $3.734,911.33 had been expended end of 1912, leaving an unexpended balance the completion of construction operations of $76 67. This sum will be sufficient to complete the included in the $4.500,000 estimate.

The condition of the money market during th year had the effect of leading your Commission moderate the rate of construction progress, wit object of reducing their financial calls upon the poration.

GROWTH DURING 1912:

The growth in the services rendered the publi ing the year 1912 is striking, as the following shows:

Particulars.	At Jan. 1, 1912.	At Dec. 31, 1912.	Incre
Meters in use	3,901	13,858	9,957
Lamps in use	87,270	300,024	212,754
Street lanterns in use	18,800	33.824	15,024
Connected load, h.p.	10,811	54.655	43,844
	Jan.	Dec.	
Peak load, h.p.	5,934	17.198	11.264

CIVIC SERVICES:

Very satisfactory arrangements have been ent into with the Waterworks Department, which prove of interest and value to the citizens in con tion with the most important question of water

ectric System

to Electric Commissioners

rangements cover the maintenance by the orks Department of a complete steam pumpt to be used by it during "Electric-Peak" hile, during "Off-Peak" hours electric power ised. This insures to the Waterworks Depart- sources of power supply, thereby protecting ns against the dangerous risks attendant upon source of supply, while at the same time it Commission a substantial customer for "Off- eriods. The estimated cost to the Waterworks ent of maintaining under this combination the ces of supply does not exceed the cost of main- he steam plant alone under the old arrange- The Civic Street Car System is also being suc- operated with electric power furnished by mission.

H OF CITY AND ITS OBLIGATIONS:

ion is drawn to the fact that the growth of will necessitate from time to time capital ex- to the Hydro-Electric System. The mileage reets of the city was increased during 1912 out 408 to 508 miles; the population is in- ; industrial activity shows no sign of abate- d the services to the public which the Hydro- System was established to render must be to the enlarging conditions and to the increas- and that will arise therefrom. Such support and confidence can but stimulate them to further exertions in the work to which the city is now finally committed.

Respectfully submitted on behalf of the Commission,

P. W. ELLIS, Chairman.

H. C. HOCKEN, Mayor.

Toronto, Canada, 4th April, 1913.

AUDITORS' REPORT.

Toronto General Trusts Building,
85 Bay Street, Toronto, 3rd April, 1913.

The Toronto Electric Commissioners,
Toronto.

Gentlemen,—

We beg to annex hereto the Revenue Account for the year ended, and the Balance Sheet as at 31st December, 1912, of the Toronto Hydro-Electric System. We have audited the books and accounts of the System from the 1st June, 1911—the date upon which you assumed control of the administration—to the 31st December, 1912. The expenditure upon the System from its inception until the 31st May, 1911, (during which time it was administered by the municipal corporation of the City of Toronto), amounting to approximately $1,400,000, has not been audited by us, and we therefore assume no responsibility in connection therewith. Subject to this reservation, we certify as follows:—

(1) No expenditure has been charged to Capital Account except such as is properly attributable thereto. That portion of the interest which constitutes an integral part of the cost of construction has been charged thereagainst. By-law No. 5,918 of the City of Toronto authorizes the issue of $2,200,000 of debentures for the express purpose of providing, inter alia, for the said interest charge.

(2) The Income Account for the year has been charged not only with the usual expenses of operation and management, but with the whole of the cost of getting new business, no part of which has been carried forward; and with provision for actual and contingent losses, for special and general depreciation in addition to the cost of repairs and maintenance, for interest chargeable against current operations, and for the full requirements of the sinking fund necessary to extinguish the debt incurred.

(3) The inventories of stores on hand at 31st December, 1912—while checked by us as to calculations—have been accepted in the usual way as to quantities and prices on the certificates of responsible officers. The inventory of stores on hand at 31st December, 1911, amounted to approximately $113,000 less than the stores which, according to the books, should have been on hand at that date.

(Continued on Page 709.)

Revenue Account of the City of Toronto Hydro-Electric System for Year Ended 31st December, 1912

SECTION I: SHOWING NET EARNINGS FROM TOTAL OPERATIONS FOR YEAR

CHARGES.

	Amount.	Total.
To cost of electric current	$ 194,328 19

By Depreciation Reserve Fund—		
In respect of general system, after providing out of income for repairs and maintenance of buildings, plant, and equipment	$ 68,586 20	
In respect of leasehold buildings and improvements	3,041 00	
Total	$ 71,609 20	
By Surplus Earnings for Year—		
After providing for expenses of operation, management and maintenance, for actual and contingent losses, and for interest, depreciation, and sinking funds	13,555 41	
		85,164
		$4,369,158 38

AUDITORS' REPORT

(Continued from Page 708 c.)

The missing stores have in the interval been traced and satisfactorily accounted for, except to the extent of $6,562.06. In our opinion, after full inquiry, there is little doubt but that, subject to the usual wastage, which itself is a charge upon the operations causing it, the stores represented by this deficiency were consumed upon construction operations and through oversights in the stores department not charged thereagainst. The amount has therefore now been charged against Capital Expenditure Account.

-) Our requirements as Auditors have been complied with, and in our opinion the annexed Revenue Account and Balance Sheet are properly drawn up so as to exhibit a true and correct view of the state of the affairs of the enterprise.

We may add that the interim approximate accounts prepared from time to time during the year subject to adjustment in some important matters, showed a less favorable result than is disclosed by the annexed accounts, for the reason that in the interest of safety they were loaded for contingencies to a greater extent than has proved necessary.

Respectfully submitted,

JOHN MACKAY & CO., Auditors,

Chartered Accountants.

BOND TENDERS INVITED

Ionetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Medicine Hat, Alta.—A water by-law to raise $170,000 ay be voted upon by the electors.

Grandview, Man.—Until April 15th for $16,350 20-year 5 er cent. debentures. Wm. Dickie, secretary-treasurer.

Dana, Sask.—The village has been empowered to borrow 500 for permanent improvements. J. T. Wilson, secretary-easurer.

Conquest, Sask.—The village has been authorized to orrow $6,500 for permanent improvements. C. C. White, ecretary-treasurer.

Russell Township, Ont.—Until May 3rd for $4,000 5 per ent. 10-year local improvement debentures. F. J. Larocque, easurer, St. Onge, Ont.

Fort Qu'Appelle, Sask.—Authority has been granted the llage to borrow $6,500 for permanent improvements. W. M. homson, secretary-treasurer.

Elmsthorpe R.M. No. 100, Sask.—Until April 20th, for 12,000 6 per cent. 20-year general improvement debentures. homas H. Clay, secretary-treasurer, Avonlea.

Point Grey, B.C.—The school board is expecting to exend about $200,000 this year in schools, in addition to an mount approximately the same voted last year.

Harris Rural Municipality No. 316, Sask.—Authority has een granted the municipality to borrow $10,000 for permannt improvements. W. Youell, secretary-treasurer, Harris.

Norton Rural Municipality, No. 69, Sask.—The municiality has been empowered to borrow $15,000 for permanent nprovements. J. F. Diemert, secretary-treasurer, Pangman.

Sutherland, Sask.—Until April 24th for $200,000 5 per ent. 20 and 30-year debentures, S. Appleby, secretaryreasurer. (Official advertisement appears on another page).

Last Mountain Valley Rural Municipality No. 250, Sask.—he council board has been authorized to borrow $10,000 for ermanent improvements. A. Graham, secretary-treasurer, ovan.

Elmsthorpe Rural Municipality No. 100, Sask.—Authority as been granted the council board to borrow $12,000 for peranent improvements. Thomas H. Clay, Secretary-treasurer, vonlea.

Thorold, Ont.—Until April 18th for $15,000 5 per cent. o-year consolidated debentures, and $9,527.37 5 per cent. 10-ear local improvement debentures. D. J. C. Munro, reasurer.

Lacombe, Alta.—Until May 1st for $6,500 5 per cent. 15-year skating and curling rink, and $7,135.50 6 per cent. 20-year local improvement debentures. E. J. Tett, secretary-reasurer.

Birch Hills Rural Municipality No. 460, Sask.—The ouncil board has been authorized to borrow $10,000 for peranent improvements. J. R. Taylor, secretary-treasurer, irch Hills.

Sudbury, Ont.—Until April 14th for $35,000 5 per cent.. 30-year Roman Catholic separate school debentures. S. Fournier, treasurer. (Official advertisement appears on another page)

Herbert, Sask.—Until April 15th for $7,850 fire hall and fire apparatus, and $1,150 local improvement debentures, repayable in 15 years; interest 6 per cent. J. E. Unruh, secretary-treasurer.

North Qu'Appelle Rural Municipality, No. 187, Sask.—The council board has been authorized to borrow $10,000 for permanent improvements. W. M. Thomson, secretary-treasurer Fort Qu'Appelle.

Milton, Ont.—Until April 22nd for $10,000 5 per cent. cement walks, $20,000 5 per cent. hydro-electric debentures. G. S. Hemstreet, town clerk. (Official advertisement appears on another page).

Haileybury, Ont.—Voting on the issuing of $5,000 debentures for the purchase of the Farr property to be presented to the provincial government as county buildings site, will take place on May 5th.

St. Clements Rural Municipality, Man.—Until April 15th for $12,000 4 per cent. 30-year highways improvement debentures, guaranteed by the Manitoba Government. Thomas Bunn, secretary-treasurer.

Blairmore, Alta.—Offering of the following debentures at 90: $15,000 6 per cent. 20-year waterworks extension debentures. C. E. F. Hiscocks, secretary-treasurer. (Official advertisement appears on another page).

Montreal, Que.—Until April 29th for $200,000 5½ per cent. 40-year debentures of the St. Anselme School Commission. L. N. Ricard, secretary-treasurer, St. Anselme School Commission, 234 Amherst Street, Montreal.

Moose Jaw, Sask.—Until May 7th for $150,000 5 per cent. 30-year school debentures. Clifford Kempton, secretary-treasurer, Moose Jaw Public School Board, District No. 1. (Official advertisement appears on another page).

Woodstock, Ont.—Until April 16th for $37,800 5 per cent. 30-year school and collegiate debentures; $1,629.70 5 per cent. 30-year waterworks debentures; and $7,000 4½ per cent. 30-year consolidating debentures. John Morrison, city clerk.

York Township, Ont.—At the council meeting by-laws were submitted as follows:—(1) To raise by way of loan $28,000 for school extensions. (2) To raise by way of loan the sum of $37,500 to enable trustees of section 28 to purchase a school site.

Kindersley, Sask.—On April 15th the following debenture by-laws will be voted on:—$3,000 10-year town hall; $5,500 20-year skating rink, and $2,500 10-year sidewalks; interest 6 per cent. Two by-laws, one for $1,000 for hospital purpose, and the other $3,500 for exhibition grounds, have been passed, and delivery of debentures can be made at any time. The 1912 assessment was $864,535; the debenture debt, exclusive of waterworks debentures, $34,730; waterworks and electric light plant, $90,000; rate of taxation, general 16½ mills; school, 7 mills; population, 1,223.

PERSONAL NOTES

Mr. R. E. Unicume is the new secretary of the Brandon board of trade.

Mr. D. H. McDonald, late of Fort Qu'Appelle, Sask., has been elected a member of the Winnipeg Stock Exchange.

Mr. George W. Yarker, a well-known Canadian banker, recently celebrated his seventy-seventh birthday. Mr. Yarker is manager of the Toronto clearing house, previous to which he was in the service of the Bank of Montreal for 30 years, having commenced as a junior at Kingston, then successively accountant at Peterborough, manager at Whitby, Toronto and London, England, and chief inspector at Montreal. The Monetary Times joins with Mr. Yarker's numerous friends in the hope that he may long continue in his present position in the banking world.

◆

The name of Ormsby, Clapp and Anderson, Limited, has been changed to Clapp and Anderson, Limited.

SUTHERLAND, SASK.

We wish to call attention in this issue to an offering of Debentures of exceptional value, namely, that of Two Hundred Thousand Dollars at 5% of the Town of Sutherland, Saskatchewan.

Sutherland is an incorporated Town with a population of 1,500 people at a conservative estimate, immediately adjoining the City of Saskatoon to the East. The nearest point of the limits of the Town to the West being about one mile from Saskatoon City Post Office.

Sutherland is, in fact, the Saskatoon Terminal of the Canadian Pacific Railway, on their main line from Winnipeg to Edmonton, Saskatoon to Brandon, Regina and Moose Jaw.

Sutherland is the Head Quarters of the Canadian Pacific Railway for Districts Numbers Two and Three Saskatchewan Division, and is the largest Divisional Point between Winnipeg and Edmonton.

Sutherland has a Canadian Pacific Railway Pay Roll at the present time of over Fifty Thousand Dollars per month.

There are, including Engineers, Firemen, Conductors, Brakemen, and Shopmen, between 450, and 500 men working in the local Shops and Yards.

Sutherland is the Headquarters of the Building and Bridges, Mechanical, Car, and other Departments of the Canadian Pacific Railway.

Sutherland has twenty-eight miles of Track, shortly to be much increased, a Twenty-Car Stock Yard, Ice House with a capacity of 2,000-ton, Sixteen Stall Round House, Machine Shops and Car Repair Tracks.

Sutherland is only Three-Quarters of a Mile from the Saskatchewan Provincial University and Experimental Farm Buildings, 1,333 Acres of the best of land are absorbed by the above institutions, a great part of which forms the South-West Boundary of the Town. Over Three Million Dollars have been spent to date, on the above Buildings and Grounds, and before they are completed, it is estimated that over Ten Millions will be spent. These institutions are planned for the eventual accommodation of Five Thousand Students. Of great value to Sutherland, is the fact, that the new City Hospital, costing over Three Hundred Thousand Dollars, is being placed on the University campus, bringing this valuable asset also, within Three-Quarters of a Mile and easy reach of the Town.

Sutherland has the Dominion Forestry Reserve, comprising 320 Acres of Land located with 160 Acres of it, within the Town limits.

Improvements forecasted for this year, will total Five Hundred Thousand Dollars, including the present issue of Debentures.

Appropriations have already been sanctioned, for the expenditure immediately, of Fifty Thousand Dollars by the Canadian Pacific Railway, mainly for a Freight Shed and construction of Trackage in the local Yards, and it is known positively, that the Railway authorities intend double-tracking from Sutherland into Saskatoon, this year if possible.

The Dominion Government have appropriated in their last estimates, Thirty Thousand Dollars, for work on the Forest Reserve this year.

The Royal Bank of Canada have also purchased a valuable site, and intend erecting a substantial Building for their use at an early date.

The Saskatoon School Board, in whose district Sutherland is located, are just completing a magnificent brick School at a cost of One Hundred and Twenty Thousand Dollars.

At the present time, certain Financial Agents of Saskatoon are dealing with the City Council for the construction of an extension of the Street Railway to Sutherland, and have actually placed securities to the amount of Fifty Thousand Dollars for the construction of the line as an unreserved Gift. This is expected to be done this year.

Certain industrial enterprises will commence the erection of their plants at an early date. The Provincial Government have material now on the ground to install a local telephone system and exchange.

Last Year's assessment totalled $1,835,255, and this year will be well over Two Million Dollars.

The present Debenture Debt is the insignificant total of Five Thousand Four Hundred Dollars, none of which is in arrears.

By the Financial Statement appended, it will be seen there is a Surplus credit to the Town of $16,452.38 on December 31st 1912.

There is every evidence that large investors are only waiting for the utilities to be provided, to force the pace for Sutherland, and put it in the front ranks of any Division of the Saskatoon Area. This issue of Debentures is absolutely Gilt Edged. It is a virgin field for investment of unequalled quality and will bear the strictest investigation. (Advertisement).

ANNOUNCEMENT

A Series of Articles

ON

"Investment of Life Insurance Companies' Funds"

Has commenced in this week's issue of The Monetary Times. This important subject interests the manager and the student, but information on it is not easily available. Mr. M. P. Langstaff, A.I.A., F.A.S., has written these articles to meet that need.

Insurance and Actuarial Students will find them invaluable as will all interested in Life Insurance matters.

The First Article is entitled

"The Importance of a High Interest Rate"

COMPANIES ARE NUMEROUS

our Provinces Contribute Twenty Each — Salvator Silver Mines Heads List

Ninety-eight companies received charters this week with total capitalization of $96,444,975. The only company with pital of one million dollars was the Salvator Silver Mines, balt.

Grouping the new concerns according to provinces in hich the head offices are situated we have the following relts:—

Province.	No. of Companies.	Capitalization.
Ontario	29	$3,759,000
Quebec	23	2,295,975
Saskatchewan	21	1,370,000
British Columbia	19	1,260,000
Manitoba	6	960,000
Total	98	$9,644,975

The following is a list of charters granted during the st week in Canada. The head office of each company is tuated in the town or city mentioned at the beginning of ch paragraph. The persons named are provisional direcrs:—

Wadena, Sask.—Wadena Printers, $10,000.

Herschel, Sask.—Kingsland Farms, $20,000.

THIRD REPORT OF

The Steel Company of Canada, Limited

For the Year ended December 31st, 1912

Annual Meeting will be held Monday Afternoon, April 28th, at 3 o'clock

To the Shareholders:

The statement of Assets and Liabilities and Profit and Loss Account as at the 31st of December, 1912, is herewith respectfully submitted by your Directors.

From this statement it will be seen that the net profits for the year, after expending $464,162.75 for Repairs, Maintenance and Improvements on Plants and Machinery, were $1,547,039.77, an increase of $173,516.36 over 1911. These profits were dealt with in the following manner:—

Interest on Bonds and Mortgage	$ 465,326 91
Preferred Stock Dividends	454,741 00
Credited to Fund for Depreciation, Renewal and Improvement of Plants	150,000 00
Credited to Profit and Loss Account	476,971 86
	$1,547,039 77

The increase in earnings for 1912 over 1911 is due partly to the improved trade conditions in the latter part of the year, but a very considerable part must be credited to the fact that we have greatly improved our plants and increased the efficiency of our operations and thereby reduced the cost of production.

For a large part of 1912 we had, in nearly all our lines of goods, to contend with very low prices. The average price of Steel Bars at Pittsburg over a period of ten years has been $1.42 per hundred lbs., but during the early part of 1912, contracts extending over several months were made on a basis of $1.05 per hundred lbs. F. O. B. Pittsburg, for export to Canada, or over seven dollars per net ton less than the average price for ten years. The same condition prevailed with regard to Pig Iron. The average price at Buffalo for four years has been a shade over $15.00 per ton, and contracts were made for Canada during 1912 at less than $13.00 per ton. The Government regulations still admit of large quantities of Steel Bars and Pig Iron being brought into Canada either free of duty or with a drawback of 99 per cent. of the duty paid.

The issue of the $500,000.00 of Bonds, the proceeds of which were required to help defray extensions to plants and which was referred to in the last annual report, was successfully disposed of. During the year your Directors, in order to be prepared for just such a financial stringency as at present exists, arranged for the placing of notes, the payment of which is spread over three, four and five years, and this accounts for the increase of the amount of our bills payable as compared with last year.

All of our inventories were taken on a most conservative basis, and while they are a little larger than they were in the previous year, our accounts and bills receivable, after providing for all bad and doubtful accounts, bills receivable and cash on hand, are considerably in excess of last year.

During the year very considerable additions were made to our plants, the cost of which was defrayed out of the moneys received by the Bond and Note issue before referred to. The two new Open Hearth furnaces mentioned in the last report were completed and put into successful operation. The work on the Blooming, Billet, Rod and Bar Mills was pushed forward as vigorously as possible, but some of the contractors were delayed by reason of their not being able to get prompt delivery of some of the machinery and materials, with the result that we have not been able to get these mills into operation as early as we anticipated. The Blooming and Billet mills are completed and the Rod mill will be in operation in the course of a few days. At the Canada Works, Hamilton, additions were made to the buildings to accommodate the machinery required for increasing our product of Wood Screws necessary to meet the growing demand for them. At the Works at Swansea and Montreal, new bolt and screw machines were also installed. During the current year we should receive good results from the expenditure on all these additions.

The 92 shares of the Canada Screw Company, Limited, which were outstanding at 31st December, 1911, were turned in during the year and the Hogan Estate Mortgage on th Montreal Rolling Mills property has been discharged.

C. S. WILCOX,
President.

Hamilton, Canada, April 1st, 1913.

NEW FEATURE IN FIRE STATEMENT

At the annual meeting of The Pacific Coast Fire Insurance Company, held a few days ago, Dr. David H. Wilson, of Vancouver, was elected president, succeeding Mr. Thomas T. Langlois, who had resigned owing to ill-health. Dr. Wilson has been a resident of Vancouver for nearly twenty-five years, is well known, not only in this City, but throughout Western Canada, and was one of the original promoters of this Company. Also Messrs. J. W. Horne and W. H. Malkin, well-known business men of the West and residents of Vancouver, were elected First and Second Vice-Presidents, respectively.

The Company during the past few years has made remarkable progress and stands now in the front rank of Canadian Fire Insurance Companies. The total assets of the Company amount to $1,273,473; the subscribed capital on the First of January, 1913, stood at $831,600; the paid-up capital, $548,229.99; surplus to shareholders, $216,945.99, with security to policyholders of $1,166,438.25. In addition to the above surplus to shareholders the directors at the last annual meeting, set aside in a special account the sum of $50,000 as a conflagration reserve. This is possibly the first Canadian Company to set aside such a large sum for this purpose and is a strong indication of the conservative policy pursued by the Company's Board of Directors.

The Company is a member of the Canadian Fire Underwriters' Association throughout the Dominion and maintains branch offices in Eastern Canada, at St. John, N.B., Montreal, Que., and Toronto, Ont.

The Pacific Coast Fire Insurance Company was the first company of its kind to be organized in Western Canada. It has been doing business for nearly a quarter of a century. For many years it has paid regular dividends at the rate of ten per cent., and has at all times met promptly all fire losses and has been a credit to the West.

Mr. T. W. Greer, who has been identified with the Fire Insurance Business for nearly twenty years, is Managing Director of this Company. Mr. J. A. Stewart, 10 Adelaide Street E., Toronto, is the company's provincial agent.—(Adv.)

Don't Blame
the Stenographer

She can't make bright, business-like letters unless you supply good typewriter ribbons. And you can't get clean, easy-to-read carbon copies from poor carbon paper.

PEERLESS BRAND

will settle both these points for you.
PEERLESS ribbons make the type stand out on your letters clear and free from spots and blurs.
PEERLESS Carbon Paper makes copies clear as originals.

Order Peerless Ribbons for your machines. Try a box of Peerless Carbon Papers. Get the sort of letters and copies you want.
Dealers everywhere.

THE Incorporated 1875
MERCANTILE FIRE
INSURANCE COMPANY
All Policies Guaranteed by the LONDON AND LANCASHIRE FIRE INSURANCE COMPANY OF LIVERPOOL.

INCREASES FIRE MARSHALS' JURISDICTION

Four bills, extending the jurisdiction of the state fire marshal of New York, and giving the state superintendent of insurance additional powers over insurance companies, have been signed by Governor Sulzer.

The new laws provide that the state fire marshal shall have jurisdiction over the inspection of the adequacy and sufficiency of water supplies and fire fighting apparatus; that advertisements of foreign insurance companies shall exhibit only their United States branch capital and assets; that the state fire marshal may permit the testing of fire arms upon the premises where they are manufactured, and that the scope of title guaranty corporations may be broadened to permit the guaranteeing or insuring payment of notes of individuals or partnerships.

CANADIAN ROGERS COMPANY ACQUIRES SILVER PLATE COMPANY.

The new Canadian Rogers Company has concluded an agreement under which the business of the Toronto Silver Plate Company is being acquired. When plans for the new company were being laid it was recognized that the alternatives were to build a factory or to acquire a going concern in the same general line of business. The directors of the Canadian Rogers Company feel that the purchase of the Toronto Silver Plate Company, which is well established in Canada, will admit of the new Rogers Company getting into earnings from commencement, the business being taken over as of January 1st last. The net earnings of the Toronto Silver Plate Company for last year were about $30,000, after allowance is made for money borrowed during the year being replaced by capital. The amount of the purchase price will leave the Canadian Rogers Company with a portion of cash available for extensions and developments. The Toronto Silver Plate Company business will continue to be conducted under that name for the present.

Thursday was the last day for receipt of applications for $500,000 preference shares of the Canadian Rogers Company, Limited, except in the case of shareholders resident outside of this province or absent from Canada, who have to the 21st inst. The preference stock of the Canadian Rogers Company is being offered at par, with a bonus of 35 per cent. common stock, only to shareholders of Wm. A. Rogers, Limited, pro rata, at the rate of one new preferred share as against five (common and preferred) in the parent company. Wm. A. Rogers, Limited, guarantees payment of the preferred stock dividend of the Canadian company for ten years from April 1, 1914.

◆

At the annual meeting of Dunnville, Ont., board of trade officers were elected as follows: Honorary president, F. R. Lalor, M.P.; president, ex-Mayor Robert Bennett; vice-president, G. E. Parkes; second vice-president, A. G. Milne; treasurer, A. W. Hann; industrial commissioner, D. Hastings; publicity commissioner, Dr. G. R. McGuire; secretary, E. E. Anderson.

By order of the Board

W. S. HART,
Secretary.

Montreal, March 22, 1913.

TRINIDAD ELECTRIC COMPANY, LIMITED

Monetary Times Office,
Montreal, April 10th.

Notwithstanding the fact that the Trinidad Electric Company, Limited, in common with most companies doing business in the West Indies, did not experience as prosperous a year as was hoped, it managed to end the year by carrying a surplus forward to be added to the surplus at the beginning of the year. The financial report for the year 1912, as compared with that of the year 1911, is as follows:—

	1911	1912
Gross earnings	$222,277	$224,548
Operating expenses	108,621	115,956
	$113,656	$108,592
Bond interest	36,000	36,000
Net	$ 77,656	$ 72,592
Dividends paid and payable	58,200	58,200
	$ 19,456	$ 14,392
Directors' fees	2,000	2,000
	$ 17,456	$ 12,392
Accidents paid and provided for	10,000	2,000
	$ 7,456	
Other charges	1,368	
[illegible]	$ 6,088	$ 10,392
Previous surplus	152,063	158,151
Total present surplus	$158,151	$168,543

The authorized capital of the company amounts to $1,200,000, while the issued capital amounts to $1,164,000. The company also has $720,000 of 5 per cent. debenture bonds.

Among the items of the year to which attention was drawn was the completion of the ice plant, the cost of which was added to property and plant. During the year, the company had paid $9,189.92 out in settlement of claims for injuries. This amount came out of the reserve for this purpose, and, with the $2,000 appropriated from the earnings of 1912, left only $1,328.87 to the credit of the account at the end of the year.

CANADIAN JEWELLERS, LIMITED

Monetary Times Office,
Montreal, April 10th.

The Canadian Jewellers, Limited, at the first an meeting held a few days ago, was able to present a satisf tory report to shareholders. The early part of the year occupied in organization work and in altering the layout the factory, installing machinery and getting into or generally, to do business. The results of the operations the last half of the year were as follows:—

Gross profit from manufacturing and trading		$92,966
Commission and miscellaneous revenue		3,777
Total revenue		$96,74
Administration expenses, salaries, sales department expenses, etc.		$53,031
Net earnings		$43,71
To interest and accrued dividend	$23,002.17	
Added to depreciation reserve	12,500.00	
Added to accounts received reserve	6,622.90	42,125
Carried forward		$ 1,58

In connection with the dividend provisions, it may said that the dividends are those on the cumulative pre ence shares of the company and are only intended as an justment on the amounts received in payment for the s from shareholders commencing with the various dates u which payments were received and calculated to the en the year. The payments will be made at the first of June will level up stock subscriptions to the beginning of year, from which time all future dividends will date.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICES

SOVEREIGN COTTON MILLS, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 19th day of March, 1913, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in all kinds of cotton, woollen, linen and other goods, cloths, yarns, and materials and all by-products thereof and to build, acquire, erect, maintain and operate all kinds of mills, dye houses, print works, bleacheries and other buildings and plant in connection with any part of the company's business or undertaking; (b) To acquire and operate cotton plantations and interests therein and generally to carry on the business of a cotton planter; (c) To purchase, lease or acquire lands and interests therein and water powers and water privileges and power and to develop therefrom any power, electrical or other energy and to use the same in connection with the business, and to transmit the same, and to sell, lease or dispose of lands or interest therein or power and to enter into working arrangement with other companies, persons, firms or corporations for the use thereof, and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell and dispose of electricity, gas or power, light, heat and power, provided always that the rights and privileges hereby conferred upon the company to generate, sell and dispose of electrical energy for light, heat and power, when exercised outside the property of the company, shall be subject to all provincial and municipal laws and regulations in that behalf; (d) To sink wells and shafts and to make, build, construct, erect, lay down and maintain reservoirs, water works, cisterns, dams, culverts, main and other pipes and appliances and to execute and do all other works and things necessary or convenient for obtaining, storing, selling, delivering, measuring and distributing water for the purposes of irrigation and for the creation, maintenance or development of hydraulic, electrical or other mechanical power, or for any other purposes of the company; (e) To construct, maintain, alter, make, work and operate on the property of the company and for the purposes of the company, or on property controlled by the company, reservoirs, dams, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharves, buildings, shops, stamping mills and other work and machinery, plant and electrical and other appliances of every description; (f) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same, and generally to carry on the business of a land and land improvement and irrigation company; (g) To construct, acquire, manage, maintain, alter, charter, operate, hire, lease, sell, exchange or otherwise dispose of all kinds of ships, vessels, barges and boats, or shares or interests therein, and also elevators, sheds, warehouses and buildings, wharves, docks, dry docks and terminals, and for such purposes generally to carry on the business of shipbuilding, ship repairing, engineering, elevator, warehousing, navigation, transportation and terminal company, or any such businesses, and to manufacture and deal in engines, boilers, machinery and other appliances and things used in connection with any of the aforesaid businesses; (h) To manufacture and deal in logs, lumber, timber, wood, metal and all articles into the manufacture of which wood or metal enters, and all kinds of natural products and by-products thereof; (i) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (j) To purchase or otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To issue and allot as fully paid-up shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (m) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (n) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; MUNICIPAL MOVEMENTS

Regina's Bank Proposal—Halifax Tramways—Bond Bidding and Interest

Regina owns its waterworks plant, electric light plant and street railway system. Now it is proposed to establish and operate a municipal bank. This suggestion has been made by Alderman Wessel and is under consideration by the civic finance committee. To have a City of Regina Bank, an institution regularly chartered and doing a general banking business, but under the direct control of the city, is the suggestion of this alderman. One of the estimated benefits that would accrue to the city by such an arrangement is that the city could finance its undertakings at par instead of the discount which is now inevitable whether debentures or stocks are sold.

After the bank was in operation the city could take its own debentures, deposit them with the government as a reserve, suggests the Alderman, and it could obtain power to issue bank notes to the amount of the reserve. All these notes would be similar to the bank notes used by other banks and would be accepted as currency.

Some Doubt as to Scheme.

The city would let its contracts and pay its debts in its own bank notes. When Alderman Wessel made this suggestion to the civic finance committee, Alderman Peart enquired whether the bank would accept deposits from citizens and others, and was informed that the bank would be operated as other banks are, except that the city would deposit its own debentures with the government.

Some of the aldermen are said to be rather dubious about taking such a radical step as is proposed by Alderman Wessel, but the finance committee are to consider the matter.

By a vote of eight to five, the Halifax City Council rejected Mr. E. A. Roberts' offer of increased civic contribution from the Tram Company and reduction of light and power charges for a renewal of the company's exclusive franchise, and reaffirmed their position in favor of municipal ownership.

Debentures and Profits.

Berlin city council have consented to the issue of debentures amounting to $25,000 for an addition to the gas plant and construction of a trunk main in north and west wards, subject to the approval of the Ontario Municipal Board.

The first figures of Fort William's annual utilities report have been compiled, and although the report is not yet completed, it is found that the net profit on light will be some twenty thousand dollars while on telephone it will amount to over four thousand dollars. The usual deficit is being found in the operation and maintenance of the waterworks, but, it is believed that it will be less this year than before.

Legislature Gives Permission.

Ottawa city council has been given the right by the Ontario legislature to pass a by-law with two-thirds of a majority to issue debentures for $5,000,000 to better their water supply, which Ottawa intends to bring from the Gatineau Lakes.

The bill as a whole was sent on to the legislature, shorn of a clause that empowers the city to issue debentures amounting to $50,000 for a swimming bath. Outside the $5,000,000 there are expenditures for many other purposes.

Renfrew's bill enabling the town to consolidate its debentures and raise money by debentures for a water system and electric power plant was passed.

A bill to consolidate the floating debt of Collingwood, amounting to $17,000 and permitting the issuing of debentures for the sum was passed by the committee.

Raising Interest Rates.

Cities are now realizing the economic need of paying a higher rate of interest for the money required for civic development.

To effect an advantageous sale, the five million dollars of four per cent. bonds, approved by Vancouver ratepayers at the first of the year, will be resubmitted at a higher rate of interest. It is expected to put the by-laws before t people in May and July as was suggested last week.

Kamloops, B.C., by-laws to change the rate of inter reads as follows: Whereas it has been found impossi owing to the present condition of the money market to tain a fair price for said debentures and it is desirable amend the said by-law so as to make the rate of interest the said debentures six per cent. instead of five per cent. provided in the said by-law.

There were no bids received for the $163,000 5 per c 40-year debentures of the North Vancouver City Ferr Limited.

For the Estevan, Sask., $50,000 5 per cent. 30-year hi school, $30,000 5 per cent. 30-year waterworks, $25,00 per cent. 30-year sewer, and $25,000 5 per cent. 25-y year manufacturing establishments' debentures, no b were received.

North Vancouver district council has accepted an o from Messrs. J. P. Fell and Edward Mahon of a loan $15,000 cash necessary for payment by the municipality fore the annual meeting of the Burrard Inlet Tunnel Bridge Company can be held. This amount is 10 per c of the district's second subscription of $150,000. The l must be repaid before December 31, 1913, and will bea per cent. interest.

Brandon, Man., school board refused an offer of 94 5 per cent. 30-year bonds.

◆

DEBENTURES AWARDED

Holdfast, Sask.—$3,000 7 per cent. 15 years, to Hood La Company, Regina.

Brandon, Man.—$100,000 4½ per cent., to Messrs. B. Thompson and Company, Winnipeg.

◆

TORONTO MAY SELL BONDS IN MAY

"Considerably increased activity has occurred in C adian securities, and a general improvement in quotations l resulted. Government and municipal stocks, more especi the newer issues have been in demand for investment, a although prices do not show much change, the tone of market is certainly better."

The above paragraph appears in the last report of Coat Son and Company, forwarded to Toronto's treasu and indicates the change in the London money market resp ing municipal bonds.

Toronto's next issue of bonds will probably be mark at the end of May.

◆

MONTREAL FIRE PREVENTION COMMITTEE

To have in Montreal a fire prevention committee, the resolution adopted at a meeting of repres tives of various influential organizations of the city. meeting was presided over by Lieutenant-Colonel Smart the course of an address he pointed out that there was ur need of a remedy in the way of proper regulations w should be properly enforced. This course would be eff to diminishing the great waste of property by fire that M real suffers from under present conditions. Accordin figures presented at the meeting, Canada suffers ten t as great a loss by fire annually as any country in Eu The decision arrived at was that each organization r sentative should appoint three members to act perman on the fire prevention committee and that the conv should be the chairman of the local branch of th M facturers' Association. The representatives present w Messrs. George F. Benson and F. W. Evans, of the b of trade; Mr. S. D. Jaubert, of the chambre de comm Messrs. J. Brunet, Thomas Gilday, F. W. Sayer and R Werry, of the Builders' Exchange; Messrs. T. L. Mor T. F. Dobbin, W. E. Findlay, of the Underwriters' Ass tion; J. Rawson Gardiner, of the Architects' Associ and Lieutenant-Colonel C. A. Smart, Howard Murray, Wardleworth and H. T. Meldrum, of the Manufa Association.

FIXING THE PRICE OF MONEY BY ACT OF PARLIAMENT

The testimony of the experts, before the Banking Commerce Committee, has been damaging to the ry, held by some members of parliament and by a e number of borrowers in Western Canada, that the e of money can be successfully regulated by legis- e act. It has been a subject of complaint that the ks charged 8 per cent., and in some cases 9 per cent. nore, on loans at the branches in small Western ns and villages.

Certain members, holding the opinion that a 7 per . maximum would be for the good of the country, osed to have a clause to that effect incorporated in new bank act. But money is not the slave of govern- ts or parliaments. It refuses to be regulated—as world's history amply demonstrates. Regulation of price of money has been attempted by practically y civilized nation.

The wisest and most experienced countries aban- ed such attempts many years ago. They learned the policy of fixing a low legal rate injured bor- ers more than any other class.

When one takes the trouble to think over the ques- , it is easy to see that if the law were framed so as make it impossible for the banks to get more than er cent. on loans and discounts anywhere in Canada, borrowers in the Western Provinces are the ones would suffer the greatest injury.

After two or three years of strict operation of such w there would come down from the West an angry imperative demand for its repeal. One after the er the banking experts testified that if it was impos- e to charge more than 7 per cent., a number of branches in the West would be closed, as it would not pay to operate them. Expenses of all kinds pertaining to the establishment and operation of branches in the small localities of the West are high. To equalize the expenses it is necessary to charge higher rates than in the east.

The banks are merely dealers in money or credit. Dealing in credit is just like dealing in sugar, or flour, or tea, or coffee—in that the dealer will discontinue his operations if he is forbidden to make a profit.

If the local grocery man in a Western town could not lay down sugar at a less cost than six cents a pound, and the legislature decreed that sugar should be sold at no more than five cents a pound, the grocery man would not handle sugar while that law was in effect. The law fixing the price of money or credit would work in the same manner.

Take a small Western town under present conditions, with a branch of one of the chartered banks. The bank discounts at 8 per cent. for the local business men who are considered good. Farmers who are in good position also borrow at 8 per cent. We may count these borrowers as belonging to class one.

Then there are several business men and a goodly number of farmers who are not strong enough to qualify for class one. As the risk of extending credit to them is appreciably greater, the bank will not discount their paper unless they submit to an 8½ or 9 per cent rate. They submit, and thus they are able to borrow for their necessary requirements. That is the condition of affairs with the law as at present.

But certain members of parliament and others, being convinced that the borrowers in this town and in others like it are not receiving generous treatment from the chartered bank, bring their influence to bear and succeed in having parliament decree that nothing higher than 7 per cent. shall be exacted. What happens?

Does the bank branch in the little town promptly reduce its rate and continue to extend credit as before?

The executive of the bank may decide to keep the branch open; but even if the branch stays, there will be a radical change in its policy. All the borrowers who cannot qualify for class one are cut off entirely. The risk in connection with their loans is too great to put them on the 7 per cent. basis. So they get nothing from the chartered bank. Also, some of the weaker members of class one are required to pay up. Then the bank puts into force higher rates applying to transfers of money and for services performed by it; and probably it reduces the rate of interest allowed on deposits.

But if there is not much margin of profit at this point, the head office may elect to close the branch. Then appear our friends, the private bankers, who take over the premises formerly occupied by the chartered bank; and there they are, as large as life, ready to do business with the local people—but not at 7 per cent. They have an arrangement with a chartered bank in the financial centre of that district, whereunder the chartered bank agrees to advance funds to them at 7 per cent. on approved collateral notes with 20 or 25 per cent. margin. So, under the new conditions, bank money or credit is laid down in this town at a net cost of, say, 7¼ per cent. But these newcomers must have their margin of profit; and it is no light or small margin. Perhaps two or three of the best risks among the business men will get a 10 per cent. rate. No one else can borrow under 12; and many of the farmers are obliged to pay 15 per cent. And that is not all. These newcomers make a specialty of chattel mortgages, assignments, etc., etc. When you go to borrow from them you will be invited to execute something of this nature—and, of course, there is a healthy fee or commission to pay. And when their high interest rates, fees, commissions, etc., have nearly eaten up the equity of a poor borrower in his farm, they may dispossess him and take his property for themselves.

This little picture illustrates one way in which fixing the price of money by act of parliament does not operate to the advantage of the borrowing classes.

OUTLOOK FOR CUSTOMS REVENUE

According to the unrevised figures published in the Canada Gazette, the total revenue of the Dominion for the fiscal year just ended was $165,528,137. The revenue for the fiscal year ended March 31st, 1912, was $132,745,386; and the increase is, therefore, about $30,000,000, or 25 per cent. It is noteworthy that the customs revenue in the past year represented 68 per cent. of the Government's total receipts, as against about 65 per cent. of the whole in the preceding year. On comparing the customs revenue for 1912-13 with the record for 1911-12, it is seen that the increase amounts to, roundly, $26,700,000, or 31 per cent.

These figures naturally draw one's attention to the huge imports of merchandise which serve as the basis or foundation of the great increase in revenue. Canada's total foreign trade in the fiscal year crossed the billion dollar mark for the first time. Of the foreign trade for the fiscal year, roundly two-thirds were imports and one-third was exports. The excess of imports was, roundly, $300,000,000. This excess compares with an excess of $220,000,000 in 1911; an excess of $154,000,000 in 1910; an excess of $79,000,000 in 1909, and an excess of $35,000,000 in 1908. The year 1908 may be taken as the commencement of the present era; and the excess of imports shown each year may be taken as largely influenced by Canada's borrowings abroad and the general movement of capital to this country.

There was in the preceding era, as in this, a gradually rising excess of imports, and a gradually rising national revenue. Thus in 1903 the excess of imports was $31,000,000; in 1904 it was $56,000,000; in 1905, $52,000,000; in 1906, $73,000,000; and in 1907, $128,000,000. The movement of capital towards the Domin was temporarily checked by the tight money of 19 and monetary stringency at the world centres, thro its action on the flotation of new securities, eventu produced in 1908 a drop of $70,000,000 in our impo and at the same time it had a tendency to stimulate export business.

One naturally, therefore, looks somewhat clo at the latest statistics of the customs revenue to disc whether the monetary stringency of the past six mon has had any marked tendency to check the increase the monthly collections. Taking the fiscal year a whole, as remarked above, the showing is emine satisfactory. An increase of nearly a third, over figures of the preceding year, must be counted favorable, indeed. The Balkan war broke out early October; and on the 17th of that month the Lon bank rate was pushed up from 4 to 5 per cent. Bank of France also raised its rate on the 17th Octob and since then money has ruled high enough at Lon and other European centres to discourage all but nec sitous borrowers.

Now let us see in what manner the check to borrowings has affected the customs collections. So as monthly increases are concerned, the best show in the past fiscal year was made in July. In that mo the customs revenue was $9,950,000, as against $6,88 000 in July, 1911—the increase being $3,069,000, about 45 per cent. In August there was an increase $1,955,000, or 25 per cent.; in September, an incre of $2,100,000, or 27 per cent.; in October, $2,202,0 or 28 per cent.; in November, $2,432,000, or 35 cent.; in December, $1,840,000, or 27 per cent.; January, $2,614,000, or 41 per cent.; in Februa $1,720,000, or 24 per cent., and in March, $1,748,0 or 22 per cent.

Thus, from August to the end of November th was a steady rise in the ratio of increase. A consid able drop occurred in December, but the figure was ba near the high record in January. A sharp drop to place in February, and a further drop in March. T closing months of the year show the smallest ratio increase—the March ratio being just half the ratio sho in July, 1912. It is reasonable enough to attribute fall to the monetary stringency in Europe and at ho in this country. As conditions have not been favora for the placing of loans in London, the borrowing porations in Canada have been less disposed to imp machinery, iron and steel goods, and other dutia goods for direct or indirect use in construction wo At the same time the limitations imposed by the ban on borrowers at home would have a tendency to prev importers bringing in more merchandise than they abs lutely needed.

It is to be remembered that when the stringen made its appearance the importing merchants and co porations would be under engagements or commitmen in respect to certain transactions which would, perhap require several months for completion. That is to sa they would have orders outstanding in process of exec tion. So it might be four or five months before check to the import trade became particularly noticeabl

At this point arises the question, What are t revenue prospects for the current year? At the time writing it does not appear probable that the custon revenue for 1913-14 will show an increase of 30 per cen over that for 1912-13. An increase of 30 per cent. o last year's figures would produce in 1913-14 a total cu toms revenue of over $146,000,000, or say an averag of $12,000,000 per month; and, taking the custom revenue at 70 per cent. of the entire income of treasury, total receipts of $210,000,000 would be in dicated.

The chances are that the actual results will f short of those figures. The effects of the monetary shor age may be seen in the first quarter of the new fisca year. The banks are not yet encouraging their importin customers to cut loose in the matter of bringing dise from abroad. So it would not be strange if ng the early summer the ratio of increase in customs nue should show further declines. But when the ook for the longer future is considered, it is advis- to take into account that the Balkan war is prac- ly ended, and that the European markets are appar- moving into an easier situation; that the immi- ion movement into this country has a marked ten- y to cause increased imports; that the influence of 1913 crops may be important in the same direction; finally, the effect of the proposed United States f revision.

AFTER NINE YEARS

Toronto's citizens are to-day recalling the con- ation of April 19th, 1904, just nine years ago.

The Queen City has witnessed a wonderful expan- of its limits since then, and many improvements have made so as to guard against a recurrence of such saster. But its individual citizens have not yet ned all the lessons they should have done from that y experience.

The existence of the remaining bare walls and blank es do not permit of their forgetting the catastrophe. following figures from Toronto's fire department's rns show the waste from fire, despite the efficient ts of Fire Chief Thompson and his band of fire- ers with their modern appliances:—

	Losses.	Insurance.	Alarms.
......	$10,956,546 35	$10,899,716 65	771
......	448,664 04	2,246,486 66	779
......	667,247 35	3,679,744 60	854
......	1,107,542 49	5,315,145 00	1,061
......	1,073,989 93	4,218,783 00	975
......	740,931 78	2,531,741 75	1,103
......	259,741 36	3,036,631 00	1,267
......	447,988 84	3,751,095 00	1,593
......	1,103,684 00	5,395,566 00	1,670

The waste throughout the Dominion is revealed by e figures from *The Monetary Times* fire record as w:—

1909	$18,905,538
1910	23,593,315
1911	21,459,575
1912	22,900,712
1913 (three months)	7,661,527
Total	$94,520,667

Added to this must be the destruction of nearly o lives, while the following returns show losses sus- ed during a twelvemonth by representative Canadian s from the latest available returns:—

Toronto, Ont.	$1,103,684
Winnipeg, Man.	775,486
Halifax, N.S.	336,753
Victoria, B.C.	139,596
Regina, Sask.	139,120
St. John, N.B.	108,374
Fort William, Ont.	106,423
Calgary, Alta.	71,737
Kingston, Ont.	41,053
St. Catharines, Ont.	14,060
Red Deer, Alta.	9,185

These totals show the need of a fire prevention paign throughout the Dominion. The Ontario Fire vention Association, the Montreal Fire Prevention nmittee, the Board of Railway Commissioners, the estry Departments, St. Maurice Forest Protection ociation, together with the Canadian fire insurance panies with several other bodies, are doing their e, but the individual Canadian citizen must be made ealize his responsibility in this matter before the best lts can be obtained. The elimination of the factor of carelessness in the individual, in the construction of buildings, and also in the inspection of buildings by municipal and insurance officials will also greatly help in the reduction of this waste, which is now of such large dimension.

Every reader of these words should realize their assistance is needed; therefore, in the words of the Ontario Fire Prevention Association:—

"We urge you to see that your premises are clean and in proper condition as regards fire hazard.

"Remove all inflammable litter, giving special attention to basements and cellars.

"Inspect your lighting, heating and power equipment; also your fire escapes and fire protective appliances."

SMALL CHANGE

It is unfortunate that the passing of the Bulk Sales Bill was again delayed in the Ontario legislature last week. The proposed act embodied much needed reform in circles where credit is granted. Considerable credit is granted in Canada from coast to coast, more than in the majority of countries. Consideration of the proposed Ontario bill has been again deferred for a year. It is to be hoped that it will then become law.

* * * *

"Let Canadians be true to themselves, remembering that the maintenance of Canada's credit in the London money market is vital," said Sir Frederick Taylor a little time since; that is, the credit of the Dominion, the credit of provinces, its cities, towns and municipalities and its commercial and industrial spheres. A phase of financing which will in due time affect this credit to a considerable extent has been noticed by *The Monetary Times* during the period of tight money.

Tenders for public works have been called for by municipal administrators. These have been opened. The successful contractor has then been told that the exchequer was empty, or practically so, and payment would be made in bonds of the municipality. This cannot be too strongly condemned, for the results of such financing are obvious, and are detrimental to efficient work and progress, as well as damaging the future credit and standing of the municipality.

◆

BANK OF BRITISH NORTH AMERICA

The Bank of British North America's strong position is revealed in the seventy seventh annual report and balance sheet which appears in this issue. The following items show the favorable progress being made by this conservative institution:—

	1912.	1911.	Increase or decrease.
Reserve fund	$ 2,020,000	$ 2,774,000	+ $ 146,000
Deposits	39,452,980	36,067,708	+ 3,385,272
Notes in circulation	4,767,706	4,411,506	+ 356,200
Cash in hand	6,624,619	7,177,236	- 552,615
Cash at call	11,306,757	10,067,432	+ 1,239,325

Especially is this evident when it is remembered the figures for 1912 are only for an eleven month period, the accounts being closed on November 30th instead of December 31st. In 1910 the bank made $554,800 profit, in 1911 $627,800, and for 1912 (11 months) $678,507.

The chairman, in speaking of conditions existing in Canada, said: The general prosperity of the country is no doubt due in the main to the basic conditions which have caused the great progress of the country during the past few years, i.e., a rapidly growing population and ample supplies of fresh capital. It would not be wise, however, to overlook the fact that the activity of trade has been stimulated to some extent by the spending of profits arising out of real estate transactions, nor can it be expected that profits on the same scale from this source, as well as the expenditure they give rise to, will continue indefinitely.

◆

The following securities of the Smart Woods, Limited, were listed this week on the Montreal exchange: 15,000 shares common and 15,000 shares preferred stock.

THE DOMINION'S PROGRESS AND EXPANSION

Much Publicity and Comment as to Canada's Growth —Critics Who Have Not Seen the Country —The Situation at Saskatoon

BY A. E. BOYLE.

Canada's progress, prosperity, and expansion has been the subject of much publicity and comment.

Criticisms have been made, only to be refuted, or to die naturally. Such having been proved to be made in ignorance, or for a personal motive, or with malice intent.

Half truths though worst of all, have also been successfully combated.

Western Canada has been maligned repeatedly by those who have judged the conditions in this new land by old world standards, and by those whose attacks have been called forth by the subdivision craze, which has been a black spot. But Canada's business and financial interests, its banks and indeed all who have its interest at heart have issued repeated warnings regarding it to all and sundry. And this has been offset by resources, advantages and solid growth and other points too numerous to mention. So that the attacks aforesaid were altogether uncalled for and unnecessary.

Saskatoon is a Thriving City.

I have just concluded a careful investigation of actual conditions in Saskatoon, and am presenting the information for the purpose of setting at rest any misleading rumors that have gone abroad respecting this city. This is furnished without argument and without any desire to make out a case. The information can be verified by anyone who chooses to visit Saskatoon or by correspondence with any reliable institution or business man there.

I would begin by insisting that Saskatoon is a thriving city, and make no apologies for employing that term. Evidences of thrift are to be seen, in spite of the exploitation of resources reflected in real estate operations. The city has been satisfied to make progress every year, without attempting to become a metropolis over night. It has been able to recount a series of good years since its growth began ten years ago. It is still making progress.

There is no boom at the present time, and it is unlikely that there will be one in the near future. The men who are furthering the best interests of the city discourage booms to the extent of their influence. They rely on the steady and regular upbuilding which constitutes the real strength of any community.

Banking and Loaning Condition.

But if any man imagines that general business is bad in Saskatoon, he is due to receive an awakening.. The ordinary transactions which go to make up the round of trade from month to month, and which furnish the best criterion of a city's progress, are being carried on now with as much vim and confidence as at any time in the past. In some lines there is a keener activity, but in order to be moderate it may suffice to declare that as far as the current movement of merchandise is concerned there is no sign of a reaction. The supply of money is the next item of importance, and it is a big factor in a community which can absorb as much money as Saskatoon has received during the past few years.

Bankers told me that they were furnishing all the money that was required for the purpose of assisting or encouraging sound business propositions. What more could be expected? Loan company managers remarked that collections on city mortgages were as good as at any time in the past, and were slightly more encouraging at the moment than those on farm loans.

One well-posted official said that his company's receipts on collections during March showed an increase of more than 100 per cent. as compared with the same month last year. He was ready to put out more funds, because it was the policy of the company to encourage home-building. The volume of his business was showing a steady and encouraging increase.

Maintenance of Production.

The maintenance of a large volume of production in and around the city is a weighty consideration, for Saskatoon depends upon it for her future prosperity. Any man who has the proper proportion of red blood in his veins must admit that Saskatoon has nothing to fear in this connection. The territory adjacent or tributary to Saskatoon is as fair a land as was ever touched by a plough, and its fertility is bringing forth greater revenues every year. Such facts need only to be stated, in order to carry conviction. But if detailed confirmation be required, a study of the official figures of agricultural production as furnished by the government of Saskatchewan at the close of each season will give it. I was keenly interested during my recent visit, in the crowds of settlers and other new[illegible] who made pedestrianism on the station platforms a [illegible]. A passenger agent of one of the railways told me that these Canadian fledglings were bound for one other of the small towns which surround the city in every rection to take up land and increase agricultural productio Every day there was an additional squad, and only one inf ence was possible. Until such time as that stream of pop lation ceased to flow, there was plenty of foundation for Sa katoon's confidence.

Municipal Financing and Developments.

The position occupied by the municipality in its relati to the purse of the world is worthy of notice. Saskatoon h been faced with a tremendous task in finding the facilities a conveniences demanded by the people of a new big city. Wh the population insists on doubling within a year there is to be a problem in municipal government for the men have sought the support of the electorate. The expenditu have grown at an enormous rate, but they have not kept p with the benefits conferred through the outlays thus mad And they have not caused financial appendicitis at the ci headquarters. The mayor of the city has just returned from conference with the management of the Bank of Montreal the head office of that institution, and he brings the assuran of funds for the city's spending operations during the curre year. The municipality has arranged to expend $1,500,000 public works during the season, in the form of capital outla besides carrying on the numerous regular activities which n form the business of municipal administration. If th[illegible] any weak spots in the general situation at Saskatoon, the Ba of Montreal could be trusted to take notice of them, and t assurances from that institution have been received with gra fication on the part of all those who are determined to maint the reputation of this city.

SASKATOON'S COMMERCIAL CONDITIONS ARE HEALTHY

Now that spring is actually here there is greater busin activity, and while no doubt the lack of ready money is havi its effect, commercial conditions, I regard as being in healthy state. During this month a certain amount of liqui tion should result from the money brought into the coun through immigration, the movement of grain with the openi of navigation and the release of a large amount of money the sale of debentures by the municipalities and provin which have been borrowing from the banks, is how Mr. W. Kirkpatrick, of Bank of Commerce, Saskatoon, sums up c ditions.

The bank clearings for the three months show an incre over 1912. In view of the fact, too, that in February March last year real estate activity was at its height, w this year one may safely state the clearing figures repres solely the commercial expansion.

The building trades should prosper this year as a la number of buildings commenced last year will not be c pleted before midsummer, and the anticipated buildings this year will run pretty close to the figures of last year, th is, of course, the possibility that some of this proposed bui ing will be delayed because of the difficulty of obtaining fun on mortgage loans.

There is considerable grain in the country elevators, farmers' hands, in this district yet to be shipped.

There is every evidence that the scarcity of money make more producers this year, parties who had left th farms returning to them, and farmers adjacent to the city purchasing cattle, therefore, mixed farming is getting a st

Wholesalers report improved collections, and the lo merchants report trade up to expectations.

Seeding will commence about the fifteenth which is l but I am of the opinion that conditions will be ideal beca there will be sufficient moisture in the ground to carry crop to the June rains, and the growth will be very rapid

PRICES ARE STEADY AND FIRM

Wholesale prices in Canada in March were on the sa general level as in February, and only a little higher than March last year. The department of labor's index numb stood at 135.5 for March, compared with 135.4 in Febru and 134.8 in March, 1912. These numbers are percenta of the average price level of 272 commodities during the cade 1890-1899. A considerable decline in coke was offse advances in furniture and earthenware. Important increas also occurred in animals and meats, boots and shoes, i and steel bars, picks, crowbars, etc., gasoline and coa and lumber. Decreases were reported in grains and fodd dairy products, fresh vegetables, brass, copper, silver and zi linseed oil and rubber. The feature of the month in re prices was the general decline in eggs, and numerous vances in meats in eastern Canada.

IN THE INSURANCE ARENA

oronto Life Underwriters—Canadian Life Insurance —Edmonton's New Association

"The Earning of Money by Proper Education," was the ject of an epigrammatic address given by Mr. A. L. yd at the mid-day luncheon of the Toronto Life Underters' Association on Thursday last. Mr. Boyd remarked t education proper consisted of (1) the acquisition of owledge; (2) the full development of the faculties, physi-, mental and moral. The insurance man said he could y achieve what he could conceive. A vote of thanks proed by Mr. J. A. Tory, of the Sun Life Company, and secled by Mr. T. B. Parkinson, of the Aetna Life Company, s tendered the speaker.

Mr. A. Homer Vipond, of Montreal, has been appointed irman of the topics committee of the National Association Life Underwriters, succeeding Mr. W. Van Sickle, of troit.

urance Beginnings in the Dominion.

The first Canadian life assurance company was chared in 1847 and for twenty years had no Canadian comitor. In 1868 the second company entered the field and the early 'seventies four others, but the growth of all s rather slow in those early pioneer days. In the 'sixties l 'seventies the greater part of the business was in the nds of the British and American companies. For exple, the new assurances effected in 1869 were as follows:

Canadian companies	$ 1,156,855
British companies	2,627,392
American companies	9,069,885
Total	$12,854,132

From this small beginning has grown up a great and sperous business. The new assurances effected in this d in 1911 by 26 Canadian, eight British and 13 American npanies were:—

Canadian	$110,077,453
British	5,591,832
merican	61,197,694
Total	$176,866,979

reased Twofold, Sevenfold and Hundredfold.

In those forty-two years the new business of the British npanies has a little more than doubled, that of the Ameri- companies has increased nearly sevenfold, and that of Canadian companies nearly one hundredfold, writes Mr. F. Junkin, manager for the United Kingdom of the Sun fe Assurance Company of Canada, in the London Finanl Times. Not including the assurances carried by assment and fraternal societies, the total assurances now in ce in Canada amount in round numbers to one thousand llion dollars, of which about two-thirds is in Canadian npanies. Speaking generally, both the total new assurces and the total amounts in force have just about ubled every decade since the year 1881 to 1911. Taking o consideration great industrial development and rapid pansion in all lines, it is not at all unlikely that this rate progression may be maintained for some decades to come perhaps increased. In the one year 1911 the increase in w assurances effected in Canadian companies showed an crease of almost twenty million dollars, which is more an the increase during the whole fifteen years from 1886 1901 and more than the total effected in these companies 1886.

monton's Fire Association.

The officers of the newly formed Edmonton Fire Insurce Association are:—President, R. N. Frith; secretary, A. Davis; committee on rules and constitution, essrs. Robert Mays, E. C. Chauvin, O. A. Davis, E. C. pe and E. F. Racey. At the organization, Mr. H. H. Mot-, of Calgary, discussed the insurance act, recently pass- by the Legislature of Alberta. He explained that the vernment, through its secretary, will appoint a superindent of insurance at a salary of $3,600 a year to see that e act is carried out and that every agent is registered and mpetent to carry on insurance business in Alberta. The sociation will invite the Calgary union to join it in formg the Alberta Fire Underwriters' Association.

tters Patent Insurance.

An innovation in the species of risk covered by insurce is introduced by the Letters Patent Insurance Comny, London, Eng., which came into existence last year. itherto the way of the inventor has been beset with many fficulties. Even when an article has been patented after uch trouble and research, it has not always been possible r the inventor, if a man of limited means, to protect his design to the desired extent. Moreover, much disappointment has been caused and time and money lost in the preliminary steps to the patenting of inventions that have been found of insufficient utility or novelty. The object of the Letters Patent Insurance Company is to issue a number of policies by which a patentee or manufacturer may insure himself against almost every risk connected with patents, registered designs and trade marks. The company offers its services to everyone concerned in any way with an invention or manufacture, and undertakes, where advisable, to put at its client's disposal the best legal talent at home and abroad.

IMPROVING MONTREAL'S HARBOR

Monetary Times Office,
Montreal, April 17th.

There is every evidence that the new harbor commissioners of the city of Montreal will carry on the work outlined by the former board of commissioners and conducted by them successfully. The programme of improvements begun by the old commissioners was estimated at a cost of $6,000,000. The present commissioners propose to spend at least $2,000,000 this year. The second stage of the work of development will now be proceeded with.

Last fall the old commissioners had begun the work of diverting St. Mary's Current, and for the next two years every effort will be made to accomplish this object, the current having ever been a menace to navigation in the harbor. It is thought that it may take six or seven years to complete this work. When completed, tht harbor will practically be a still water harbor, only sufficient water passing through to keep the water fresh. Included in the programme is the removal of what is known as Moffat's Island. Work on this was started last year. It is one of the biggest undertakings in the entire scheme.

A number of the large steamship piers will have 250 feet added to them. Although work will be started on these piers this year, it will not likely be completed for some time.

Additions are also being made to No. 1 elevator, the contract fo this having been let by the old harbor board. Conveyor galleries for the big No. 2 elevator will also be completed. New sheds will be erected at Maisonneuve. Railway tracks will be ballasted, and further work will be carried on at the drydock. Altogether, the harbor commissioners have quite an elaborate programme under way.

It is interesting to note that the season of closed navigation which came to an end towards the end of last week, was the shortest in the history of the port of Montreal. Navigation was officially closed on January 3rd, and on April 11th it was re-opened. The longest closed season would seem to be back in 1893, when navigation was closed on November 26th and was not opened again until April 25th, the harbor being thus frozen up for five months.

GENERAL ACCIDENT ASSURANCE COMPANY OF CANADA

The General Accident Assurance Company of Canada's seventh annual report reveals the progress this company is making.

An increase in the total income amounting to $30,316 is shown in the figures for the year ended December 31st, 1911, being $301,416, and those for the year ended December 31st, 1912, made up as follows:—The premiums, less cancelments, returns and reinsurance, etc., amounting to $321,686.97, interest of investments $10,045.71, making a total income of $331,732.68.

The expenditure for claims paid, and reserve for claims outstanding amounted to $156,552.26. The amount paid for commissions and expenses amounted to $135,287.84, making a gross expenditure of $291,840.10, and in addition, the reserve for unexpired risks was increased by $10,340.33, leaving a balance at the credit of the revenue account, of $29,552.25, which, added to the balance carried forward from the previous year of $70,202.49, less a dividend of $10,000 paid during the year, makes the total balance at the credit of the revenue account, $89,754.74.

The company's assets amount to $273,000, and consists of bonds, etc., valued at $218,831. Deposits with Accident Underwriters' Association, $250; interest accrued sundry debtors, $612.85; cash in bank and in hand, $10,492.71; bills receivable, agents' balances, outstanding premiums (less cost of collection), (reserve on above included in liabilities), $34,996.38; furniture and fittings (less depreciation), $3,243.09.

The progress of the company shown above reflects a continuance of the conservative managerial guidance of Mr. J. J. Durance in the various operations during the past year.

INVESTMENT OF LIFE INSURANCE FUNDS

I.

The Importance of a High Rate of Interest

(Continued.)

BY M. P. LANGSTAFF, A.I.A., F.A.S.

In the article which appeared in last week's Monetary Times the percentage holdings of all companies reporting to New York State were given. In the table below similar ratios are shown for all (198) United States companies doing ordinary business. Thus 3.9 is the percentage which the value of the combined real estate holdings of all regular life companies in United States bears to the total admitted assets of these companies. But by taking these percentages, we do not necessarily arrive at the investment policy of the average company. The enormous assets of the gigantic companies form such a large percentage of the total assets, that what we have obtained is the average for such companies. This is borne out in the table below, where I also give the percentage holdings of the ten largest companies:

It is seen that the total assets of the ten largest companies are approximately 79 per cent. of the total assets of all companies, and, moreover, that the percentage holdings of investments are practically the same.

No Proof That Small Companies Follow These Lines.

But this is no proof that the investment policies of the medium-sized or small companies follow along these lines. The investment policy of a medium-sized or small company might differ radically from that of these large companies, but little or no change would be made in the ratios of the combined companies. To set out these facts, I have again taken the year book, and computed the percentages of investment holdings of different groups of companies, according to their assets. These groups have been rather arbitrarily selected, but suffice, I believe, to show the point in question. For instance, column (1) deals with the whole 198 companies, as given above; column (2) with the ten largest companies, also given above; while column (3) deals with the twelve companies following, with assets ranging between 20 millions and 60 millions; column (4) with the next 11 companies with assets between 6 millions and 19 millions; and so on.

Considering firstly real estate, we find our ratios rise from 3.2 per cent. to 7.91 per cent and then decline to 3.93 per cent. This is in accordance with what we might expect. With the largest companies—the three largest of which belong to New York—the real estate holdings allowed by law must necessarily form a small percentage of their immense total assets. In those groups with smaller assets, the percentage, as might be expected, is greater. Most of these companies have expensive office buildings and also their share of foreclosed real estate mortgages. As we approach the companies with small assets, the percentage declines, as numerous of the smaller companies will not ov their head office premises, and, moreover, the younger co panies will not have been in the investment field a sufficie length of time to possess many properties, acquired by for closure.

Turning to mortgages and bonds, we find such a co tinual and pronounced rise in the percentages of the form and such a continual and pronounced fall in those of t latter, that any doubt we may have had as to there being relation between the size of a company and its investme policy at once vanishes.

It cannot be said that the same tendencies would shown were a similar investigation applied to the Canadi companies. This can be explained from the fact that th are too few to make good average groups, and hence t personal element of individual companies would enter largely into the ratios.

Explanation Re Bonds and Mortgages.

To explain the preference of the smaller companies f mortgages, and the seeming preference of the larger com panies for bonds, the following reasons, among others, m be given:

It has been definitely ascertained that mortgages, the average, yield a better rate of interest than do bond Young companies are naturally anxious to make the highe possible rate of interest on their funds, and must do so compete successfully against the larger companies with the low expense rates;

Companies with enormous funds find difficulty in o taining sufficient suitable real estate mortgages. Even they did so, it might lead to over-investment in a certai locality, and a depreciation of land values in that localit would work much havoc;

Very possibly a larger proportion of the smaller com panies are located in advantageous localities for mortgag loaning;

Large companies doing an extensive foreign busines require large bond holdings for government deposits;

Conversely, a great many of the smaller companies a not organized in various States, and require fewer bond (in proportion) for this purpose;

It is reasonable to expect that some of the larger com panies are very closely associated with bond-houses;

The larger companies invested in long-term bonds the nineties, and other years, when the interest yield mortgage loans was low. Many of these bonds they st hold;

Mortgage loans have proved more popular during r cent years, and the increased investments therein of th younger companies will show more perceptibly in the ratio than will be the case with the larger companies;

It is necessary for the larger (and older) companies keep a higher percentage of their funds in investments tha are readily realizable, to allow for the payment of the greater proportion of death claims, matured endowments

(Continued on next page, foot of second column).

CONFIDENCE IN WESTERN CANADA AND ITS FUTURE

Is Expressed by Well-known Winnipeg Banker in Course of an Interview with The Monetary Times

"While there is little or no money here for speculative or investment purposes, business along agricultural and commercial lines seems to be getting on fairly well, and I have not heard of any curtailment of credits for any of this class of business," stated Mr. C. W. Rowley, the well-known Winnipeg banker, to The Monetary Times in the course of an interview relative to Western conditions.

"There is no doubt that there is a world-wide financial stringency, but I doubt very much," said Mr. Rowley, "if conditions are any different here from what they are in Europe, and it means that those who are in charge of all the large businesses must see that, owing to the world-wide financial stringency, there is no unnecessary extravagances or uncalled for expansion until the general stringency eases up,—if one can judge from municipal and government sales that have been made in London, it would seem as though there was a general improvement in this market for Canadian securities. On the other hand, municipalities should not attempt for some years to float unnecessary issues, I mean by this, issues that are for the purpose of supplying what are more or less luxuries, but should confine their attention solely to the absolute necessities of municipal development and improvement, which owing to the growth of the country will be large.

People Have Been Warned.

"It seems that there are a great many people who have been looking and hoping for a panic in Canada, which has not materialized, nor do I think it will as long as conditions remain as they are, for by our system these things are now able to be taken in time and thus a great deal of loss and damage is avoided. Then, too, there has been damage done from over-speculation in sub-divisions. The people, however, have been warned of this so often and so publicly during the last four or five years that if they are taken in, they are very much to blame themselves. People from older communities must not forget that the rapid development of this country means the frequent re-adjustment of farm and city land values, which is hard to realize from old world eyes.

"Now that the public have realized that the financial stringency is a matter over which they have no control, and that it comes from without rather than from within, they have begun to find out that there is nothing so contagious or disturbing to the commercial world as a sense of fear, which if permitted to hold sway for any length of time, results in a general business depression. This sense of fear has been practically removed during the last month or six weeks by instances of renewed confidence in this country both by England and the United States; this is shown in the recent sale of high-class securities. Add to this the ever-increasing immigration. Returns last year show immigration into Canada of nearly 425,000 and we understand from the commissioner of immigration that this year the prospects are that there will be between 450,000 to 500,000 come to Canada to make their homes. We further understand that the class of immigrants coming this year is better than heretofore. When the amount of immigration that we have to-day to absorb and take care of, the amount of money they bring in actual cash, plus effects, their producing power and the amount of money needed to house and take care of them, is considered, you will readily understand that the expansion of Canada from year to year must increase. Nothing can hold back Canada so long as this living stream of industrious men, women and children continue to flow into this country, opined Mr. Rowley. It may be necessary for us to slow down once in a while and take stock, but with the above conditions and barring European troubles, development, prosperity and progress must follow. This is looking forward and not backward, and improvements come with Cans not Can'ts.

Room in Canada for Producers.

Canada has room for producers, manufacturers, creators and agricultural and industrial workers, who can get and hold down a good job, and, if one can judge from the class of immigrants seen at the stations and immigration offices and on the streets, we are getting an enthusiastic lot of men and women.

Enthusiasm oils the wheels of commerce and makes the clogs slip around without jarring. Enthusiasm, or as some call it, optimism, is the road bed upon which the Express of Business makes its best run, makes great deeds possible and brings progress and success in both municipal and individual affairs.

Probably the greatest business barometer is the Canadian Pacific Railway; the public press has stated that they propose to spend in the West the largest amount for extension expended by any one railway on the American continent, and it is the greatest amount ever devoted to construction work by any one road in any one year. In addition to this they propose to spend considerable in their irrigation work at Calgary.

That Sir William Mackenzie expects to lay 600 miles of new track this year for the Canadian Northern Railway, and also that Chairman Smithers, of the Grand Trunk and the Grand Trunk Pacific, expects to join the east and the western lines this autumn unless labor troubles interfere. This means that these great feelers of the public pulse confidently expect enormous development in this country and are preparing for it.

Prospects and Some Needs.

Questioned as to the future, Mr. Rowley's reply was: I have no hesitation in saying that Western Canada finds her people happy and prosperous, with comfortable homes, the standard of living high, and with confidence in the future. In the many resources of Canada lies her strength. She can never be left high and dry by the low price of any single commodity or class of commodities. The foundations of her prosperity are laid broad and deep. We, like all other countries, will have our periods of depression, unscrupulous promoters, etc., but notwithstanding this each ten years will show a decided improvement in general conditions and material development. There needs, however, to be a decided effort put forth to assist and encourage diversified and intensive farming and good roads. Good roads would materially reduce the cost of marketing all products of the farm. It is my opinion that it costs the farmers of Western Canada almost as much, if not more, to haul their crops to the elevators or railways over bad, and at times, almost impassable roads, as it does to ship the grain from the elevators to Fort William, and the saving to the country generally would more than offset the cost of good permanent highways.

◆

INCREASES OF CAPITAL

The capital stock of the Brandon Construction Company, Limited, has been increased from $20,000 to $60,000 by the issue of 4,000 new shares of $10 par value.

The capital stock of the National Securities Company, Limited, has been increased from $25,000 to $85,000 by the issue of 600 new shares of $100 each.

The capital stock of the Lowe-Martin Company, Limited, has been increased from $20,000 to $70,000, such increase consisting of 500 shares of $100 each.

The capital stock of Ladies' Wear, Limited, of Toronto, has been increased from $100,000 to $250,000 by the creation of 1,500 shares of new stock of $100 each, of which 750 are preference shares.

The capital stock of the Westport Manufacturing and Plating Company, Limited, has been increased from $20,000 to $50,000 by the creation of 300 shares of new stock of $100 each.

The capital stock of the Manitoulin Island Rural Telephone Company, Limited, has been increased from $[illegible] of $7,000 by the issue of 100 shares of new capital stock of $50,000.

INVESTMENT OF LIFE INSURANCE FUNDS

(Continued from previous page)

policy loans, cash surrenders, and so forth.

The ratios of policy loans do not call for explanation. They run as might be expected.

One point might be referred to, and it will hold true for any of the groups, viz., that if one or two of the companies have a very pronounced and similar investment policy, but one differing from those of the other companies in the group, considerable change in the average of the group would be effected. However this may be, we may ignore it for present purposes, as I do not think any change of importance would be shown in the general trend of the ratios given above.

Considerable profit could be obtained by those in charge of our younger companies—and others too, perhaps—by studying the past experience and history of different individual companies. For instance, we might ask ourselves: "What has been the investment policy of this or that company?" "To what extent has it affected the success of the company?" Assuming its investment policy has been a success, "Has this success been aided, e.g., by advantageous location, by peculiar conditions of the money market, by the popularity of certain forms of investment in certain years, by the rate of growth of the company, or by other peculiar conditions?" "What would be the possible effect of the same investment policy, applied under the same or different conditions in the future?"

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions Dividends and Future Plans

Richelieu and Ontario Navigation Company.—The Prudential Trust Company have been appointed transfer agents for this company, and the Royal Trust Company have been appointed registrars. Above appointments to take effect at the opening of business April 21st, 1913.

Duluth-Superior Traction Company.—Earnings of the Duluth-Superior Traction Company for the first week in April came to $23,385, an increase of $1,642, or 7.6 per cent., over the corresponding week of last year. Earnings for the year to date are $297,073, a gain of $17,453, or 6.2 per cent., over the corresponding period of last year.

Maritime Lumber Company.—Directors of the Dominion of Canada Trust Corporation, the main asset of which is the Maritime Lumber Company, admitted to shareholders that the Canadian lumber business could not be managed from London. They were negotiating, they said, with three different groups in Canada to buy the concern. The shareholders approved the report.

Goodwins, Limited.—A special meeting of shareholders of Goodwins, Limited, will be held immediately preceding the annual meeting, now fixed for May 14, when a resolution will be submitted asking for authority to increase the board of directors from 10 to 12 members. The report, it is understood, will show an increase in sales and net earnings are also expected to make a favorable showing.

Mexico Tramways Company.—The statement of earnings and expenses from traffic only of the Mexico Tramways Company, as advised by cable, for the month of March, 1913, in Mexican currency, is as follows:—

	1912.	1913.	Increase.
Total gross earnings	$554,745	$606,411	$51,666
Operating expenses	267,100	278,767	11,667
Net earnings	$287,645	$327,644	$39,999

Cape Breton Electric Company.—The total earnings of the Cape Breton Electric Company, for the seven days ending April 5, and for the corresponding days of preceding year follow:

1913	$4,643
1912	4,206
Increase	$ 437

Laurentide Company.—Mr. A. D. Huff has been appointed to the position of manager of the new traffic department which the Laurentide Company has decided to establish. Mr. Huff has had some twenty years' experience in railroading and leaves the employ of the Grand Trunk, in which he held the post of division freight agent at Ottawa, to accept the new position created in the Laurentide Company.

Beaver Consolidated Mines.—Receipts from ore sales for the year ended February 28, according to the annual report of the Beaver Consolidated mines, were $339,052 and estimated value of ore at smelters $76,260, a total of $415,312. Operating and other expenses were $231,338, leaving a balance of $188,332. During the year the company shipped 689,921 ounces of silver valued at $409,212, compared with 750,950 valued at $386,785 in the previous year. The report contains no estimate of ore reserves.

Carter Crume Company.—Net earnings of the Carter-Crume Company for the year 1912 as shown in the report presented at the annual meeting were $135,115, compared with $[illegible] in 1911. A balance at credit of profit and loss is carried forward of $192,042.

The directors have in contemplation calling a special meeting of shareholders during the present year in order that they may adopt a plan for the exchange of the stock of the Carter-Crume Company for that of the American Sales Book Company, Limited.

Shawinigan Water and Power Company.—The Shawinigan Water and Power Company propose to do considerable work this year in extending the plant at Shawinigan. The No. 2 power house, which was completed in 1911, will be extended to provide for two additional 20,000 horse-power units. The power house when completed will therefore have a capacity of [illegible] horse-power. To effect this it will only be necessary to provide three additional penstocks, for [illegible] has already been [illegible] the concrete bulkhead at the end of the canal. These penstocks are erecte of steel on concrete foundations and are 600 feet long. Thi work is expected to be completed by the 1st of January, 1914

Canadian Fairbanks-Morse Company.—Plans for extension of the Canadian Fairbanks-Morse Company, include th building of a new eight-story head office building in Montreal this summer. A large new warehouse will also be pu in Vancouver, B.C. The company last year carried out number of extensions which should have an important bearing on the revenue in the latter part of the current year.

The most important development in the sales end of th business last year was in gasoline and electric motor trucks agencies for which had been secured from some of the leading manufacturers. This department and that of auto accessories, H. J. Fuller, president, expects will form an important part of the company's future business.

Hudson Bay Company.—The sales of farm lands by th Hudson's Bay Company for the quarter ended March 3 amounted approximately to 4,500 acres for £20,000, as compared with 9,400 acres for £41,300; and the sales of tow lots to £43,600, as compared with £26,600 for the corresponding period of 1912. The receipts are £123,300, a against £109,800 in 1912. The sales for the twelve month ended March 31 are 53,500 acres for £231,900, and town lot were sold for £1,275,400, as compared with sales of far lands 42,500 acres for £166,200 and town lots for £166,5 for the corresponding period of 1912. The total receipts f the twelve months ended March 31 amount to £705,600, a compared with £371,600 for the corresponding twelv months.

The Mexican Light and Power Company, Limited.—Th statement of combined earnings and expenses of the electri light and power services owned or controlled by the Mexica Light and Power Company, as advised by cable, for th month of March, 1913, in Mexican currency, is as follows:—

Gross earnings.	1912.	1913.	Increase o decreas
The Mexican Light and Power Company, Limited	$603,343	$596,829	— $6,51
Pachuca Light and Power Co.	115,577	127,727	+ 12,15
Total gross earnings ...	$718,920	$724,556	+ $5,63
Net earnings.			
The Mexican Light and Power Company, Limited	$453,521	$427,204	— 26,3
Pachuca Light and Power Co.	75,944	74,324	— 1,6
Total net earnings	$529,465	$501,528	—$27,0

Western Canada Power Company.—Western Canad Power's balance sheet, to be presented to the shareholders the company at the annual meeting, is as follows:—

Assets.

Cost of property, franchises and works........	$8,159,620
Material and supplies	142,775
Accounts receivable	30,059
Cash on hand and in bank	6,511
	$8,3[illegible]0,866

Liabilities.

Capital stock—	
Authorized 50 000 shares of $100 each	$5,000,000
Issued, [illegible] shares of $100 each	3,000,00
[illegible] Bonds—	
Authorized	5,000,00
Issued	4,000,61
Accounts payable	104,078
Contingent account	5,000
Bank loans and overdrafts	157,86
Profit and loss account—balance at credit.....	13,311
	$8,3[illegible]0,86

Crow's Nest Pass Coal Company.—The year 1912 was profitable one for the Crow's Nest Pass Coal Company, annual statement showing net profits of $471,454, whi after deducting the debit balance brought forward from 191 leaves a credit balance of $410,42[illegible]. Net profits were at th rate of 7.58 per cent. on the paid-up capital stock. C mined during the year was 1,064,701 tons, compared w

359.456 tons in 1911; while coke produced in 1912 was 245,229 tons, against 60,659 tons in 1911. During 1911 the mines were closed down for eight months on account of the strike of miners. President Rogers pointed out that during the year the indebtedness to the banks had been reduced to $568,099. At the end of the year it stood at $795,000, and since the end of the year the company has paid $70,000 more to the First National Bank, leaving the indebtedness now standing at $725,000. Referring to the prospect for dividends, Mr. Rogers pointed out that in view of the existing financial conditions all over the world and of the fact that the note to the First National Bank was a demand note, and within the power of the bank to be called at any time, it was considered the best policy to pay off this indebtedness and to build up a good reserve.

◆

MONTREAL FIRE UNDERWRITERS ARE ACTIVE

Monetary Times Office,
Montreal, April 17th.

If the Fire Underwriters' Association does not eventually succeed in improving the water supply of Montreal, it will not be for lack of effort or agitation. Attention has been drawn from time to time in these columns to the efforts of the association in this direction, and to the criticism offered concerning the water supply of the city. The association, not content with calling for investigation into the conditions in the city water department, has now submitted a few questions to the board of control respecting fires in wards which are furnished water by the Montreal Water and Power Company. It wants to know what obligations the company has entered into respecting the furnishing of water for fire service in the various municipalities which have been annexed to the city; whether any system of supervision is maintained by the city to see whether the company is fulfilling its obligations; what department is charged with it, and what official is responsible for seeing that the obligations of the company are carried out. Replying to this, a report has been furnished showing what the pressure in the different wards must be. It is worthy of remarking that in some of the wards no pressure whatever is specified.

◆

CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

The Canadian Casualty and Boiler Insurance Company's tenth annual report shows an increase in the total revenue to the extent of $30,867, the revenue being $141,218 made up as follows: Premiums, less reinsurances, etc., $107,914.41; special services, $4,127.95; interest on investments, $5,196.38, together with the balance of $23,980 from the last account. Last year's revenue was $110,351.

The net surplus to shareholders is shown as $29,863 The company's assets total $148,314, and are here appended: Investments at cost: City of Lethbridge 4½ per cent. debentures, $5,000; city of Port Arthur 5 per cent. debentures, $5,392.40; town of Brockville 4½ per cent. debentures, $4,219; city of Brandon 4½ per cent. debentures, $4,569.50; city of Moose Jaw 4½ per cent. debentures, $4,841.40; town of Indian Head 5 per cent. debentures, $4,707; city of Kamloops 5 per cent. debentures, $4,827; London Loan Company 4½ per cent. debentures, $45,000; Standard Loan Company 4 per cent. debentures, $42,050. Interest accrued, $2,184.05; cash in bank and in hand, $13,080.91; sundry debtors, $1,076.21; agents' balances, $066.70; premiums outstanding (less cost of collection), $7,919.79 (reserve on above included in liabilities)—$8,886.49; office furniture and engineers' equipment (less depreciation), $1,580.10.

◆

PERSONAL.

Mr. A. E. Duncanson has been elected a member of the Toronto Stock Exchange.

Mr. C. W. Dunning, of the Saskatchewan Co-operative Elevator Company, Regina, called at The Monetary Times office this week, before his departure for Europe with the Saskatchewan Monetary Commission.

◆

The warm weather of the last few days, though late in arriving, has stimulated activity on the part of the farmers, and seeding operations are progressing rapidly in the Edmonton district. The land is reported to be in ideal condition. The surface is dry enough to work, with plenty of reserve moisture below, sufficient to promote vigorous growth until seasonal rains start next month, even if there should be no rainfall in the meantime.

BRITISH COLUMBIA'S BUSINESS CONDITIONS

Commercial Firms Feel Money Stringency—Municipal Undertakings—Telephone Extensions

(Staff correspondence.)

Vancouver, April 12th.

Instances of business being affected by the stringent course adopted by the banks are occurring on the coast. They go to show that if the large monetary institutions adhere to their policy of granting no new loans and limiting outstanding amounts, trade will be affected. A large clothing house in Vancouver, one that has done good business in the past and enjoys one of the best businesses at present, has been notified by the bank to cut down their liabilities one-half. If this is insisted upon, it will mean very likely a forced liquidation. A firm such as this carries a large stock, and few firms have cash capital enough to do so without the aid of their bank. In another instance, a prominent broker, who has been in business for ten years here, went for a renewal of a note he held to the bank, a certain amount being paid off. At first, the manager thought it might mean a new note, and after protesting that he could not accept anything like that agreed to renew the other paper for two months.

Municipalities and Their Undertakings.

The Bank of Hamilton is coming to the aid of North Vancouver. The city treasurer, who is in the east, reported to council that the bank is ready to advance loans sufficient for maintenance purposes this year, so that undertakings proposed may be carried out.

There is the hope that the financial stringency will not be such that municipalities will be unable to get money on their four and a half per cents. An immense amount of work is proposed in Vancouver and Greater Vancouver, the carrying out of which will mean employment for large numbers of men. In addition to amounts of different adjacent municipalities, Burnaby ratepayers will vote on $615,000 worth of by-laws on April 26th. These will be: $40,000 to establish a cottage hospital; $500,000 for construction of permanent roads; $25,000 for the purchase of additional school sites, and $50,000 for sidewalks. At the same time the British Columbia Electric franchise by-law will be submitted.

Interior lumbermen continue in their protest against the taxation of lumber industry. They maintain that the government is taxing the industry too heavily, and that if this course is persisted in it will mean the shutting down of several of the mills. Last year the Arrow Lakes Lumber Company shut down its big plants at Arrowhead and Kamloops, and a large mill at Fernie has also closed indefinitely owing to conditions.

British Columbia Telephones.

That development is proceeding steadily all over the lower mainland and on Vancouver Island is shown by the announced policy of extension and expansion of the British Columbia Telephone Company. Officials of the company toured Vancouver Island last week and will make extensions to outside plant in nearly all of the exchanges on the Island. Improvements have been in progress in Victoria for a couple of years past, and large works are now in hand there. The fact that the smaller exchanges throughout the Island show growth indicates a settlement on the agricultural areas, something that is badly needed in this province. In Point Grey, the company is expending much money, and plans this year to have telephones all over the Burrard peninsula.

◆

FORT WILLIAM'S PUBLIC UTILITIES

The annual report of the manager of Fort William's utilities for the year ended December 31st, 1912, shows that there has been a net gain of $4,025.04 in the telephone department during the year as compared with a deficit from the operation of this utility during the year of 1911 of $2,728.30

The increase in the surplus of the light department is $21,085.10, as compared with a gain of $1[illegible],300.28 during the year 1911.

The revenue and expenditure in the three utilities, light, water and telephone, are as follows:

Water Operation.—Total revenue, $75,091.74; operation, debenture interest and sinking fund, $88,015.14; deficit, $12,023.40.

Light Operation.—Total revenue, $99,310.97; operation, debenture interest and sinking fund, $78,225.79; profit, $21,085.18.

Telephone Operation.—Total revenue, $44,684.73; operation, debenture interest and sinking fund, $40,659.69; profit, $4,025.05.

SASKATCHEWAN IS A PROVINCE OF RICH RESOURCES

Which Need Intelligent and Careful Development—Protection is Increasing

Although there has been a pronounced check in all speculative business and in much municipal development work throughout the west, and while there are some unsatisfactory conditions, so far as this section of Saskatchewan is concerned, and, indeed, all of the province, we are but beginning on the right road to true prosperity, and though there seems to be some adjusting to do, no serious trouble is anticipated, writes a gentleman prominent in the financial world, from Regina, in reply to some queries of The Monetary Times. We went for quite a long time without reasoning, as capital was coming easily into the country, and the future was being speculated with. A certain amount of that capital went in ways that did not assist development, and perhaps wasteful habits were encouraged, but now everybody is thinking, and the result will be a more intelligent and careful development of resources that have not been touched, and others that have only been disturbed.

Those who worked six months, in wheat growing, (which in too many cases has not been profitable in the past two years, owing to the high cost of production as well as to the increasing cost of other requirements that were needlessly being imported) are looking for means of employment for twelve, and the proportion of those in towns who have been trading real estate is becoming less, as many of them are turning their attention to other things, appreciating what we shall have to depend upon when the flow of outside capital stops and railway development slows up.

Diversified Farming is a Need.

A man cannot buy a section or two of land and a traction engine and make money by raising grain alone, while buying gasoline or coal and neglecting all the other possibilities of his farm, but one can start with a quarter or a half section and enough money to buy the necessary implements and a yoke of oxen, or a team of horses, along with a cow and a few hogs, chickens, etc., and soon become independent, if he properly utilizes everything on the ground, and does not go unnecessarily into debt so as to become swamped with interest. I personally know many such men who began in this way from five to ten years ago, who to-day are comfortably off; worth between $10,000 and $20,000, with practically no liabilities. They are mostly from Manitoba or Eastern Canada. The attention of the country should be given, and is being given, to farming in every branch of the business, and to bringing down the cost of producing wheat, and more attention in towns should be given to starting small industries of various kinds.

Value of Products Is Increasing.

Everywhere much discussion is heard of different large flotations "if only capital could be secured," but it might be better if more encouragement were given to the establishment of certain sorts of manufacturing that show prospects for development, and those to which the country is particularly adapted. Labor is gradually becoming more available all the time. Many farmers would go more extensively into sheep raising, but there is no market for wool. Conditions generally will be very different and more satisfactory before long.

We have imported beef, mutton, poultry, eggs, and the bulk of our garden stuff. These are now receiving much attention, as well as other products. I think there is no doubt that the value of products in Saskatchewan this year will be very much greater than it ever has been. Commercial collections have not been good, but those who gave credit somewhat lavishly have themselves to blame for this.

Everywhere during the last few years we have seen merchants, as well as farmers, start with insufficient capital, and often no experience; and in many cases where they had something to begin with they bought land that they did not need, or made unnecessary extensions, as it was easy to secure goods on time. Failures and losses are inevitable, but when capital and experience are again considered essentials, business will soon recover and develop on a sound basis.

Regina's Programme.

As regards conditions in Regina, comparatively little real estate is changing hands just now, although occasional sales of inside property are made from time to time. The city programme calls for expenditures totalling over three millions, and it is not thought that these operations will be interrupted. There is a good deal of building going on just now, chiefly under the control of firms or corporations who made their plans last year. This includes a ten-story business block for McCallum & Hill, and one of six stories for the Canada Life Assurance Company.

MANITOBA'S AGRICULTURE AND MINERALS

Seeding in the West—Committee on Mineral Resources—Business Men's Trip

Monetary Times Office,
Winnipeg, April 15th.

Seeding will be general throughout Western Canada by the end of next week. Already in Medicine Hat and Lethbridge districts the farmers are busy with the spring sowing, while by mid-week the work will be general at Moose Jaw and Saskatoon and throughout Manitoba, and by the end of the week the country tributary to Regina, Edmonton, and Calgary will be under the discs and shoes of the seeder. At Prince Albert the spring has been somewhat tardy, but plowing and the preparation of the seedbeds are even now being taken up, and by next week seeding will be general.

Land and Fruits.

Canada's first land and apple show will be held at Winnipeg on October 10th to 18th of this year. This decision was reached at a meeting of the standing committee last week at which Mr. J. Bruce Walker, immigration commissioner presided. The list of awards authorized calls for an expenditure of over $4,000, and includes cash prizes, diplomas and a year's free scholarship in each of Canada's provincial agricultural colleges. The prizes in gold include the following:—

Wheat—1st, $250; 2nd, $150; 3rd, $100.
Barley—1st, $100; 2nd, $75; 3rd, $50.
Oats—1st, $100; 2nd, $75; 3rd, $50.
Apples—1st, $200; 2nd, $100; 3rd, $50.
Pears—1st, $100; 2nd, $50; 3rd, $25.

In addition to the cash prizes special diplomas will be awarded provincial governments, organized agricultural districts and fruit growing associations for the finest general display of grains, grasses, etc., and fruits. The show will be an all-Canadian one.

Manitoba's Mineral Wealth.

A special committee on mineral resources, which has been added to organizations of the industrial bureau, has now held their first meeting. Dr. R. C. Wallace, professor of geology and mineralogy of the University of Manitoba, has been appointed chairman, and the other members are Prof. A. W. Bedford, and Principal Hodgson, of the Provincial Agricultural College; Mr. Arthur J. Merrill, B.Sc., of Mackenzie and Merrill, consulting engineers; Professor A. M. Parker, of Manitoba University; Messrs. C. N. Bell and A. B. Mitchell. The committee will first concentrate their energies on the collection of economic minerals which will be exhibited in a booth in the exposition in natural and manufactured state. The personnel of the committee and the field open for investigation warrant the belief that the work of the committee will be of the greatest value in stimulating interest in the development of the mineral wealth of Manitoba. It is understood that when the provincial government take over the mineral resources of this province, and establish a mines department that the committee will assist by handing over all information and collections made, to assist the authorities in the work of development.

Arrangements are now nearing completion for the Winnipeg Industrial Bureau's Trade Expansion Committee's annual business trip through Western Canada. It is expected that at least eighty business men join in this eight-day tour of the newly opened west. Many of the cities and towns included in the itinerary are offering special arrangements for the entertainment of the party and the Canadian Northern and Grand Trunk Pacific Railways, along whose newer lines the trip will be made, are also making preparations for the entertainment of the travellers.

PROOF OF AGE IN LIFE INSURANCE

The bill introduced in the Ontario legislature by Mr. M. C. McKeown, relative to the proof of age in life Insurance, came up in the committee stage in the house on Tuesday, but it had a short passage, and on motion of the Prime Minister was sent back to the special committee. According to Mr. McKeown, the reprinted bill was radically different from what the committee had agreed upon.

"As I understand it," explained Mr. McKeown, "Mr. McGarry, at the last meeting of the committee, suggested an amendment by which notices that proof of age was necessary before payment of the claim should be made by the insurance company should be sent out with the policy. The bill here provides that the company must send out a notice within one month after the contract is made. I may be wrong, but that is not my understanding of what the committee agreed upon."

The requirement that the notice be sent out in one month after the first premium had been paid—meant nothing. If the notice was received before the contract was made and the first premium paid the insured would have the importance of securing proof impressed upon him.

LOAN COMPANIES AND LOANS

nditions in Western Canada and Ontario Differ— Payments Are Satisfactory

Fundamental conditions in the West are sound and if subdivision business receives a setback from which it not recover it will be for the good of everybody con- ed. If the energies of our people are confined to legiti- e lines there will be no possibility of a serious setback, reply received by The Monetary Times in answer to a y regarding as to how the financial stringency has cted the payment of loans.

The writer, in continuing, adds: "Our collections are up to those of former years. The tightness of the ey market does not seem to be affecting the repayment ur loans. The mortgage, loan and other financial insti- ons are experiencing difficulty in obtaining an increase unds to carry on their business, and, therefore, cannot nd their operations very much at this time."

While the manager of another company says: "It is well wn that mortgage payments maturing due in the first of the year are more slowly met than those due in the half-year, we find our interest and principal instalments e as well met as in past years. In some cases our farm s are a little slow, owing to the fact that the grain in farmers' hands will not come out for sale till the storage city is cleared up by the opening of navigation.

The experience of this company is something similar hat just given, namely: "Both principal and interest nents are being fairly well met, and as well as they were year. We anticipate that for the next month or two ittances from the west will not be particularly large. is usually the case, and is attributable, we think, to roads, owing to the breaking up of the winter, and to fact of the imperative necessity of the farmers getting the land at the earliest possible moment to do their ing. This will, as usual, prevent deliveries, and also rd the completion of threshing, of which, we understand, e is considerable yet to be done."

ario Payments Met Promptly.

The situation in Ontario is a little different from that Vestern Canada, as the following three replies show. nber one says: "Payments in Ontario are met very nptly; those in Manitoba and Saskatchewan are not so paid, but the anticipation is that farmers will realize od deal of money on grain still in hand, and thus reduce indebtedness."

"So far as our Ontario business is concerned, we could cely wish or expect payments of both interest and prin- l to be made more promptly, states number two, than have been for several years past, including the past . We give our borrowers to understand that we expect terms of our mortgages carried out, and, as stated be- , have very little difficulty. Our business in the North- t has, up to the present time, even including the past , been good, payments being fairly well met, but not romptly as in Ontario."

Number three adds: "Our Ontario borrowers, with few ptions, are meeting their payments promptly with cash; act, our collections have never been better."

in Satisfactory Manner.

Other writers who responded remarked as follows:—

"I am well satisfid with our mortgage repayments, both rest and principal having been well met."

"The maturing payments under our mortgage invest- ts are being met in a satisfactory manner this spring."

"The payments of principal and interest are being made our borrowers in about the same manner as they have for several years past."

A loan manager, whose reply to the query of The Mone- Times is given above, added the following remarks: "The source of mortgage debenture capital in the case of ing companies is Great Britain, and in that market e is a growing tendency both to scrutinize security offered e closely and to demand a higher rate of interest, and place Canada in line with the rates paid by the United es, Australia and the Argentine under similar conditions. lender in Great Britain is well informed as to local con- ns, as he is of those in other mortgage fields in other s of the world."

◆

RAILROAD EARNINGS.

The following are the railroad earnings for the week d April 7th:

	1913.	1912.	Increase or decrease.
adian Pacific	$2,623,000	$2,519,000	+ $104,000
d Trunk	1,024,125	939,753	+ 84,372
adian Northern	392,600	381,800	+ 10,800
iskaming and Northern Ontario	37,038	33,902	+ 3,606

NEW BRUNSWICK'S CITIES

St. John's Improvements — Sussex, Moncton and Woodstock Seek Publicity

St. John is preparing to take advantage of the town planning act recently passed by the legislature. Regulations have been passed and submitted to the government for approval. The regulations provide for a town planning commission which would have authority to provide for the laying out of streets, parks and playgrounds, as the city expands into the suburban districts, and for the establishment of industrial districts distinct from those devoted to residential purposes. The commission will have the power to control the expansion of the city in such a way as to provide for the greatest comfort and convenience of the people, on a sanitary and symmetrical plan, which will also make provisions for future growth. The work will be carried on under the direction of an expert.

Railway's Construction Plans.

The Suburban Railway Company have engineers surveying on four different roads out of St. John, and are negotiating with the city and county councils as to the terms on which their lines may be constructed.

The Canadian Pacific Railway has spent more than $2,800,000 on the division between Megantic and St. John since 1908, and will appropriate more than $1,500,000 this year in development work, including the grain elevator at St. John.

Recently there were fourteen ocean steamers in port together at St. John. The rush of immigrants is at its height, about 8,000 having arrived last week. There is urgent need of additional steamship accommodation at West St. John. The harbor revenues last year showed an increase of nearly $7,000.

Publicity and Progress.

A board of trade has been organized in the town of Sussex. A commercial club has been organized in Moncton, and at a recent meeting subscribed $500 as the beginning of a fund for advertising purposes. The town of Woodstock has subscribed a fund and appointed a publicity agent.

English investors have bought for about $25,000 some 4,000 acres of timber and lumber lands with a small saw mill near Anagance, in King's County.

The contract has been awarded for the new building for the Bank of British North America, St. John. The building and site will cost about $200,000.

The Oil, Motor and Manufacturing Company, with $150,000 capital, has been organized at St. John to manufacture oil and other internal combustion engines, as well as kerosene adopters for gasoline engines. The company will erect a factory, and the development of the oil wells and oil shales of Albert County is expected to create a demand for their product.

◆

AGRICULTURE IN THE MARITIME PROVINCES

The results of the agricultural census of 1911 for the three Maritime Provinces of Prince Edward Island, Nova Scotia and New Brunswick, provide data for a comprehensive survey of this part of Canada, states the Census and Statistics Monthly. The total land area of these three provinces is 32,744,928 acres, or 4,398,933 acres less than the land area of England and Wales. Of the total, Prince Edward Island comprises 1,397,991 acres, Nova Scotia 13,483,671 acres, and New Brunswick 17,863,266 acres. According to the census returns 10,968,516 acres in the three provinces were under occupation, this being about one-third of the total land area. The proportions of land occupied to total land vary in the three provinces, being 86 per cent. in Prince Edward Island, 39 per cent. in Nova Scotia and 25 per cent. in New Brunswick. In each province the bulk of the land is owned by the occupiers. For all three provinces the total acreage of land owned is 10,591,227, as compared with 377,289 leased or rented; that is to say, of the total land occupied, 97 per cent .is owned and 3 per cent. is leased or rented.

The total number of holdings in the three provinces was 106,186 in 1911, as compared with 107,630 in 1901, and the average size per holding was consequently 103 acres in 1911 and 99 in 1901. The falling off in the total number of occupiers is due to migration to the western provinces, and the census shows that there were in Nova Scotia 992 and in New Brunswick 739 vacant holdings which produced no crops in 1910.

◆

For the past fifteen years the Prudential Company has led all life insurance companies in New Jersey in new business. In 1912 the amount of paid-for life insurance issued and revived in New Jersey by this company exceeded $41,000,000 on over 200,000 policies.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Porcupine, Ont.—April 10.—Grand Hotel, King Street. Loss $3,500.

New Westminster, B.C.—Port Moody hall. Cause, lighted cigarette stub.

Vienna, Ont.—April 14.—Damage to residence of Mr. Wellington Johnson.

Levis, Que.—April 8.—Mr. G. Parodis' residence. Loss and cause unknown.

Maitland, N.S.—April 5.—Three buildings and contents. Loss $10,000. No insurance.

Glen Miller, Ont.—Tenement apartment owned by the Glen Miller Paper Company.

Auburnton, Sask.—April 3.—Residence of Mr. Orsean Reid. Cause, lamp explosion.

Winnipeg, Man.—April 5.—303 St. Patrick Street. Loss, building, $500; contents, $80.

Owen Sound, Ont.—April 1.—Vacant house on Fifth Street East, owned by Mr. N. Moote.

Port Arthur, Ont.—April 12.—Motor car owned by Mr. Thomson, Alloa, totally destroyed.

Ottawa, Ont.—April 14.—Residence on St. Charles Street, damaged. Cause, overheated stovepipe.

Woodstock, Ont.—April 8.—Messrs. Hay and Company's piano factory. Loss $100. Cause unknown.

Hull, Que.—April 4.—Mr. G. Walker's residence, Front Street, Eddyville. Loss $1,200. Cause, stove.

Grayson, Sask.—April 10.—Grenfell Milling Company. Loss $10,000. No insurance. Cause unknown.

Townsend's Corner, P.E.I.—April 7.—Residence of Mr. Donald Baker. Loss $600. Cause, defective flue.

Glace Bay, N.S.—April 9.—Coal bunker at Dominion No. L. Loss $500. Supposed cause, overheated motor.

Thessalon, Ont.—March 31.—Residence of Adelard LeRose, Federation Street, destroyed. Insurance, $700.

Macgregor, Man.—April 1.—Mr. G. Billings, Jr., residence. Loss $2,000. Insurance $800. Cause unknown.

Southampton, Ont.—April 5.—Bell Telephone office, hardware store, and living apartments over drug store, damaged.

Nelson, B.C.—April 6.—Planing mill of Edgewood Lumber Company, at Castlegar. Loss $12,000. Cause unknown.

Belleville, Ont.—April 12.—House of Mr. William Thompson, Sydney Township, destroyed. Supposed cause, defective chimney.

Innisfail, Alta.—April 1.—Log stable on Whyte Avenue, owned by Mr. F. M. Rogers. Cause, children playing with matches.

Niagara Falls, Ont.—April 9.—Rampo Iron Works damaged. Loss $12,000. No insurance. Fire started from oil heater.

Victoria, B.C.—April 6.—Carpenter shop at Canadian Pacific Railway inner wharf. Loss on building, $2,500; on contents, $2,000.

Moose Jaw, Sask.—April 15.—Sheds on Exhibition grounds; and seven race horses, owned by Mr. John Taylor. Cause unknown.

Woodstock, Ont.—April 8.—Boiler room owned by Mr. T. L. Hay, 785 Dundas Street. Loss, $100 to building. No damage to contents.

Longueuil, Que.—April 12.—Lalumiere's Block, St. Charles Street. Loss $3,000. Cause, explosion of gasoline stove in barber shop.

St. Thomas, Ont.—April 10.—Lusty Lumber Company, and the Canadian Casket Company. Loss $20,000. Insurance $9,000. Cause unknown.

Fairbank, Ont.—April 10.—Cottages of J. Noad and J. Duncan, Gilbert Avenue. Insurance of Mr. Duncan, $700. Cause, defective stovepipe.

Millbrook, Ont.—April 1.—Mrs. Scott's dwelling and outbuildings, and store of Mr. James Donaldson. Loss $2,000. Cause, overheated stove in Mrs. Scott's house.

Michael, B.C.—April 3.—Store of Trites Wood Company, Imperial Bank building, and residence of Mr. H. C. Lockhardt, destroyed. Loss to Trites Wood Company, $100,000. Cause unknown.

Fredericton, N.B.—March 28.—Currie Brothers, Queen and Westmoreland Streets. Loss $9,500. Insurance on building, $3,000; on stock, $2,500; insured in Yorkshire and National of Hartford.

St. John, N.B.—April 12.—Steamer "Westport." Cause, spontaneous combustion.

April 7.—Barn rented by Patrolman McFarland, owned Officer Garnet. Cause, incendiary.

April 5.—Building owned by Messrs. Cosman a Whelpley. Loss, $3,500; insurance, $500 in Northern Insu ance Company. Cause, incendiary.

Truro, N.S.—April 6.—Building owned by Mr. C. A. M Lellan, occupied by A. B. Cox and Company, and J. S. H and Company. Loss to building, $2,900, insured in Lond Mutual for $3,000. Loss to stock of A. B. Cox and Compa $100; insured in Canada Fire for $700. Loss to stock of J. Hay and Company, $1,250; insured in Ontario, $200; No British, $1,500; Dominion, $1,000; Employers' Liabili $500. Cause unknown. Building owned by Mr. W. N. Mil occupied by Mr. A. T. McInnis. Damage on stock, $175; building, $275. Building insured in Acadia for $2,500; st in National Benefit for $500. Cause unknown.

Toronto, Ont.—April 10.—Mr. G. Hunt's store, 102 D Mills Road. Loss, contents, $515. Insurance, $300, Gore surance Company. Ross and Wright, Toronto, adjusters the assured. Building owned by Mr. J. Lunan. Loss, bui ing, $500. Insurance, $100, Gore Insurance Company. Don Mills Road. Loss, building, $100. Insurance, $2,5 Cause unknown. 78 Gormley Avenue. Owned by Mr. Willfong. Loss, building, $2,300. Insurance, $2,500. Ro and Economical. Cause unknown.

April 13.—Standard Sanitary Company, Royce and La downe Avenues. Loss $1,500. Cause unknown. Mr. A. Goodman's residence, 1 Cedar Avenue. Loss $500. Cau overheated stove.

April 15.—Basement of Simmers' Seed Company, King Street East. Loss $25. Cause, defective wiring.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Regina, Sask.—March 18.—Dr. McLeod's residence. I on building, $100. No loss on contents. Insured in Can National for $900, and London and Lancashire for $2, Cause, defective fire place.

SASKATOON'S FEBRUARY AND MARCH LOSSES

Saskatoon, Sask.—February 4.—Dwelling occupied Mr. F. Schroeder, Avenue M. and Bedford Road, and own by Mr. R. M. Thompson. Loss on contents, $200; on bui ings, $700. Cause, overheated stove-pipe.

February 11.—Olympia Cafe, owned by Mr. H. K O'Brien. Damage to contents, $20. Cause, overheat stove.

February 13.—Apartments occupied by Mr. J. Donal 302 25th Street East, owned by Mr. D. Crowe. Loss to c tents, $74; insured in Dominion Fire for $1,600. Loss building, $97; insured in National Insurance, St. Paul a German American. Cause, gasoline stove explosion.

February 25.—Unoccupied dwelling owned by Mr. Brown. Loss, $50. Cause, unknown.

February 26.—Empress Hotel, owned by Mr. H. Shore. Loss, $37. Cause, caught from range.

February 27.—Canadian Northern Railway flat car da aged. Cause, hot ashes.

March 4.—Laundry of Mrs. Julia Anthony, 1331 Ave B. North. Damage to building, $100. Cause, overheat stove. No insurance.

March 5.—Restaurant owned by Mr. Sidney Dale, Fi Avenue South. Damage to contents, $70. Insurance, $1, in Springfield Fire. Cause unknown.

March 10.—Bakery at 113 Avenue B. North, occupied Mr. A. Glass, owned by Mr. Sparkman. Loss to build $37; insured for $2,000 in Adelphi, Niagara and Phœ Companies. No insurance on contents. Cause, overheat stove.

March 11.—Dwelling owned and occupied by Mr Tremheath, 1124 Avenue B North. Loss, $105. Insura [illegible] kitchen.

March 12.—Dwelling occupied by Mr. J. Rosalle, Ave C. and 21st Street, owned by Mr. F. Fonsarells. Loss, $ Cause, coal oil stove explosion.

March 15.—Dwelling owned and occupied by Mr. R Lacy, 226 Avenue F South. Loss, $25. Cause, defect chimney.

March 22.—Canadian Pacific Railway fruit car. Co tents owned by Northern Fruit Company. Loss, $500 sured in National Fire, German American, St. Paul, Phœ Insurance of America. Cause, coal oil stove explosion.

VANCOUVER'S MARCH FIRE LOSS.

Vancouver fire department responded to 53 alarms dur- March divided as follows:—Chimney fires 6, false rms 5, smoke scares 4, back fire in carburetter 1, fires ere damage resulted 26, small fires where no damage oc- red 11. The estimated damage by fire and water was ,876, with insurance paid $24,752, leaving the loss above urance $20,124. The total value of property involved was 9,455.

A complete list of alarms where damage occurred ows:—

March 1.—Telephone alarm at 12.26 a.m. Small fire in bish in Chinese quarters in basement at the Hotel Van- ver. Cause unknown. Damage $6. Telephone alarm 9.49 p.m. Small fire on stairway and first floor at 818 efer Street, caused by an old lady falling down stairs h an oil lamp. Building owned and occupied by J. W. debank. Damage $10. Mrs. Frances H. Green was erely burned and sustained a broken right arm when she down the stairs while carrying a lighted oil lamp, and d at the General Hospital in the morning.

March 2.—Alarm from Box 523 at 12.01 a.m. Fire in me cottage in rear of 228 Harris Street, caused by an rheated stovepipe. Building owned by Mr. Sankey and upied by J. Demichel and used as a dwelling. Damage o, partly covered by insurance. Alarm from Box 28 at a.m. Small fire in building at 89 Pender Street East, sed by wood being piled too close to stove. Build- owned and occupied by Man On Tong as a dwelling. mage $5. Alarm from Box 12 at 8.12 a.m. Fire in a bar- shop in the basement of the Leigh-Spencer Building, Granville Street. Cause unknown. Barber shop occu- d by E. Gagnon. Damage $600, covered by insurance.

March 3. Telephone alarm at 1.15 a.m. Fire in back ch in rear of building at 2146 1st Avenue West. Cause known. Building owned by Mrs. E. G. Wilson and occu- d by C. R. Watson and used as a dwelling. Damage o, covered by insurance

March 5.—Alarm from Box 53 at 3.25 a.m. Fire in shed rear of 1024 Richard Street, caused by hot ashes. Shed destroyed. Damage $85.

March 7.—Alarm from Box 1213 at 9.05 a.m. Fire in kitchen at 33 10th Avenue West, caused by drying thes too close to stove. Building owned by Mr. Derby- re and occupied by H. Godley and used as a dwelling. mage $40, partly covered by insurance. Mrs. Godley was htly burned about the face in trying to extinguish the ve fire.

March 10.—Telephone alarm at 8.10 a.m. Small fire in rame building at 1921 Powell Street, caused by throwing ted match into some rubbish. Building owned and oc- ied by B. Taylor and used as a shoe store. Damage 7, covered by insurance.

March 11.—Alarm from Box 37 at 3.11 a.m. Fire in the c of a frame building at 436 Main Street, owned by J. J. lk and occupied by Biswanger and Cline, and used as a it and tobacconist store. The adjoining store occupied Mr. McPherson and used as a tailor shop was also dam- d. (No. 432). Cause unknown. Damage $862, covered insurance. Alarm from Box 718 at 7.30 p.m. Fire in ement of a frame dwelling owned and occupied by J. E. rk. Cause unknown. Damage $100, covered by insur- e.

March 15.—Telephone alarm at 3.56 a.m. Fire in a me building owned by Mr. Seknie and occupied by Mr. llison and used as a restaurant and rooming house. Fire rted in a small room in the rear of restaurant and the se was probably spontaneous combustion. Location, 355 well Street. Damage $100, partly covered by insurance.

March 17.—Alarm from Box 21 at 6.10 a.m. Fire in the l-Irving Block at the corner of Richards and Cordova eets. Fire started in two rooms upstairs occupied by the y Map and White Print Company. Some damage was e by water to the occupants of the underneath stores in ting blaze under control. Building was owned by Mrs. l-Irving and used for stores and offices. Cause unknown. mage $3,084, covered by insurance.

March 18.—Telephone alarm at 12.41 a.m. Passenger ch on fire at the Great Northern Railway depot, Pender Columbia, caused by an overheated stove. Damage 500, covered by insurance. Telephone alarm at 5.56 . Fire in a brick house at 221 Harris Street, owned by rge King and occupied by Tony Fredericks, and used as estaurant, with rooms above. Fire started at base of ge in kitchen, gutting same, and getting under the floor into the ceiling before being extinguished. Cause, rheated and defective range. Damage $300, covered by urance.

March 19.—Telephone alarm at 5.05 a.m. Small fire in 'sporting house'' at 710 Alexander Street, owned and oc- ied by Blanche Lewis. Caused by the explosion of an ohol lamp. Damage $16, covered by insurance.

March 20.—Alarm from Box 264 at 1.30 a.m. Fire in a frame building at 251 6th Avenue East, owned by Mrs. Clough and occupied by Wong Kee Lee and used as a Chinese laundry. The fire started between the wall and the chimney (which was built against the back of the house) and spread to the roof before being extinguished. Cause, overheated chimney. Damage $50.

March 21.—Telephone alarm at 12.15 p.m. Small fire in a concrete block at 1411 Commercial Drive. Fire started in Room No. 9 on the third floor, between some paper and the wall, behind the stove. Building owned by Mrs. K. Moore and used as stores and apartments. Cause, overheated stove. Damage $35, partly covered by insurance. Telephone alarm at 1.10 p.m. Small fire on the first floor in a kitchen at 25½ Canton Alley, building owned by Yen Lick and Company and ocupied by Chinese, and used as stores and rooms. Cause, overheated stove. Damage, $20, covered by insurance.

March 25.—Telephone alarm at 2.37 a.m. to 122 Hastings Street West. Fire on the stage at the rear of the Savoy Theatre. The fire had great headway on when the department arrived, having spread to the third floor by way of the elevator shaft, and doing considerable damage there. The occupants of the basement suffered some loss from smoke and water. The building was owned by Cook and Craig and occupied by the Canadian Amusement Company, Bailey and Gunn, and Fletcher Brothers in the basement. Cause unknown. Estimated damage, about $11,600, partly covered by insurance. Verbal alarm at 8.52 a.m. to Cordova Street and Gore Avenue, a frame building owned by the Seamen's Institute, and occupied by Rev. F. M. Ryan and used as a Mission to Seamen. The fire, which started in the upstairs portion of the building, burned with great rapidity owing to the very inflammable nature of the structure which was composed wholly of wood, and the whole of the upper story was gutted, and the roof burned off. Cause, overheated stove. Damage $1,700, partly covered by insurance. Alarm from Box 126 at 12.55 p.m. Small fire on roof of old wooden shed at 435 Railway Street, owned by Canadian Pacific Railway and occupied by the British Columbia Electric Railway Company and used as a storage shed. Caused by an overheated stovepipe which projected through the roof. Damage $5. Alarm from Box 139 at 4.45 p.m. Fire on the roof of a frame dwelling at 721 Hastings Street East, owned by J. J. Hall and occupied by Mrs. Sconides. Cause, sparks from chimney. Damage $5.

March 26.—Alarm from Box 2122 at 8.00 a.m. Fire in a frame building at the corner of Eton and Slocan Streets, owned and occupied by Hemphill Brothers and used as a garage. The fire had a great hold before the apparatus arrived and the whole of the building and contents were a total loss. Cause unknown. Damage $13,000. Telephone alarm at 8.48 a.m. to 518 Hastings Street West. Small fire on the second floor of brick building owned by Mahon, McFarland and Proctor (agents) and used for stores and offices. Cause unknown. Damage $75, covered by insurance.

March 27.—Telephone alarm at 3.00 a.m. to 3572 Point Grey Road. Fire in the basement of a frame dwelling owned and occupied by Mr. Fitzlander, probably caused by an explosion of gasoline. Damage $7,500, partly covered by insurance.

March 31.—Telephone alarm at 10.15 a.m. to 1545 8th Avenue West. Fire in a clothes closet in an upstairs bedroom of a frame dwelling owned and occupied by Mr. Thompson. Cause unknown. Damage $40, covered by insurance.

Hose laid at fires during the month was 21,250 feet; chemical used at fires during the month was 1,680 gallons.

TORONTO CITY MAY PURCHASE RAILWAY

On Thursday afternoon, April 17th, the Toronto city council held a special meeting, and, without discussion, unanimously decided to ask for legislation granting power to make the purchase of the Toronto Electric Light and Toronto Railway Companies. In the evening Mr. W. K. McNaught (North Toronto) introduced the bill in the Ontario legislature, the rules were suspended, and the measure was given a first and second reading.

By the provisions of the bill:—

The city of Toronto is given permission to acquire by purchase all existing street railway lines in the city, and such portions outside the city as are necessary. Also the rights and franchise of the Toronto Electric Light Company.

The electors of the city must pass upon the proposition before the city council can buy out the companies.

The city, without consent of the ratepayers, can issue forty-year debentures sufficient to provide a sum to purchase the franchises.

The city gets all the rights and privileges now enjoyed by the Toronto Railway and Toronto Electric Light companies.

The control of the municipal enterprises is vested in a commission to consist of three or five members, of which the mayor, ex-officio, shall not be a member.

GRAIN GROWERS AND THE BANK ACT

Terminal Elevator Receipts on Same Basis as Call Loans—Suggested Renewal of Charters Quinquennially—Agricultural Co-operative Banks

The grain growers of Western Canada were given an opportunity of stating their views before the banking and commerce committee upon the revision of the bank act.

Mr. Roderick Mackenzie, secretary of the Manitoba Grain-growers, suggested that the act should be so amended as to place terminal elevator receipts on the same basis as call loans. This would help to finance the crop movement. He favored the clause permitting farmers to secure loans on grain. The present conditions, he said, contributed to create an annual blockade, and the farmer should be encouraged to hold his wheat rather than sacrifice it.

Mr. Mackenzie did not think it necessary to revise the bank act more than once in a decade. With regard to interest rate, he said: "I think it pretty near time to call the bluff of the banks about this interest business. They say if they are limited to 7 per cent. they will withdraw. The railways said they would build no more lines if we pressed the freight rate inquiry. The manufacturers make threats what they will do if the tariff is lowered. It is time to call the bluff, and we might as well begin here."

Renewed Every Five Years.

Mr. F. W. Green, secretary of the Saskatchewan Grain-growers, advocated that the renewal of bank charters should be made quinquennially instead of every ten years. He also favored smaller and more economically operated banks. In his opinion banks were generally too extravagant in the matter of buildings.

The chairman (Mr. H. B. Ames).—If there was a co-operative farmers' bank formed in your neighborhood would you deposit in it?

"Yes," was the reply, "if it was properly organized and had good security."

Major Sharpe.—Do you think more banking facilities would benefit the west?

"Yes."

Mr. Green suggested a scheme whereby the Dominion Government would secure bank loans, and put a tax on lands, as for school purposes, as the basis of that security. "We want the banks," said Mr. Green, "but we don't want to pay the money two or three times over."

Questioned as to the statement made by the manager of the Weyburn Bank that money could be obtained more easily by the western farmer than by his neighbor over the boundary, Mr. Green declared, "If I had to start over again I would rather start with a spade and a hen than have to borrow money.

Considerations that Must be Faced.

Incidentally, Mr. Green complained, that there were regions where men were waiting for railroads, in which case they had to transport grain for hundreds of miles, and very few of these men were able to get loans.

As to the proposal to allow banks to make loans on thrashed grain, although he did not think it would affect very many farmers, yet for the sake of the few he thought the facility should be given. Such a system would, however, require inspectors to examine the amount and the quality of the grain. There would also have to be considered the risk of loss by fire and deterioration by snow and rain.

The provision of interior terminal elevators to relieve the grain blockade, was suggested, and it was urged that the Dominion Government should legislate so as to help the farmer at this time when the presence of so much grain in the elevators involved stringency of money. He suggested the creation of a national agricultural bank.

In conclusion Mr. Green said that he did not expect the minister of finance to establish agricultural co-operative banks at once, but the farmers of the west hoped that that action would be taken next session.

◆

INDUSTRIAL ACCIDENTS DURING MARCH

During the month of March, according to the record of the department of labor, 480 industrial accidents occurred, of which 93 were fatal and 387 resulted in serious injuries. This is eight more fatal and thirteen fewer non-fatal accidents than were recorded in February. The record for March, 1912, was 113 fatal and 356 non-fatal accidents. The greater number of fatal accidents occurred to employees in steam railway service. Of the non-fatal accidents, 115 steam railway employees were injured. In the metal trades, 102 workmen were injured, while in the building trades 25 workmen were injured.

VALUE OF LIFE INSURANCE

VIII.

Short Term Policies

BY C. A. HASTINGS.

Take the position of a contractor, who has an opportun to handle an important and profitable contract; or imag the position of a man with an invention which he knows l a big commercial value. In each case neither dare make move, because all that they have must be sunk into the c tract, or into the marketing of the invention, so that the ev of death during the preliminary periods must be very seric to their dependents.

Personally I seldom, if ever, approve of a short te policy for, to my mind, it means nothing more nor less th borrowing from his widow and orphans; furthermore, the sured is not building up a reserve.

Cases When it is Essential.

However, there are cases, during a period of hea financial responsibility, when it is essential, but the applic must be more than a first-class life to get it, for no reputal life office would dream of accepting him, on such terms, less he were. The rates of premium are very low and ma apply for this class of protection on account of its cheapne not recognizing the fact that he is buying on the same pr cipal as if he were buying fire insurance.

There are other cases to whom this class of protecti applies, for example, the individual who wishes to start in business and who has reason to expect a substantial su of money within a short period.

Protection Till Business is on Sound Foundation.

Yet again there is the man with ability whom others a ready to back with capital, but naturally require protecti until the nature of the business undertaken is placed on sound foundation.

Although a man may be poor, his chief asset is his lif it is a marketable asset, and here is shown a method by whi he can market it.

The following articles in this series have already a peared:—

(1) March 1st.—How to become one's own master.
(2) March 8th.—How depreciation of assets can be m
(3) March 15th.—How to borrow at a profit.
(4) March 22nd.—The automatic production of capital.
(5) March 29th.—How to redeem debentures.
(6) April 5th.—Value of goodwill and how to preserve
(7) April 12th.—How to protect capital in land, etc.

ST. LAWRENCE ROUTE AND MARINE INSURANCE

An important feature of the past year in connection wi marine insurance was the strength of the agitation in Cana for the establishment of a local underwriting institution Montreal. This is by no means a new suggestion, for it h been discussed at intervals ever since the commencement the twentieth century. Experience has shown that the S Lawrence is an exceptionally dangerous waterway, and th being so underwriters have, of course, no option but to pr tect themselves by charging adequate premiums for the ris they incur, on the other hand, it is urged by Canadian shi owners that very large sums are spent annually upon the in provement of the St. Lawrence as regards dredging and cu rents, and this is admitted by underwriters. Unfortunatel however, nothing has yet been done to reduce the dange arising out of the dense fogs which last for days at a tim and render the movements of shipping an extremely hazardou proceeding, nor is it likely that any human device will eve succeed in overcoming this serious drawback to the safet of the Canadian route, states the London Financial Times. a marine insurance institution were to be started at Montrea with a view to charging lower rates than are current in Lo don for St. Lawrence business, it is safe to say that befor long the new concern would become bankrupt. London u derwriters have not made money out of St. Lawrence bus ness; on the contrary, they have lost large sums, and thi must be borne in mind by those who are apt to think Canadian ship-owners are discriminated against unduly.

◆

Nova Scotia estimates were brought down in the House Assembly on Tuesday by Premier Murray. The estim revenue is $1,002,016, and the expenditure $1,800,788. Th estimated income from mine royalties is $852,000, and succe sion duties $45,000. The heaviest items of expenditure $342,000 for education; interest, $424,744; public chariti $242,000; roads, $230,000.

RNAL INSPECTION OF BANKS IS QUITE IMPRACTICABLE

sts Sir Edmund Walker in His Evidence Before Banking and Commerce Committee

Edmund Walker, in giving evidence before the bank-
l commerce committee, favored revision taking place
n years. He considered, however, that charters should
ire automatically. It was an injustice to the banks
g banks to an end by failure of parliament to act.
harters," he said, "should be continuous, but the re-
decennial, or oftener if thought desirable. We have
eared anything happening till this year, when there
n obstruction," said Sir Edmund. Questioned as to
nks, he said: "All experience in this country shows
e branch banks system is preferable to the local
"

nada has one bank to each 2,847 of population; Great
one to every 5,116; the United States one to every
nd Scotland one to every 2,106. In Bristol there is
k to every 5,604 of population, while Toronto has one
y 2,304. In Canadian cities generally there is one
every 3,100 of population, and in the United States
ne to every 9,700. Sir Edmund submitted statistics
dian industries, showing that at all the big centres
nks would not fill the need.

ing Branches was a Waste.

Sexsmith enquired about co-operative banks in Ger-
nd Sir Edmund said the system was entirely different
In Germany the whole business was guaranteed joint-
did not believe that an Ontario farmer would favor
eeing a co-operative bank in the west, for instance.
ative banks might operate well in the older provinces.

122 of our branches in the west, farmers' deposits
,689,926, and our loans to farmers $13,035,000." Sir
l quoted those figures against the co-operative sys-
d also to meet the argument that the money is being
ut of the country. He admitted that the banks fully
with the railways the credit for developing the west
reasing its banking facilities.

the west do you pursue the same policy to farmers
e east?" asked Mr. Nesbitt.

s, it is the same, but the Ontario farmer does not
like the westerners."

Edmund stated, in reply to Mr. Nickle, that in the
of loans to farmers, personal integrity was a large
e. Where a man's farm was mortgaged to the extent
its value, the margin of safety was exceeded, and the
vere very careful in making loans.

Edmund admitted that the great number of compet-
nches was a waste. "The only way of overcoming
ver," he said, "is in those amalgamations which ap-
are so distasteful."

eed With Mr. Forgan.

can imagine nothing more foolish than for the gov-
t, or any commission, stating at what rate new bank
hould be issued," declared Sir Edmund, in referring
se 34. "I think it right to provide as you do that it
e sold at a rate over the book value. To compete
nder that would be a great injustice to the share-
I think, however, that there is a tendency for stock
sued in Canada at a price within the extreme limit of
's provisions. If you forced the banks to sell at less
lue, it would make the offering more attractive to the

the value of the bank stock.

is pretty hard to refuse loans to shareholders who
eir stock to put up as security," he said, but agreed
e present clause was not wholly defensible.

disagreed with Mr. Forgan, of Chicago, as to the
ility of one bank loaning money on the stock of an-
In the United States, with 27,000 banks, the situa-
s different. He was opposed to the "wet nursing"
in banking in Canada. Take away the lien, and
ock as collateral would be reduced in value.

nts Thought to be Sufficiently Detailed.

Edmund then came to the important clauses dealing
spection and audit. He considered the annual and
statements submitted now by directors to shareholders
iently detailed.

ould not publicity do away with many suspicions by
lic?" asked Mr. McCurdy.

at depends upon how far the publicity would be to
ks and its customers."

"The Nova Scotia Bank a few years ago published a list of its investments," added the member for Queen's, who asked if all the banks might not well follow this example.

"The list gives no intimation of the character of the securities. If you published them it would be used as an argument in favor of the sale of such securities," was the reply.

"Could it not be done by an appendix to the annual statement "

"You cannot judge of the whole institution by any particular instrument it holds."

Mr. Ames: "What do you call saving deposits?"

"Deposits subject to notice, and on which interest is paid."

"What proportion of your interest-bearing deposits are saving?"

"Almost all."

"What have you to say on the audit?" asked the chairman.

Will Not Stop Failures.

"No system of internal inspection will be effective in absolutely stopping failures. In view of all the difficulties surrounding it the shareholders' audit, I think, is the best for Canada. I think that government inspection as they have it in the United States is, as Mr. Forgan has told you, entirely ineffective. We have a staff of fourteen inspectors and another staff of assistants, and their work takes up every day in the year. It costs $105,000 a year."

"What about the head office inspection?"

Sir Edmund reiterated that government inspection, judging by United States experience, would not be efficient. It was suggested, he said, that the Bankers' Association inspect their fellows, but the association did not favor this, as assuming too much guarantee and responsibility on behalf of the public.

"What about Mr. H. C. McLeod's statement that more banks fail proportionately in Canada than in the United States?" asked J. J. Hughes.

"Mr. McLeod went on the percentage basis. If we had four banks in Canada, and one failed, Mr. McLeod would call it 25 per cent. A better way would be the amount involved in the failure. Eleven banks have failed since Confederation. Their total assets were $77,780,419; their losses, $6,090,000; in addition there have been losses of $2,196,000 by banks, which could have been organized under this act.

Quite Impracticable Is External Inspection.

"The percentage of total assets of the banks that have failed to all the banks is 5.09. The percentage of losses by creditors to the assets of the failed banks is 7.83. The percentage of losses to the total assets of all the banks is 3.99, and the percentage of loss to creditors through failure of banks to the total assets of all the banks is 14 cents per hundred dollars."

Mr. Nickle: "Have you objections to the external inspection of banks?"

"I have no objection, but it is quite impracticable."

Mr. White: "Would the government secure any good purpose by interfering with specific transactions of banks?"

"No, it might be disastrous."

Mr. White: "Some accounts, at one time doubtful, have turned out all right?"

"There are many of such cases. Only the internal knowledge of the bankers could give the right judgment."

"In your judgment, would an inspection of the head office be sufficient?"

"An inspection by an auditor of the system of inspection of the bank would disclose whether the bank considered its position safe. If I were finance minister I would not feel that inspection of head offices would prevent failures."

◆

AUTOMOBILE BUSINESS IN ARGENTINA

It is interesting to note the manner in which the automobile business has sprung into prominence during the last four years; 831 cars imported in 1909, 1,581 in 1910, 2,461 in 1911, and in the first nine months of last year, 3,067. If 1912 continues its average for the last quarter, the figures will rise to 4,000, or about five times the imports of 1909, states Mr. H. R. Poussette, Canadian trade commissioner at Buenos Aires.

As Canada manufactures the same class of cars as the United States makers are selling here, Canadian manufacturers should be encouraged by the success which has been attending the enterprise of the former, there being no reason to suppose that they might not attain it to an equal degree.

There is an aspect to this subject which is well worth noting by manufacturers in general; it is that events move quickly in South America. What may be only an unimportant industry to-day, may to-morrow have grown into a very important one.

NINETY-ONE COMPANIES GRANTED CHARTERS

Richelieu and Ontario Navigation Company's Reorganization—Fox Farming

This week's new incorporations number ninety-one, with a total capital of $35,578,500, the Richelieu and Ontario reorganization being the principal corporation with a capital of $15,000,000. The other companies with a capitalization of one million and over are:

Company.	Capital.
British North American Investment and Land Company, Port Arthur	$7,500,000
Mikado Consolidated Gold Mines, Toronto	2,000,000
National Mortgage Company of Canada, Winnipeg	2,000,000
Cargill, Limited, Cargill, Ont.	1,000,000
British Dominion Real Estate, Vancouver	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	48	$12,959,500
Quebec	12	16,507,000
British Columbia	17	3,055,000
Manitoba	11	2,950,000
Prince Edward Island	3	107,000
Total	91	$35,578,500

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Merritt, B.C.—J. A. Menzies, $50,000.

Courtenay, B.C.—Courtenay Waterworks Company, $35,000.

Invermere, B.C.—Invermere Construction and Supplies, $50,000.

Huntsville, Ont.—Rill Lake Hunting Club. S. Snyder, W. Snyder, W. G. L. Hunt.

Forest, Ont.—Forest Fruit Growers' Association. A. J. Clark, W. Rogers, I. Fratn.

Ottawa, Ont.—Valois Realties, $50,000. T. B. Lyons, L. P. Goyette, R. L. Calder.

Kenora, Ont.—Kenora Amusements, $25,000. G. A. Toole, J. T. Brett, F. Gardner.

Quebec City.—Parentville Realty Company, $500,000. N. Drouin, J. Picard, G. A. Bergeron.

Kamloops, B.C.—Shields Lumber Company, $500,000. J. C. Shields, C. J. Amm, R. D. Craig.

St. Boniface, Man.—Les Chasseurs de St. Boniface, $5,000. J. Mondor, C. A. Lambert, E. Couture.

Aultsville, Ont.—Aultsville Cheese and Butter Factory. S. W. McConnell, E. T. Shaver, R. A. Cook.

Fort William, Ont.—Ruthenian Co-operative Company, $9,500. M. Klapey, J. Matejezuk, P. Bodnarchuk.

Paris, Ont.—Crystals, $100,000. J. Penman, Paris, Ont.; W. D. Long, Hamilton; J. W. Bain, Toronto.

Gananoque, Ont.—Booth Felt Company, $40,000. N. E. Booth, E. W. Booth, T. R. Brawley, Brooklyn, N.Y.

Berlin, Ont.—Westmount Improvement Company, $300,000. E. P. Clement, E. W. Clement, W. P. Clement.

Cargill, Ont.—Cargill, Limited, $1,000,000 (timber and farm lands). G. H. Kilmer, H. H. Davis, J. R. Rumball.

Courcelles, Que.—Compagnie Bouilliere St. Apollinaire, $108,000. V. D. Gauthier, N. Brousseau, J. D. Morin.

Coldwater, Ont.—Coldwater Skating and Curling Rink, $10,000. W. H. Manning, J. Kingsborough, J. McDermid.

Grand Cascapedia, Que.—Cascapedia Silver Black Fox Company, $100,000. A. Nadeau, C. H. Nadeau, E. Nadeau.

Preston, Ont.—Dominion Bronze Manufacturing Company, $100,000. D. M. Campbell, W. J. Hodgins, G. Fink.

Dauphin, Man.—Sutherland Stelck Hardware and Implement Company, $40,000. D. Sutherland, A. Bonnar Reid, B. Phillips.

Sarnia, Ont.—Delaware Development Company, $40,000. L. A. Wilson, Petrolea; A. I. McKinley, R. V. LeSueur, Sarnia.

Peterborough, Ont.—Peterborough Business College, $50,000. G. Spotton, Wingham; P. H. Torrance, E. E. Logan, Peterborough.

Stratford, Ont.—Stratford Brass Company, $100,000. A. Helm, New Hamburg; J. R. Macdonald, J. Whyte, Stratford. Farquharson-Gifford Company, $100,000 (furniture). C. Farquharson, F. M. Gifford.

Orillia, Ont.—Curran and Clement, $40,000 (contractors). R. Curran, M. B. Tudhope, J. L. Cull. C. B. Janes and Company, $40,000 (lumber). C. B. Janes, A. Woods, Miss B. Haywood.

Midland, Ont.—Benson and Bray, $200,000 (timber merchants). J. A. Benson, M. J. Bray, C. M. Tremeer. Midland Transportation Company, $40,000. F. F. Burke, D. J. Burke, F. J. Burke.

Port Arthur, Ont.—British North American Investm and Land Company, $7,500,000. G. Ruel, R. H. M. Ten A. J. Reid, Toronto.

St. Agathe, Man.—St. Agathe Improvement Comp $100,000. B. F. McFarland, West Bend, Iowa; J. P. roney, Mallard, Iowa; E. A. Lee, Cazenovia, Iowa.

Walkerville, Ont.—Canadian Lamp and Stamping pany, $100,000. W. T. Jones, G. E. Edmunds, B. F. Ki Oddfellows' Temple Building Association, Walkerville. H. Bennett, W. Chater, J. Winterburn.

Victoria, B.C.—Victoria Talking Sign Company, 000. Pacific Gravel and Builders' Supply Company, $ 000. S. P. Finance Company, $75,000. Greater Vict $100,000.

Hamilton, Ont.—Grand Gypsum, $250,000. W. Anderso O. Callaghan, J. P. Steedman. Dunlop-Magee Company, 000 (grain). J. Dunlop, F. A. Dunlop, F. J. Magee. and Canal Sites, $75,000. O. D. Peat, J. M. Telford, McBride.

Vancouver, B.C.—National Paper Box and Carton pany, $25,000. Canada Autophone Company, $35 Mainland Ice and Cold Storage Company, $250,000. S Company, $10,000. British Dominion Real Estate Com $1,000,000. Bella-Coola Townsite Company, $50,000. Creedon Company, $25,000. Federal Land Traders, 000. Pacific Coast Finance Company, $250,000.

Prince Edward Island.—Standard Cup Oyster Com of Malpeque Bay, $25,000. T. E. Inman, North S Eleanors; J. A. Morrison, Summerside; H. V. Carr, Street, Eleanors. Diamond Silver Black Fox Com $60,000. C. Craig, Middleton; E. Arnett, Central Bed M. H. McCabe, Middleton. St. George's Silver Black Company, $22,000. E. Clark, Wilmot; H. Crozier, W A. Clark, North Bedeque.

Montreal.—Riding Academy of Montreal, $100,000 A. Reeb, A. Coussirat, H. Payette. Richelieu and O Navigation Company, $15,000,000. W. K. McKeow Choquette, J. R. Law. Graveline Shoe Company, $1 E. R. Bouchard, D. R. Kennedy, A. R. Perrault. T Importing Company, $200,000. E. R. Parkins, A. C. C R. E. Allan. Denis Land Company, $149,000. A. D. L. Morin, T. Denis. Fairview Land Company, $ H. N. Chauvin, G. H. Baker, J. E. Coulin. La Comp des Terres Hautes de Laprairie, $20,000. L. C. Pel E. Dore, H. Dore, Laprairie. McGill Hotel Com $20,000. J. O'Connor, F. O'Connor, J. McDonnell Compagnie J. and C. Brunet, $20,000. C. Brunet, J. B A. Pelletier.

Winnipeg, Man.—Landed Investment and Loan pany, $50,000. R. G. Mainer, G. S. Haig, J. H. Sib Maclean Sutherland Building Company, $20,000. G. H. ler, D. R. C. MacLean, R. B. Kilbourne. CHARLES H. NEELY, General Manager

The Bank of British Nort America

Established in 1836. Incorporated by Royal Charter in 1840.

SEVENTY-SEVENTH ANNUAL REPOR AND BALANCE SHEET

Report of the Directors of the Bank of British North America, Presented to the Proprietors at their Seventy-seventh Yearly General Meeting, on Tuesday, March 4th, 1913.

The Court of Directors submits the accompanying Balance Sheet to the 30th November last.

It will be seen that the profits for the half-year, including $175,610.22 brought forward from last account, amount to $563,514.92, which the Directors propose to distribute as follows:

In the payment of a Dividend of 40s. per share.....	$194,666.67
Payable, less Income Tax, on the 4th April next.	
Transferring to the Reserve Fund.................	146,000.00
Transferring to Bank Premises Account...........	73,000.00
And in the payment of a bonus of 5 per cent. to the Staff, about	34,066.67
Leaving a balance to be carried forward of........	93,446.79

The above Dividend will make a distribution of 8 per cent. for the year.

The Dividend Warrants will be remitted to the Proprietors on the 3rd April next.

Since the last report a sub-Branch has been opened at the Union Stock Yards, West Toronto, and a Branch has been closed at St. Martin's, New Brunswick.

The following appropriations from the Profit and Loss Account have been made for the benefit of the Staff, viz.:—

To the Officers' Widows and Orphans Fund........	$ 3,621.08
To the Officers' Pension Fund.....................	17,740.38
To the Officers' Life Insurance Fund..............	973.33

London, 18th February, 1913.

The seventy-seventh yearly general meeting of the Bank of British North America was held on Tuesday, March 4th, at the offices of the Corporation, 5 Gracechurch Street, E.C., Mr. C. W. Tomkinson presiding.

The Secretary (Mr. A. G. Wallis) having read the notice convening the meeting,

The Chairman said: The next business is the report of the directors and statement of accounts to be submitted, but with your leave I will take them, as usual, as read. I will first ask your attention to the balance sheet, on which a few comments and explanations are, I think, required. Taking first the debit side, the reserve fund now stands at the figure of $2,920,000, as compared with $2,774,000 last year. This increase is effected by the transfer of $146,000 from the profits of the past year, a larger appropriation than we have often made before, but one which we believe will meet with your approval, both from the point of view of the soundness of a policy of strengthening the reserve as much as possible, and from the fact that it brings it up to the satisfactory round figure of $2,920,000. Deposits show the considerable increase of $3,385,272.80, which I think is a good and substantial growth, having regard to the fact that money has been in strong demand. Notes in circulation show an increase of $356,200, and rebate of $6,049.26. Following the practice of the great joint stock banks, we now show the amount of our acceptances separately from our other liabilities, which is an improvement, we think, as revealing more clearly the Bank's position. With regard to the "Liability under guarantee in respect of the Sovereign Bank of Canada" of $300,000, you have been informed in previous years that no loss was anticipated in this connection. Unfortunately, the winding up of the affairs of this institution now seems likely to yield a less favorable result, and there will probably be some loss, which, however, we have fully provided for according to the information in our possession. Turning now to the credit side, cash and specie are down by $552,614.85; cash at call and short notice are up by $1,329,325.13. The proportion of our cash to immediate liabilities is 33 per cent. Investments show but very slight changes, and stand in the books at or below t market value. Bills receivable show an increase of $3,1 463.26. Bank premises account has increased by $73,447. that is after crediting the account with the provision $73,000 from the year's profits, but I shall refer to this acco subsequently. The profits of the past half year, as stated the report, including the carry forward of $175,610.22, amo to $563,514.92, which we propose to allocate as follows: $1 666.67 in the payment of a dividend of 40s. a share, less inco tax, $146,000 to reserve, $73,000 to bank premises account $34,066.67 in the payment of a bonus of 5 per cent. to staff, leaving a balance to be carried forward of $93,446. The balance sheet, I think you will agree, shows a heal condition of affairs, both as regards the growth of the Ban business and the general strength and soundness of our p tion, and in the latter connection I may mention that provision has been made for all probable losses. It will have escaped your notice that the balance sheet is made to November 30th instead of to December 31st, the latter hav always been the date for the closing of our accounts in p vious years, and the profits earned, therefore, are for a per of eleven months as compared with complete periods of twe months previously. Bearing in mind this fact, a compari of the profits for the past three years is interesting and sho the result for the eleven months just closed in a particula favorable light. For 1910 the profits were $554,800, for 1 $627,800, and for 1912 (eleven months), $678,505.57. T result, I think, is satisfactory, and reflects the greatest cre on the staff, to whose loyal co-operation and unflagging ene it is chiefly due. I feel, therefore, that, as in previous ye of satisfactory trading you have been pleased to sanction t bonuses recommended by the court, you will be pleased on t occasion to signify your approval of a bonus at the rate 5 per cent., amounting, as stated in the report, to ab $34,066.67. As regards bank premises, you will note that appropriate $73,000 out of the year's profits to this accou As you have heard at former meetings, the opening of fr branches and the growth of the Bank's business demand c tinued expenditure on this account, and you will clearly und stand that our provision is not required to meet any deprec tion—rather the reverse, as our property tends to increase value—but simply to meet the growing need of the Bank business. It will, perhaps, be of interest to you to hear th the foundations of our new building at Montreal are now and good progress, we hope, will be made with its erecti during the coming summer. Some of you may have notic statements in the press with regard to our intentions in c nection with our building at Edmonton, to the effect that had decided to put up a ten storey building. This informati is quite erroneous. Our building at Edmonton will be a han some building, consisting of four storeys, i.e., a basement floor for the Bank's business entirely and two floors of offic above; but we have no idea of embarking upon a more a bitious building programme, as has been suggested in so quarters. A new branch has been opened since the last rep at the Union Stock Yards, West Toronto, and a branch h been closed at St. Martin's, New Brunswick. We hope short to hear that our branch at Regina has been opened. Duri the past year, as you are aware, Mr. Stikeman has resig the position he held for so many years of general manag of the Bank. The reasons which led Mr. Stikeman to ask be relieved of his office were entirely in connection with health, which he felt was no longer equal to the strain of work and responsibilities which fall to the lot of a gener manager. Mr. Stikeman's connection with the Bank exten ver a period of forty years, including three years as first gent in New York and eighteen years as general manager in ontreal. After so many years of devoted service to the ank's interest his retirement will, I believe, be no less re- etted by you than it was by the court. I cannot, however, t this occasion pass without saying how great has been the alue of his sound judgment and mature experience in the eneral manager's chair, and how much the Bank is indebted him for building up its business on safe and conservative nes. Good as was the credit of the Bank of British North merica in 1894, when Mr. Stikeman took over the general anagership, we believe it stands even higher to-day, and were e cause of this result to be sought, it might fairly be replied at it was in large measure due to Mr. Stikeman's efforts. ne general managership thus vacated has been filled by Mr. . B. Mackenzie, who has the entire confidence of the court. r. Mackenzie has had a wide experience of the Bank's busi- ss, as inspector, branch manager, superintendent of central anches, and finally, for the past four years, as superintend- t of branches in Montreal. He is a man in the prime of e, forty-five years of age, and is very highly thought of by those who know him. We look forward to his filling the sition to the satisfaction of the court and the profit of the areholders. Having now dealt with the affairs of the Bank detail, I think you will probably like to hear a few words om me on the subject of the general trade conditions pre- iling in Canada during the past year, and on the subject of e present position. The harvest was a fair one, the complete turns showing a total acreage under grain crops of twenty- o million acres, and a total estimated yield of over six hun- ed and twenty-six million bushels. The total area sown uld certainly have been considerably greater but for the favorable weather conditions which prevailed last spring. griculture in every country of the world is, and always will , subject from time to time to adverse weather conditions, there is nothing at all peculiar in Canada's experience last ar. General trade conditions have been very satisfactory; all business is active, and a strong demand for money exists, and seems likely to continue. The general prosperity of the country is no doubt due in the main to the basic conditions which have caused the great progress of the country during the past few years, i.e., a rapidly growing population and ample supplies of fresh capital. It would not be wise, however, to overlook the fact that the activity of trade has been stimulated to some extent by the spending of profits arising out of real estate transactions, nor can it be expected that profits on the same scale from this source, as well as the expenditure they give rise to, will continue indefinitely. A word on the issue of new capital creations may, perhaps, not be out of place. Canada has been a very large borrower on the London market during the past few years, and it is a good and healthy sign of the country's growth, so long as the capital obtained is wisely and economically spent; but at the same time the appetite of the English investing public is not unlimited, and there are at present signs of an attack of indigestion. In quite a number of cases lately the investing public has failed to come forward to the relief of the underwriters, and the latter have been left with a big proportion of the stock on their hands. Conditions also are at present very unfavorable to all fresh capital creations, and seem likely to continue so, owing, firstly, to the fact of the great activity of trade in this country which is keeping money dear; and, secondly, to the large probable requirements of foreign governments which may have to be met by the London market, in addition to the usual demands of railways, municipalities, etc., in the new and developing countries of the world. We have a fairly wide acquaintance among those who undertake these new issues, i.e., bankers, stock brokers and underwriters, and we think it will be only prudent for those intending to embark on schemes involving application to the London market not to do so without first realizing the difficulties they may have to meet and the high rates they are likely to be required to pay. As to the prospects for the present year, prophecy is always a rash and dangerous business, but there is good reason

Balance Sheet, 30th November, 1912

Capital			$ 4,866,666.66
20,000 Shares of £50 each fully paid.			
Reserve Fund			2,920,000.00
Deposits and Current Accounts			39,452,983.06
Notes in Circulation			4,767,796.42
Acceptances			7,907,450.16
Other Liabilities, including Provision for Contingencies			5,948,825.58
Rebate Account			125,110.28
Liabilities on Endorsements		$533,185.35	
Liability under Guarantee in respect of the Sovereign Bank of Canada		$300,000.00	
Profit and Loss Account—			
Balance brought forward from 31st May, 1912		$370,276.89	
Dividend paid October, 1912		194,666.67	
		$175,610.22	
Net profit for the half year ending this date, after deducting all current charges and providing for bad and doubtful debts		387,904.70	
		$563,514.92	
DUCT:			
Transferred to reserve Fund	$146,000.00		
Transferred to Bank Premises Account	73,000.00

Transferred to Officers' Life Insurance Fund	973.33		
Transferred to Officers' Pension Fund	17,740.38		
Staff Bonus	34,066.67		
		275,401.46	
lance available for April Dividend			288,113.46
			$66,276,945.62

By Cash and Specie at Bankers and in Hand	$ 6,624,619.75	
By Cash at Call and Short Notice	11,396,757.02	
		$18,021,376.77
By Investments—		
Exchequer Bonds— £310,300, 1915, at cost	$1,505,165.22	
Dominion of Canada 3¾ per cent. Bonds, £250,000 at 99	1,204,500.00	
Other Investments	114,540.47	
		2,824,205.69
By Bills Receivable, Loans on Security, and other Accounts		43,811,186.24
By Bank Premises, etc., in London and at the Branches		1,394,665.34
By Deposit with Dominion Government required by Act of Parliament for Security of General Bank Note Circulation		225,511.58
		$66,276,945.62

We have examined the above Balance Sheet with the Books in London, and the Certified Returns from the Branches, and nd it to present a true statement of the Bank's affairs as shown by the books and returns.

G. SNEATH,
N. E. WATERHOUSE,
Auditors.
Of the Firm of Price, Waterhouse and Company,
Chartered Accountants.

London, 17th February, 1913.

for thinking that a larger area than ever before will this year be under crop, since a greater acreage was summer fallowed last year than in the previous year. Moreover, it is hardly to be expected that we shall see a repetition of the unusually unfavorable weather conditions which prevailed last spring, and which no doubt prevented the seeding of a considerable area. Meanwhile immigration continues on an enormous scale, and from the figures at present to hand it appears likely that the total for the fiscal year ending 31st inst. will amount to 400,000 persons, as against 354,000 in the year ending March 31st, 1912. It is of interest to note that immigration into the United States only came up to the figure of 400,000 when the total population in that country was forty millions. The population of Canada is now only just eight millions, which goes to show how extremely rapid is the growth of Canada at the present time, even when compared with the large growth of the United States in an earlier period of that country's history. It also brings home to us how enormous a development is required in every sort of direction, both public and private, when a country has to provide for an annual increase of population by immigration alone of 5 per cent., that increase consisting, too, in the main of men and women in the prime of life. During the past year Mr. Hoare and Mr. Mayne Campbell have both visited Canada, and have done much valuable work in the Bank's interests, for which we are extremely indebted. I now beg to move that the report and accounts be adopted.

Mr. E. A. Hoare: I beg to second the adoption of the report.

The Chairman: If any shareholder has any questions to ask on the subject of the Bank's business I shall be very pleased to do my best to answer him.

Mr. Theodore Ellis Williams: Mr. Chairman, your speech has been so complete that I have little to ask you in connection with the report before us; in fact, you have already referred to certain points on which I would have asked for an explanation. First let me say, however, that it is generally considered an ominous sign when many shareholders attend a public meeting; on the other hand, it is a sign that the shareholders are absolutely satisfied with the conduct of the business of the company by the directors when but few attend. No such idea has weighed with me in coming here to-day. I know that during the considerable number of years that I have been a shareholder in the Bank you have had but very small meetings, but I have uniformly received such courteous consideration as a shareholder from the board and also as a small customer from the officials of the Bank, both in London and New York, and at one or two other branches, that I feel it a pleasing duty to come to see you if I possibly can. You have already explained about the reserve fund and the réserve from bank premises. You referred to the building at Edmonton. I have always thought that you were extremely wise in having your buildings, although of a very useful, substantial and pleasing elevation, somewhat lower than most of the buildings around you, because it has occurred to me that in these Canadian cities which grow so rapidly you have acquired some of the best possible sites with capabilities for the extension of your business premises, should occasion arise, upwards towards heaven. I am only sorry, although I have no doubt you have acted very wisely, that you have put your building at Edmonton as high as four storeys.

I think that in most of your banks there are only one or two storeys, but if you have made them sufficiently substantial, and if Edmonton grows, you can easily extend your building, if you think it more desirable to do so, rather than obtain a fresh site. It strikes me, sir, that you have rather a small proportion of branches in Alberta, but I daresay that has been carefully considered by you. Alberta seems to be going ahead at the present time, and I know that some of the banks have branches in one or two other places, such as Lethbridge and Red Deer, but that is a matter which no doubt you have not overlooked. I was extremely pleased to hear from you that your late general manager, having felt obliged to retire after so many years of useful service to the Bank, has been succeeded by Mr. Mackenzie. I am extremely glad that your choice fell upon him, for when I made his acquaintance in Victoria some years ago—it must be six or seven—I was particularly struck with him. I regarded him as a man of extraordinary capabilities and of boundless energy, always extending the greatest courtesy to all those with whom he came in contact. There are one or two matters, if I am not taking up your time too much, on which I should like to draw an opinion from you, if you see your way to give one, as being indirectly, at any rate, connected with the business of the Bank. You probably observed in The Times of last Saturday an article on "Canadian Banking," and a telegram from The Times correspondent on the subject. He seems to think that there is a disposition to oppose the extension of charters except on certain conditions. That is a matter which affects this Bank, although it will not do so for some years, as we have just had the charter renewed. Amongst those proposals that seem likely to be objectionable, but on which you will be better able to form an opinion, are limitation of reserves, inspection by Government inspectors, land banks, rural credit, and interference with the rates of interest. It seems to me that in a new and prosperous country, especially one so fortunate as Canada, there is a great desire to obtain capital; but when that capital has been obtained there are a large number of people who are ready to consider only their own interests, rather regardless of those who have provided the capital. Any such action must be very deterrent to the continued inflow of capital to a country. Already I believe your Bank, in common with others, meets all the legitimate requirements of those who wish to borrow. It is just possible that banks may see their way to advance on some other kind of security more easily produced by the borrowers, but I do not think that Government ought to interfere in a matter of that kind. It seems to me to be rather a matter for the lenders to satisfy themselves that they are really having adequate security, and we may trust them to be perfectly ready to advance money, it being their business, that from which they obtain most of their dividends, whenever they can see their way to a very good security. This Bank has always had the credit of exacting—I must not go into comparisons, therefore, I will say of exacting—a security which would be satisfactory to the board of directors and to the shareholders. The same applies to the rates of interest. Those matters seem to me to be questions of supply and demand as in the case of other goods, and I hope that the Canadians will not press forward any legislation which may hamper the banks to such an extent as to check the flow of capital, which is absolutely necessary for the continuous development of that large and growing country. I do not think, sir, I need take up your time with any more remarks on that subject. Perhaps you can see your way to enlighten us a little.

The Chairman: As regards the various questions that Mr. Williams has raised, I think with reference to Edmonton I may inform him that although our building is only planned for four storeys at the present time, the foundations are being constructed in such a manner that we can always increase it in height if we wish to do so in future. Then, as to the extension of branches in Alberta, I think Mr. Williams may rest assured that we do not in any way overlook Alberta; but, of course, in a country growing as rapidly as Canada is at the present time, it is hardly possible for one bank to cover the whole ground, and the policy is rather to take such favorable opportunities of opening as we feel ourselves able to. With regard to The Times article which Mr. Williams has mentioned, I think all I can say at the present time is that we have studied the Bank Act, and that we can so far see nothing prejudicial in it to our interests. Of course, the difficulties Mr. Williams mentions are all of the future, and if they should occur we must do our best to deal with them. I think that is all I have to say in reply to Mr. Williams, and as no other shareholder has any remarks to make I will now put the question.

The resolution was carried unanimously.

The Chairman: The next business is the election of directors. The directors who retire by rotation have been proposed for re-election, and I will put them to you separately.

Mr. J. H. Brodie, proposed by Mr. G. D. Whatman; Mr. Richard H. Glyn, proposed by Mr. E. A. Hoare; and Mr. F. Lubbock, proposed by Mr. H. J. B. Kendall, were then re-elected.

The Chairman: Before actually asking you to vote on Mr. F. R. S. Balfour's election, I should like to refer to the retirement of our valued colleague, Mr. J. J. Cater, whose resignation was announced in the papers some months ago. Mr. Cater had been a member of the court for forty years, and his retirement was solely on grounds of health, Mr. Cater no longer feeling himself equal to carrying out the duties involved by his directorship. His resignation was, of course, much regretted by all of us, and we shall greatly miss his wise counsel and ripe experience. In asking you to confirm our action in co-opting Mr. Balfour, I should like to say that in asking Mr. Balfour to join us I feel sure we have secured a man who is thoroughly suitable in every way. Mr. Balfour has had a considerable experience of business in America and Canada, having been for a number of years with our valued customers, Messrs. Balfour, Guthrie and Company on the Pacific Coast, while at the present time he is a director of the London and British North America Company, whose business gives him a close acquaintance with Canadian affairs. He is also a director of the Guardian Assurance Company. We quite expect he will be able to visit Canada from time to time, and so keep in touch with Canadian affairs and with the Bank's business on that side, and we have no doubt that in this, as in other ways, he will prove a useful and valuable director.

Mr. Balfour's election was unanimously confirmed.

Mr. Bischoff proposed the re-election of the auditors, Mr. G. Sneath and Mr. N. E. Waterhouse.

Mr. D. A. Campbell seconded the motion, which was unanimously agreed to.

Mr. Williams: Will you allow me, sir, to rise once more to propose a vote of thanks to you for your able and courteous conduct in the chair, to the board of directors for their careful management of the business of the Bank, and to the London manager, the general manager, the branch managers and all the staff of the Bank for their assiduous attention to the duties of their positions, which has brought about a most successful and happy state of affairs.

Mr. Bischoff seconded the motion, which was unanimously adopted.

The Chairman: I thank you, gentlemen, for the kind way in which you have carried the motion, and Mr. Williams for the very kind words which he used in proposing it, and also Mr. Bischoff for seconding it. I am sure we are all very grateful to you.

The proceedings then terminated.

THE GENERAL ACCIDENT ASSURANCE CO. OF CANADA

Head Office - - Toronto

SEVENTH ANNUAL REPORT

The Directors Beg to Present the Seventh Annual Report to December 31st, 1912.

The Premiums, less Cancelments, Returns and Reinsurance of every description amounted to **$321,686 97**, Interest on Investments **$10,045.71,** making a total income for the year of **$331,732.68.**

The Expenditure for Claims paid, and Reserve for Claims outstanding amounted to **$156,552.26.** The amount paid for Commissions and Expenses amounted to **$135,287.84,** making a gross expenditure of **$291,840.10,** and in addition, the Reserve for Unexpired Risks was increased by **$10,340.33,** leaving a balance at the credit of the Revenue account, as a result of the operations for the year, of **$29,552.25,** which, added to the balance carried forward from the previous year of **$70,202.49,** less a dividend of **$10,000** paid during the year, makes the total balance at the credit of the Revenue Account, **$89,754.74.**

On the 14th March, 1913, a dividend of **$10,000** was declared from the accrued profits of the Company to December 31st, 1912, payable to the shareholders of record on that date.

PELEG HOWLAND,
President.

Toronto, April 15th, 1913.

Toronto, February 15th, 1913.

/ESTERN CANADA AND THE FINANCIAL STRINGENCY

xisting Conditions Throughout Prairie Provinces Should Make for Rational Progress and Expansion

Much has appeared in the public press as to how the exist- world-wide financial stringency has affected Western Can- and The Monetary Times has endeavored to obtain ions from reliable sources as to existing conditions.

A striking similarity is noted in the observations of the ous writers, and all join with one gentleman in denouncing catting in real estate, he says: "The present curse of the is the real estate speculation, and it is regrettable that government cannot do more to prevent the subdivision, catting."

As to general financial and commercial conditions the re- from Manitoba are as follow:—

That a financial stringency exists is accepted generally, I think the condition is greatly exaggerated owing to the inual cry of wolf, wolf, which makes everybody, whether s in need of funds or not, feel the need of treating the cry it were actual. I do not think myself that in this vicinity ave any material cause to believe locally that money is at ight, is the reply received from Brandon.

There is a great number of our farmers who have been ole to market their crops, or portions of it. The railways, g to lack of accommodation at Fort William, were unable aul any flax. I know two farmers who have been unable ay owing to the flax still being on their hands.

Trade has been fairly good during the winter, in most s I think quite up to that of last year, but the fall of 1912 not as good as expected, and consequently in certain of business the stock carried over to this year is greatly xcess of that required. This in some cases makes the firm sed perhaps for ready cash, but it will reduce his fall purses this year very materially.

The real estate situation is also an important reason, ough in this vicinity neither our city property nor farm s have been unduly inflated.

Ground is Source of Wealth.

Local merchants report this to be the worst season for col- ons that they have experienced, and it is true that more ts are being returned than ever before. I am hopeful that verage crop will relieve the situation so far as Portage la rie district is concerned. But I am inclined to believe, re- nds a Portage la Prairie banker, that we will not fully re- r until after the crop of 1914 has been marketed. The ation has arisen through over-borrowing, and until suf- nt actual increase to the wealth of the community has been n out of the ground, there is no doubt the pinch will con- e to be felt.

The crops in the Virden district, Manitoba, were fairly d, comments a gentleman well known in Virden financial les, and in most cases saved in fair condition and marketed itably. All the same, credit was too cheap during the d times, and we are now suffering to a certain extent for overtrade in poor collections, and have to carry over a y debt until next fall, with the hope the new crop will g relief. It is encouraging to note that there is a very erent sentiment existing now, at least in this part of the t, than has prevailed for some years. It is manifesting lf in reduced credits, discrimination in sales, and increased vity in collections, all of which should have a tendency to dually effect an improved condition in the business affairs his part of the world.

To this another correspondent adds, the Virden district is led by many old timers, among whom are a number of men l-to-do, so that one light season does not greatly affect n. I do not think there will be very much spare cash in neighborhood during the season ahead of us.

uld Right Itself.

In Saskatchewan the chief trouble appears to be an over- ansion of credit due to too much prosperity. While the sperity of the west is dependent on continued immigration the inflow of foreign capital, the basis for the ultimate sperity must be the success of the farmers, who are the producers here. They have been getting too much trouble very way, but more especially from the implement houses, a Swift Current, Sask., gentleman in answer to The etary Times' question. It must be admitted that the com- tion among the banks is in some way responsible for the -extension of credit.

The present stringency is the best thing that could happen west. Most of the retail merchants have been speculating eal estate, and if the stringency continues for say a year, most of the agreements of sale with which they are tied will run off, and matters will be in a much healthier con- on. With conditions satisfactorily adjusted in Europe, and a good crop this fall, the outlook for 1914 should be very good.

Merchants in Moose Jaw, Sask., appear to be meeting their obligations well considering the general money stringency. It must be borne in mind that the large Canadian Pacific Railway pay-roll in Moose Jaw puts a heavy amount of money in circulation each month, and consequently the situation is somewhat better than in the average western city. An exceedingly good sign is that people generally are economizing at the present time and with good crops this year and anything like adequate transportation facilities in the fall, business should right itself, but in the meantime it is likely to be quiet, thinks one of Moose Jaw's bankers.

While no doubt tight money is in a way affecting industrial activities, as a whole, the result is most beneficial in putting a check to the wild real estate movement which was going on a year ago. It is the result of this more than of the present money condition which is resulting in the returning of paper from the west, is the opinion of a Prince Albert, Sask., financier. Many people are meeting payments on real estate instead of paying their store bills with the result that the merchant cannot meet his drafts. I think that there is no question but that Western Canada will progress again this year, but will do so on a sounder and more sane basis than in the past, and that in the long run the present position of affairs is going to be most beneficial.

Outlook in Alberta.

Alberta's position is revealed as below. Mercantile business in Edmonton is active, and both retailers and wholesalers with whom I have come in contact, report substantial increases in their turn-over. The local retail merchants are meeting their payments promptly, and less than five per cent. of the paper coming under my observation, has been returned unpaid.

So that conditions in the Edmonton district are satisfactory, states Mr. A. C. Fraser, of the Merchants Bank of Canada. Wholesalers with whom I have spoken have complained of slow payments, due to the fact that the crop was slow in moving. The farmers hesitated to market on account of poor prices. This difficulty, however, is being overcome with time. It is surprising to find business conditions so satisfactory in the face of such tight money.

As far as the Medicine Hat district is concerned I am not of the opinion that the tight money situation has not been detrimental to us in any way, probably the reverse as it stemmed a real estate boom, writes one who is in close touch with monetary matters. The farmers in this district have probably suffered more from the tightness of money than any other class.

There is, however, one most serious side to the present financial situation which is likely to be most detrimental to the proper growth of our city, and that is the lack of mortgage building loan money. As far as I can ascertain this will be very hard to obtain. A very great number of houses will be built here if the mortgage money can be obtained, but otherwise the housing situation will be a very difficult one to contend with here this summer.

The district of Southern Alberta, of which the city of Lethbridge is the chief business centre, has undergone a severe test during the past three years, and the present money stringency, coming as it has at the end of a long struggle against adverse circumstances and conditions, has affected business to a very marked extent, writes Mr. K. D. J. C. Johnson, of The Molsons Bank.

Agricultural conditions are good this spring, and the majority of the farmers are "playing safe" by going into mixed farming. They are also working their land on a more scientific basis and good results will no doubt follow.

General business will naturally be quiet this summer as there is very little money available for building or other development. People generally realize that they will have to go slowly this year and are setting their course accordingly. This is as it should be under present conditions, and business will derive much benefit by being carried on along more conservative lines than in the immediate past.

To put the whole matter briefly, money is scarce, business is quiet but healthy. Everyone has confidence in the resources of the country, and this district is in good shape to make a quick recovery as soon as monetary conditions become easier.

The merchants at Kamloops, B.C., look well after their paper. There is not the same activity in real estate that there was a year ago. The prospects for Kamloops are bright, suggests the writer of this reply. There has been gradual progress in this part of the country for many years, and during the last few years there has been more marked progress than heretofore. I see no reason why the progress should not continue; and I expect that Kamloops and this district will keep on progressing even in spite of the present tightness of money.

◆

ONTARIO TO HAVE FIRE MARSHALS

The Ontario government has decided to take action in the ection of establishing a provincial fire prevention service ough the appointment of a fire marshal. Legislation with t end in view has been introduced in the house by Hon. J. Foy. The attorney-general, in moving the first reading of bill, explained that it was not the intention to have it pro- d very far this session, the idea being to have it presented the purpose of being printed and distributed throughout province for criticism and suggestions.

◆

BANK OF ENGLAND RATE REDUCED

The Bank of England rate, as was generally anticipated, reduced to-day to 4½ per cent. after the retention of the er cent. rate for the longest period in half a century.

The beginning of the Balkan war in October last, when financial strain on the continent of Europe was acute, essitated a 5 per cent. rate, but the recent improvement in etary conditions abroad, which allowed the Bank of Eng- d to absorb the weekly arrivals of gold, and the ameliora- r in the Balkan situation, with improving prospects of ce, have enabled the directors to make a relaxation of one- per cent. from the abnormal rate of 5 per cent.

This reduction is expected to be followed by a further inution as soon as peace between Turkey and the Balkan es has been signed and money, which is being hoarded in parts of the European continent, comes more freely into ulation.

◆

Two bids have been received for the Ardath, Sask., 000 6 per cent. 15-year debentures, but neither have been epted as the debentures are being held for a better price.

By the action of the treasury board of the Privy Council Banque Internationale has passed out of existence, and assets came formally into possession of the Home Bank of ada this week.

Public discounts poor paper

Of all concerns which *must* use just the right stationery a bank, broker or financial house is under the greatest necessity to make a careful choice.

The public largely discounts the standing of a concern whose correspondence is not above criticism—whose letter paper is less than 100% right.

Crown Vellum

is the choice of many of our biggest men—and it's worthy of their approval. Fine, substantial, even textured paper—with the "feel" and "look" that begets confidence.

We can supply if your regular stationer will not.

WANTED

AGENCY FOR A STRONG RELIABLE LOAN COMPANY for the City of Calgary, Alta. Write to ALBERTA INVESTMENT AGENCY, BEVERIDGE BUILDING. CALGARY, ALBERTA.

To general insurance fund, viz.: Provision for claims outstanding, $3,218,000; investment reserve and general contingency fund, $158,493.95; to reserve fund, $1,500,000; proportion of premiums unearned, $3,636,239.43; to balance from revenue account, $3,321,104.48.

Reference was made at the annual meeting in London to the successful efforts of the local boards and officials in the overseas dominions. Mr. C. H. Neely is general manager for Canada, and the company's head office is at Toronto.

LIGHT AND POWER DEVELOPMENTS.

One of the largest construction and engineering contracts of the year was closed, when the directors of the Cedar Rapids Power and Manufacturing Company, a subsidiary of the Montreal, Light, Heat and Power Company, let out work in connection with the new hydro-electric development amounting to over $3,000,000.

The firm to secure the contract is Messrs. Fraser, Brace and Company, of New York. Its undertaking will consist in taking up the work where the construction staff of the Cedar Rapids Company left off, complete the canal and build the power house sub-structure. The installation under the contract just signed will be 100,000 horse-power, and the work must be completed by October, 1914. The terms of the contract are on a unit price basis, and the estimated value of the work is in excess of $3,000,000. The contract is one altogether apart from the machinery to be installed, contracts for which are pending.

The contract was signed on behalf of the company by Mr. Howard Murray, vice-president of the Cedar Rapids Company, and Mr. J. S. Norris, the secretary.

Bills of sale record the transfer to the Essex County Light and Power Company of four private companies, the Amherstburg Electric Light, Heat and Power Company, Limited, the Essex Light and Power Company, Limited, the Leamington Light and Heat Company, Limited, and the Kingsville Electric Light Company, Limited. The sum of $59,550 is being paid for the franchises of the Canadian towns, and the same company is purchasing two electric businesses in Detroit. The Essex Light and Power Company is the Edison Light Company of Detroit.

DIVIDENDS AND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

SUTHERLAND, SASK.

We wish to call attention in this issue to an offering of Debentures of exceptional value, namely, that of Two Hundred Thousand Dollars at 5% of the Town of Sutherland, Saskatchewan.

Sutherland is an incorporated Town with a population of 1,500 people at a conservative estimate, immediately adjoining the City of Saskatoon to the East. The nearest point of the limits of the Town to the West being about one mile from Saskatoon City Post Office.

Sutherland is, in fact, the Saskatoon Terminal of the Canadian Pacific Railway, on their main line from Winnipeg to Edmonton, Saskatoon to Brandon, Regina and Moose Jaw.

Sutherland is the Head Quarters of the Canadian Pacific Railway for Districts Numbers Two and Three Saskatchewan Division, and is the largest Divisional Point between Winnipeg and Edmonton.

Sutherland has a Canadian Pacific Railway Pay Roll at the present time of over Fifty Thousand Dollars per month.

There are, including Engineers, Firemen, Conductors, Brakemen, and Shopmen, between 450, and 500 men working in the local Shops and Yards.

Sutherland is the Headquarters of the Building and Bridges, Mechanical, Car, and other Departments of the Canadian Pacific Railway.

Sutherland has twenty-eight miles of Track, shortly to be much increased, a Twenty-Car Stock Yard, Ice House with a capacity of 2,000-ton, Sixteen Stall Round House, Machine Shops and Car Repair Tracks.

Sutherland is only Three-Quarters of a Mile from the Saskatchewan Provincial University and Experimental Farm Buildings, 1,333 Acres of the best of land are absorbed by the above institutions, a great part of which forms the South-West Boundary of the Town. Over Three Million Dollars have been spent to date, on the above Buildings and Grounds, and before they are completed, it is estimated that over Ten Millions will be spent. These institutions are planned for the eventual accommodation of Five Thousand Students. Of great value to Sutherland, is the fact, that the new City Hospital, costing over Three Hundred Thousand Dollars, is being placed on the University campus, bringing this valuable asset also, within Three-Quarters of a Mile and easy reach of the Town.

Sutherland has the Dominion Forestry Reserve, comprising 320 Acres of Land located with 160 Acres of it, within the Town limits.

Improvements forecasted for this year, will total Five Hundred Thousand Dollars, including the present issue of Debentures.

Appropriations have already been sanctioned, for the expenditure immediately, of Fifty Thousand Dollars by the Canadian Pacific Railway, mainly for a Freight Shed and construction of Trackage in the local Yards, and it is known positively, that the Railway authorities intend double-tracking from Sutherland into Saskatoon, this year if possible.

The Dominion Government have appropriated in their last estimates, Thirty Thousand Dollars, for work on the Forest Reserve this year.

The Royal Bank of Canada have also purchased a valuable site, and intend erecting a substantial Building for their use at an early date.

The Saskatoon School Board, in whose district Sutherland is located, are just completing a magnificent brick School at a cost of One Hundred and Twenty Thousand Dollars.

At the present time, certain Financial Agents of Saskatoon are dealing with the City Council for the construction of an extension of the Street Railway to Sutherland, and have actually placed securities to the amount of Fifty Thousand Dollars for the construction of the line as an unreserved Gift. This is expected to be done this year.

Certain industrial enterprises will commence the erection of their plants at an early date. The Provincial Government have material now on the ground to install a local telephone system and exchange.

Last Year's assessment totalled $1,835,255, and this year will be well over Two Million Dollars.

The present Debenture Debt is the insignificant total of Five Thousand Four Hundred Dollars, none of which is in arrears.

By the Financial Statement appended, it will be seen there is a Surplus credit to the Town of $16,452.38 on December 31st 1912.

There is every evidence that large investors are only waiting for the utilities to be provided, to force the pace for Sutherland, and put it in the front ranks of any Division of the Saskatoon Area. This issue of Debentures is absolutely Gilt Edged. It is a virgin field for investment of unequalled quality and will bear the strictest investigation. (Advertisement).

LEGAL NOTICE

SOVEREIGN COTTON MILLS, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapt of the Revised Statutes of Canada, 1906, known as "The Comp Act," letters patent have been issued under the Seal of the Secr of State of Canada, bearing date the 19th day of March, 1913, incorp ing James Steller Lovell and Charles Delamere Magee, account William Bain, bookkeeper, and Robert Gowans and Joseph Ellis, solic clerks, all of the city of Toronto, in the Province of Ontario, for the f ing purposes, viz.:—(a) To carry on the business of manufacturers of dealers in all kinds of cotton, woollen, linen and other goods, cloths, and materials and all by-products thereof and to build, acquire, maintain and operate all kinds of mills, dye houses, print works, bleach and other buildings and plant in connection with any part of the pany's business or undertaking; MUNICIPAL MOVEMENTS

Civic Savings Banks Suggested for Toronto—Vickers & Company's Shipbuilding Plant

Two interesting resolutions were carried by Toronto's Board of Control: one, that the city advertise and dispose of its bonds "over the counter," while the other was relative to the inauguration of a civic savings bank.

At a special meeting of the Stratford city council May 8th was set as the date for voting on a by-law to loan the Stratford Mill Building Company $30,000 and grant a fixed assessment of $12,000 for ten years in return for the company erecting a $60,000 plant for the manufacture of flour mill machinery, replacing the factory destroyed by fire last December.

Bathurst, N.S., is forming a board of trade to give publicity to its possibilities and resources.

With an increase of $5,000 in the grant for weed inspection in Alberta and the appointment of additional weed inspectors under the newly organized rural municipalities, a big effort will be made to minimize the weed evil throughout the province.

Bella Coola, B.C., is the location of a new branch of the Bank of British North America under the temporary management of Mr. J. N. Cran.

Ready in September.

The shipbuilding plant which is being established at Montreal by Messrs. Vickers & Company will be ready in September next to undertake the construction of the largest steel vessels.

Hamilton board of trade intend holding a trade excursion to Northern Ontario.

The Canadian Credit Men's Association, Winnipeg, were addressed at the monthly meeting by Mr. H. M. Temple, C.P.A., of St. Paul, Minn., his subject being "Accounting and Auditing and Their Relation to Credit." The address was profusely illustrated by lantern slides. A motion was passed that the thanks of the association be tendered the Saskatchewan government for refusing to consider suggested legislation calculated to legislate the association out of that province, so far as the handling of insolvent estates is concerned. Among the reasons given why this legislation should not be passed was that the association practically represents every large wholesale house from the Atlantic to the Pacific doing business in Saskatchewan.

Guelph's fire loss during March was only $32, there being five fires reported.

Small Fire Loss

Regina's March fire loss was $100. The number of alarms received by the department was twelve.

A branch of the Canadian Bank of Commerce has been opened at Parksville, B.C., under the supervision of the Nanaimo manager.

Vegreville, Alta., is desirous of having a steam laundry established there.

At the annual meeting of the Guelph board of trade ex-Mayor George J. Thorp was unanimously elected president for 1913. Mr. Alex. Simmers, who recently came to Guelph from Winnipeg, was elected vice-president, and Mr. James Watt re-elected secretary-treasurer.

◆

DEBENTURES AWARDED

Scott, R.M.—$8,000 6 per cent. 20 years, to Messrs. Flood Land Company, Regina.

Brantford, Ont.—$60,000 4½ per cent. 30-year debentures, to Messrs. A. E. Ames and Company, Toronto.

Petrolia, Ont.—$11,901 5 per cent. 15 instalments, to Messrs. Wood, Gundy and Company, Toronto.

◆

The following issues have been listed on the London Stock Exchange: City of Calgary, £130,000 four and a halves; Rio Tramway's $5[illegible] fives; Shawinigan Water and Power $1,000,000 shares, and Vancouver Power £50,000 four and a quarters.

IN THE LONDON MARKET

Several Cities Have Disposed of Bonds—Edmonton's Issue—Calgary Made an Error

The new loan of the city of Regina, £553,000 5 per cen at 101 was fully subscribed.

The city of Edmonton has succeeded in placing £2,00 000 five per cent. debentures at 95. The loan is a size whi it is believed, never was previously attempted by any Domini city.

Whether this is a matter for congratulation or oth wise remains to be seen. It is certain, though, that finan circles in London, when the news gets abroad, will be incli to gasp at Edmonton's temerity, states a Canadian As ciated Press cable.

Eighty-five per cent. of the Saskatchewan 4 per ce debentures were left with the underwriters, and sixty-five p cent. of the Southern Alberta Land 6 per cent. debentu were also left.

Calgary's Loan.

A blunder was made in connection with the placing the city of Calgary loan, states the London Times, with result that the recent issue has been withdrawn.

It appears that an issue of bills to the extent of $2,5 000 was recently placed in London by the Bank of Montre and almost simultaneously another batch of similar bills for t same amount was disposed of in New York by a person repr senting Calgary in some capacity. These bills were th sold by the New York house to a London house of hi standing and sold there on terms differing materially fro those arranged by the Bank of Montreal. Consequently, t city has now withdrawn the New York portion.

Some further information as to Calgary's loan is obtain from the Calgary Herald, which says:—The following m sage from Mayor H. A. Sinnott, has been received by Act Mayor Ross.

"To William Ross, Acting Mayor.

"Have sold six hundred thousand pounds treasury bills 6 per cent. discount, plus expenses, eight months, pay in New York, American gold, to Heidelbach and Tekelhein They take chances if they wish to sell in London. We n sell now, if at all.

"H. A. SINNOTT."

In brief, it means that the mayor has succeeded in gett a short term loan of $3,000,000 at 6 per cent., the interest expenses to be subtracted from the loan.

The mayor's reference to the fact that the loan is to paid in American gold at New York means that he is sel the notes direct to the New York people, and that they are in any sense, acting as agents for Calgary to sell the elsewhere.

This action is made necessary by the monopoly claus the city's agreement with the Bank of Montreal which been causing the city officials much worry in the past. B clause in this agreement the Bank of Montreal is given en control of Calgary's finances in the United Kingdom. By terms, Calgary is debarred from handling its own funds the United Kingdom or permitting any agent over whom has control to handle finances for it, except the Bank Montreal.

This explains the reference in Mayor Sinnott's messag "They take chances if they wish to sell in London." In ot words, the bills are sold to the New York people and it is up them to take all responsibility thereafter for their dispos

Regina Decides to Withdraw Treasury Bills.

Commissioner Reid brought up the sale of the treas stock at the recent Regina council meeting authorized so time ago, and said that with this immediate issue of sto in London it would be well to cancel this issue of trea bills. Alderman Roundine was at once agreed, and poi to the saving, for where they were paying 5% for treasury funds they would obtain the other at 5 p Alderman Peart declared that it would be rather unfort if they succeeded in selling both and had about $2 lying in the bank of which they could make no im diate use.

ISSUING BANK STOCK BELOW THE MARKET

Many holders of Canadian bank stocks would no ubt be pleased if the banks adopted the suggestion de by Mr. J. B. Forgan regarding the issue price new shares. Mr. Forgan told the banking and comrce committee that the market quotations for bank cks in this country would be improved and the banks uld be able to get new capital from their stockholders h more facility if the new stock was issued at prices ing more valuable rights.

He said that, in his opinion, some of the Canadian nks have been rather hard on the rank and file of their reholders in requiring from them practically the full ue of the old stock every time they have asked them subscribe for the new.

In the United States the old shareholders, as a rule, given the opportunity to take new stock at prices king it a very attractive investment; and if a sharelder does not find it convenient to increase his investnt at the time the new stock is offered, a market is re for the rights, and he does not lose anything by inability to subscribe.

Owing to the relatively unfavorable terms offered stockholders of Canadian banks there is often a conerable block of the new capital not taken up when issue is made.

This unsold portion has to be sold by tender, or on market, and naturally the price of the old stock is pressed to a certain extent when it is being placed.

In the advertisement of the Bank of Montreal, ering the unsubscribed portion of its last issue, it was nounced that the stock not taken up by shareholders uld be sold to the highest bidder and the proceeds, er and above the price at which the stock was allotted to old shareholders would be divided among the individual shareholders who had failed to take up their new stock.

In other words, these stockholders would not lose or suffer because they did not exercise their right to subscribe.

The Bank Act merely provides that when allotted stock is not taken by a shareholder, the bank may sell it to the public on such terms as the directors prescribe.

What the general practice is in disposing of the proceeds we do not know; but apparently in some cases the surplus amount realized (over and above the issue price) has gone into the bank's profit and loss account; and those shareholders who, through ignorance, negligence, or inability to pay, failed to exercise their right to subscribe, thereby lost all benefit of the new issue.

Upon reverting to the suggestion made by Mr. Forgan, that new stock should be allotted at lower prices, the case of the Canadian Pacific Railway naturally comes to mind. Largely because of the Canadian Pacific Railway policy of issuing new stock to old holders at prices far below the market, the quotations are usually on a level at which the net return runs from 3½ to 4½ per cent. Another result of the policy is that the company can get huge blocks of fresh capital from its stockholders almost at will, regardless of tight money periods.

If the banks were to form the habit of putting out their new stock at prices 60 or 70 or 100 points below the market, it seems likely that the market price of bank stocks would rise sharply, and the regular dividends would represent a smaller return on the market quotations.

The rights to subscribe would then have a substantial value. Suppose a bank with capital $5,000,000, rest $5,000,000, dividend 12 per cent., and stock selling at 220, issues $1,000,000 new at 120, and the directors let it be understood that in case of future issues it was the intention that the rights should possess substantial value, the rights pertaining to the issue in question should be worth about $17 per share.

And if there was a prospect of another such transaction in a couple of years, the market price of the stock might easily rise to a 4 per cent. basis, or $300 per share. If so, the bank could get $200 per share for its next issue, and still put it out at 100 points below the market.

Of course, under that system of offering new stock it would not be feasible to increase the dividend rate as is done at present. The capital would be increasing a little more rapidly, and besides, the stockholders would be getting virtual increases in their rights to subscribe.

Under such a policy the rest or reserve fund would perhaps fall behind the paid-up capital in point of size. It would consist more largely of earned profits, and its growth would be slower.

The eminent Chicago banker quoted at the beginning of the article remarks as follows on this phase of the subject: "This process may be slower and more troublesome to the managers, but in the long run it redounds to their credit. It is in the interests of shareholders that they should have an opportunity to subscribe for new stock issues at a reasonable rate."

If the shareholders could expect that they would have the opportunity from time to time of subscribing for new stock at low prices, there would scarcely ever be any question of the absorption of new issues made by well-established banks. And the chances are that the increase of capital would be more proportionate to the increase of liabilities.

ACREAGE AND AGRICULTURAL PRODUCTION

Canadian agriculture is the topic of interest just now. The early opening of navigation has hastened the transportation of last year's wheat crop. Suitable weather having prevailed, seeding is proceeding throughout the West.

The Monetary Times' Annual Review contained an article, "Retrospect and Prospect," in which was this sentence: "Another problem which the nation must face immediately is the question of rural depopulation. That in an agricultural country especially is a serious matter." An Irish firm of stock brokers has coupled this with the statements of a correspondent of the London Economist relative to the decrease in acreage and value of last year's Canadian crops as a basis of a warning to their clients who might be likely investors in Canadian securities:—

"All that can be said at present is that there is a tendency in the Canadian immigrants to cluster into towns and seek employment there instead of on the land," continues the letter. "As this fresh population hungers for the city comforts and conveniences, to which they have probably been accustomed, one Canadian town vies with another in setting forth its superior residential attractions. This vigorous campaign to capture new inhabitants has not been unattended with ill effects. To this source may be traced much of the wild speculation in town lots at absurdly inflated prices; and to this cause may likewise be ascribed, at least in part, the Canadian municipal borrowings, so familiar to everybody, in the London market. Whether this eager absorption of fresh population by Canadian towns is a healthy process in the development of Canada is, indeed, open to grave doubt."

Then follows a statement relative to conditions in Argentine before the Baring crisis, just as if the writer thought such a crisis was coming in Canada. While such a condition as stated by the Annual Review exists, and while there was a decrease in acreage and value of Canadian crops last year, these things are of temporary character.

Rural depopulation is a problem and an advers factor, but one which is receiving much attention. Th Dominion government is lending its assistance. Th provincial governments are alive to existing needs. Ne Brunswick is making progress in the solution, and s are all the other provinces right across the Dominic to British Columbia, where the land settlement questio is a live one. Decreased crop acreage was not a sig of decay, but, as Dr. Archibald Blue, chief officer of th Dominion census and statistics office, in a recent issu of *The Monetary Times*, stated:—

"Anyway, it is certain that the decrease to whic the correspondent of the London Economist calls atte tion is attributable entirely to the abnormal character the season of 1912, and not to any other set-back the development of the northwest or of other areas Canada."

From all available reports received by *The Moneta Times*, this may be remedied even this year, for a su stantial increase in acreage is expected to be shown the year's returns. Diversified farming is growing, is shown in the following statement:—

"We have imported beef, mutton, poultry, eggs and the bulk of our garden stuff. These are now receivin much attention, as well as other products. I think ther is no doubt that the value of products in Saskatchewa this year will be very much greater than it ever ha been," is the opinion of a prominent Regina citizer while Mr. C. W. Rowley, the Winnipeg banker, a ger tleman who knows the West as only few do, remarke in an interview published in last week's *Monetar Times*:—

"The foundations of her prosperity are laid bro and deep. We, like all other countries, will have ou periods of depression, unscrupulous promoters, etc., bu notwithstanding this each ten years will show a decid improvement in general conditions and material devel ment."

Statements such as the foregoing from those w are right at the centre of contention should do much make fearsome individuals who think and write of crise and setbacks realize that the agricultural population producers and production will in the near future show noticeable growth, and turn their thoughts and writing to the solidity and security of the advances made in th development of the Dominion's varied resources.

SMALL CHANGE

In August last one purporting to be a journa associated with a London daily in an interview sta his articles relative to Canadian investments "wo create one of the biggest sensations in the history British finance." At this time *The Monetary Tim* stated it was waiting for the sensation.

It still waits.

It now appears an English writer, who admits has never been in or seen Canada, is writing a seri of facts in a journal for investors, the said facts havin been gathered from publications and persons who hav returned from the Dominion. The articles are of a detri mental nature, the premises contained in them absur No notice need be taken of such vagaries.

The National Institute of Journalists are shor holding their convention at Montreal, when a numb of representative British writers are to visit the Domini and make a tour through it.

Being trained observers and skilled investigators they, with their native inborn caution, will be able garner for themselves such supply of conservative fa and to form such opinions as will effectually meet the and all such effusions, and show that Canada's progres prosperity and expansion is an actuality of which th future will show but greater growth.

SASKATOON'S RAPID GROWTH

s Been Accompanied by Increased Prices of Land—The Subdivision Game—Business Men and Conditions of To-day

BY A. E. BOYLE

The conditions prevailing in the real estate market at skatoon have given rise to the unfavorable reports which ve been circulated with respect to the general business uation there, and it is worth while to discuss briefly those nditions and their relation to the whole commercial scheme things. In so doing one must bear in mind the position t the city has occupied since its wonderful progress be- n about ten years ago.

It has practically sprung from nothing to a commercial tre of more than 25,000 people, all within a decade, and has been compelled to depend largely upon its own ex- ience at it went along.

The growth has been accompanied by many advances prices of land. Let us see what the history of Saskatoon's l estate activity has been. In the early days it was pos- le to buy lots on the principal thoroughfares at $10 to per front foot. A year later it was possible to sell them $20 to $100 per foot. The new purchasers could hold for ear and sell out at practically twice the amount they had d. As many of the transactions were on the basis of e-third down, balance in one and two years," the actual fits in some instances were as high as 500 per cent. on sum paid over.

wth Attracts Manipulators.

The reason for all this upward movement in values was growth of population in the city itself and in the country rounding it. Naturally the opportunities there attracted e attention, and Saskatoon came to be known as the ce where investors, even those who operated on a small le, could secure huge returns in a very short space of e.

As the city grew and the values of central property rose, vever, the opportunities diminished. By the time lots on main streets were selling at $500 to $1,000 per foot a ly large sum was needed to do business. The profits e as heavy, for the men who had enough money to invest hat sort of land, but the general run of investors could fulfil the financial requirements.

The residential streets of the city aroused interest en the central property began to shine in the thousand ar class, and for some years the profitable experiences and buyers were repeated there. They piled investment investment until the prices reached a limit where the ller operators could no longer participate.

In the meantime the sub-division game was being play- to the full extent of the law. Farms were surveyed into for miles in all directions from the city, and these were resented as offering the same chances for profitable in- tment as did the real lots near the business district. And vas in this connection that the legitimate land business eived its most severe blow. It was impossible to prevent manipulation of bald prairie and the exploitation of it ong thoughtless or ignorant people as Saskatoon lots. m all parts of the continent individuals jumped into the -division business because they saw so many chances picking up easy money from incredulous speculators.

oms Once in a Hundred Years.

Hundreds of people who heard or read about the marvel- advances in prices of Saskatoon property have attempt- to "get rich quick" by purchasing a lot in that neigh- hood.

It is not necessary to say that a large proportion of the ney invested in that way has been planted where pecuni- vegetation is slow and uncertain. We have heard of the tury plant which blooms once in one hundred years. By time the next blooming occurs, some of the sub-divisions are supposed to be near Saskatoon will be in a position eturn dividends to their owners.

In the meantime the losers will be sore on Saskatoon, on the West in general.

While the individual losses sustained by speculators in -division stuff are serious enough, they are only the na- l result of the operations that were conducted when ney was so easy. Some of the men who made money in dfuls while the craze was at its height were fitted by ning and business experience for only menial occupa- s, but their pretensions were ridiculous. It was these racters who were picking up the remittances of careless ple in other parts of the world, and they are now joining he chorus of declamation and distress.

All this is history, although some of it is comparatively ent. The main fact of the real estate situation in Saskatoon is that the people who are doing legitimate business there are the ones who condemn most bitterly the scandalous exploitation of farm lands as town lots.

If one-half the money that has been sunk in outside sub-divisions had been invested in the city, in land or in ordinary commercial enterprises, the results to the community and to the investors would have been gratifying in the extreme. The keenest critics of the wild-cat performances are, as I have intimated, the people who have something at stake in Saskatoon itself. They are devoted to their city and to its interests.

They think that it has justified its existence, and they are proud of every stage of that existence. As a wholesale and manufacturing city it has its future in its own hands, and there is nothing which can prevent it from playing an important part in the further up-building of the West. But at no time will the business of buying and selling real estate be promoted to a position among the leading industries.

Confidence in Saskatoon's Future.

I made a point of asking dozens of responsible men in Saskatoon for their opinions on the general commercial outlook, and found all of them imbued with a strong confidence in the future of the city, immediate and distant. Comparisons with the activity of 1912 they regarded as misleading, because there was an abnormal volume of business twelve months ago. They deplored the antics of the wild-catters and felt disappointed at the unwarranted criticisms of Saskatoon that had been spread abroad as a consequence of the illegitimate exploitation of sub-divisions. But they regarded the sudden collapse of this movement as a good thing for the city and country generally. The lesson may have been a painful one, but it had many advantages.

These business men's opinions were based on the observations they had made in the management of their own establishments, and they knew their subject. It was easy to understand why Saskatoon had made such great headway.

In addition to the benefits and bounties conferred by Nature, the human element there is an asset of enormous strength. Any impressions I may have had as to the sound position occupied by Saskatoon were confirmed by conversations with the men who do things there. They are more deeply interested in the permanent soundness of Saskatoon's real estate than any outside investors can possibly be.

They themselves own most of the property, and when they tell me they are pleased with the situation, it is easy to infer that even in the land market conditions are satisfactory.

◆

TORONTO HAD FIRE PREVENTION DAY

Toronto's Mayor, Mr. H. C. Hocken, issued the following proclamation re a Fire Prevention Day:—

Whereas the Canadian Fire Prevention Association have requested that a day, to be known as Fire Prevention and Clean-up Day be proclaimed, and the medical officer of health, chief of fire department, and the property commissioner have reported that this is a step in the right direction, and that a considerable amount of good can be accomplished by this means. They, therefore, recommend that the last Friday in April be set apart for this purpose, and that on this day and the following day the merchants and manufacturers of the city and citizens generally be requested to have removed from their premises all accumulations of inflammable and combustible waste materials, and that in the following or first week in May a general inspection be made by the fire department for the purpose of ascertaining what has been done, and those who have failed to comply with the requirements above outlined.

And whereas the city council have, on the recommendation of the board of control, authorized me to issue a proclamation requesting the observance of the said day in the manner indicated.

I, therefore, in compliance with the wish of the council, proclaim Friday, April 25th, 1913, as Fire Prevention and Clean-up Day, and do hereby respectfully and urgently request our manufacturers and merchants and the citizens generally to co-operate with the city authorities in removing or destroying all accumulations of waste material and to have a general cleaning up of their premises.

The fire department will make a general inspection during the following or first week in May to ascertain to what extent the request herein made has been complied with, and in all cases of non-compliance to urge and insist upon the observance of the reasonable provisions of this proclamation.

In witness whereof this proclamation is made public, and citizens are hereby requested to take notice and govern themselves accordingly.

Grand Forks has reorganized its board of trade on broader principles than it has worked under heretofore. Mr. Fred Clark, formerly of Port Hope, is president, and Mr. Barlee, secretary.

NATIONAL BRICK COMPANY

Satisfactory Report Presented to Shareholders—Bond Interest—Output and Outlook

Monetary Times Office,
Montreal, April 23rd.

The first annual report of the National Brick Company of Laprairie, which was presented at a meeting of the shareholders, was a good one, particularly when it is remembered that the year covered was the first in the history of the company in its present form. It may be recalled that the National Brick Company was formed by J. N. Greenshields, K.C., upwards of a year ago, and that the concern took over the old established Laprairie Brick Company, and also began the construction of a brick plant at Delson Junction, near Laprairie.

The profit and loss account covering twelve months to February 28th last, was as follows:—

Gross earnings		$396,732
Less administration, directors' fees, legal expense, taxes, etc.		14,768
		$381,964
Dividends on old Laprairie stock	$36,570	
Bond interest	90,197	126,767
Applicable against common stock dividend		$255,196

Common Stock Issue.

The common stock issue of the company is $2,000,000 so that the above net profit, after deducting bond interest, would be 12.75 per cent. thereon. A dividend was declared some time ago by the directors, amounting to 1¼ per cent. for the last quarter of the year. This would require $25,000, which, being deducted from the above amount, would leave the sum of $230,196 as surplus to be carried forward to the coming year from operations of the past year. This would mean 11.50 per cent. on the common stock of the company. The stock is now on a regular basis of 5 per cent. per annum, which would mean that the company, last year, earned 6½ per cent. more than sufficient to meet the present dividends.

It will be observed that the bond interest in the above statement of profit and loss amounts to $90,197. The total bond issue is $2,319,100 of 6 per cent. The interest on this would amount to $139,146, or $48,949 more than shown in the above statement. The additional bond interest which will thus be necessary during the coming year is, however, almost wiped out by the fact that the charge of $36,570, shown in the above statement as dividends on old Laprairie stock, will, in future, be cancelled. This would mean that bond interest during the coming year would amount to only about $12,000 more than the total charge for bond interest and dividends on old Laprairie stock last year.

Old Laprairie Stock.

Respecting this old Laprairie stock, it may be said that a considerable portion of this stock was not turned in for exchange until a very few months ago, so the dividends assumed priority along with the bond interest shown in the statement as a prior charge.

No allowance is made in the profit and loss account for bad and doubtful debts or for depreciation. The statement of assets and liabilities show that the company has already a reserve fund from the old Laprairie Brick Company of $10,103 against bad and doubtful debts. This was, no doubt, considered sufficient without making further allowances. The Laprairie Brick Company has a reserve fund of $277,000 for depreciation, which amount has been written off the property and building account. Inasmuch as the plant of the National Brick Company at Delson Junction was only in process of building during the year, it was unnecessary to write off anything for depreciation on this plant.

Comparing the quick assets and current liabilities, the company is found to be in a satisfactory position. Cash, bills, and accounts receivable, stock on hand and unexpired insurance show a total of $369,383. Accounts payable and accrued interest on bonds amounted to about $75,596, so that quick assets exceed current liabilities by no less than $293,787, which would seem to place the company in an exceptionally strong position.

In Operation But Seven Months.

In considering the above, it should not be forgotten that the earnings mentioned were made notwithstanding that the new National Brick plant was in operation but seven months out of the year. The output during this period was between 30 and 40 million bricks, and the output of the Laprairie plant was about 64 million bricks.

The North American Accident Insurance Company, of Toronto, has been registered in Alberta.

WESTERN CANADA

Seeding Conditions Are Satisfactory—Immigration ar Immigrants—Building Statistics

Monetary Times Office,
Winnipeg, April 22.

Seeding is now general throughout the West. There an abundance of moisture in the ground and conditions a satisfactory.

Many districts, especially in Manitoba, report that plo ing is behind, but on the other hand, a large number of t districts report a larger percentage of cultivated land rea for seed this year, taking this with the newly broken la and the area promises to be large. There is apparently lack of good seed. Farmers are said to have from 15 to per cent. of last year's crop still on hand after seeding completed.

Farmers Acquire Homesteads.

The immigration season is at its height; daily lar trainloads arrive at Winnipeg where they are distributed all parts of the West.

Mr. W. J. White, inspector of Canadian governme agencies in the United States, during a visit to Winnip last week, stated that he believed that the number of ne settlers coming to Canada this year from the south wou show an increase of over 20 per cent. on the returns of la year. "Particularly gratifying," says Mr. White, "are t enquiries which we are receiving from those states whe there is no work in the way of organized immigration car paigns being carried on. A large amount of corresponden has been received from the states of Florida and Kentucl and several states where there is no immigration offici from the Dominion."

The homestead entries in the prairie provinces, for tl period ending March 30, show that 80 per cent. of the e trants are English-speaking people. The actual figur were 826 entries made, and of these 230 were from tl United States, 174 British born settlers, 149 Canadian bor

A campaign is to be instituted to induce dairy farme from the state of Minnesota to come to Western Canada; number have already come with their effects. These me said Mr. White, not only bring wealth with them, but tl most valuable experience along the lines of dairy farmir under conditions very similar to those existing in Weste Canada.

Building in Winnipeg.

The continued fine weather this spring is keeping tl building inspector's office busy. The total permits issu for the year has already passed the three and a half millic dollars. The erection of apartment blocks promises to be notable feature of this year's building construction, permi having been taken out during the first three and a ha months of the year for nine new buildings of this clas Some of the industrial buildings for which permits ha been taken out this year are a $36,000 warehouse for th Pease Foundry Company, a $28,000 foundry for the Man toba Bridge and Iron Works on Logan Avenue, and $195 000 warehouse for the Smart-Woods Company. Other bi permits taken out this spring are as follows:—Medical Co lege, $36,500; additions to the Winnipeg Grain Exchang to cost $500,000. A number of fine new residences will al be erected.

◆

BRITISH INDUSTRIES TO LOCATE BRANCHES

It is stated on good authority here that, "with a vi to preventing the development of Canada falling mainly i American hands, a representative of an influential group British financiers has just sailed to the Dominion with object of starting branches of several important British dustries in the chief centres there. The industries will financed with British money, and the interests concern have put up five million pounds sterling in order to car out their enterprise. Several concessions have been obtai by those interested in this scheme, and others have b promised by the Canadian local authorities," states Can dian Trade Commissioner J. E. Ray, who is at Birminghan England.

◆

The Montreal Autobus Company has secured a Dominio charter. It will have a capitalization of $10,000,000, of whic $1,000,000 will be subscribed in London, and $500,000 i Montreal. Its charter members are Messrs. H. S. Holt, U. F Dandurand, F. L. Wanklyn, D. McDonald, J. S. Norris, Tar crede Bienvenue, D. Lorne McGibbon, Paul Galibert, an James E. Wilder, all well-known Montreal capitalists, and number of them connected with the Montreal Light, Heat an Power Company, and with the Montreal Tramways before it reorganization some years ago. Mr. McDonald will b general manager of the new corporation.

MARCH BANK STATEMENT

Increases Shown in Circulation, Deposits, Call Loans Elsewhere and Current Loans

	March, 1912.	Feb., 1913.	March, 1913.	Year's inc. or dec.	Month's inc. or dec.
osits on demand	$376,953,217	$349,661,830	$357,756,659	— 5.3	+ 5.1
osits after notice	625,294,344	630,467,518	630,434,708	+ 0.8	— 0.005
rent loans in Canada	837,282,550	882,112,726	890,513,446	+ 6.3	+ 0.9
rent loans elsewhere	33,478,564	37,673,798	38,277,672	+14.3	+ 0.1
loans in Canada	68,305,157	71,286,799	70,731,030	+ 3.5	— 0.7
loans elsewhere	115,832,736	95,229,407	109,227,927	— 5.6	+14.7
ulation	93,819,333	97,206,713	102,202,047	+ 8.9	+ 5.1

The March statement of the chartered banks of Canada als many changes, but none which greatly affect the etary situation. The principal items with changes are vn above. Increased activities, due to the spring trade ement, are reflected in an increase of circulation to the nt of $5,000,000. Other increases are eight millions in osits, fourteen millions in outside call loans, and eight ions in current loans. Domestic call loans decreased one ion.

The following table shows the course of current and call s in Canada during the past thirteen months:—

ns.	Current in Canada.	Call in Canada.
—March	$815,948,308	$69,846,338
l	833,242,621	69,243,791
	837,282,550	68,305,157
e	848,940,088	68,701,855
	852,256,651	70,407,734
ust	852,045,624	75,194,735
ember	859,341,193	72,205,261
ber	879,676,655	73,959,866
ember	874,721,503	70,668,521
ember	881,331,981	70,655,661
—January	874,705,616	71,376,510
ruary	882,112,726	71,286,799
ch	890,513,446	70,731,030

The increase in current loans in Canada is shown to be 00,720, in March, 1912, the increase was $22,-761, showing that the banks are still moving with care. percentage of increase for a year is 6.3. Call loans where were increased by $13,998,520.

The growth of current and call loans in Canada and where during the past few years is shown below:—

ch.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
	$520,109,936	$34,915,132	$48,911,736	$117,850,605
	624,550,051	40,719,679	59,945,735	130,194,540
	710,604,072	35,512,495	58,369,712	85,250,789
	837,282,550	33,478,564	68,305,157	115,832,736
	890,513,446	38,277,672	70,731,030	109,227,927

The following table traces the on demand and after notice deposit accounts during the past thirteen months:—

	On demand.	After notice.
1912—March	$331,896,238	$606,044,932
April	345,365,183	615,370,348
May	376,053,217	625,294,344
June	373,500,180	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,017	640,536,652
October	383,814,572	040,097,928
November	376,829,372	635,810,703
December	370,777,210	632,641,340
1913—January	354,518,064	635,000,056
February	340,661,830	630,467,518
March	357,756,650	630,434,708

A gain of over eight millions is shown in deposits on demand, while those after notice remain practically unchanged. Deposits outside Canada were augmented to the extent of $6,000,000.

The total increases in Canadian deposits is shown in the following table:—

March	On demand	After notice.	Total.
1909	$200,843,984	$445,626,884	$646,470,868
1910	247,562,171	515,272,117	762,834,288
1911	278,171,792	553,032,466	831,204,258
1912	376,053,217	625,294,344	1,002,247,561
1913	357,756,659	630,434,708	988,191,367

Circulation amounts to $102,202,047.

That the financial stringency is still being felt is apparent from the above statement, but the anticipations are that a little easier condition will shortly prevail.

The Bank of England rate was reduced last week to 4½ per cent. after the retention of the 5 per cent. rate for the longest period in half a century.

The beginning of the Balkan war in October last, when the financial strain on the continent of Europe was acute, necessitated a 5 per cent. rate, but the recent improvement in monetary conditions abroad, which allowed the Bank of England to absorb the weekly arrivals of gold, and the amelioration in the Balkan situation, with improving prospects of peace, have enabled the directors to make a relaxation of one-half per cent. from the abnormal rate of 5 per cent.

◆

PRINCE ALBERT CONDITIONS

"Possibly Prince Albert has not felt the pinch of tight ey so much as some other places in Western Canada," stat-Mr. E. G. Shannon, of the Canadian Bank of Commerce he Monetary Times. "This town is an all-the-year-round due to the large lumbering industry to the north. The t West Wood, Iron and Chemical Company, a new concern h obtained certain concessions from the city, has erected e buildings on the north side of the river and have spent iderable money here and propose increasing this expendi- very materially.

"The building programme will be quite as large. This ramme will include the erection of two banks and two ches. The farmers did not have a very satisfactory fall a percentage were disappointed in returns from the at. Being largely a mixed farming district, this did not t us as much as if we depended entirely on our grain s. The stock have wintered well, prices are remunerative, vithstanding the shortness in the supply of hay, due to the weather conditions last fall.

"Local tradesmen probably are experiencing some little ncial difficulty.

"The outlook for the future of this district is bright. We cipate that the Grand Trunk Pacific Railway will be ning here this fall. The Canadian Northern Railway have r projections contemplated."

REGINA AND THE RENTAL PROBLEM

Rentals throughout Western Canada are high. In this particular Regina is no exception. The city council, realizing the importance of lower rentals, has set about to solve the rental problem.

The scheme was first suggested by Alderman Halleron. The city owns considerable property, including about half a section or so within three-quarters of a mile of the post office. Alderman Halleron proposes that lots in this section be leased to workingmen at a nominal figure. The lessee will make arrangements for the erection or his own home, but it is thought that the city will be able to make arrangements with some of the building firms who are building houses, and accepting rent as payment, covering a period of four or five years. At the end of the 10 years the lessee will have the privilege of purchasing the property at the rate of the value of the land only, or he may purchase it at any time within the 10 years.

The lessee will be allowed to secure his own home on terms which would not amount to anything near like the ordinary rental. The property which the city proposes to use is situated immediately north of the warehouse section.

There was considerable discussion over the matter when it was suggested to the council. The difficulty as first seemed to be that people would not build homes on leased ground. The matter has been referred to the city commissioners to work out the details.

T. C. BOVILLE,

Deputy Minister of Finance

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensi Dividends and Future Plans

Canadian Rogers Company.—The $500,000 preferred stock issue of the newly incorporated Canadian Rogers Company has been taken up. What was not taken by shareholders of the William Rogers Company has been placed with outsiders. The preferred issue carried a bonus of 35 per cent. common stock.

Home Bank.—The Home Bank of Canada has declared its regular quarterly dividend at the rate of 7 per cent. per annum, payable June 2nd.

The annual meeting of the bank will be held June 24th. The directors have approved the submission of a by-law to the shareholders increasing the authorized capital of the bank to $5,000,000.

Duluth-Superior Traction Company.—Earnings of the Duluth-Superior Traction Company for the second week in April amounted to $23,116, an increase of $2,282, or 11 per cent. over those of the corresponding week of last year.

Earnings of the month to date and the year to date are as follows:—

	1913.	1912.	Increase.
Month to date	$ 46,501	$ 42,576	$ 3,925
Year to date	320,190	300,454	19,736

International Engineering Works, Limited.—The following have been elected officers and directors of the International Engineering Works, Limited, for the ensuing year: Messrs. C. H. Cahan, president; H. A. Lovett, vice-president; R. Garrett, general manager; D. W. Robb, sales manager; G. F. Gyles, treasurer, and G. W. Cole, assistant to general manager; R. Brutinel, director.

The International Engineering Works is the reorganization of Robb Engineer Company, which has works at Amherst, N.S., and at South Framingham, Mass.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore received at the Trail smelter for the week ending April 11:—

Company's mines.	Tons.
Centre Star	2,525
Le Roi	912
Sullivan	932
No. 7	128
St. Eugene	94
No. 1	42
Other mines	1,714
Total	6,347

Hollinger Gold Mines, Limited.—Net profits of $128,352 for four weeks ended March 25, or $32,088, are indicated in the regular monthly report sent out with dividend cheques this week by the Hollinger Gold Mines, Limited.

From January 1 to March 25 profits are $369,952, which, adding $351,801, carried over from 1912, and deducting three dividends of $270,000, leaves a surplus on March 25 of $451,754.

The total ore treated by the mill in the four weeks covered by the report, according to General Manager Robbins, was 10,681 tons of average value of $19.61 per ton. Approximate extraction was 95 per cent., which would make the total value of ore treated just below $200,000.

Operating costs were $61,611, or $6.76 per ton milled, while extraordinary expenditures due to alterations to mill, strike expenses, etc., brought the total up to $69,621, or $6.52 per ton of ore milled.

Toronto Paper Manufacturing Company.—The directors of the Toronto Paper Manufacturing Company, on receipt of the company's statement, showing earnings equal to 14½ per cent. on the capital stock, increased the dividend from 5 to 8 per cent.

The financial statement, which is for the seven months' broken period ending the financial year at 31st March, shows profits of $[illegible]. This is an increase at the rate of 50 per cent. over the preceding year. This state of affairs must prove very gratifying to the present management. While the company is the oldest manufacturer of high-grade paper in Canada, the new management only took charge last September.

From the profit of $80,973.22, which is at the rate of $138,503.58 per annum, was deducted bond interest of $17,500, leaving the net profits $63,473.22. The surplus car forward to the credit of profit and loss was $46,937.25. depreciation reserve stands at $109,143.

Temiskaming Mining Company.—The statement for first quarter of the year shows that the Temiskaming Mi Company had on March 31 $120,346 in the banks, and t was due from smelters $13,399.

For the quarter the Temiskaming has been depen entirely for its revenue on its low-grade ore put through mill, no returns having been received from the high-g ore shoot now being worked on the bottom level. The fi cial statement shows March 31, 1913:—

Cash in banks	$120,34
Due from smelters	13,39
Ore on hand	15,69
Bills and accounts receivable	26,84
North Dome loan account	44,03
Sundry stocks on hand	19,98
	$240,30
Less open accounts payable	23,4
Balance	$216,80
Less dividend No. 15, payable April 18, 1913	75,00
	$141,80

BANK ACT ENQUIRY

sion of Emergency Circulation Suggested—Bank-s' Association—Shareholders' Audit is All Right

Iajor Sharpe lodged a protest against the clause which wered the Bankers' Association to appoint a curator a bank suspends at the resumed hearing of the bank-nd commerce committee relative to the Bank Act. history of the association," he says, "is that once a suspends and they take charge, it never again gets on et. The St. Hyacinthe Bank, I am advised, was per-solvent, but was forced to suspend payment. The iation forces suspension. I am told they wish to crowd ie small banks."

I think the association very solicitous for the small s," said Hon. Mr. White. "This clause does not pre-winding up under the Companies Act. I propose to up with the Bankers' Association a number of ques-which cannot be legislated upon."

I used to belong to the association," said Mr. F. S. irdy, "but it was intimated that the younger bankers not wanted. I wish the minister would get a resume eir present activities."

'It's beginning to look unreasonable to me to have a s rivals wind it up," stated Mr. Thornton.

Ir. White observed that if any charge was made against Bankers' Association he would see it was investigated ughly. His own view was that no bank wished another il.

Ir. Sharpe proposed that the next revision of the Bank e in 1920 instead of 1923. Mr. White observed that he noticed no great objection to decennial revision. The e was passed as it was.

Vilkie Gives Evidence.

Ir. D. R. Wilkie, president of the Canadian Bankers' ciation, and also of the Imperial Bank, in giving testi-, explained to the committee that he did not appear of-y on behalf of the Bankers' Association.

At the outset Mr. Wilkie referred to the great develop- of banking, and to the increasing demands of the West nore facilities. Emergency circulation was largely the t of that demand. "Our notes have been in demand," id, "until at this season of the year we are obliged to government notes and anything else we can get our s upon, because our circulation is dangerously near to imit. If emergency circulation were extended to eleven hs in the year, they could do away with the necessity gold reserve."

Ir. Nickle asked whether or not the gold reserve held ist circulation was an economical waste. Mr. Wilkie it was not, for though it was lying idle, the notes re-nting it were earning money. It was impossible to both. "If you take away any part of the reserve," he "you destroy, so to speak, part of the house. The re- is there for a particular purpose—to strengthen the tution. The first losses a bank makes are reserved."

Mr. Aikins asked if the circulation of Canadian banks her lands was not detrimental to Canada, and an unfair to treat privileges given through the Bank Act.

Mr. Wilkie stated that any injury incurred through re-d circulation was more than offset by the fact that out-circulation opened up trade routes and established trade ections.

es of Bankers' Association.

Major Sharpe asked if he had heard of a certain big loss e bank in Mexico, and whether it would be disclosed in annual statement.

'I think so," said Mr. Wilkie.

In answer to a question by Dr. Thompson, of the Yukon, Wilkie said that of the $[illegible] in Canadian banks, y millions were American money.

Asked by Chairman Ames as to the composition and es of the Bankers' Association, Mr. Wilkie stated that owers were not great, nor its influence strong. It was up of all the general managers of all banks in Canada, its chief duties were to appoint curators in case of bank res and to have charge of circulation.

Major Sharpe asked whether there was an agreement the association as to rates on deposits.

"I believe there is an understanding," said Mr. Wilkie, t we will not pay more than the government pays."

Mr. Wilkie approved of the proposed shareholders' audit he bill.

"I don't think any changes are necessary in the bill. expedient that it go through as soon as possible."

port What is in Present Act.

The witness believed in the system of internal inspection orce in his own office.

"I am prepared to support what is in the present Act," he. "The shareholders' audit will be all right."

Mr. Nickle asked if the Ontario Bank were not taken over by the Bank of Montreal simply to save the financial situation.

"The Bank of Montreal got a good bargain out of its purchase, and made a lot of money. It was done at the request of the Ontario, and the shareholders are satisfied."

Mr. Wilkie could think of no better scheme to forestall dishonest men than that of the shareholders' audit. That was the most which could be done.

◆

QUEBEC AND SAGUENAY RAILWAY

Monetary Times Office,
Montreal, April 23rd.

Statements which have turned out to be altogether unfounded have been made so frequently, of late, concerning the settlement of the Quebec and Saguenay difficulties that Montreal is disposed to take the latest report with a grain of salt. Its bonds were guaranteed by the Quebec Railway, Light, Heat and Power Company, and it was this connection between the two concerns, and the known difficulties which the Quebec and Saguenay was in, which to a large extent caused the weakness in the securities of the Quebec Railway, Light, Heat and Power Company. The Quebec and Saguenay is intended to connect up the city of Quebec and Murray Bay. The route has been located and a considerable amount of work has already been done on this line. Much rock cutting and tunnelling had to be done along the route, however, and no doubt it was found that the cost of building was greater than at first supposed. Some time last fall the contractors, failing to get their money, quit work and entered action. Ever since, there has been various rumors concerning settlements. It is known that payments have been made to the contractors and it has been alleged that these payments came from Messrs. Mackenzie and Mann, who had arranged to take over the road. In these rumors, the Dominion and provincial governments usually appeared in the capacity of guarantors. These rumors have, upon more than one occasion, been denied and whatever may have been behind them, nothing definite has ever developed. It is now again declared that the deal has been completed much after the manner alluded to above. Montrealers have grown skeptical and are now reserving judgment until a more definite statement.

SHIPPING ON THE ST. LAWRENCE

Monetary Times Office,
Montreal, April 23rd.

Shipping concerns in Montreal are interested in the statement that the Institution of London Underwriters has taken up the matter of reduction of rates of insurance on the St. Lawrence and will do all possible to secure an alteration of the terms of insurance which have heretofore prevailed on ships coming to the ports of Quebec and Montreal. Apparently Mr. R. J. Dale was instrumental in persuading the institution to come to this conclusion as it was through him that the announcement was made to the meeting of the council of the board of trade.

It would seem that Mr. Dale, when on a recent trip to England, interviewed some of the leading underwriters there. His object was to secure an alteration in the British North American Warrant which, in its present form, is regarded as instrumental in keeping tramp steamers from entering Canadian ports. Mr. Dale pointed out that vessels may trade from Halifax, N.S., to St. John, N.B., without additional premium.

He wanted the period of navigation for a fixed premium extended from the first of September to the end of October, and an additional premium for vessels chartered for one voyage to the St. Lawrence, than is at present charged for cancelling the Baltic and British North American Warrants.

One of the drawbacks to the port of Montreal is that practically no tramp steamers visit here during the season. The reason for this apparently is that the insurance rates are so arranged that the premium on one trip is as high as it would be on a number of trips, the result being that no tramp steamers would come to the ports for a single trip. Mr. Dale's effort evidently was to bring it about that rates would be based on the number of trips.

◆

A board of trade organization meeting at Gilbert Plains, Man., was held, after which the following officers were elected:—Mr. C. C. Baker, president; Mr. J. G. Cory, vice-president; Mr. C. B. Narraway, secretary-treasurer. As a council the following members were elected:—Messrs. J. D. Hudson, P. A. Robertson, Robert Greenaway, D. Cameron, J. Evans, A. G. Stewart, A .W. MacGillivray, and W. Sutherland.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

II.

Interest Earnings.

BY M. P. LANGSTAFF, A.I.A., F.A.S.

Interest rates on the same or different securities are constantly changing, relatively one to the other, according to financial conditions of the country, public confidence (due to increased familiarity with certain securities, or perhaps to the fact that this or that security is beginning to obtain a record for being safe and profitable), new inventions, etc. Not only so, but interest rates in general may be advancing or declining owing to varying causes, as, e.g., a change in the rate of gold production. Conclusions, then, formed from a study of the past, may be totally vitiated by future upheavals and changes. Great caution, therefore, must be taken in arriving at conclusions based on past experiences, and hesitation used in applying such conclusions to practical use in the future.

To ascertain the rates of interest earned during past years by the leading companies of United States on their different classes of investments, one cannot do better than to refer to such publications as the Brown Book of Life Insurance Economics, Year Book, etc. Therein is shown that in the last four years, 1907-1910, the average rate of interest earned by twenty-eight companies on mean holdings of mortgages was 5 per cent. plus, as against 4.32 per cent. on bonds. By comparing the rates earned by these individual companies over a course of years, it is shown clearly that, with very few exceptions, real estate mortgages earn the higher rates.

If we took smaller companies it is reasonable to suppose that the difference would be still more marked, owing to the better selection of mortgages. This, at any rate, has proved to be the case with the moderate sized Canadian companies, who earned on the average nearly 5½ per cent. in 1910, a rate which the large American companies did not approach.

Indeed one well-known company has 85 per cent. of its assets invested in sound and secure real estate mortgages, mostly on Western Canadian property, and is earning the handsome rate of nearly 8 per cent. on its funds. Of course the fact of the additional expense attached to mortgage investments has to be considered, but, even allowing for this, the net rate on real estate mortgages has proved to be, in the majority of cases, well in excess of the net rate earned on bonds.

Net Rate Obtained.

It may be stated here, however, that it is a difficult matter to obtain the net rate earned by a company on any particular class of investment, as the amount of expenses to be deducted from the gross earnings is largely a matter of arbitrary and individual opinion.

Another point that might be considered here is, whether part of the gross interest should not be taken as a "risk premium," some investments entailing a greater risk of loss than others. In arriving at the true value of any investment, I see no reason why this should not be done. Whether a company should, in actual practice, treat a certain proportion of the gross earnings in this way, and place them under a reserve for depreciation or loss in investments account, is a matter of opinion. Personally, I see no great reason for doing so. By skilful averaging, geographical distribution, avoidance of anything like speculation, and by always demanding a sufficient margin of security, a company should maintain itself practically free from any serious loss. And it cannot be too much emphasized that the company's investments should be made by qualified, experienced men, who are free to give to the investing of the company's funds their undivided attention and study.

Future Trend of the Interest Rate.

A point that has come up for discussion very often of late is the probable future trend of the interest rate. This is one of the most important and yet difficult matters with which a life office has to deal—important because under present conditions of strenuous competition, the company furnishing insurance at lowest net cost obtains the business, and therefore every item of profit, howsoever minute, has to be weighed; difficult, because so many regulating factors have to be considered, e.g., the preservation of the world's peace, the [illegible] of invention, the development of trade, the increase in the gold supply, the cultivation of the earth's surface, the state of the stock markets, and innumerable other factors of greater or less importance.

Apart from security of capital, convertibility, etc., the [illegible] of money is determined, like that of other commodities, by the principle of demand and supply. This is known as the quantity theory of money, defined by John Stuart Mill as, "The value of money, other things being the sa varies inversely as its quantity, every increase of quan lowering the value, and every diminution raising it, in ratio exactly equivalent." But those other things, cert of which were referred to above, though the same or nea so to-day, may not be so to-morrow; moreover, it is possible to determine to what extent the quantity of mo will be increased or diminished; and thus the way is op ed to endless discussion on the influence and counter- fluence of these various factors. It is perhaps a mistake put too much weight on present and past conditions.

Future developments are liable to upset all judgme formed in this way. As one writer has said, "Difficult as is to forecast the exhaustion of natural resources, it is much simpler than to estimate the probable effects of ploitation, invention, and discovery which materially aff the interest rate, or judge of the psychological causes optimism as to profitable employment of money, which m keep the interest rate up as the hope for large returns its effect upon money demand, and consequently for the r of money."

Effect of Largely Increased Gold Supply.

Great importance has been attached to the question to what effect a great increase in the supply of gold w have on the interest rate. Some writers maintain that supply of gold will never become excessive, for if the m becomes so plentiful that its value falls materially in re tion to other things, then the relative cost of producing g in wages and materials will increase and the supply decline—that, moreover, the annual output of gold, howe large, must always bear a ratio negligible in size to enormous total transactions which take place in the wor markets, and to the world's present supply of gold. The same writers, while admitting that the supply of gold is creasing and the prices and interest rates are advancing, ma tain that the increase in the gold supply is not the und lying cause, but that other causes are the explanation, s e.g., as "the hopeful and speculative spirit that has natu ly accompanied a long series of bountiful harvests, and the greatly increased purchasing power of the masses w has resulted from the revival in trade all over the world."

Some Conclusions Arrived at.

Mr. Strong, in a paper a few years ago, expresses opinion that the depreciation in the value of the curre through an excessive production of gold, was at the bottom the advancing interest rates, and some of the conclusions rived at by Mr. Byron W. Holt in his book, "The Gold Su ply and Prosperity," may also appropriately be given he as follows:—

1.—That both the output and supply of gold are lik to increase rapidly for many years.

2.—That, therefore, the value of gold will depreciate its quantity increases.

3.—That this depreciation will be measured by the in the average price level.

4.—That a rising price level, if long continued, is companied by rising or high interest rates.

5.—That high interest rates mean lower prices for bon and all other long-time obligations drawing fixed rates interest, dividends, or income.

6.—Rising prices increase the cost of materials and operation, and tend to decrease the net profits of all co cerns, the prices of whose products or services either can be advanced at all, or are not free to advance rapidly.

7.—Rising prices tend to increase the net profits of concerns that own their own sources of materials a supplies.

8.—Rising prices of commodities tend to cause t prices of all tangible property to rise. This includes lan mines, forests, buildings, and improvements.

9.—Rising prices of commodities and property tend increase the value of the securities of corporations hold commodities or property.

Proportion of Investments in Various Classes.

If these conclusions are correct, it behooves some of insurance companies to consider carefully the proportion investments they have in certain classes of securities. I b lieve it is recognized that the effect of an increasing ply of gold upon prices of all bonds, shares, or commodit which may be classed as speculative, is more decided certain in its operation than any other single factor. If take Mr. Holt's conclusions as correct, we note that for years to come, bonds and all other long-time obligatio such, e.g., as preferred stocks, drawing fixed rates of terest, will fall in value. Again, from conclusion No given above, we would argue that it will not be well to vest in such securities as the common stocks of railway as the costs of operation would be increasing, but with probability that legislation would interfere with a corr sponding advance in the rates. From the seventh, would infer that the stocks of most industrial corporatio will appreciate. We would except, however, those corp whose products are subject to regulation by law, e.g., n gas companies, where the cost of production would ce, but the selling price would remain fixed, or ad- with difficulty and under protest.

to be Incorrect.

would also draw attention to conclusion No. 4. "That ng price level, if long continued, is accompanied by or high interest rates." One should not argue from hat gradually advancing price of commodities mean ally advancing rates of interest. This is incorrect as asily be shown. Increasing prices for commodities a depreciation in the value of money, i.e., in its purg power. Thus if the normal rate of interest is, say, cent. per annum, and the rate of depreciation in money, per cent., the interest rate should be advanced to 7 nt. to compensate the lender, and kept there as long as me rate of depreciation continues. If, however, after ber of years, the value of money ceases to depreciate, mains normal at its lowest value for a year, the rate rest paid the lender should be only 4 per cent., for he ready been compensated for past depreciation, and in ear there is none. In concluding these remarks on ld supply question by another extract from Mr. Holt's as to the importance of a correct understanding t subject and its influence on prices. He says, "This greatest problem that now confronts the financial and demands solution of every investor. Not to solve mean great loss and possible failure. To solve it success and greatly enhanced wealth for all who now ither a fair share of this world's goods or who have and can intelligently go in debt for a large amount."

◆

COBALT ORE SHIPMENTS

ne following are the shipments of Cobalt ore, in s, for the week ended April 18th: O'Brien, 78,668; ion Reduction, 83,612; Right-of-Way, 62,136; Conia- 102,971; McKinley-Darragh, 121,884. total, 449,271 s, or 224.6 tons. The total shipments since January now 11,331,701 pounds, or 5,665 tons.

1904 the camp produced 158 tons, valued at $316,217; , 2,144, valued at $1,437,106; in 1906, 5,835 tons; in ,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; 0, 34,041 tons; in 1911, 25,080 tons; 1912, 21,500 tons.

◆

TCHEWAN COMMISSION WILL INVESTIGATE

ne commission appointed by the government of Sas- wan held its preliminary meeting in Regina recently, as now departed for Germany to gather information. ubject of most interest to prairie dwellers, which the ssion has taken up, is that of securing cheaper money farmers. When in Germany during last year Premier personally gave that subject his attention, and it is ng out the preliminary investigations made by Premier hat the commission is now doing. The commission posed of men well able to handle the subjects before viz., Messrs. J. H. Haslam, chairman; Charles A. ng, the general manager of the Saskatchewan Co- ve Elevator Company, and a leading official of the Growers' Association; Hon. George Langley, minister nicipal affairs, and Dr. E. H. Oliver, professor of his nd economics at the University of Saskatchewan. Mr. Mantle, deputy minister of agriculture, will act as sec- to the commission.

addition to the question of cheaper money for the s, the commission will also deal with the possibilities roving conditions under which Saskatchewan grains rketed. It was decided at the initial meeting that the gation of grain markets should proceed along three namely, the cost of producing grain in Saskatchewan, st of marketing and transporting that grain, and the ng of grain in the British markets. The respective of these investigations will be to enable the com- n to make recommendations looking toward the reduc- cost of producing grain, the reduction of cost of orting and marketing grain, and improvement in the f grain.

◆

e report recently published that "the city authori- Calgary had decided to take action against the ntee Company of North America, surety for former an, Harry Minchin, who has been remanded to the e court on a charge of embezzling, is, upon investi found to be without foundation. Apparently, Min- shortage occurred prior to the issue of the Guarantee ny of North America's bond upon him as assistant er; and, furthermore, no demand or intimation of has been made upon the company, nor has it had any nication with the city of Calgary relative to the bond d, since it was cancelled almost fifteen months ago. uarantee company's position in the matter of litiga ith its clients is unique, inasmuch as it has not had y years any claims in suit.

PERCENTAGE OF CROPS MERCHANTABLE

Yields and Comparisons Live Stock's Condition—Early Indications

Ninety-two per cent. of last year's wheat crop in Canada, or 183,611,000 bushels out of the total estimated production of 199,236,000 bushels, proved to be of merchantable quality. In the Maritime Provinces, in Quebec and in Ontario the proportions were smaller than this, being 88 per cent. in Prince Edward Island, [illegible] per cent. in Nova Scotia, 82 per cent. in New Brunswick, 75 per cent. in Quebec, and 83 per cent. in Ontario; but in the three Northwest provinces of Manitoba, Saskatchewan and Alberta, where the bulk of the wheat crop is produced, the percentage of merchantable quality was in each case about 93. In British Columbia, the quality proving merchantable was only 76 per cent.; but in this province the total production was relatively small.

It is estimated that about 22 per cent. of the total wheat crop in Canada, viz., 44,668,000 bushels, remained in farmers' hands on March 31, as compared with 27 per cent., representing 58,129,000 bushels of the crop of 1911 which remained in farmers' hands on March 31, 1912. The quantity of wheat estimated as remaining in farmers' hands on March 31, 1913, was in the Maritime provinces 336,000, in Quebec 350,000, in Ontario 3,232,000, in the three Northwest provinces 40,704,000, and in British Columbia 46,000 bushels, reports Dr. Archibald Blue in a bulletin issued from the census and statistics office.

Improvement on Last Year.

Oats, the estimated yield of which was last year 361,733,000 bushels, was of merchantable quality to the extent of 91 per cent., or 328,483,000 bushels, and the quantity remaining in farmers' hands was 44.22 per cent., or 159,948,000 bushels, as compared with last year's figures of 89 per cent. merchantable, or 310,074,000 bushels, and 44.18 per cent. or 153,846,000 bushels in farmers' hands on March 31, 1912. The proportions merchantable of the crop of 1912 were by provinces: Prince Edward Island 95 per cent. (6,857,000 bushels), Nova Scotia 87 per cent. (2,753,000 bushels), New Brunswick 86 per cent. (4,612,000 bushels), Quebec 73 per cent. (22,016,000 bushels), Ontario 83 per cent. (76,074,000 bushels), Manitoba 99 per cent. (53,171,000 bushels, Saskatchewan 94 per cent. (99,239,000 bushels), Alberta 99 per cent. (62,193,000 bushels, and British Columbia 80 per cent. (1,568,000 bushels).

Of the total barley crop of 44,014,000 bushels it is estimated that 87 per cent., or 38,299,000 bushels, were of merchantable quality, and that 35 per cent., or 15,404,000 bushels, remained in the hands of farmers at the end of March. The corresponding figures for last year were 90.26 per cent., or 36,683,000 bushels merchantable, and 32.56 per cent., or 13,235,000 bushels in farmers' hands on March 31, 1912. The bulk of the barley crop is produced in Ontario and in Manitoba. In the former province 12,001,000 bushels, or 81 per cent., and in the latter 13,416,000 bushels, or 90 per cent., was of merchantable quality.

Some Other Results.

The merchantable yield of corn for husking was 76 per cent of the total crop, of buckwheat 81 per cent., of flaxseed 89 per cent., of potatoes 78 per cent., of turnips and other roots 90 per cent., and of hay and clover 81 per cent. The quantities on hand at March 31 were: corn, 3,969,000 bushels; flaxseed, 5,803,000 bushels; potatoes, 35,097,000 bushels; turnips and other roots, 18,884,000 bushels; and hay and clover, 3,444,000 tons.

As a general rule, live stock wintered well and their average condition for all Canada expressed in a percentage of 100 representing a healthy and thrifty state was, for horses 95, milch cows 93, other cattle 91, sheep 95, and swine 94. In the Maritime provinces, Quebec and Ontario, the winter proved exceptionally mild; and, with an abundance of fodder, all descriptions of farm live stock came well through. In the Northwest provinces live stock did well on the whole; but in many localities cattle suffered through the lack of prairie hay, which was spoiled by last year's heavy rains. Many deaths amongst young pigs were attributed to the cold farrowing season. The winter proved long and cold in Manitoba and Saskatchewan, but was unusually mild and open in Alberta.

Indications and Anticipations.

Indications at the end of March were for an early spring and sowing season throughout the eastern part of Canada; but in the Northwest provinces, where deep snows and severe cold persisted during March, it was anticipated that sowing would be late. With few exceptions the fall wheat in southern Ontario was reported to be in fine condition. It was too early to report on the fall wheat of Alberta.

◆

TORONTO PAPER MANUFACTURING COMPANY

The Toronto Paper Manufacturing Company's finan statement for the seven months' period ended March 3 1913, has given general satisfaction, it shows a surplus $46,939. The total profits were $80,973.22; less the b interest paid and accrued, $17,500; leaving net profits, $ 473.22. Dividends Nos. 1 and 2 took $12,500; the dir fees were $1,400; and $2,635 were written off for organiza expenses. Surplus, $46,937 25.

The companies assets total $1,440,066. At the an meeting of the company the directors increased the divi from 5 to 8 per cent., the earnings being of such gra character.

MANY MILLIONS OF CAPITAL

Large Corporations—Headquarters in Six Provinces —Lumber, Coal and Mining Development

The British and Colonial Land and Securities Company, nto, is the company with the largest amount of capital tered this week. Ninety companies altogther received ters, their capitalization amounting to $34,227,900, the est being:—

Company.	Capital.
mbia Western Lumber Yards, Toronto	$5,000,000
adian Continental Coal Company, Vancouver	4,000,000
ada Malting Company, Toronto	4,000,000
n Mills, Vancouver	3,700,000
-Hughes Gold Mines, Toronto	2,000,000
eral Securities Corporation, Toronto	2,000,000
ing Brothers, Calgary	2,000,000
inion Tobacco Company, Vancouver	1,000,000
pendence Mining and Development Company, Winnipeg	1,000,000

Grouping the new concerns according to provinces in h the head offices are situated, we have the following re- :—

Province.	No. of Companies.	Capitalization.
Ontario	38	$27,120,000
Quebec	20	1,348,000
Manitoba	14	3,920,000
British Columbia	14	9,580,000
Alberta	2	2,250,000
New Brunswick	2	9,900
Total	90	$34,227,900

The following is a list of charters granted during the week in Canada. The head office of each company is ated in the town or city mentioned at the beginning of paragraph. The persons named are provisional direc- :—

Victoria, B.C.—Drake Hardware Company, $50,000.

Comox, B.C.—Knowles-Smith Lumber Company, ooo.

New Westminster, B.C.—Vedder River Shingle Com- . $10,000.

Kamloops, B.C.—Kamloops Moose Home Building Com- , $60,000.

South Vancouver, B.C.—Reliance Shingle and Lumber pany, $10,000.

Bolton, Ont.—Bolton Rink Company, $10,000. F. N. vens, A. Norton, R. Smith.

Fraserville, Que.—Le Comtoir d'Immeubles, $100,000. eBel, G. Racine, J. E. Pineau.

Wingham, Ont.—Wingham Publishing Company, $20,- G. Spotton, R. Vanstone, A. Cosens.

Papineauville, Que.—National Lumber Co., $99,000. A. nger, A. O. Belanger, L. N. Desjardins.

Quebec City.—L'Association des Courses de Quebec, ooo. O. Parent, J. A. Drolet, U. Gauvin.

Hamilton, Ont.—Royal Templar Building Company, ooo. G. H. Lees, G. T. Turner, H. A. Martin.

Niagara Falls, Ont.—Standard Crushed Stone Company, ,ooo. R. Boyle, J. H. Symmes, Mrs. A. Boyle.

Orono, Ont.—Orono Canning Company, $40,000. A. A. den, Wellington; J. Waddell, S. Cuttell, Orono.

Westfield, N.B.—Schuller Electric Welding Company, oo. W. I. Barton, J. H. Barton, J. W. Crowley.

St. Paulin, Que.—Compagnie Hydraulique de St. Paulin, ooo. C. E. Boucher, A. Boucher, J. A. Bourbeau.

Kingston, Ont.—Northern Motor Car Company, $250,- C. A. Macpherson, H. Macpherson, A. W. Wheatley.

Woodstock, Ont.—Ontario Sanitarium of Modern nce, $75,000. J. H. Dunn, F. H. Dutton, W. MacKay.

Ancaster, Ont.—Ancaster Fruit Growers' Association. . Carey, E. T. Beckett, Hamilton; R. S. Stevenson, Ancaster.

Woodstock, N.B.—Woodstock and Northampton Telene Company, $5,000. L. E. Young, Woodstock; G. A. son, Northampton; C. F. Rogers, Woodstock.

Sudbury, Ont.—Sudbury Curling Club, $40,000. J. S. . R. Martin, J. P. Coulson. Laberge Lumber Company, ,ooo. J. B. Laberge, J. A. Laberge, L. Laforest.

Calgary, Alta.—Motor Traction of Canada, $250,000. C. alker, R. C. Jackson, T. Henderson. Cushing Brothers, oo,ooo (lumber). R. W. Hart, G. M. Miller, J. V. Guile.

Ottawa, Ont.—Tally-ho Pure Water Company, $250,- G. Muir, W. F. C. Devlin, R. G. Code. Pink, Mc- y, Blackburn Company, $150,000 (automobiles). J. F. e, M. G. Powell, N. W. Lyle. Ontario-Saskatchewan perties, $500,000. A. Menard, J. Vaughan, A. G. les.

Perth, Ont.—McLaren Lumber Company of Brockville, $75,000. P. McLaren, J. L. P. McLaren, W. L. McLaren.

St. Hyacinthe, Que.—St. Hyacinthe Soft Sole Shoe Company, $10,000. A. Boucher, Jr., E. Miller, L. Bissonette, Jr.

Vancouver, B.C.—Boultbee, Johnson and Company, $300,000 (builders' material). Ramsay Hotel Syndicate, $200,000. Coast Transfer Company, $50,000. Dominion Tobacco Company, $1,000,000. Johnston Storage Company, $50,000. Canadian Continental Coal Company, $4,000,000. Ocean Mills, $3,700,000 (sawmills). MacIntyre and Company, $25,000 (theatres). Marlboro Café Company, $100,000.

Winnipeg, Man.—Allan Securities Company, $500,000. J. Macgregor, G. H. Davis, A. A. Hobkirk. Heinitz Investment Company, $10,000. J. Heinitz, D. Heinitz, M. Markus. Fred P. Austin Company, $20,000 (dry goods). F. P. Austin, W. J. Finlayson, A. J. Webb. Auto Lite Gas Company, $20,000. W. C. Murkar, W. C. Murkar, W. Scott. City and District Land Company, $100,000. C. L. Richardson, D. Muir, D. Montgomery. Cushman Motor Works of Canada, $50,000. W. Ridler, L. Heringer, H. E. Johnston. Independence Mining and Development Company, $1,000,000. E. E. Domina, H. S. Champion, H. A. MacDonald. Watson Feeder and Dry Farming Implement Company, $200,000. J. Munro, S. R. Shantz, R. B. Watson. A. T. Creed Company, $20,000 (printing). C. T. Butchard, A. T. Creed, A. E. L. Price. Stewart Loader Company of America, $500,000 (agricultural implements). G. W. Fletcher, M. R. Grant, J. L. Doupe. National Improvement and Investment Company, $500,000. J. Macgregor, G. H. Davis, A. A. Hobkirk. Northern Improvement and Investment Company, $500,000. A. A. Hobkirk, R. B. MacInnes, G. H. Davis. Royal Farm Machinery Company, $500,000. F. L. Taylor, A. D. Abbenzeller, Brockton, Mass.; J. S. Hough, Winnipeg. Pavolotch Loan and Aid Association. D. Rusen, S. Rusoff, D. Kotlarsky.

Montreal, Que.—Sangamo Electric Company of Canada, $50,000. L. Macfarlane, C. A. Pope, G. Barclay. United Coffee Stores, $100,000. J. H. Fisher, N. H. Truett, A. Plow. Landholders' Company, $75,000. J. A. Mann, C. G. Kackinnon, T. B. Gould. Damien Lalonde, $200,000 (lumber). D. Lalonde, A. Lalonde, L. Lionais. British Building Company, $50,000. H. Davis, D. E. Anthony, E. Jones. Duncan Bell, $50,000 (commission agents). A. Bell, J. T. McTurk, L. C. Fraser. George E. Hensley Company, $50,000 (jewellery). G. F. Hensley, C. Lamond, Miss M. M. Chappell. Brilliant Cut Glass Company, $50,000. B. C. Macfarlane, E. C. Baker, S. H. R. Bush. Georges Haardt Company, $50,000 (real estate). R. T. Heneker, W. S. Johnson, E. J. Waterston. Realty Exchange of Montreal, $100,000. W. G. Mitchell, R. Chenevert, F. Callaghan. Lower Canada Realties, $20,000. R. Tuson, W. S. Johnson, E. J. Waterson. British-American Fashion Company, $20,000. C. H. G. Short, J. W. Blair, F. J. Laverty. Natashquan Fisheries, $20,000. C. H. Cahan, Jr., O. B. MacCallum, W. E. Brown. Regent Knitting Mills, $200,000. R. Taschereau, J. E. Billette, A. R. W. Plimsoll. Denis Realty, $45,000. A. D. Denis, A. Cusson, F. O. Lavimodiere.

Toronto.—Balmy Beach Land and Building Company, $40,000. W. N. Hancock, D. W. Lang, F. S. Cummings. Keelesdale Realty Company, $150,000. H. Riley, W. B. Sturrup, W. R. Anderson. Keens Manufacturing Company, $500,000 (whitewear). J. H. Keens, H. C. Cox, H. H. Fudger. Metropolitan Engineering Company of Canada, $100,000. J. S. Lundy, C. G. O'Connor, Miss J. McGillicuddy. BRITISH COLUMBIA

Outlook for Lumbering Interests -Trade in Northern Part of Province Being Secured by Edmonton Houses—Electric Systems

(Staff correspondence.)

Vancouver, April 19th.

If free lumber is placed on the United States tariff list, it is expected that benefit will result to one of the principal industries in British Columbia. Not only will mills at present operating be more active, but other plants will be established. If shingles are also allowed to enter the United States free of duty, manufacturers here will reap an advantage. The Canadian shingle market is limited, and the red cedar article, manufactured on the coast, has for a long time been largely marketed on the other side of the boundary, despite the handicapping duty of thirty cents a thousand. Lumbermen feel that with free entrance into the States they can compete with American manufacturers of both lumber and shingles in their own territory.

Two years ago when it was mentioned in these columns that prominent Americans expected that the tariff would be so amended so as to allow the entry of timber products into the United States free of duty. It was with this condition in prospect that the Brooks-Scanlon interests established a large pulp mill at Powell River, the total expenditure being well on for three million dollars. This week, Messrs. W. H. White and Thomas White, of Boyne City, Michigan, and Mr. W. O. King, of Chicago, are visiting Vancouver, and are completing plans for the erection of large lumber mills on the northern end of Vancouver Island. They bought extensive timber areas six years ago, and now propose to manufacture lumber with the prospect of better markets in the United States, and with better transportation facilities via Panama. Messrs. White are Canadians, hailing from near Toronto, though they have been in the United States for thirty years.

Reorganization of Companies.

The reorganization of the Ocean Falls Company, Limited, is before the courts. This concern, which has a saw mill and pulp mill at Ocean Falls, with yards at Prince Rupert was organized by Lester W. David. Last autumn he retired when a reorganization took place, Mr. I. Hamilton Benn representing the English bondholders. There is quite a number of unsecured creditors, one being the Crane Company, which is applying for a compulsory winding up order. The company has offered a compromise, being that the creditors take 20 per cent. of their claims in stock, and the remainder in notes at six per cent. extending over one, two and three years. The suggestion is that the company be reorganized, with a capitalization of three million dollars, the former capitalization being six million.

Just now, too, an advertisement is appearing in the papers asking creditors of the Powell River Paper Company [illegible] claims [illegible] meeting to be held on April 28th, the company being in voluntary liquidation.

School By-laws Defeated.

A precedent was established for the province last Saturday when South Vancouver ratepayers voted down several money by-laws, including $450,000 for school purposes. The by-laws passed were: Roads, $575,000; sidewalks, $30,000; waterworks, $130,000. Usually, school by-laws are carried, no matter what others are voted against, it being felt that educational facilities are imperative, especially when a community is being settled up. Just what effect it will have in South Vancouver is difficult to say.

For some time dealers on the coast have feared that Edmonton would capture the trade of the northern interior, and the prospect is that it will get the inside track. Travelling salesmen from that city have already invaded the territory, and, to facilitate trade, there will be soon direct telephone connection from Edmonton to and beyond Fort George. This line is being established by the railway contractors, primarily, perhaps, for their own convenience, but it is being used for general commercial purposes. This means of communication will give Edmonton dealers a decided advantage over those on the coast, who are as far from this remote field as ever they were. With the railway line coming in from the east, shipping to Fort George will also be easy, the route being by rail to the end of steel and thence by river.

Many Light and Power Companies.

A statement has been made that the British Columbia Electric Railway Company owns all the electric lighting [illegible] in British Columbia. This is decidedly misleading. This company has large investments in British Columbia, but it operates only in and about Vancouver and [illegible] Westminster and south of the Fraser River on the mainland, and in and about Victoria on Vancouver Island. It ha nothing to do with the electric lighting system of Nanaim nor with the tram line proposed for that city, neither has any interests in interior cities, such as Kamloops, Reve stoke, Nelson, Rossland, Grand Forks, etc. Nelson al has a tram line. Prince Rupert is also independent of t British Columbia Electric Railway Company.

Hon. Y. Hori is the new Japanese consul in Vancouve having come here from New York, where he was for over year in the consulate office there. Mr. Hori is keen on t development of trade between Canada and Japan and giv the assurance that business men can always rely on his c operation in matters of this kind. He points out that t new treaty should greatly facilitate the increase of trad and it is important to British Columbia particularly becau being closer together relations are bound to become mo intimate in the future.

Productive Mining Properties.

Mining has been improving in the Kootenay and Boundary districts of late, and a deal at Kamloops indicates th outside interests appreciate the value of good mining pr positions. An American syndicate, represented by Mr. G. Wallinder, of Duluth, has taken over the Iron Mask pr perty at Kamloops. The Iron Mask was located in 189 and since then has had different owners, considerable o having been shipped. It is proposed now to sink the shaf 200 feet deeper, cutting into other mineralized veins.

It is felt that with a few more producing properties British Columbia attention will be directed to the many p mising mining propositions which are to be found in t interior.

◆

CAPITAL CHANGES

The capital stock of the City Dairy Company, Limit has been reduced from $1,547,500 to $1,265,000 by the c cellation of one-half of the issued common stock of the c pany, being 2,825 common shares of $100 each.

The capital stock of William Ryan, Limited, has b reduced from $100,000 to $71,500 by the cancellation of issued and fully paid shares of $100 each, held by Mr. Jo Whyte, of Stratford, Ont.

The capital stock of Stanley Brock, Limited, has b increased from $25,000 to $250,000, such increase consist of 2,250 shares of $100 each.

The capital stock of Frederick Stearns & Company, Canada, Limited, has been increased from $250,000 to $5 000, such increase consisting of 10,000 shares of $25 each

The capital stock of the Dougall Varnish Compa Limited, has been increased from $200,000 to $250,000, s increase consisting of 500 preferred shares of $100 each.

The capital stock of the Canadian Carbonate Compa Limited, has been increased from $100,000 to $500,000 the creation of 4,000 shares of $100 each.

The capital stock of the Waldman Company, Limit has been increased from $100,000 to $500,000, such incr consisting of 500 shares of $100 each.

The capital stock of the Noisy River Telephone C pany, Limited, has been increased from $10,000 to $25 by the creation of 3,000 shares of new stock of $5 each

LARGER SILVER CURRENCY SUGGESTION

There is no metallic money in circulation except ridiculously small amount of subsidiary silver, suggests P. Preston in a letter to the Vancouver News Adv The per capita circulation of silver is decreasing each notwithstanding the establishment of a mint at Ottawa. T mintage of silver in 1911 was only $[illegible], which was [illegible] 25 cents per capita for the new population of that [illegible] leaving nothing whatever to offset the silver coin lost, w out, and consumed in the arts. It is probable that the [illegible] isting per capita of silver in Canada is now less than $ and at the present rate of mintage it will soon be down [illegible] the meagre allowance of the Indian ryot for his small expenditure.

The absolutely safe and conservative $[illegible] per ca of France might well be taken as a model to begin [illegible] The government should order the bullion from Cana [illegible] and coin all that can be shipped. If the ca of the mint is not sufficient, more minting machinery s be obtained, the cost of the machinery being nothing [illegible] pared with the object to be attained. To provide [illegible] people with $[illegible] per capita will require new coin the amount of nearly $[illegible]. If it could be provi at the rate of $[illegible] per annum, so much the be Assuming that immigration and births will add [illegible] annum to Canada's population it would require an [illegible] tional $6,000,000 per annum to keep the per capita at $10 allowance for loss, wear and tear, and consumption in the

The new coinage should be largely standard dollars, unlimited legal tender, like those of the United States

TORONTO AND THE STREET RAILWAY

rman of Transportation Committee's Memorandum —Revenues and Charges

Toronto's revenue from the street railway for 1911, as in the city treasurer's last report was $772,108. This is ross revenue. It is this gross revenue which usually ap- in the press and a great many people appear to regard net. The returns for 1912 exceed those of 1911 by about 000. But in place of the city getting from $800,000 to 000 each year from the railway, the actual income to-day ly about $125,000, states Alderman S. Morley Wickett memorandum submitted to the transportation committee ronto city council.

rom a special return which I have been favored with and additional information from other quarters the approxi-y complete figures for the last four years, which, as the may probably be assumed to be the most productive , are as follows:—

he city's expenditure on street railway:—

	Pavements.	Repairs and Reconstruction.	Interest.	Total.
...	$24,882.77	$232,251.62	$160,000.00	$417,134.39
...	78,138.04	235,942.72	160,000.00	474,080.76
...	342,094.51	201,359.70	160,000.00	703,454.21
...	150,462.23	314,186.36	160,000.00	624,648.59
				$2,219,317.95

e item of $160,000 as interest: For some curious reason ty, states Mr. Wickett, has been assuming the entire cost ck pavement instead of charging a fair proportion to the properties; thus Yonge Street properties, for example, nly for pavements between the sidewalk and the track, ity paying for the surfacing of the area covered by the e tracks and devil strip. This means that altogether the as paid for some $4,000,000 of pavements, of which at one-half might and should have been charged as a local vement. Interest on this sum at 4 per cent. is $160,000, may be taken as a rough approximation. This item of st, it will be noticed, is over one and one-half times the f rental for right-of-way.

he city's revenue from street railway:—

	City's Percentage.	Rental of Right-of-way.	Taxes.	Total.
....	$507,827.49	$82,127.62	$50,326.34	$640,281.45
....	596,297.35	83,040.58	48,142.37	727,480.30
....	687,650.44	84,458.20	50,119.60	822,228.24
....	798,958.66	90,958.00	52,137.30	942,053.96
				$3,132,043.95

he surplus revenue over expenditure:—

1909	$223,147.06
1910	253,399.54
1911	118,774.03
1912	317,405.37
	$912,726.00

means a yearly average for the last four years of $228,- This sum, however, is subject to a proportion of the g fund charges on outstanding pavement bonds ($1,300,- et), which may be placed for each year at somewhat over 000, thus leaving the city a net revenue from the railway any of $125,000.

s and Revenue.

s regards the taxes paid by the Toronto Street Railway any the rolling stock is exempt. The taxes indicate a tion of approximately only two and a half millions for ompany's land, buildings, machinery, poles, wires and s.

ut of the net railway revenue the city must in future interest and sinking fund on costs of railway pavements. franchise expires 1st of September, 1921. In the past g fund charges have been issued on a basis of retire- in ten-year periods. From now on if all such payments be cleaned up by the expiry date of the franchise, the charges for sinking fund will be higher in proportion, ests the Alderman, to the growing shortness of the due f the pavement bond issues. Even assuming that the city's railway revenue will increase substantially, this means uring the last year or so of the franchise the city may ying out for railway pavements and sinking fund charges much all the moneys it will be receiving from the com- The actual situation will depend on the earnings of mpany, the class and extent of railway pavements the ys and the condition of repair in which such pavements aintained. The outlay for railway pavements will likely be higher than in the past on account of the city laying heavier road-beds than formerly, and in view of the contemplated extensions to street railway lines.

Outlook Compels Attention.

The outlook for the last few years of the franchise directs attention to the system of civic financing in connection with past surpluses.

In the first place, to appropriate these surpluses for general city purposes and then borrow fresh money for pavements is a costly and an unbusinesslike policy. It is a policy, moreover, which leads the public into imagining a larger surplus than really exists.

In the second place, to build street railway pavements entirely at the expense of the city, instead of charging a fair proportion as local improvements is not equitable.

Had the local properties been charged their fair proportion there would have been little if any outstanding liability such as now stands against railway pavements, and must be liquidated out of general taxes during the next few years. On this item alone the city is out about $2,000,000.

If no action is taken the city will have to face an unnecessary bill of another million before many years are over, concludes Mr. Wickett.

Moreover, a decision on this point is advisable with a view to a civic policy in connection with our own lines. To charge the civic system with the entire cost of surfacing pavements places a burden on this system that cannot fairly be charged as part of capital cost.

LONDON STREET RAILWAY COMPANY

The London Street Railway Company's annual report, showing the satisfactory progress the company is making, the principal returns are given below. Mr. H. A. Everett, president of the company, remarked that "the expected increases in gross earnings and surplus during the past year have been exceeded, and, as general business prospects in the city at present are good, our anticipations for the coming year are that it will be the best year in the company's history."

	1911.	1912.	Increase.
Earnings:			
Passengers	$274,887.95	$301,196.62	$26,308.67

CUNARD COMPANY WILL MAINTAIN WEEKLY SERVICE

In the Canadian trade we have last year had the advantage of a full year's working, and the results naturally show a great advance on those on the previous year, said M. A. Booth, chairman of the board of directors of the Cunard Company, at the annual meeting. When the two new steamers, Andania and Alaunia, are placed in the service, as they will be during the current year, we shall be able to maintain a weekly service between London and Montreal during the St. Lawrence season, and we shall then be able to look forward to still more satisfactory results.

The North-Western National Insurance Company, of Milwaukee, Wis., has been licensed to transact throughout Canada the business of fire, hail and tornado insurance. Mr. Guy M. Harris, Winnipeg, has been appointed the chief agent.

ASSESSMENT LIFE INSURANCE

Demand Shows Decrease—Death Claims are Increasing—Year's Record Shown in Tabular Form

By W. H. ORR

Another year's record of the operations of the assessment life societies has been compiled, and it may now be seen how this compares with the record of previous years. We will give, herewith, a compact view concerning all the societies doing business in Canada, embracing not only those which confine their operations to this country, but also those deriving the major part of their business from foreign countries. Prominent among the latter are the Independent Order of Foresters, Toronto; the Royal Arcanum, of Boston, Mass.; the Maccabees of Detroit, Mich.; and the Knights of Pythias, of Indianapolis, Ind. How those four strong societies have fared, of late, in the matter of growth or decay, is shown by a statement of their dimensions, a few years ago, when their death losses were comparatively light, and their dimensions at present, embracing a view of the much heavier mortality with which they are all now afflicted.

The full figures for these four associations will be found close to each other, in the centre of the more comprehensive statement, which embraces nineteen societies. But for more careful study, we give, herewith, as statement of the condition of these four prominent societies, in the year ending December 31st, 1906, and that of December 31st, 1912, as follows:—

Formerly.

Name.	In Force.	Deaths.
Independent Order Foresters ...	$258,695,000	$2,163,718
Royal Arcanum	514,530,500	7,704,486
Maccabees	357,470,290	2,977,180
Knights of Pythias	125,445,000	1,593,269
Totals	$1,256,140,790	$14,438,653

At Present.

Name.	In Force.	Deaths.
Independent Order Foresters	$241,410,129	$2,466,257
Royal Arcanum	482,516,863	8,164,659
Maccabees	331,972,046	3,711,476
Knights of Pythias	99,282,006	1,624,497
Totals	$1,155,181,044	$15,966,889

This statement shows that in the past six years, 1906 to 1912, not only have the efforts to increase their dimensions proved disappointing, but that upon a greatly decreased membership, the mortality has made an increased call.

The insurance in force is now less by $100,959,746 than it was in 1906, but the yearly death claims, instead of being less, as one might expect, are greater now than then, by no less than $1,528,236 in those four leading societies.

Records Do Not Improve.

But while that is the record for such strong societies, deriving their strength from wide-spread and variable communities, it is worse in a society confining its membership almost entirely to Ontario. Originally connected with the lodges of Workmen throughout the United States, the Ancient Order of United Workmen of Canada, whose headquarters are at Orillia, broke away from their American brethren on account of having death calls from the more southerly lodges. They gave notice to their brethren across the line, that after a certain date they would keep their funds at home, because they felt that the climate of Ontario and Quebec would give them a more favorable mortality than was being experienced throug connection with the State lodges of Indiana, Nebraska, Vi ginia, Mississippi, Missouri, Alabama, etc. For a time th seceders certainly did gain, and many new members were ol tained. The inducement was that the death losses could b met by a yearly assessment of $7 per $1,000; and, as $2,00 was the regular certificate, this was very cheap insuran while it lasted, and especially so in the case of elderly me not exceeding age 44.

Will Go Into Operation May First.

This mistaken idea of carrying fathers and sons at a ur form rate, continued with slight alteration in 1897, until 190 when a more sensible, or graded system was adopted for new entrants.

Under this new system, the young man of 18 would p 74 cents, while his father, aged 44 would pay $2.05 per $1,00 at each monthly assessment. But here a mistake was repe ed, in that all the old members were required to change this graded rate, not upon their then attained ages, but upon t ages of 5, 10, or 15 years previously, at which they had joine Consequently while new members would be paying a ra properly due to say, age 27 at $1.02 per month, per $1,000, t old member, who joined at age 27 long years ago, and w now, say, 43 years old, would be only paying the same a 27 rate of $1.02, whereas he ought to be paying $2 to t new-comers' $1.02 each month.

This inequity could only end in one way, if allowed continue to a natural conclusion. The error was only seen the managers after it had become too late to rectify it on prop lines. Thousands of the old members had died, or had l the order without paying up, and hence a loss which no su sequent action could repair. And to make matters worse, provision was adopted under which every member reaching years of age could cancel his certificate and withdraw, in cas one-half of all the money he had paid in. Only recently ha the officers decided to do something towards rectifying t original error of rating the old members upon the ages which they entered, instead of upon the attained ages.

This step was met with much opposition, but is to go in operation after the 1st of May.

Need of Reserve Fund.

The record of the United Workmen appears near the he of the following table respecting all the societies doing bu ness in Canada. It follows that of the Ancient Order f Foresters, and makes a marked contrast with that ciety, in the "Assets per $1,000." The reason of this is t the Ancient Order of Foresters maintains an adequate " serve fund," just like an ordinary life insurance compa which fund is now $140 per $1,000, where the Ancient Or United Workmen had, a year ago, $28.14, and now o $20.04. Its $1,597,023 of a year ago has dropped to $1,02 955, and is growing less and less as each month's demands e met. Its death losses of 1903 were only $742,800, and n upon a much smaller business in force, have grown to $1,40 811 during the year 1912.

In the following statement figures are gin for each society as found in the chart published by the Bullen Company, of Toronto. It will be noticed that the results r two years when assessmentism was flourishing, are first give and then for the last two years, 1911 and 1912, so that e conditions may be compared:—

The school by-law for $450,000, the hospital by-law for 35,000 and the fire halls by-law for $85,000 were defeated t South Vancouver, B.C.

The Canadian Fire Underwriters' Association have reuced all rates at Cobalt 10 per cent. in consequence of improvements in Cobalt fire protection.

The number of directors of the General Railway Signal Company of Canada, Limited, with head office at Lachine, Que., has been increased from eleven to twelve.

Mr. Avern Pardoe, who has been on a business trip to London, is expected to be in Toronto next week. Mr. Pardoe acquired a seat on the Toronto Stock Exchange shortly before leaving for London.

CANAL STATISTICS

Wheat Traffic Last Year Totalled One Hundred and Thirty Million Bushels—Opening of Navigation

Sixty lake freighters laden with approximately 12,250,000 bushels of wheat, oats, flax and barley left Port Arthur and Fort William on Saturday last bound for eastern ports, thus opening the navigation season.

The total volume of traffic through the canals of the Dominion during 1912 was 47,587,245 tons, distributed as follows:—

	Tons.		Increase or Decrease.
Sault Ste. Marie	39,669,655	+	8,717,946
Welland	2,951,915	+	314,280
St. Lawrence	3,477,188	+	371,480
Chambly	608,415	+	18,586
St. Peter's	74,809	—	489
Murray	170,081	+	6,624
Ottawa	302,350	+	72,270
Rideau	160,133	—	12,094
Trent	77,150	+	19,860
St. Andrew's	95,549	+	48,414
Total	47,587,245		9,556,892

It will be observed that the increment for the year 1912, as compared with 1911, was 9,556,892 tons. This was equal to 25.1 per cent.

It must not be assumed that the net business of the canals amounted to 47,587,245 tons. There is duplication to the extent of several million tons, and unavoidably so. For example, all traffic between Fort William and Montreal is first credited to the canal at Sault Ste. Marie, then to the Welland Canal, and finally to the St. Lawrence Canals. In the same way, freight shipped from Ottawa to New York finds a place first in the returns of the Ottawa River Canals, next the Lachine Canal, and lastly in the Chambly Canal, states Mr. J. L. Payne, comptroller of statistics, in a report just issued by the department of railways and canals.

Growth During Past Decade.

The following statement shows the growth of traffic through the canals of Canada during the past decade:—

1903	9,203,817	Tons
1904	8,256,236	"
1905	9,371,744	"
1906	10,523,185	"
1907	20,543,639	"
1908	17,502,820	"
1909	33,720,748	"
1910	42,000,608	"
1911	38,030,353	"
1912	47,587,245	"

It will be seen that the expansion for the ten year period between 1903 and 1912 was equal to 417 per cent.

The ratio which each of the foregoing classes bore to the total volume of traffic during the past three years is shown in the following statement:—

	1910. %	1911. %	1912. %
Agricultural products	10.2	14.2	14.51
Animal products	1.2	.1	.04
Manufactures	5.2	6.2	4.68
Produce of forests	3.9	4.0	3.43
Produce of mines	79.5	75.5	77.34

Total Volume of Traffic.

The rapid settlement of the Western provinces has created a steadily deepening interest in the movement of Canadian wheat. From 1895 down to 1909 a separation of Canadian and American products was not made in canal statistics; but since the latter year a careful record has been made of the facts in that regard. The following shows the volume of Canadian wheat brought down through the Canadian canal at Sault Ste. Marie:—

	Bushels.
1909	48,047,833
1910	51,774,833
1911	63,641,000
1912	83,743,034

The foregoing figures do not represent the total volume of Canadian wheat which came down from the Northwest in 1912. They have reference wholly to the number of bushels which passed through the Canadian canal at Sault Ste. Marie. There came through the American canal at that point 22,020,833 bushels. It was also ascertained from the customs department that 10,724,498 bushels of Canadian wheat went out from Duluth in 1912 in bond. Of this latter quantity 7,646,634 bushels had been accounted for in th totals of the two canals at Sault Ste. Marie, leaving 3,078 264 to be added to the figures just given. The total quai tity of Canadian wheat moved by water in 1912 would ther fore be 109,842,031 bushels, as compared with 65,622,48 bushels moved in 1911.

Without reference to which of the two canals was use at Sault Ste. Marie, the account with respect to Canadia wheat might be presented in this form:—

From Fort William	99,117,233	bushe
From Duluth, in bond	10,724,798	do.
Total	109,842,031	do.

The account is still incomplete. Canadian flour to th amount of 2,828,980 barrels passed through the Canadia and American canals at Sault Ste. Marie, and, allowing fi bushels of wheat to the barrel, this would mean an additio of 14,144,900 bushels, bringing the final total of Canadia waterborne wheat up to 123,986,931 bushels.

◆

VALUE OF LIFE INSURANCE

IX.

Endowment Policies

By C. A. Hastings.

There are not many forms of assurance that are know but this is one of the few, as most men can tell you, th at the end of the contract the assured receives a fixed sur and, in the event of premature decease, that sum is payab to his beneficiary. This form of assurance is virtually a option policy, for the assured is given twenty or thirty yea to make up his mind—whatever the period of contract ma be—and then he can either take the cash, an annuity, bu more protection, or a combination of these.

Although this form of protection costs more than a ordinary whole life policy or a twenty payment life polic I maintain that such an investment as this is preferable t many others, on the grounds that the majority of peopl are totally unfitted by either experience or by tuition for th selection of other securities.

Reduced Bonus is Most Remote.

On the other hand, any intelligent person who wi devote a little time and thought can find employment for hi savings—whatever the sum—in assurance, either by annu or other periodical deposits. The more thorough the intere taken, the more clear will it become that, dealing with a firs class life office, the idea of a possibly reduced bonus rat is most remote; in short, the element of doubt does nc come in at all: it is otherwise with companies whose div dends are spasmodic.

Two Points for Consideration.

There are other points to consider besides the bonu additions, and they are, exemption from income tax, the pro tection afforded to the assured, which is worth at the ve least one per cent., and the absence of risk of loss throug poor investments.

Comparing this class of investment with the purchas of any gilt-edged security, endowment assurance can we hold its own, to say nothing of the fact that it can be boug on the instalment plan, and, from the standpoint of th business man, it is the most popular, and, in some respect the best form of life assurance.

The following articles in this series have already a peared:—

ITALY'S STATE INSURANCE

The national life insurance system has now been i operation in Italy for over three months, the state institu tion having commenced operations at the beginning of th present year. According to the results achieved during first quarter, the Italian newspapers express the opinion th the state monopoly will be successful. The policies issue during the three months are declared to represent a to of [illegible]. This amount is claimed to afford a pr of the confidence of the population in the state institutio although it has to be borne in mind that the confidence compulsory, as the law of 1912 prohibits Italians fro effecting life insurance with foreign institutions.

DUSTRIAL CONDITIONS ON PACIFIC COAST

onditions Thought to be Ideal for Shipbuilding—Agricultural Produce—New Officers of Victoria Board of Trade

As to the economic importance and the great desirability establishing shipbuilding on this coast, of providing ade-ate drydock facilities, and of the erection of grain ele-ors to take care of the western grain shipments, there be no doubt, remarked Hon. W. R. Ross at the annual eting of the Victoria board of trade.

"As the report of the board of trade ably points out," d he, the industrial conditions on the western coast are culiar, and the object should be to build large industries o which the high price of labor shall not enter as a de-rent factor. Shipbuilding is certainly one of those in-stries, and, with shipbuilding, is, of course, closely allied question of adequate drydock facilities. The erection of ain elevators, and possibly of large flour mills, is another ch undertaking entirely independent of the condition of labor market. I should add to these an iron and steel lustry, once we have solved the fuel problem, or that of ctrolithic smelting; because, while high priced labor does er into the smelting of iron and the manufacture of steel oducts, the other conditions of accessibility of the iron de-sits, the contiguity of lime, and the cheapness of water nsportation, etc., are sufficient to offset that factor.

nama Canal and Competition.

"Talking of labor, none of us wishes to see the scale of ges reduced in this country, especially in the face of the eatly increased cost of living, but we must not lose sight this fact, that until the rate of wages becomes equalized oughout the industrial world, the great majority of pro-cts which we could manufacture for ourselves cannot be nufactured by reason of the rates of wages which prevail Europe and on the eastern side of this continent; and s condition of affairs will be more or less emphasized on the completion of the Panama Canad, whereby the pro-cts of the eastern world will be brought more keenly into npetition with our own. Therefore, as the report sug-sts, you must look to those industries and those activities ich do not depend for success upon cheap labor.

"Shipbuilding is pre-eminently one of these, and I sin-ely hope that the parliament at Ottawa may see its way ar to work out a system of encouragement that will be ective in bringing out its establishment not only on this ast, but on the Atlantic coast as well. In time I see no ason why the shipbuilders of experience and financial ility in Great Britain should not transfer a portion of eir operations to both coasts with this in view. The con-ions on this coast for shipbuilding, it seems to me, are al."

ust Depend on Prairies a While.

Mr. Ross stated that the population of British Columbia increasing at the rate of 75,000 or 100,000 annually.

"If you estimate the consumption of agricultural pro-ce at $80 per head per annum, which I think is fairly con-rvative, you see at once that 75,000 persons would consume ,000,000 worth, being the amount of annual increase of nsumption. In 1911 the imports amounted to $14,850,000, d the home production to $14,100,000. In 1912 the imports ounted to $15,250,000 and the home production $22, 0,000

"They show that while we have not by far been able to ovide for our own requirements we have advanced very pidly and substantially in that direction. You must re-ember, too, that we shall never reach a time when we shall ase to import largely of agricultural products, because the turns include tropical fruits and other fruits out of season. ntil the northern country is fully developed, which is ad-rably adapted for stock raising and dairying, we must de-nd on the prairies for our meat supply and outside sources r our dairy products."

ctoria Board of Trade Officers.

The newly-elected officers of the Victoria board of trade e: President, Mr. J. J. Shallcross, who was re-elected by clamation: secretary-treasurer, Mr. F. Elworthy, who has eld that position for fourteen years, and the council con-sts of Messrs. Simon Leiser, J. C. Fraser, D. R. Ker, C. Lugrin, J. L. Beckwith, R. L. Drury, A. C. Flumerfelt, B. Thomson, M.P.P., H. T. Bullen, Beaumont Boggs, Forman, Captain W. H. Logan, H. A. Munn, J. T. Mara nd A. G. Sargison.

* * *

Peterboro's board of trade's new officers are as follows: resident, Mr. C. H. Pennefather; vice-president, Mr. J. J. urner; treasurer, Mr. James Hamilton.

UNITED STATES POLICYHOLDERS AND INCOME TAX

Co-operation of Companies—Concessions and Alterations—Should Include the Exemption of all Insurance

"Policyholders are to be congratulated upon the hearty co-operation of life insurance companies all over the United States in an effort to obtain the important amendments to the income tax section of the tariff bill needed for the protection of their interests," stated Mr. Robert Lynn Cox, general counsel and manager of the Association of Life Insurance Presidents. "While it was reported about two weeks ago that the tariff bill was completed, that no hearings would be given and no amendments would be made, life insurance men have been able to impress a few of the leaders at Washington with the justice of their claims that much ambiguous language should be cleared up and the bill otherwise amended. The leaders at Washington do not yet seem to recognize clearly the essentially mutual character of life insurance as compared with businesses organized and carried on solely for the profit of stockholders. That the leaders have recognized this distinction to some extent by exempting mutual savings banks and fraternal insurance societies, leads to the hope that a continuance of co-operative efforts among life companies may in the end obtain justice for their policyholders.

"The leaders have not granted the request of companies for the exemption from taxation of policyholders so-called dividends or premium abatements. Apparently they are not yet impressed with the strong arguments that have been presented on this subject from many sources.

Individual Return of Holders.

"Some of them seem to see only the many millions of dollars involved in dividend abatement of premiums and do not perceive that the aggregate is made up of small individual returns to each policyholder. The point of view of the policyholder still remains to be brought home to them effectively. Again, the technicalities of life insurance serve to confuse the mind and delay the granting of exemptions from the tax of all proceeds of policy contracts regardless of their form.

"While the leaders have practically conceded language that will clear up the ambiguity of the original bill so that proceeds of life policies paid on the death of the policyholder will not be taxed as principal, yet the wording is so phrased as to raise a question as to whether other forms of insurance are exempted as well," thinks Mr. Cox.

Definitely Agreed Upon.

"One change that has been definitely agreed upon insures the exemption from taxation of the net annual increase of reserves. The revised language in defining the exemption permitted insurance companies, specifies 'the net addition, if any, required by law to be made within the year to reserve funds' but excepts 'dividends, or return of premium payments, paid within the year on policy and annuity contracts.'

"It will thus be seen that the companies must continue to co-operate in the effort to obtain full justice for policyholders, which should include the exemption of all insurance conducted on the mutual or participating plan, whether in mutual or stock companies, as was provided for in the Income Tax Law of 1894," said Mr. Cox.

"The amended bill will probably be reported by the ways and means committee at once and it will then be possible to ascertain the exact phraseology needed to make it conform to the views of insurance men, and bring it into harmony with the other exemptions granted to business institutions conducted on the mutual plan and mainly in the interests of persons with small incomes."

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED—First-class insurance man to take charge of insurance department. Must be experienced and capable of taking charge of both inside and outside work. Apply Nay & James, Regina, Sask.

Kingston's fire loss for the first quarter of the year is exceedingly low, amounting to only $3,648.75, with insurance at $214,550. The fire department was called out twenty-seven times.

LEGAL NOTICE

BRITISH AND COLONIAL LAND AND SECURITIES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of April, 1913, incorporating James Steller Lovell, Charles Delamere Magee, accountants; William Bain, bookkeeper, Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, take on lease or otherwise acquire, to hold, sell or otherwise dispose of property, movable or immovable, land, or any right or interest therein, water powers, power sites, timber limits or licenses, mines, mining rights, mining licenses, quarries, oil wells and products of quarries, and mineral lands and any interest therein; to develop, produce, deal with or otherwise turn to account any lands of the company or any kind of natural or artificial product which may be taken therefrom, and without limiting the generality of the aforesaid words, to mine, raise or otherwise produce minerals of all kinds, and to refine and otherwise treat and make merchantable or otherwise marketable the same; to manufacture or produce timber, lumber, logs, pulp wood or any article made in whole or in part from wood or any product or by-product thereof; to quarry, smelt, refine, dress, amalgamate and prepare for market, ore, metal and mineral substances of all kinds, and to deal in stone and the products thereof; (b) To engage in catching, freezing, salting, smoking, curing, canning, drying, preserving, selling, disposing of and dealing in fish taken in water flowing through lands owned or controlled by the company or adjacent thereto and in producing, manufacturing, selling and disposing of manufactures of every kind and nature whatsoever from fish and fish products; to engage in the sale, exportation and distribution of such fish, fish products and manufactures therefrom; to erect such plant and machinery as may be necessary to preserve or cure fish or for the purpose of changing fish or its products into any form in which the same may be sold; to manufacture fertilizer from fish; to manufacture cans, barrels, packages, or other receptacles for the preservation of goods and products, and to purchase, build, lease or otherwise acquire, and to maintain and carry on cold storage and refrigerating processes; (c) To subscribe for, purchase or otherwise acquire, own, hold, sell and otherwise dispose of and deal with and to transfer shares in the capital stock of any corporation, foreign or otherwise, and bonds, debentures, obligations or other securities of any government, municipality or corporation, foreign or otherwise, and while the holder thereof to exercise all the rights and privileges of ownership including the right to vote thereon, notwithstanding the provisions of section 44 of the said Act; (d) To buy, sell, manufacture and deal in minerals, plant, machinery, implements, conveniences, provisions and things capable of being used in connection with the operations of the company, or required by workmen and others employed by the company; (e) To construct, carry out, maintain, improve, manage, work, control, operate and superintend any roads, streets, tramways, sidings, sidewalks, drains, water mains, sewers, and any other improvements, on land belonging to or controlled by the company, and any bridges, reservoirs, water courses, artesian wells, waterworks, pumping stations, viaducts, filtration plants, mains, connections and other accessories to such waterworks, furnaces, mills, crushing works, lighting plants, shops, stores and other works and conveniences which may directly or indirectly be conducive to any of the objects of the company, and to contribute to subsidize or otherwise aid or take part in any such operations; (f) To carry on any other business whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to [illegible] the value of or render profitable any of the company's property or rights; (g) To issue [illegible] paid shares of the company in payment or part payment of any property, assets, franchises, options or other rights or privileges; (h) To construct, acquire by purchase, lease or otherwise, and to own, develop and operate works for the production, sale and disposal of steam, electric, hydraulic, pneumatic or other power or force, and to produce, create, develop, acquire by lease, purchase or otherwise, and to control and generally deal in, use, sell, lease or otherwise dispose of such steam, electric, hydraulic, pneumatic and other power or force for any uses and purposes for which the same are adapted, provided that all sales, transmission or distribution of electric or other power, or force, beyond the lands of the company, shall be subject to local and municipal regulations in that behalf; (i) To construct, acquire, own, manage, charter, operate, hire and lease all kinds of steam and sailing vessels, boats, tugs, barges and other vessels, wharves, docks, elevators, warehouses, freight sheds and other buildings necessary for the purposes of the company, and to tow, carry goods, freight and passengers for hire and generally to carry on the business of an elevator, [illegible] and transportation company; (j) To contract for, build, construct, and equip public and private works of every description, and to acquire, purchase, hold, sell, dispose of, supply, manufacture and produce all manner and kinds of material for use in the construction and equipment of such public and private works; (k) To promote, or to assist in the promotion of any company or corporation carrying on a business similar in whole or in part to that of this company or for [illegible] of the company or any part
thereof; (l) To transact and carry on a general financial agency a
brokerage business, and to act as agents and brokers for the investme
loan, payment, transmission and collection of money, for the transfer a
recording of bonds, debentures, shares or other securities and for the p
chase, sale and improvement, development and management of any p
perty, business or undertaking and the management, control or directi
of syndicates, partnerships, associations, companies or corporations; a
to accept, fulfil and execute any trust committed to the company by a
corporation of which the company holds shares, debentures or other
curities, or with which the company has business relations, or by a
court of law, on such terms as may be agreed upon and as the co
shall approve, and to take, hold, receive and convey all estates and p
perty, real and personal, which may be granted, conveyed or committ
to the company with its assent upon such trust or trusts; and to act
trustees in respect of bonds, debentures, mortgages, hypothecs or other
curities of companies or corporations with which the company has busine
relations, and to deal with such property in accordance with the inst
ment creating the same; (m) To act as agents for others in the inve
ment of funds for the carrying out of any business which this compan
authorized to carry on; (n) To distribute any of the property of the
pany in specie among the shareholders; (o) To apply for, purchase
acquire by assignment, transfer or otherwise, and to exercise, carry
and enjoy any statute, ordinance, order, license, power, authority, franchi
concession, right or privilege, which any government or authority, supre
foreign, municipal or local or any corporation or other public body m
be empowered to enact, make or grant, and to appropriate any of the co
pany's stock, bonds, and assets, to pay and defray the necessary c
charges and expenses thereof; (p) To apply for or purchase or otherw
acquire any patents, brevets d'invention, grants, licenses, leases, conc
sions and the like, conferring any exclusive or non-exclusive or lim
right to use, or any secret or other information as to any invention w
may seem calculated to benefit this company, and to use, exercise,
velop or grant licenses in respect of or otherwise turn to account the p
perty, rights, interests or information so acquired; (q) To investigate,
port on the title to any lands and tenements or chattels real or the leg
of the issue of the bonds, debentures or other securities of any corpo
tion of which the company holds shares, debentures or other securities,
which is authorized by law to make an issue of bonds or debentures or
circumstances of any business thereof; (r) To sell, lease or otherwise
pose of the property and undertaking of the company, or any part there
for such consideration as the company may think fit, and in particular
shares, debentures, bonds or securities of any other company; (s) To
cure the company to be registered and recognized in any foreign coun
and to designate persons therein according to the laws of such for
country to represent the company, and to accept service for and on be
of the company of any process or suit; (t) To enter into partnersh
into any arrangement for sharing profits, union of interests, co-operat
joint adventure, reciprocal concession or otherwise with any person or
pany now or hereafter carrying on or engaged in or about to carry
engage in any business or transaction which this company is autho
to engage in or carry on, or any business or transaction capable of be
conducted so as directly or indirectly to benefit the company; (u
amalgamate with any other company having objects similar in whole
part to those of this company, or to purchase, lease or otherwise ac
any business similar in character and objects to any of the businesses
this company; (v) To draw, make, accept, endorse, discount and ex

INDUSTRIAL BONDS AND STOCKS

Grand Trunk Pacific in London Market—Scotia's Forthcoming Stock Issue

The Grand Trunk Pacific is issuing in the London market two million 4 per cent. debentures at 87.

The shareholders of the Dryden Timber and Power Company, at the annual meeting held at Toronto, approved of a new issue of half a million preferred stock, which will be issued a may be required during the year to provide for certain desirable additions to the plant.

The works of the company on the Wabigoon River, at a point half-way between Fort William and Winnipeg, have just been completed. Over $150,000 was spent in the power development alone.

Nova Scotia's Stock Issue.

The forthcoming issue of $1,500,000 six per cent. perpetual debenture stock of the Nova Sotia Steel and Coal Company is likely to attract more than passing interest from investors.

The Nova Scotia Steel and Coal Company has grown from a very small beginning until to-day it is practically a self-contained industry, producing all the raw material used in the manufacture of its products, coal, iron ore, limestone and dolomite. It owns and operates its own blast furnaces, open-hearth steel furnaces, forges and finishing mills, as well as its own railway and equipment necessary for the movement of the coal, ore and other supplies between its mines and quarries, coal and ore docks, furnaces, etc. In addition, the company also operates a fleet of large, modern coal and ore freighters of an aggregate deadweight capacity exceeding 80,000 tons.

The average annual earnings for the past three years have been $1,053,000. Out of this, after allowing for bond interest and sinking fund, 6 per cent has been paid on the debenture stock, 8 per cent. on the common. The amount required for interest and sinking fund charges on the first mortgage bonds is $330,000 per year, leaving $723,500 with which to meet the interest of $180,000 on $3,000,000 of debenture stock, or four times the amount required.

The management reports favorably on the prospects of the company. During the past few years "Scotia" has expended large sums in improvements and betterments which are only now becoming productive. Every department is busy, and the production is sold many months in advance.

Serial Gold Bonds.

An issue of $600,000 first mortgage 6 per cent. serial gold bonds of the William Pearson Company, Limited, of Winnipeg, is being made by Messrs. Peabody, Houghteling & Company, Chicago. The bonds are secured by a closed first mortgage on 47,608 acres of farm lands and townsite property in Saskatchewan and Manitoba and farmers' notes of $251,656, which are a first and only lien on 19,449 acres sold on contract. The lands have a value of $30 per acre placed on them.

Light and Power Company's Activities.

The International Light and Power Company, Limited, has been organized under the laws of Canada with an issued capitalization of $2,500,000 common and $1,000,000 6 per cent. preferred stock out of an authorized capitalization of $10,000,000 of each class of stock. It also has outstanding £115,000 5 per cent. debentures out of an authorized issue of £400,000.

The $1,000,000 preferred stock is being offered in London at £18 per share with a bonus of $60 in common stock with each share of preferred. Messrs. William C. Burton and Albert N. Connette, of the J. G. White & Company, Limited, of London, are on the board. The company has acquired all of the capital stocks and debentures of the corporations owning the electric lighting and gas plants, with their distribution systems, in Caracas, Venezuela and in Parana, province of Entre Rios, Argentina.

Other South American public utilities are being negotiated for, and if acquired additional securities of the new company will be issued. The gross receipts of the companies now acquired are estimated at about $500,000 a year with net of about $200,000 a year.

MUNICIPAL FINANCING

Vancouver Will Shortly Make Issue—Toronto' Debenture Debt—Bond Notes

Eighty-seven per cent. of the West Australia governm nt loan of £2,000,000 was left with the underwriters in Lon n.

Vancouver is negotiating through its fiscal agents, he Dominion Securities Company, for the disposal of the debentures which it is hoped will soon be sold, thus provi ng funds for a resumption of work on civic undertaki gs, especially sewer works.

A local concern has offered to advance money to he amount of $1,000,000. This offer, it is stated, was not ap ov-ed by the council.

Mr. Steele, western manager of The Dominion Se r ties Company, expressed his belief to the committee tha city will effect a sale of its bonds within a short time that the price secured will prove to be a generally favo b one.

Toronto Firm Will Handle.

Medicine Hat city council discussed the financial r quirements of the city at its recent meeting, and it shown that the city will issue bonds to the extent of one a half millions. It was decided that the first issue of to the extent of a million dollars be handled by Messrs. W Gundy & Company, Toronto, and the other issue will be posed of at a later date.

Unnegotiated Debentures.

A statement of Toronto's debenture debt as just is ed for 1912 is gratifying in that it shows a decrease from in spite of the growth of the city, to the extent of about 000 in the past year. The net debt for 1912 was $33 242, as compared with $33,203,269 for 1911, a decreas approximately $8 per capita. The city's debenture inde ed ness at the end of 1912 was $80 a head.

At the same time there are unnegotiated debentur to the sum of $12,125,000 in the city treasury, which is n rly double the same class of collateral at the end of 1911 these are figured as indebtedness the total debt per c ita reaches $110 per person at the end of 1912. The city's debt at the end of 1912 was $44,000,000, or $56,500,000 the unnegotiated bonds included. This brings the per c ita debt up to $137.

Bond Bidding Is not Satisfactory.

No satisfactory offers have been received for the 35,000 5 per cent. 30-year Sudbury, Ont., Roman Ca olic Separate school debentures.

The $12,000 5 per cent. electric light and power rks debentures of Rapid City, Man., for which tenders we received up to March 25th, have not yet been sold. This sue has been offered at 95.

The $9,000 6 per cent. 15-year debentures of He ert, Sask., for which tenders were called until April 15th, ave not yet been sold.

◆

DEBENTURES AWARDED

Regina, Sask.—$500,000 4½ per cent. school deben res.

REVISION OF BANKING SYSTEMS

Banking and currency reforms are not confined to ada. The people of the United States are concerned rding these questions, and its financial journals are enting many suggestions, as the following headlines v:—

An Elastic Currency would Help.
A Scientific Centralization of Reserves Necessary.
Make the Circulation more Flexible.
Present Banking System without a Head.

The reports of the enquiry into Canada's Bank Act e been closely scrutinized, as will be seen from the ended remarks of a Minneapolis contemporary:—

"Just at an opportune time, Canada is now furing us a valuable object lesson in the proper method handling banking and currency reform. Every ten rs Canada revises her banking laws, and endeavors keep them up to date and in harmony with the latest iness development. Here we see the right attitude, ch is in such strong contrast to our own methods t it calls for special comment.

"Our national bank law was passed in 1863, and m the difficulty experienced in getting it amended, might infer that it was a sacred law, perfect, and to be disturbed. Except for the few minor changes, law stands about as it was passed fifty years ago. the other hand, Canada appears to realize that a ional bank act should not be a fixture, but a mobile trument, changing to meet new conditions.

"So we find the Canadian laws have been regularly ised to best serve the banking and commercial busis as it develops in that country.

"This procedure follows the natural evolution of all laws that endure. When experience shows the best way, it is made the legal way. In our over-smartness we have vainly imagined that we can reverse this method, and compel business to adjust itself to the antiquated law. The experience of the two countries in 1907 proved conclusively which one has followed the soundest and most scientific financial principles.

"In revising her banking laws, Canada is asking for the advice of both her active and retired bankers, and has even invited our own bankers to come over and offer suggestions for improving her code. J. B. Forgan, president of the First National Bank of Chicago, stated his views before Parliament recently, and other prominent bankers from the United States will do the same. Probably the Canadians felt that Mr. Forgan was especially qualified to give good counsel, as he has been an active banker in both countries.

"We are not now considering the relative advantages of the Canadian or United States banking systems, as that is quite another story. Either country will, no doubt, adhere to the system it now has, even if amendments are adopted from the other's experience. What we should like to see in Congress is the spirit and attitude manifested at Ottawa, of trying to develop the most efficient banking system, and of basing changes in the law upon the judgment of practical bankers. Let Congress ask for the counsel of the leading commercial and investment bankers of this country and Canada, and of Europe, too, for that matter, and we would then have a rational basis upon which to build additions to our present system."

These remarks show the methods that Canadian legislators have used in determining improvements in Canadian banking system have met with approval in United States financial spheres. Now, when the talking is done, comes a time of action, and then Canada's Revised Bank Act.

SAFE SECURITIES FOR SMALL INVESTORS

The savings deposits in the banks and elsewhere, the life insurance in force, etc., are indications of the strength of the army of small investors in Canada. During the past months, while money has been tight, the small investor has received much attention. The fraudulent promoter knows human weaknesses well, and utilizes them for his own selfish and scurrilous ends. He preys on the ignorant, the foolish, and the unlearned.

But the small investor is usually a man of care. Young man he may be, or middle-aged, thrifty mechanic, and he will have no dealings with such schemes, whether presented by smooth-tongued scoundrels or by a blatant publicity campaign.

His first thought is safety. He wants the return of every dollar he invests.

His difficulty is, in what he shall invest his money, so that he can obtain this result, through whom can he acquire the security. This being so, in Canada municipal banks are being mooted. Debentures are being offered over the counter. Other schemes have been, and are being, devised, all of which are to interest this individual, who already owns an insurance policy and has the rest of his savings safely deposited in a bank. Legitimate financial concerns are also catering to his needs as is evidenced by the hundred dollar bond—"the baby bond"—and also by the following advertising plan:—

A well-known firm of brokers operating in the Maritime Provinces, realizing the difficulty of this man, has evolved advertising matter of convincing character relative to municipal debentures.

First they give the following definition:—

> "Municipal debentures are the direct obligations of counties, cities, towns and school districts. They are used to provide funds for public buildings, waterworks, sewerage systems, street improvements, and various other corporate purposes of a similar nature."

Proof is then forthcoming of the safety of such security:—

> "No other security is so fully safeguarded by law as municipal debentures," states the advertisement, "from their date of issue to their date of redemption. Each issue must be separately autorized by special Act of Legislature. Proper provision must be made for regular payment of interest and formation of sinking fund to wipe out the principal at maturity.
>
> "Such issues are secured by the entire property of the community. Indisputable evidence of their absolute safety is the fact that not a dollar of interest or principal has ever been lost on them in the Maritime Provinces."

After which comes the suggestion that the said firm can supply the investor with the said security, stating that it will yield up to 5 per cent. This firm's attempt and others of a similar educative and convincing character should meet with success and bring satisfaction to many small investors and gratification to the houses which acquire these additions to their clientele.

BANQUE DE ST. HYACINTHE

Mr. Joseph Rainville, M.P., handed to the Finance Minister, according to press despatches from Ottawa, a statement to the effect that the Banque de St. Hyacinthe, when a solvent institution, capable of paying a hundred cents on the dollar, was forced to close by the Canadian Bankers' Association. The circumstances of the Banque de St. Hyacinthe are well known. At the beginning of 1899 the bank had capital $314,130, rest $75,000, and total assets $1,630,000. It had five branche and was paying dividends of 6 per cent. Here is a stat ment of the results achieved by the bank during the la ten years of its existence. It is to be remembered th the following interesting figures are those published t the directors themselves:—

	Declared profits.	Dividends paid.	Bad debts acknowledge and written of
1899	$24,044	$18,792	....
1900	19,370	18,885	....
1901	19,328	19,294	....
1902	20,346	19,452	....
1903	30,646	19,661	$27,136
1904	15,666	....	39,821
*1904	13,874	....	9,482
1905	13,752	....	9,409
1906	10,779	....	5,946
1907	11,157	....	31,970
	$178,962	$96,084	$123,770

---

* Year end was changed from 31st January to 30 November in 1904. This line, therefore, shows resul of ten months' operations.

In the whole period of ten years the officials of th bank claimed that it earned $178,962. They paid $96,08 of this in dividends and lost $123,770 in bad debt The bank's cash reserves were low. Through the who period the amount of specie and legals as shown at th fiscal year ends ran from 2 per cent. to 4 per cent. c its liabilities to the public; and if the amount carried o deposit with other Canadian banks be added to the speci and Dominion notes, the reserve ran from 5 to 10 pe cent. of liabilities. Again, it was known that the ban had a large amount advanced to a small railway cor pany, such advance representing a large proportion its total resources—and this sum was involved in pr tracted litigation, the outcome of which was uncertai More than three years after the bank closed its doors in October, 1911, to be exact—a meeting of the shar holders was held at St. Hyacinthe, about two hundr being present, according to a despatch published by t Montreal Gazette. Mr. Gaspard De Serres, of Mont real, submitted an offer to pay depositors 85 per cent to be accepted in full settlement. What he propose was to advance this money to the shareholders in ord to enable them to offer the depositors 85 per cent. as full settlement. The shareholders were to pay him six pe cent. interest and a commission of 3 per cent.; and i there was any surplus after repaying the De Serres loan the shareholders were to have it.

Mr. Rainville has since informed the banking a commerce committee that he desires an investigati into the circumstances surrounding the failure of Banq de St. Hyacinthe.

SMALL CHANGE

Croplets from the cornfields are beginning to chir cheerily.

* * * *

There was only one change of dividend in April but there will be many movements in May.

* * * *

"These numerous Canadian loans remind me April showers," said a London broker. "Why?" queried *The Monetary Times*. Because they bring fort the investor's greenbacks and golden flowers.

* * * *

Calgary, in addition to its numerous advantages had thirty-one days in April. At least so it would seen from the remark of a journal published in that city, fo it stated in reference to Mr. Andrew Miller, industria commissioner: "On April 31st Mr. Miller concludes his second year of office."

SKATOON IS A BUSY COMMERCIAL CENTRE

holesale and Retail Trades are Active — Present Conditions and Future Outlook

BY A. E. BOYLE.

It would be a difficult matter to demonstrate by means
ctual figures that general business at Saskatoon was in
ealthier condition on account of the falling-off in real
te transactions, but that impression is gathered as a re-
of inquiry into those conditions. I noted that the bank
rings for the first three months of the present year were
00,000 larger than they were for the corresponding
od last year, and this comparison indicated the prevail-
state of affairs. Twelve months ago the city was in the
st of a land-selling campaign, and the activity was re-
ed in the clearing house figures at the time. This year,
little or no zest in the realty market, the clearings are
er, and the conclusion that ordinary business is better
natural one to be drawn from that fact.

The information given by wholesale firms bore out this
lusion. One warehouse, which would do credit to any
in the Dominion, was a hive of activity when I visited it,
there was no necessity to ask if trade was good. The
e manager declared that he had doubled his inside staff
e the beginning of this year, which was another way of
ng that he had taken on about twenty men and women
hree months. He added that collections were slow, and
vould have been glad to see a better response in that
ter, but he was not at all concerned. The past year had
been so favorable for the farmers, and this considera-
showed itself through every department of commercial
ity.

orts from Firms.

Another firm reported sales of $9,700 for the first
days of April, as compared with $5,200 for the same
od a year ago, and the manager remarked that these
istics were indicative of the state of trade. It was true
his instance that the increased business was partly due
he fact that a much larger stock was carried, but most
e growth was due to the general increase in the demand
goods. The population of the neighboring territory had
vn, and its requirements in respect to general mer-
dise were much heavier.

A dozen or more managers of other houses confirmed
impressions I had gained in these two establishments.
as they represented nearly all the staple lines I was
ent to let my inquiries on the subject of wholesale and
ributing activity drop. I had ascertained that the orders
e satisfactory and that the volume of business was fully
to the expectations of the various firms engaged. The
agers were unanimous in complaining about the state
ollections, but they admitted that there was always room
rumble about that phase of their business.

simism Absent in Retail Trade.

The retailers, they said, seemed to have so many ways
lisposing of the money which reached their hands from
farmers that delay in settlement with the jobbers was to
xpected. As for the farmers, they had been disappoint-
in regard to market conditions for grain. The supply
ars had been irregular and prices had been low, so that
e was little inducement to ship. Even with the advances
values during the past month, they had been unable to
anything on account of the congestion in terminal ele-
rs at the head of the lakes.

Retail trade at Saskatoon would disconcert the pessi-
t. A compliment might be paid to the city on account
its fine stores. The managers of these stores asserted
the volume of business for the past three months had
n larger than for the corresponding period in any pre-
is year, and that it seemed to be increasing steadily.
y were satisfied, and even pleased, with the outlook, and
considered that their experience reflected the general
mercial conditions in the city. They were not able to
ak with any degree of familiarity about the situation in
country districts, as their trade connection was practi-
y confined to Saskatoon. Certainly shoppers who crowd-
the counters during the few days of my observations there
wed no signs of a money panic. They were out to buy
best goods, and they had the means to pay for them. It
the same with practically every other branch of mer-
tile activity. I thought that when I looked into an auto-
bile agency I would surely hear a tale of woe. There
no woe. The agent told me that he had sold 32 cars al-
dy this season, and I asked him how many factories he
resented. "Only one," he replied. When I saw him the
t day he remarked that he had sold two more. To sell
motor cars of one make in Saskatoon in less than four
nths was a fairly good record, according to my calcula-
ns of the volume of that business throughout the country.

To know Saskatoon is to be optimistic, and it is worth while remarking that the optimism of the people there has always had a broad foundation. Even the bankers, who are supposed to draw long faces and mutter dire imprecations about public and private extravagance, are convinced that business is flourishing. They acknowledge that the real estate market has come back to a saner basis, with the elimination of the sub-division manipulators, and they express the opinion that it is much healthier on account of the change. They insist that the general outlook for trade is encouraging, and draw attention to the fact, sometimes forgotten, that Saskatoon is engaged in buying and selling merchandise, not in exploiting horizon real estate. The real estate men, for their part, are free to admit that the volume of transactions shows a decrease, as compared with this time last year, but they are careful to include with this admission an assurance to the effect that values are fully maintained. They point to the site of the new office building of the Canadian Pacific Railway on Second Avenue, bought by that corporation at $1,800 per front foot. This was the top figure for Saskatoon property, and the Canadian Pacific Railway paid it because it could not buy what it wanted for anything less. The brokers invite anyone to try to buy any land on Second Avenue near that site at the same rate. The trick cannot be turned. Inside lots in Saskatoon to-day are held as closely as ever before, and there is no inclination to let go. Some of the people who own that sort of property are trying to buy more at shaded prices, but they are unable to do so.

City in Class by Itself.

The history of Saskatoon reads like a commercial fairy-tale, but it is real. It has no duplicate, and comparisons with the records of other communities are of little avail in making an estimate of future possibilities. The city has always been in a class by itself, and it has had no one to thank for its remarkable progress except its own people. They have worked to build up their community, with the aid of the geography, and they have succeeded. They have attracted railways, industries, wholesale warehouses, investors, workingmen and all the other elements that go to make a city great, and they are attracting more and more of these every year. They have built rapidly but safely, and they have cause to regret none of the steps they have taken. Saskatoon is not worrying over the present situation. She has done well, and she expects to continue to do well for an indefinite period.

NEW SHIPPING COMPANY

The Hepburn Line of steamers is stated to have been acquired by a new company headed by Mr. Æmilius Jarvis, of the well-known Toronto financial house. The Hepburn fleet comprises both freight and passenger boats operating between Montreal and Picton, and along the shore of the lake and the Bay of Quinte.

NEW BANK BRANCHES

A branch of the Bank of British North America has been opened at Selkirk, Man., under the temporary management of Mr. A. E. Burnham.

The Bank of Toronto has opened a sub-branch at Kerwood, Ontario, under the management of Mr. F. J. Gunne, of Wyoming branch.

The Kingston, Ont., branch of the Bank of Toronto has been moved into the new office at the corner of King and Brock Streets.

MAY DIVIDENDS

Among the dividends which will be paid out during May are the following:

Transportation—Brazilian, 1½ per cent.; Mexico Tramways, 1¾ per cent.; Sao Paulo Tramways, 2½ per cent.; Montreal Tramways, 5 per cent., and Quebec Railway, preferred, 3½ per cent.

Miscellaneous—Buffalo Mines, 5 per cent.; Canadian Converters, 1 per cent.; Cobalt Lake Mining, 3 per cent.; Canada Cement, preferred, 1¾ per cent.; Monarch Knitting, 1½ per cent., and preferred 1¾ per cent.; Montreal Light Heat and Power, 2¼ per cent.; Penman's Limited, 1 per cent., and preferred 1½ per cent.; Robert Simpson Company, preferred, 3 per cent.; Russell Motor, preferred, 3 per cent.; Rio de Janeiro, 1¼ per cent.; Kaministiquia Power, 1¼ per cent.

Bank—Imperial, 3 per cent.; Nationale, 2 per cent.

VALUE OF LIFE INSURANCE

X.

Single Premium Policies

By C. A. HASTINGS

It is poor business to purchase stocks without training and without knowing how to value the securities; it is also poor business to deal in any security—land or otherwise—of which you know very little, and in markets of which you know nothing—yet it is being done every day, because it is the speculative element that appeals, nothing else matters. If the public generally appreciated more the fact that life insurance is an investment of the gilt-edged class, the returns of life insurance offices would at once increase at an enormous rate, for, as I have already pointed out, the individual cannot hope to earn compound interest as a life company can—how much more can a life company earn for its policyholders is obvious if the public realized the value and importance of it.

My object in this article is to show a particular form of life assurance most suitable to a business man whose income fluctuates.

Straight Premium Policies.

I refer to single premium policies, and one who takes out such a policy is getting his protection at an extremely moderate rate, for he can buy either a whole of life or an endowment policy, both of which are fully paid, and which continue to earn a very high rate of dividend, as long as he lives, provided he has chosen a reputable office. So far as he is concerned, the transaction is completed, and I repeat, that non-depreciation of capital must not be forgotten.

Many argue that money used for life assurance is locked up. This is entirely erroneous. Every life office is willing to make advances on the security of its own policies—the difference between the loan which can be demanded and the premiums paid in is the most of the protection during the same period, to say nothing of the fact that the policy still remains in force.

In the case of single premium policies a proportionately larger sum may be borrowed.

Now, does not this mean that the endowment assurance costs little at the worst and next to nothing at the best? For example, if the policy is yielding, say, 3½ per cent. per annum, and the assured borrows on its security at 5½ per cent. per annum, the most important protection of life assurance is costing no more than 2 per cent. There is no doubt that this form of protection and investment stands absolutely without rival, and it is only public failure to appreciate the real benefits that so few single premium policies are sold.

You cannot get away from the following facts regarding this very useful form of protection:—

(1) The capital is never out of reach.

(2) The capital is, at any time, at the disposal of the assured at a low rate.

(3) It never stops earning interest, which is accumulating to the assured's credit.

(4) In the event of death, capital, plus a handsome bonus, becomes payable.

(5) In the event of the assured borrowing, the loan can be repaid at his pleasure."

I have endeavored to illustrate that life assurance, in one form or another, is a magnificent investment, coupled with the protection it affords, for the majority of people, and I still make this assertion.

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.
(4) March 22nd—The automatic production of capital.
(5) March 29th—How to redeem debentures.
(6) Apri 5th—Value of goodwill and how to preserve it.
(7) April 12th—How to protect capital in land, etc.
(8) April 19th—Short term policies.
(9) April 26th—Endowment policies.

ALBERTA TO FLOAT LOAN

Hon. Mr. Sifton has left for England in connection with the flotation of a $5,000,000 loan authorized at last session of the Alberta legislature for additions to telephone services and roads.

◆

A branch of the Canadian Manufacturers' Association has been formed at Brandon with Mr. James Vasbinder, manager of Messrs. George White and Sons, as president.

CANADA-MEXICO TRADE

Exports Were Less—Representatives Did Not Visi Mexico

(Specially contributed by Mr. P. Tamayo, Mexican Consul, Toronto.)

A recent number of the Department of Trade and Co merce Weekly Report, copied an article of the British E port Gazette on Mexican trade, and commented on the fa that despite the fierce conflicts between revolutionary a government forces, "imports and exports are increasing leaps and bounds."

This is quite true. Each report from the department trade and commerce of Mexico shows a decided gain ov the preceding one. Upon reviewing the imports for the s months, from July 1st to December 31st, 1911, we find th they amounted to $46,070,073.15, whereas during the sa period of 1912 they reached the figure of $47,755,348.c showing an increase of 3.66 per cent.

The exports, during the same period in 1911 were $7 501,703.77 as against $82,045,734.35 in 1912, shows a ga of 16.37 per cent., and it deserves to be mentioned here th during the latter period the minerals exported were smaller proportion to the exports of agriculture produc thus being demonstrated that notwithstanding the handica which the country has had to contend with, its products ha not only satisfied the domestic demand, but there has be a surplus to be exported.

Not so Favorable Returns.

Referring particularly to the trade between Canada a Mexico, during the period above referred to, namely, fr July 1st to December 31st, the report is, unfortunately, n so favorable with regard to Canadian goods imported in Mexico. During those six months of 1911, this item amou ed to $143,923.10, whilst in the same period of 1912 amounted to $87,396.19, showing a decrease of 39.2 p cent. The exports from Mexico into Canada, on the oth hand, show an increase of 34.1 per cent. in the same perio the total reached in 1911 being $248,090.00, whereas in 19 amounted to $332,745.32.

Confidence in Mexican Trade.

Judging from the above results and from the fact, wh has come to my notice, that some of the Canadian exporte did not send their agents to Mexico last year as they h done in previous years, it seems that the political distur ances have caused more harm to them than to the rest the world's traders. This is regrettable as it means a re tive loss in their sales. It is to be hoped, judging from above outlined facts, that they will regain confidence in Mexican market.

◆

GRAND TRUNK'S REVENUE

The following summary shows a comparison of Grand Trunk Railway Company's half-year's revenue count with that of the corresponding half-year:—

	Dec. 31, 1912.			Dec. 3 1911
Gross receipts	£4,612,758	11	0	£4,135.
Deduct—				
Working expenses, being at the rate of 72.29 per cent., as compared with 75.21 per cent. in 1911	3,334,682	4	10	3,110.8
Net traffic receipts	£1,278,076	6	2	£1,024.0
Balance of income from rentals, outside operations, and car mileage	Dr. 87,084	13	9	Cr. 11,6
Total net revenue	£1,190,991	12	5	£1,036.5
Add—				
Amount received from the International Bridge Company	16,012	16	7	16.0
Interest on bonds of Central Vermont Railway	6,506	14	3	6.5
Interest on securities of controlled companies and on St. Clair Tunnel bonds acquired by the issue of Grand Trunk four per cent. debenture stock	103,100	18	6	72.7
Balance of general interest account	66,336	6	2	53.1
Net revenue receipts	£1,383,047	7	11	£1,185.0

BANKING AND COMMERCE COMMITTEE

Rainville Desires Investigation—Circulation—Loans on Security of Grain and Cattle

Mr. Rainville, the French-Canadian member for Cham- Vercheres, informed the banking and commerce com- e engaged in revising the bank act, that he desired an stigation to be held into the circumstances surrounding ailure of the Bank of St. Hyacinthe and into the actions e Canadian Bankers' Association in relation thereto.

Mr. Rainville suggested that a committee consisting of or five members of the banking and commerce com- e be appointed to make a thorough investigation of the er.

Hon. W. T. White informed Mr. Rainville that he had the written charge to President Wilkie, of the Bankers' ciation. Mr. Wilkie had replied, stating that he had itted the accusation to Secretary Knight, who would t.

"We will not take any action in the matter," said Hon. White, "until we have received the report."

ndments Agreed Upon.

Mr. G. B. McCurdy had an amendment to offer, pro- g that copies of shareholders' by-laws should be avail- to shareholders. The amendment was consented to ut a vote.

The committee also consented to having the word, "De- '" in the clause regarding the bank's statements of pro- d loss. Mr. McCurdy declared that the present state- meant nothing. At the end of the year, he said, bank tors should be called up to give an account of their rdship, and this account should be as far as possible mplete that shareholders may be able to form an on as to whether the directors have or have not been ul stewards. The amendment carried.

tion of Bank Circulation.

Major Sharpe rose to speak in favor of an amendment sing the taxation of bank circulation. He declared that s in all other countries were taxed for the privilege which enjoyed. Witnesses representing the banks had given mpression that they were philanthropists. He did not so. The banks always declared that the evidence of it fall upon the public. Despite what Sir Edmund er had said bank profits were abnormally large. The s of the Molsons Bank from 1900 to 1909 were from 10 ent to 15 per cent. The Dominion Bank profits were 22 to 4 per cent. Major Sharpe asked that a tax of alf of one per cent. be placed on every hundred dol- f circulation.

stration of Loans by Banks.

On Wednesday half a dozen important amendments to ank act relative to restriction of loaning powers and rty holdings were defeated. One amendment was car- It provides for the registration of all loans by banks curity of threshed grain or cattle. The Finance Min- pronounced strongly against it, but the amendment d by a vote of 16 to 9.

Clause 3 of section 88, which provides that the bank lend money to farmers or ranchers upon the security reshed grain or cattle, was characterized by Major e as dangerous legislation. He was in favor of liens granted if notice was given to the public; otherwise ghts of landlords and other creditors were likely to be gered.

Mr. Carvell (Carleton), in supporting the amendment Major Sharpe put forward for the compulsory regis- n of securities of this nature, said if the lien was made ut due notice to the public it would be a violation of ractice in most provinces for the past twenty years.

Mr. J. A. M. Aikins (Brandon) presented the view of Vest on the point, especially as to the desirability of privilege owing to the periodical blockade of wheat.

Conform With Provincial Laws.

Mr. McCraney (Saskatoon) insisted that any legislation gard to registration must be made conformable with the ncial laws. He supported the privilege of lien on the d that Sir Edmund Walker had said banks would y lend more to the farmer.

The Minister of Finance said there was only one reason would influence him to accept the amendment, and that he transportation and storage aspects of the problem. from that it was bad legislation. There was a dan- f other creditors being victimized if liens were not re- ed. That, however, had to be balanced against the ad- ges that would accrue to the farmer, but if this lien o be registered it would defeat the purpose of the bill.

CANADA STILL RECEIVES ATTENTION

Demand for Money is World-wide—Interest Rates—Continuance of Progress

"Although Canada still attracts much attention in political, commercial, and financial circles, the reception accorded to Canadian loan issues of various kinds in recent months has not been as encouraging as could be desired. This result has not arisen, I am satisfied, from any feeling prejudicial to Canada, or any doubt as to the intrinsic merits of Canadian securities, stated Lord Strathcona in London.

"People are almost as optimistic in the United Kingdom regarding the future of Canada as Canadians are themselves. But there have been whispers in one quarter and another from time to time, and some of them not uninfluential, that various public bodies in the Dominion appear to be borrowing rather freely and rapidly; that the progress of the country has been so great in recent years, land speculation so rife, and values have so much increased, that there is likely to be a pause in its development— if not a little setback, sooner or later.

Those of us who are specially concerned in Canada and are acquainted with what is going on, have been doing our best to place the true position before the public, and to minimize the effect of the undercurrent of suspicion to which I have alluded. It is easy to point out that the local conditions are very satisfactory, substantial, and promising, that the crops on the whole have been good, that business is flourishing, that the import and export returns have been especially satisfactory, that the revenue is advancing, if not by such rapid strides, at a steady rate, that the railways and industrial corporations are doing exceedingly well, and that the bank returns illustrate forcibly and thoroughly the advancement of the country and of the community.

Increased Interest Demanded.

"It must be stated, however, on the whole, that prices of existing securities have not been maintained, although the fall is not of any great extent, that most of the new issues have not been sought so eagerly as was the case a few years ago, and that in some instances the underwriters have had to take up a considerable share of the loans that have been offered. But these conditions have not been peculiar to Canadian issues, and they have been more or less general in their application.

"In this connection it must be remembered also that both investing companies and individuals like to divide their investments, so as not to have all their eggs in one basket; that they have absorbed many Canadian loans during the last few years; and further, that the tendency is—especially in the matter of municipal loans and of provincial loans—to look for rather higher rates of interest than it has recently been the custom to give. This requirement is extending pretty generally.

Demand for Money is Large.

The demand for money is so large and so widespread in almost every country of the world, and such good terms are offered to those who have money to lend, that they look somewhat askance upon the 3½ and 4 per cent. investments, which were formerly so much in favor. Then, again, there is the increased cost of living, or at any rate, the increasing sums are spent upon living, as compared with the past; and people everywhere are looking for higher returns for their investments in order to cover these additional requirements.

"I have not the slightest hesitation in saying that Canada will become before long as popular again in the financial markets as before. The country is certain, in my judgment, to continue on its path of rapid progress. Immigration is maintaining its volume, business is growing in proportion, and railway construction is going on apace. All these things mean an annually increasing area of land under cultivation, more producers and more consumers, and under ordinary conditions there appears to be nothing except international entanglements or other unforeseen contingencies which might tend to operate to the disadvantage of the country."

* * *

The Metzker Seed and Oil Company, of Toledo, have recently completed an agreement whereby they are to build at Moose Jaw a flax mill capable of grinding 8,000 bushels of flax per day.

A new organization, to be known as the United Boards of Trade of New Ontario, has been organized at Sudbury, to include the boards of trade of Sudbury, Sault Ste. Marie, North Bay, Sturgeon Falls, Callender, Blind River and Thessalon. The officers elected were as follows:—President, Mr. J. F. Black, Sudbury; first vice-president, Mr. A. J. Young, North Bay; second vice-president, Mr. J. B. Way, Sault Ste. Marie. Executive committee, Dr. Bird, Blind River; Messrs. C. T. Young, Callender; L. O'Connor, Sudbury; C. V. Shea, North Bay; R. C. Dobin, Thessalon; S. W. Fawcett, Sault Ste. Marie; and J. Craig, Sturgeon Falls.

FREIGHT RATES BY WATER

Canadian and United States Average Returns—Waterborne Wheat—Factors and Comparisons

The plans of the department of railways and canals for ascertaining the average rate per ton per mile on the inland waters of Canada involved the recording of the freight rates on each ship's report filed at the various canal offices. As an alternative those operators who wished to do so were permitted to send a monthly statement to Ottawa of tonnage, mileage and gross freight earnings. Ship owners were also required to send in at the close of the season a report showing:—Total tons carried, total ton mileage of loaded vessels, gross receipts from freight. On the whole, and having regard to the difficulties which are inseparable from the inauguration of new undertakings of that character, the results obtained during the past year the first of the operations of the plans were satisfactory. For example, out of a net Canadian tonnage of 6,942,278, definite information was received with regard to the mileage and freight earnings on 6,292,661 tons. St. Peters and St. Andrews canals were left out of the scheme for the year 1912, and they accounted for 170,358 tons; so that the actual net Canadian tonnage affected was 6,771,920. Returns were thus received in relation to 93 per cent. of Canadian business. These returns covered all classes of traffic, and it might reasonably be assumed that had every ton been accounted for, the result would not have been altered.

Dominion's Share of Traffic.

The Canadian returns applied to 6,292,661 tons of freight, to 3,286,187,160 ton miles, and to gross freight earnings amounting to $6,378,893.43.

From United States shipping companies reports were received covering 26,030,661 tons, out of a total net tonnage of 36,840,812. These reports had reference to all classes of commodities, and were thoroughly typical of the whole business on inland waters of Canada. It may be confidently asserted that absolutely complete returns would not have materially affected the final calculation of the average rate per ton per mile. The number of ton miles accounted for amounted to 21,799,392,809, and the gross earnings on United States freight to $14,617,368.60.

Using the factors which have been indicated—the ton mileage and the gross earnings from freight—the results are as follows:—

Canadian traffic:—	
Average rate per ton	91.04 cents.
" " per mile	0.194 "
United States traffic:—	
Average rate per ton	50.62 cents.
" " per mile	0.067 "

Without an explanation, the difference between the Canadian and United States rate per ton per mile will not be understood. Of the 36,840,812 tons of United States traffic through the canals of Canada in 1912, no less than 31,134,251 tons, or nearly 85 per cent., consisted of iron ore. Upbound coal accounted for a further 2,945,441 tons, or 8 per cent. In fact, if iron and coal were eliminated from the total account, the volume of Canadian traffic would exceed that of the United States.

Iron, Coal and Wheat.

The transportation of iron ore and coal is a special feature of the trade of the Great Lakes. Most of the ore is carried by the vessels of the Pittsburg Steamship Company, and the rate in 1912 was 55 cents per ton from the head of Lake Superior to ports on Lake Erie. These vessels are owned and operated by the iron interests of Pittsburg, and do not carry other commodities than ore and coal—ore down and coal up. For this upbound coal, without regard to ownership of the vessels, the rate last year was 30 cents per ton. Thus, while wheat was being carried to Buffalo at as high a rate as 2.616 cents per ton per mile, iron ore was passing over the same route at [illegible]; Coal was being moved upward at the still lower rate of .046 per ton per mile. In a word, any analysis of freight rates on the inland waters of Canada would be misleading which failed to recognize, and to separate for special treatment, this overwhelming movement of ore and coal under the conditions indicated.

Special care was taken during the year to ascertain with accuracy the rates which were charged on waterborne wheat. The facts in that regard were carefully tabulated. They yielded the following results:—

Fort William to Buffalo, per ton per mile, .103 cent; per bushel, 2.863 cent.

Fort William to Georgian Bay, per ton per mile, .163 cent; per bushel, 2.629 cent.

Fort William to other Canadian ports, per ton per mile, [illegible] cent, per bushel, [illegible] cent.

Fort William to Montreal, per ton mile, .160 cent; per [illegible] cent.

The lowest rate prevailed in May, and the highest in ecember.

There was not any wheat actually brought down from William to Montreal in December; and the rates are for vember. The largest volume of wheat moved between William and Montreal occurred in October, when the aver rates were .184 per ton mile and 6.149 cents per bushel. the same month the rates from Fort William to Buffalo re .084 per ton per mile, and 2.259 cents per bushel. The mki-mum rate of the season between Fort William and Mont was in effect in November, and was 8 cents per bushel.

To measure the conditions which influenced the movenmt of Canadian wheat to Montreal or Buffalo, it is necessar to know the freight rate on wheat from Buffalo to the Atla seaboard during 1912. It was officially ascertained from Buffalo chamber of commerce, under date of 14th Febru 1913, that these rates per bushel were: May to end of Sep ber, on lake wheat for export, 4½ cents; in October 5½ ce after fifteenth November, six cents.

Average rates on Different Routes.

Thus, the all water rate from Fort William to Montrea May was 5.444 cents per bushel, and the combined water rail rate from Fort William to the American seaboard ay New York) was 7.219 cents. In November, the water from Fort William to Montreal was 7.129 cents per bushel the combined water and rail rate from Fort William t United States seaboard, via Buffalo, was 8.616 cents. apparent difference in favor of Montreal was 1.765 cents bushel in May, and 1.487 cents in November, so far as he rates of freight were concerned.

There remains to be presented the facts with respec to traffic by way of Fort William and Georgian Bay ports. average rate for the season was 2.629 cents per bushel. It as officially ascertained that the rail rates from Georgian Ba Montreal were as follows:—

	Per Bushe
Canadian Pacific Railway	6 cents
Grand Trunk Railway, January 1st to June 30th	5 cents
Grand Trunk Railway, July 1st to September 30th	4 cents
Grand Trunk Railway, October 1st to December 31st	5 cents

Speaking broadly, it might be assumed that the combined water and rail rate is adjusted to practically equal he all-water rate.

Among the causes which operate to divert a large percentage of Canadian wheat from Canadian to United Stes channels despite the lower transportation cost are:—The ail-ability of ocean tonnage at New York, the consideratio of time in making delivery at foreign ports, and the rate of marine insurance. It is obvious that these causes must continued to operate effectively in 1912.

How do Rates Compare?

The question is frequently, and quite naturally, as. How do freight rates by water compare with freight rat rail? This question will never be fully and satisfactily answered until carriers by water are required to report in recisely the way railways are asked to do.

This year, for the first time, accurate information been obtained with regard to the average rate per ton on the waterborne traffic of the Great Lakes. That rat far as Canadian business was concerned, was found to b cent. It is pointed out, however, that this rate does not cognizance of the special conditions under which the inland waters of Canada is conducted, and that the tribution of government should be taken into the reckon There is pertinency in such a contention. It would seem at all events, to be proper to include the interest charge on the capital cost of the [illegible] and the annual outlay ment for up-keep. The facts in that regard are defi known. This plan omits all expenditures for harbors, houses, dredging, buoying, etc., which might be incl but, whether they should be included or not, the matte ruled out for the time being by reason of the fact sum of such expenditures is not definitely known

◆

The fire chief should be a fire prevention enthu should take just pride in the low fire loss of his city should ever be ready to aid in the removal of fire d He should frequently inspect the schools and other pulic buildings within his bailiwick and cause to be remedied all conditions liable to cause fires. A trip of inspection time through the city or town, in company with the health officer, to urge upon citizens the necessity of ing all rubbish, rags, waste paper, packing materials, straw, banking around buildings, debris, filth, and offal in fact, all things dangerous to health or liable to cause fire, will accomplish much good.—A. Lindback, fire commissioner of Manitoba.

ELEVATORS ON PACIFIC COAST

e Rupert to Have Large One—Great Northern ıd Northern Pacific Advances—Fire Prevention

(Staff correspondence.)

Vancouver, April 26th.

rince Rupert is to make a bid for the wheat traffic that ome to the Pacific coast from the prairie provinces. . E. Dalrymple, third vice-president of the Grand Pacific, has announced to the board of trade of the ern city, that an elevator with a capacity of ten milushels is to be erected on the townsite and that conion will start shortly. This is really the first definite ncement of the construction of big wheat elevator Canadian Pacific coast, with the intention of looking the trade that is expected. There has been talk of in and around Vancouver and New Westminster. Mr. mple's statement is definite, and shows that the Grand Pacific will have some of the trade from Western Alwhen its line is completed. The Canadian Pacific ay at this point will also get busy when the time , so it can be taken as granted that elevators will be d in the neighborhood of Burrard Inlet in due course. ls of the railway have stated the traffic will be taken f when it arises, and naturally they will do what they increase business.

Depot Suggestions.

number of leading officers of the Great Northern and ern Pacific Railways have been on the coast during st week. A stated time is now given when the Northacific will have its own tracks into Vancouver, that is, as Cloverdale on the south side of the Fraser River, by Great Northern Rails into Vancouver. A joint deith the Great Northern is spoken of. There has also a slight hint that the Great Northern would link with anadian Northern in a big depot at the head of False The suggestion is reasonable, for if two depots are d they will be quite close together, and one large deould serve the purpose better. But, as one of the ofremarked, it is three years yet before filling in operwill be completed, so there is plenty of time to figure out the depot.

ipal, Mining and Labor Topics.

unicipal authorities will be interested in the point that isen between the school board and city council of Vanover this year's appropriation. In its endeavor to he rate of taxation down to the usual rate of twenty et, the city council asked the board to reduce its estia certain amount. The board refused, so the council e pruning itself. The board maintains that under the e city council must provide the sum asked for and that no power to reduce the amounts. The board is adto its point. No settlement has been reached. In the ime the tax rate has been struck.

e anti-Oriental feeling on the coast may be keen, but othing like what it is in California. That it is ever nost, however, is shown by the question which came the meeting of the city council of New Westminster onday. It was reported by an alderman that a firm city business employed Orientals as skilled workmen, resolution was advanced that if their services were not ed of no more trade should be given them by the city. ally the motion went through that no work was to be to those employing Asiatic labor. Industries somerely on the cheaper Oriental labor, but it is felt that not to be encouraged.

eadily the Consolidated Mining and Smelting Comwhich has its big plant at Trail, is adding to its mine gs. Its latest purchase is the Ottawa property, near city, from a Pittsburg syndicate. For some years tawa mine was one of the heaviest producers of silver Slocan district, the value of the ore running to very verage. The policy of the Consolidated Mining and ng Company is progressive and extensive development property may be looked for.

ession of Fires.

the first meeting in May, a by-law for "the suppresf fires" will come before the council of South Vancou-This by-law will provide that all theatres and public gs be furnished with exits in proportion to their seatpacity and will prohibit patrons from occupying the Lumber mills will be required to have a certain r of hydrants in their yards, according to their area. -law will have a material effect on plans of buildings, e provisions are stringent.

tannery and shoe factory has been opened at Edmon-

NEW BRUNSWICK

Agriculture, Mining, Building and Industries Are All Active

(Special Correspondence).

St. John, N.B., April 30th

With farming operations in the province beginning from one to two weeks earlier than usual, the outlook in that direction is favorable, and the farmers are pleased with the prospect of free entry for their products into the American market.

Sir Robert Perks, who is interested in the Miramichi Pulp and Paper Company in New Brunswick, declared that the Maritime Provinces possessed many attractions for the small farmer from the old country, with from $1,500 to $5,000 capital, and said he, the provincial governments should carry on a much more vigorous publicity campaign in Great Britain.

Log driving is now in progress on the various streams of the province, and while on some of the smaller ones there is fear that the drives will be hung-up, the prospect on the big rivers is fairly good. The price of lumber continues high with an active demand. Business conditions generally in the province are sound, and the easier condition of the money market is welcomed by those engaged in the development of industrial propositions. Wholesale merchants report that trade has been better thus far this year than for the corresponding period in 1912, although there has been complaint in some sections that collections are slow.

More Shipping Accommodation Needed.

The winter steamship season which is now drawing to a close has been the best in the history of the port, both in export and import business. There has been so much congestion on several occasions that the city council and board of trade will press very strongly upon the federal government the absolute necessity of having more steamship berths ready before the business of next winter begins. The Canadian Pacific Railway handled more grain during the past winter than was handled by both elevators in the previous winter, and it will have another elevator completed this year.

Rapid progress has been made of late on the foundations of the new sugar refinery, which in a few weeks will be ready for the beginning of the super-structure of this great group of buildings.

Railway and Industrial Progress.

The oil shares in Albert County will be visited by the International Geological Congress.

Work has been resumed with great vigor on the Gibson and Minto Railway, to connect the Queen's County coal fields with the Canadian Pacific Railway at Fredericton, and larger crews are being set at work on the St. John Valley Railway, so that the portion of that line between Centreville and Gagetown, may be completed by next October.

The pulp mill at Chatham, on the Miramichi, has been purchased by A. E. Read, London, England, who is the owner of another pulp mill at Chatham. Lumbering operations on the Miramichi this year will be on a large scale. Probably about 2,500 men will be engaged in the industry on the Miramichi during the summer.

Residences are in demand in Moncton, Sussex, and also in St. John. Building will, therefore, be active in the province generally.

A Swedish company has made an offer for the lumber mills.

The Minto Coal Company has now three shafts working in its mines in Queen's County, and is sinking two more. The company has erected thirty miners' cottages and will soon have fifteen more completed.—H. T. H.

* * *

WHEAT AND ITS STORAGE

The head offices of the Grand Trunk Pacific estimate that the wheat yield for the coming year will be at least 200,000,000 bushels. The Grand Trunk Pacific and the Canadian Northern Railway will have space for the storage of at least one-tenth of this output, the storage being measured for grain that will be in the elevators at one time. Their capacity for handling the grain this year is considered better than it ever was and the officials are satisfied that no blockade will occur. The Grand Trunk Pacific makes the following announcement:

"In Alberta there are only eighteen elevators with a capacity of 905,600 bushels; Saskatchewan, 75 with a 3,785,000 bushel capacity; Manitoba, 25 with 918,000 bushels; Georgian Bay ports, 10 with 9,860,000 bushels; Westfort with 1,000,000 bushels; total, 22,649,000. It is to be borne in mind that these figures represent what can be stored at one time and does not affect that which is in transit."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extension, Dividends and Future Plans

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the third week of April were $160,670, a gain over the corresponding period last year of $19,537, or 13.84 per cent.

Porto Rico Railways Company.—The Porto Rico Railways Company, Limited, comparative statement of earnings for March is as follows:—

March.	1912.	1913.	Inc. or dec.
Gross	$ 75,368	$ 75,204	+ $ 164
Net	33,634	30,117	— 2,482
Three months:			
Gross	222,336	219,883	— 2,453
Net	105,609	102,150	+ 3,448

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore received at the Trail smelter for the week ending April 18:—

Company's mines.	Tons.
Centre Star	2,303
Le Roi	1,156
Sullivan	927
No. 1	321
No. 7	218
Other mines	1,237
Total	6,162

Maritime Coal, Railway and Power Company, Limited.—At the annual meeting of the Maritime Coal, Railway and Power Company, Limited, the president reported that the negotiations for the sale of a considerable block of the company's securities had been successful, and it was contemplated to carry out, during the ensuing year, large extensions to the power plant at Chignecto and electrification of the colliery plant at Joggins Mines, in order to cope with the increasing demand for coal and electric power.

The following were elected directors for the ensuing year: Messrs. William Hanson, A. E. Dyment, Alex. MacLaurin, William Ewing, G. Ratcliffe Hulme, W. L. Madgen, Hon. Senator William Mitchell and Hon. Senator N. Curry.

At a subsequent meeting of directors, Mr. William Hanson was elected president; Mr. A. E. Dyment, vice-president; and Mr. R. Wilson, secretary.

Steel Company of Canada.—The Steel Company of Canada inaugurated an important movement at the annual meeting of shareholders, when the meeting approved of a co-operative plan submitted by the directors by which the preferred stock of the company will be sold on favorable terms to employees. The financial statement presented by the treasurer, Mr. H. H. Champ, was considered satisfactory.

The following were elected officers: President, Mr. C. S. Wilcox; vice-president, Mr. C. A. Birge; vice-president and general manager, Mr. Robert Hobson; assistant manager, Mr. F. H. Whiton; secretary-treasurer, Mr. H. H. Champ. Directors: Messrs. Charles Alexander, Providence; John Milne, William Southworth, Hamilton; and Lloyd Harris, Brantford; Hon. William Gibson, Sir Edmund Osler, Mr. W. D. Matthews, Toronto; assistant secretary, Mr. C. F. Whiten; assistant treasurer, Mr. H. S. Alexander.

Brazilian Traction Company.—The Brazilian Traction Company gross earnings for March were the largest of any month since the amalgamation of the several companies. Operating expenses also increased to over $900,000, but, notwithstanding this, the net earnings for the month amounting to $1,068,637, were exceeded only by those of December last.

Figures for the first three months of the year indicate the net earnings are more than half a million in excess of those for the same period last year. The following is the comparative statement:—

	March. 1913.	March. 1912.	Increase.
Gross earnings	$1,977,297	$1,657,757	$319,540
Oper. expenses	908,660	762,393	146,267
Net earnings	1,068,637	895,364	173,273
	1st quarter, 1913.	1st quarter, 1912.	Increase.
Gross earnings	$5,711,067	$4,785,004	$926,063
Net earnings	3,064,135	2,534,715	520,420

Detroit United Railway Company.—The Detroit Unit Railway Company's gross earnings for the week endi April 14th were $226,606.66, an increase of $28,156.13, a from January 1st $3,306,280.89, an increase of $495,811.

Havana Electric Railway Company.—The Havana El tric Railway Company's gross earnings for the week endi April 27th were $51,359, an increase of $3,054, and fr January 1st, $892,952, an increase of $77,251.

Western Canada Power Company.—Mr. C. H. Cah presided at the annual meeting of the Western Cana Power Company. The annual statement of the compa was adopted with but little comment. The president w congratulated on the progress shown during the year, a for the satisfactory financing arrangements he consumm ed in New York a few weeks ago. Mr. John Hendry, Vancouver, retires from the directorate of the company, a is replaced by Mr. DeForest Hycks, of New York, who w represent the new United States interests on the board. T following compose the directorate for the ensuing ye Messrs. C. H. Cahan, K.C., A. R. Doble, T. J. Drummo William McNeill, Campbell Sweeney, A. H. B. Macken E. R. F. Hayard, and DeForest Hycks.

Canadian Northern Express Company.—The Canad Northern Express Company reports to the Interstate Co merce Commission for February and eight months compa as follows:—

	1913.	1912.	Chan Inc. or d
Total rcpts f'm op.	$ 50,825	$ 41,260	+ $ [illegible]
Express privileges	19,591	15,894	+ [illegible]

MONTREAL'S MOVEMENTS

Monetary Times Office,
Montreal, April 30th

Montreal is the victim of an institution known as "M ing Day," which takes place on the first of May. Upo tenants throughout the city simultaneously move their q ters. Moving day has become quite an institution. It fastened itself alike upon the residential, retail, whole and financial sections of the city and rides them with a whip. Efforts have been made to throw off the tyranny moving day, but all to no success. Leases are all made fr the 1st of May to the 1st of May and noti must be given of the intention of the tenant th months in advance. During the past week removals h been going forward in a desultory sort of manner where arrangements can be made in advance.

A year ago the removals in the financial section w numerous. This year they appear to be less so, althou the total removals in the city are much greater than a y ago. The Montreal Light, Heat and Power Company, wh is, perhaps, the best authority on the matter of remov reports that up to the end of last week, about 15,000 fami had given notice that they intended to change their r dences. Last year 20,000 families using gas and electri changed. Notices of removal are not usually receive the very last moment so that the company estimated 15,000 notices were still to come in, making a total of 30, for the present year. The staff of the company since middle of April has been divided into day and night sh so as to take care of the removals as expeditiously possible.

APRIL FIRE LOSS

ws Small Increase — Fatalities are Less — Causes Show Carelessness is Big Factor in Waste

The Monetary Times' estimate of Canada's fire loss dur- April amounted to $1,470,622, compared woth March loss ,710,756 and $1,355,055 for the corresponding period of year. The following is the estimate for April losses:—

ires exceeding $10,000	$1,035,400
mall fires	243,401
stimates for unreported fires	191,821
	$1,470,622

The following are the monthly totals of the losses by during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
ary	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
uary	750,625	941,045	1,640,153	2,037,386
ch.	1,076,253	852,380	2,261,414	1,710,756
	1,717,237	1,317,900	1,355,055	1,470,622
	2,735,536	2,564,500	2,251,815	....

y Big Fires.

The fires at which loss was estimated at $10,000 and over, as follows:—

ing, N.S.	Factory	$ 15,000
ax, N.S.	Wood working plant	50,000
eway, Ont.	Business block	35,000
Megantic, Que.	Furniture factory	50,000
land, N.S.	Stores	10,000
don, Alta.	Business section	60,000
nto, Ont.	Wholesale grocery	15,000
land, N.S.	Three buildings	10,000
ara Falls, Ont.	Iron works	12,000
son, Sask.	Milling plant	10,000
on, B.C.	Planing mill	12,000
Thomas, Ont.	Lumber mills	20,000
el, B.C.	Store	100,000
icine Hat, Alta.	Hardware store	15,000
ary, Alta.	Business block	94,400
kville, Ont.	Rink and houses	50,000
John, N.B.	Business block	50,000
an's Point, Toronto	Summer cottages	32,000
couver, B.C.	Dwellings	20,000
roy, Sask.	Business section	25,000
er, Man.	Stores	35,000
on, Man.	Dwellings	15,000
na, Man.	Business section	300,000

es are Worth Studying.

The structures damaged and destroyed were:—Residences arns 32, stores 22, factories 21, sheds 12, business blocks otels 6, garages 4, business sections 3, lumber mills 3, 2, depots 2, restaurants 2, several boathouses; and one each e following: warehouses, grist mill, stockyards, icehouse, house, roundhouse, rink, tannery, carbarns, college, dry, church and transforming station.

There were destroyed 74 horses, 61 cows, 8 calves, 51 of hay, 16 automobiles, 12 hogs, 8 stacks of green feed, 7 of harness, 2 sticks timothy, 2 bridges, 1 street car, 1 mer, 1 scavenger wagon; a great number of farm implets, and 3,200 bushels of grain.

Of the presumed causes 9 were attributed to defective neys, 9 matches (mostly children playing with), 6 tning, 6 defective and overheated stoves, 6 incendiary, 5 taneous combustion, 4 sparks, 4 overheated stove pipe, 3 trical defects, 3 cigarettes, 2 defective flues, 2 hot ashes, ch defective stovepipe, lamp explosion, gasoline, over- ed motor, oil heater, fumigating with sulphur, burning ish, heating pipes, boiling tar, broken gas pipe, gas ex- ion, and moving picture firm in contact with light.

er Deaths.

During April eleven lost their lives through fire.

The following are the monthly totals compared with 1909, , 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	..
June	16	52	13	6	..
July	4	15	110	9	..
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	68

The fires at which fatalities occurred were:—

Victoria, B.C.	Burning building	1
Sydney, N.S.	Burning building	1

PROVINCIAL FIRE LOSSES

The fire waste in each province for first four months of this year has been estimated as follows:—

Alberta	$2,476,703
Ontario	2,186,847
Manitoba	1,284,677
Quebec	840,879
Saskatchewan	673,480
Nova Scotia	612,094
British Columbia	435,801
New Brunswick	248,606
Prince Edward Island	373,062
	$9,132,149

◆

CANADIAN BANKING

A noteworthy feature is the way in which banks in Canada have expanded in all directions in an almost unprecedented manner during the last few years. Owing to the rapid development of the country, and the large capital investments which have been made there, a splendid opportunity was given for banking enterprise, and this has been very fully availed of, as can be seen by the returns published. The number of new branches which have been established in all directions is certainly remarkable, and probably many of these new banks very quickly justified themselves. It is not altogether surprising, comments the London Financial News, however, to hear from some influential quarters that many parts of the Dominion are being more than adequately catered for in this respect, and possibly no harm will be done should the pace be slackened for a time. Anyway, the fact remains that some of the Canadian institutions are not quite so active in creating new links as they were a year or two ago. It is, naturally, very desirable, before branching out, that banks should thoroughly satisfy themselves of the need of additional banking facilities in the locality it is proposed to favor; otherwise unhealthy competition is established, often leading to the undertaking of undesirable business. There must be a time in the history of all countries when a pause is desirable in the expansion policy. Undoubtedly many openings exist, and will continue to present themselves, more particularly in a great, growing country such as Canada; but it is very necessary for any undue multiplication of branches to be prevented. It may be recollected that in England itself many complaints were heard respecting the severity of banking competition some ten years ago, when new branches were being opened at a great rate, especially in the London suburban districts. A much more careful policy has been put into operation in the last few years.

◆

One million four hundred thousand dollars was expended in improvement and betterment work upon permanent trunk roads and feeders and steel and wooden bridges in Alberta during 1912 by the provincial department of public works, headed by the Hon. Chas. R. Mitchell, who also announced at the provincial parliament that the progress for 1913 will be sufficiently extensive to meet the needs of settlers in the newly opened agricultural districts and others making use of the public highways.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

III.

Real Estate Mortgage Loans

BY M. P. LANGSTAFF, A.I.A., F.A.S.

The question as to the advisability of investing the majority of a company's funds largely in bonds and like securities, or of adopting the other course, and investing most largely in real estate mortgages, must now be considered. Both sides of the question have staunch supporters, and I think the question can be dealt with by giving the comparative advantages and disadvantages of one class of investment as compared with the other. In doing so, I will also touch lightly on various points in connection with other minor investments.

Dealing first with real estate mortgage loans, we may state that:—

The rate of interest obtainable is perhaps higher, commensurate with safety, than any other form of investment permissible to life companies. In order to obtain the best rate of interest, however, the mortgages should be well chosen, for rather small amounts, and to a large extent on good farm property.

The funds are permanently invested for a number of years at a fixed rate of interest, and cannot be repaid without a substantial bonus as a recompense.

Does Not Fluctuate.

The value of property, carefully selected, does not fluctuate to any extent. Moreover, if there is this tendency, or if there is a remote possibility of depreciation, it can be guarded against by arranging for an annual repayment on account of the principal.

Mortgages frequently lead to large life policies, as additional security for the loan. A note of caution, however, should be sounded here, "Do not overload the borrower with payments. You may swamp him."

A mortgage loan is less affected by financial stringency or panic than any other security. (It is "news proof.")

As one writer has said, "It is secured by tangible physical property that cannot be juggled from under the mortgage, dissipated or stolen, and that will not wear out, depreciate, burn up or blow away. It is not subject to legislative attack or official investigation; not dependent upon public franchise; its value is not depreciated by destructive competition or corporate mismanagement; not affected by 'good will,' 'watered stocks,' 'future earnings,' or 'contemplated improvements.' "

Care and Investigation Needed.

Mortgages call for a great deal of detail work and investigation. This should not, however, be a disadvantage in the case of a large company, though it would in the case of the individual investor. The extra expense entailed would, nevertheless, require consideration when figuring on the net rate of interest to be realized.

Great care has to be taken in the selection of the property on the security of which a loan is made. What are the chances of depreciation? Do the values of property of that class, or in that neighborhood, have a tendency to fluctuate? Are the mortgages too centralized, instead of being spread about in different districts?

In the case of foreclosure, the company is in danger of heavy loss on the investment, though this can be guarded against if a sufficient margin is maintained between the value of the property and the amount advanced.

Too great a proportion of the company's funds should not be invested in mortgage loans. Sudden depreciation in land values may result ruinously to a company, overdoing this "good thing." Again, owing to the comparatively short terms of mortgages and consequent necessity for frequent reinvestment of repaid principal, falling rates of interest would affect such a company to the greatest degree.

Changes in Interest Rate.

A disadvantage which mortgages share with other investments which have to be replaced every few years, is the greater chance of an ill-chosen investment slipping in at some time. This is one point in favor of long-term bonds.

I referred above to the high rate of interest obtainable on mortgage loans. Suppose, however, that interest rates are falling. Our mortgage loan would be repaid in a comparatively short period of time and the repaid principal could only be reinvested at the fallen rate of interest. A bond, however, owing to its fixed dividend and distant maturity-date, would be correspondingly enhanced in value. This brings us to a point requiring great nicety of judgment. Is the rate of interest in the future likely to be lower, and if so, to what extent—questions involving endless discussion of theoretical and practical nature? These points determined, we then enquire, "Will the higher temporary rate of interest realized on the mortgage sufficient compensation for the brevity of the term duri which that rate is likely to be paid?" In other words, "W the accumulated amount of the mortgage at the end of term of N years be equal to the enhanced value of the bo that could have been purchased in its place N years ago?"

One advantage that the bond has over the mortgage the ease and certainty with which the interest is collect Particularly in respect to farm mortgages, is there a matter frequent difficulty in keeping the interest payments fr falling into arrears.

Question of Appreciation.

Another advantage that the bond has over the mortga and one that will appeal to a very cautious management, one lacking in initiative, is that its value has been fixed the concensus of many minds. It will, moreover, probably recommended by a reliable and experienced firm of broke The value of a mortgage is more a matter of individual ju ment and investigation.

A point in favor of mortgages is the stability of th values. Bonds and stocks are quoted in the market, and f quently very considerably in price, and it is difficult to fix th true value on a company's balance sheet. A real estate mo gage may be difficult to dispose of at any price, but there nothing by which small changes in its value can be gaug and consequently it may stand on the company's books at par value, unaltered from year to year—decidedly an excel feature.

Marketability of Securities.

From the standpoint of "marketability" the bond or sto is to be preferred. But this very lack of ready marketabil has been one of the factors in keeping the yield on mortg loans so high. Moreover, as pointed out elsewhere in paper ,"marketability" cannot be looked upon as of great i portance in the investment of a life company's funds.

We can next consider the question of appreciation (ap from fundamental changes in the interest rate). A mortga loan has no prospect of appreciation. True, the security hind the loan may improve, but this should be sufficient the outset of the loan. But, no matter how much this curity may appreciate, the mortgage lender will not rece one iota more by way of interest or principal. On the ot hand, an appreciation in the security behind a bond, or in value of a stock, is at once reflected in the market price; value of the bond or preferred stock advances by reason the increased security; the value of the common stock vances by reason of the expectation of an increased divide

The element of speculation is reduced to almost minimum in a carefully-selected mortgage loan. Bonds— cepting those of the highest class—and stocks, in particul have not this advantage to nearly the same extent.

Valuation Must Be Conservative.

Another point may be given in favor of the mortgage lo over the bond. The mortgage holder can, in all cases, enfo the provision that the security be properly maintained; wh the bondholder must rely upon the action of the trustees a other bondholders. In event of default, the mortgage hol may foreclose and act independently of others; the bondhold in such an event, must co-operate with the other holders, a be dependent upon whatever action the majority of the hold wish to take. This is, however, a great objection from standpoint of the individual investor than from that of a lar life insurance company.

In certain states, laws regarding mortgages, distinctly favorable to the lender, have been enacted. This disadv age, however, is only a local one, and can in most cases avoided, by lending on real estate located elsewhere.

Owing to the location of their head office, some compan find it necessary to go far afield in search of the best r estate mortgages. Here we have the disadvantage that investment is not made under the eyes of the managem This is not a great objection, however, if such mortgages limited to those sections where a company is well organiz and doing an active insurance business.

In relation to the fluctuating values of real estate, the f lowing point may be given. As stated before, the mortg will not benefit financially by an appreciation in the secu behind the loan. A marked depreciation, however, may l to foreclosure and probable loss to the lender. Hence, in nection with the mortgage loans, always bear in mind, the maximum benefit which can be derived, is the inter while there is always the possibility of a substantial loss principal. The following note of caution may, therefore, sounded, "Be conservative during these times of 'infl values' in your valuation of the security behind the mortgag and in the percentage you advance on this conservative val tion."

Generally speaking, mortgages in towns or villages not as safe as those on city property or on farm lands. T and village properties are subject to the success or other of the district surrounding them. In the event of a fo ation, it is difficult to sell them at anything like their alue, and thus the holder of a foreclosed mortgage may he property lying idle on his hands for years. While a n a productive district is always readily marketable, the n the town adjacent to such a farm may be most difficult pose of. The above remarks do not, of course, apply to ng and progressive towns.

well-selected farm mortgage is, I believe, the best mort- that can be obtained. Values may not be so clearly as on city property, but then, competition being less, the agee is not required to loan to such a high percentage value. Interest rates are also higher owing to less com- n and to other causes. City property lends itself easier estigation, but then again, it fluctuates more in value. are also so many differences in buildings to be con- d, and the risk from fire is much greater. In short, more complications are apt to arise than in the case of oans.

Mortgages are Satisfactory.

arm mortgages in the past have proved satisfactory in way, and are almost certain to prove more so in the Advanced methods of farming mean increased in- er acre; population and consumption are steadily increas- thout a corresponding increase of farm lands; the good movement, aided by the automobile industry, will ally bring about an era of splendid country roads; ortation facilities have improved; rural free mail de- and country telephone lines are making the farm more ible; the comforts of farm life are steadily increasing: and many other factors are leading to the constant ap- ion of farm land values, and giving added margin of y each year. Furthermore, considerable money is re- to maintain a modern farm. There will be an increased d for money in the future from agricultural interests—a d that will not be silent to any extent in times of depres- or the world must eat and the farmers produce the food; and that is "regardless of economic, political and social ons, or any spirit of unrest," and insurance companies e sure of one safe, profitable and sufficient outlet for ast funds in the years ahead.

the next article bonds will be dealt with in a similar r to the above.

e London Life Insurance Company have now located Vinnipeg offices at 402 3 4 5 Lindsay Building

e Regina civic officials are securing many valuable tions from Fire Commissioner McLean, of the pro- service, with a view to including new regulations in ilding by-law which will have a tendency to reduce the y fire in the city. In March last the loss from fire ted to less than $100. By the regulations which it is oposed to enforce it will be made an offence for people e refuse of any kind on the premises about their homes, n to have such waste material in buildings. More nt regulations will also be included with respect to the ng of gasoline, as the fire commissioner claims that of the fires are caused by careless handling of gasoline.

LIFE ASSURANCE AND THE PUBLIC

Popularity Not Yet Attained — Lack of Illuminative Publicity—Community Receives its Benefits

By R. W. BARTON, A.I.A.

Life assurance has probably been one of the most potent factors during the past century in the development of existing social conditions. Every class has sought its protection. Its past beneficiaries would equal in numbers a great nation, and present policyholders run high in the millions. The funds of individual companies represent a vast amount of wealth, while the accumulated funds of all the companies are an amount beyond the comprehension of ordinary men. It has brought comfort to countless widows and orphans, relief to hundreds of thousands of commercial enterprises, protection to creditors and heirs to entailed estates, which could have been obtained in no other way.

And yet life assurance is not popular with the public.

A very large number of men carry no life assurance at all, while of those who do carry policies only a small proportion carry an amount equal to one year's income, up to which they and their families have been accustomed to live. There is more than one cause for this, and it is not the fault of life assurance. The ignorance of the agents, combined with lack of knowledge on the part of the public, has given rise to much misunderstanding in the past, and public, companies and agents are suffering for it to-day.

Examination Not a Bogie but a Benefit.

The medical examination has been looked upon as a bogie, whereas, whether satisfactory or not, it is a benefit to the examinee. If he is accepted as a first-class life, it cheers him to know it, and if he is not so accepted, it is a timely warning that may enable him to avert a serious disease.

The public also blamed the agent, until the agent, too often to please them, in his ignorance drew upon his imagination and promised benefits that could never be fulfilled. The wonders of compound interest were not enough for Mr. Public's desire. He craved results that an eternal real estate boom could not supply, and blames life assurance instead of his own voracity for his disappointment.

Legislation and its Effects.

He has demanded drastic legislation and has obtained it. It has added neither to his profits nor his security; it may well be that it will on occasions detract from both. The wisdom of compelling companies to entrench upon profits to provide a 3½ per cent. reserve when funds are earning nearly 6 per cent. is as dubious as it was formerly to decree that a 4½ per cent. reserve was safe when funds barely earned it and the rate of interest was falling.

The public knows it ought to protect its family, its business, its creditors. It knows, too, that this can only be done by life assurance. But it hates to pay, year by year, a premium for something so far in the future that it seems hardly real. Like the ostrich, it buries its head in the sand to hide its danger. It listens to that subtle suggestion, so common to human nature, which makes each man think that, though others may die young, he will be the one to survive to old age.

Life assurance has been before the public for nearly a century. It is a difficult subject to grasp, and the public has only grasped it to a limited extent. It must be confessed that in the past it has had only a limited opportunity. It is not too hard to learn, however, and, since it is in their own interest to learn, the public are beginning to do so, and the best companies are now providing the opportunity.

Educative Publicity Receiving Attention.

Drastic restrictive legislation is not needed, but publicity, compulsory if not voluntary, on all points which will illuminate the subject is essential to a proper understanding of it. The lack of this has been a real grievace in the past. It is to this point the leading companies are now especially directing their attention.

Single leaflets describing particular classes of policies are already issued, and we have heard the arguments in favor of these which are not convincing to us. The fact remains that many policyholders still too often mistake their "twenty-pay life" for an endowment assurance.

A step in the right direction would be to supplement these leaflets with the issue, by all companies to all prospective applicants, of a handbook or prospectus explaining the principal classes of policies written by them, the rates of premium charged, the dividends paid at the last division, and such other general information as to their practices as would leave no room for misunderstanding on the part of an intelligent applicant, or misrepresentation on the part of the agent.

The public should demand this.

With increasing knowledge on the part of the public will come increasing popularity of life assurance to the great advantage of the community in general.

CANADIAN CONNECTICUT COTTON MILLS, LIMITED

Capitalization and Contracts—Plant will be at Sherbrooke—Officers and Directors

Monetary Times Office,
Montreal, April 30th.

The incorporation of the Canadian Connecticut Cotton Mills, Limited, was recently announced. The company was given an authorized capital of $1,750,000, and the headquarters and mills were stated to be at Sherbrooke. Some little curiosity was aroused in local textile and stock exchange circles, inasmuch as the name indicated the co-operation of American and Canadian interests.

The authorized capital has been divided into $750,000 of preferred stock and $1,000,000 of common stock, and an issue of $350,000 of the 6 per cent. first mortgage, twenty-year bonds has recently been offered, out of the total authorized bond issue of $500,000. The bonds are in denominations of $1,000, $500 and $100. In this connection it is worthy of remark that the dividends on the 7 per cent. cumulative preference stock only accrue from the 1st of January, 1915. The bonds are redeemable at 105 on six weeks' notice.

Goods Will be Much in Demand.

The Canadian Connecticut Cotton Mills, Limited, is organized for the purpose of manufacturing certain lines of heavy cotton goods used exclusively in the manufacture of rubber tires such as are employed on automobiles, motor cycles and bicycles. It is expected that there will be a very large demand for these goods in Canada in the immediate future, inasmuch as other concerns have also located here for the purpose of manufacturing a like product. The factory which is now being erected at Sherbrooke will come under the same management or direction as the Connecticut Mills which have been turning out a similar product in the United States. Apparently there will be no difficulty in disposing of the entire output of the Sherbrooke factory and, as a matter of fact, contracts have already been closed with four of the principal tire manufacturers of Canada for their entire requirements for five years. It would seem also that several of the large American automobile tire manufacturers have recently announced their intention of establishing branches in Canada in the near future, and as the product of the Connecticut Mills is well known among the tire makers of the United States, there is every reason to think that the product of the Canadian Connecticut Cotton Mills will be favored also. The company has the advantage of the experience of the Connecticut Mills' people, so that experimenting will be minimized.

Operations and Estimates.

The plants and property of the Canadian Company will be situated in the city of Sherbrooke. Contracts are being let for the buildings and the necessary machinery, and it is expected that the first unit will be installed by the middle of November next. The concern will get its electric power for the operation of its plants at a very advantageous rate from the Sherbrooke Railway and Power Company. The buildings will have a floor space of over 80,000 square feet, and will contain the most modern machinery. Earnings are based on the results of operations in the Connecticut Mills, the following being the estimates of the first year's operations, including the profits from the spinning plant.

Net profits, first year	$130,000
Less interest and sinking fund	32,375
	$97,625
Less Preferred Dividend	10,500
Surplus against Common Stock	$87,125

This is equal to about 14½ per cent. on the common stock without allowing for depreciation. The bond issue will represent only 70 per cent. of the cash investment in property and plant and the earnings are equal to three and a half times the bond interest. The directors include the following:—President, Harry L. Burrage, of Boston, Mass., vice-president of the National Shawmut Bank of Boston. The vice-president of the new concern is Mr. Tracey S. Lewis, and one of the directors is Mr. R. J. Caldwell, Mr. Lewis being president and Mr. Caldwell vice-president of the Connecticut Mills. Mr. S. H. Ewing, is president of the Montreal Cotton Company, Mr. John Lowe, of Valleyfield, is general-manager of the same company, and Mr. R. W. Elliott, of Halifax, is general manager of the Nova Scotia Trust. The factory manager, Mr. W. B. Fittz, of Danielson, Conn., is manager of the Connecticut Mills

MONTREAL TRANSPORTATION PROBLEM

Relief in Evidence—Auto Bus Arrangements—Fifty Will be Running in Summer

Monetary Times Office,
Montreal, April 30th.

It begins to look as though Montreal would shortly fi an exit from the tramways problem which has been wor ing it so long. Two announcements have recently be made, either of which contains the elements of relief.

Recently the president of the Tramways Company a proached the city with a tentative proposal. Later a conf ence was held at which something in the nature of a defin plan was placed before the representatives of the city. I this was outlined a scheme for the relief of congestion bo immediate and future. Certain streets were asked for, the extension of the company's lines. The programme w not unlike that proposed by Mr. Duncan McDonald. T Tramways president does not appear to have asked anythi unreasonable. His proposal called for practically only o new line of any considerable extent, which line ran throu a section of the city not now adequately served and up streets to which there could be no particular objecti Other proposals were such as have been approved by the council, such as making the stops less frequent. In e down town section it was proposed to use Victoria Squ e as a stopping point for certain cars instead of continui these through the congested district. Altogether the p posals seemed of a reasonable nature, and unless there s more behind them which has not yet been made public, th e would not seem to be any good reason why the city sho d not meet the company in the matter. President Robert p mised to put on a very much larger number of cars and o construct a roadbed of a superior character. Up to the p sent the city authorities do not appear to have given a very definite indications of how they regard the propos

Auto Bus Service.

Shortly after President Robert made his proposals to e city, fuller details concerning the Canadian Auto Bus C pany appeared. It may be recalled that this company s organized some time ago to carry on an auto bus servi the city of Montreal. The company made certain prop to the city, in which the city was to be a holder of a considerable number of the shares of the company, this ing the company's reward to the city, so it was thought the time, for granting an exclusive franchise for ten ye s on certain streets. Objection to the arrangement betw n the city and the company was offered by a number of ci zens and it it quite likely that the question is still bef the courts.

At first, the names connected with the company w not those of well-known financiers, and a certain amount doubt concerning the seriousness of the project was en tained. Within the past week, however, an announcem has been made to the effect that Mr. H. S. Holt, presi of the Montreal Light, Heat and Power Company; D. L McGibbon, president of the Canadian Consolidated Rub Company; F. L. Wanklyn, general executive assistant of Canadian Pacific Railway; Duncan McDonald, form managing director of the Montreal Street Railway; J. Norris, managing director of the Montreal Light, Heat Power Company; Tancrede Bienvenu, managing d La Banque Provinciale; U. H. Dandurand, president of the Montreal Real Estate Exchange; James E. Wilder, sident of the Wilder Company; Paul Galibert, and Adami, of McGill University, are all mentioned in con tion with the concern.

The capital of the company is $10,000,000, and Canadian group, together with the English group, wl has become interested in the concern, have already subsc ed $1,500,000. The concern has a Federal charter wl permits it to operate in any city in Canada.

Covered by the Franchise.

The interesting features in connection with the ab directorate is the mention of a number of names which been spoken of as greatly opposed to projects of the dent of the Montreal Tramways Company. It is ger considered on the Street that the Auto Bus Company w strongly opposed to the Tramways Company. The fra from the city of Montreal dates from last August, and cording to the terms the company is obliged to give a f minute service. It has been stated however, that ins of a five-minute service the concern will give one which be twice as frequent. The cars will be of the single k variety on all steep grades, but it is not impossible the double-deck variety will be employed on the l es. The capacity will be from 28 to 38 people and the chise insists that there shall be no strap hangers but all passengers shall be provided with seats. The fares be five cents, straight, and transfers to all lines of the pany.

The city of Montreal has now spread clean across the d and extends a long distance east and west so that the busses will not be confined to a limited territory be- e of lack of ability on the part of the city to extend per- ion. The franchise, of course, only covers certain ts. Altogether it is expected that fifty auto busses will unning here by mid-summer, or shortly thereafter. e seems to be some disposition on the part of the city als to delay action in the matter of the Tramways Com- until the effect of the establishment of the auto bus ce is felt. In the winter time the heating of the cars be sufficiently accomplished through the exhaust.

CANADIAN CITIES' MONETARY REQUIREMENTS

onton's Loan in London—Montreal Needs Several Millions—Treasury Certificates Used

Eighty per cent. of the Edmonton city £1,068,000 five cent. loan issued in London at 101½ has been left with nderwriters. This result is said to be largely owing to ize of the loan, which is considered excessive.

Competent observers of the London market express fear symptoms of rather acute congestion, as far as Cana- issues are concerned, are likely shortly to be in nce.

Port Alberni, B.C., made an issue of $100,000 treasury ficates. Their fiscal agents, Canadian financiers, Limit- placed same in Vancouver.

Montreal's board of control has recommended to the council the floating of a loan for $11,904,000 (40 years ½ per cent.) for permanent works during 1913. The represents 12 per cent. of the net increase of the city's ssed valuation for 1913 over 1912.

ary's Council Cancels.

The arrangement by which the Mayor of Calgary, H. A. ott, sold $3,000,000 worth of eight months six per cent. ury bills to Messrs. Heidelbach and Tekelheimer, of York, has been cancelled by the city council, owing to fact that the city has an agreement with the Bank of treal, whereby the latter institution is the municipality's sive fiscal agent for all issues made in the United King-

Moose Jaw citizens thus far have authorized debentures e total amount of $978,297 in 1913, and there is another nture by-law pending amounting to $160,000; these to- er with the $212,000 still remaining from last year's is- makes a total to be issued of $1,350,297.

ern Bills and Needs.

The following bills have been presented to the Nova a legislature by municipalities:

wn.	Amount.	Purpose.
y	$ 8,000	Sidewalks.
e Bay	13,500	School.
arton	15,000	School.
ey	410,000	Water, sewer, hospital, fire service, etc.
ton	55,000	Water, sewer, school.

The proposed debentures are payable in thirty years' and are to bear not more than 5 per cent. interest.

Mr. W. A. Maclean, Ontario provincial engineer of ways, stated recently that counties are experiencing dif- ty in placing debentures for the work done last year, until advances made have been returned to the banks it be impossible to undertake this year's programme. ral counties are now holding off on this account.

◆

PERSONAL NOTES

Mr. Fred R. Shantz has been appointed as city manager he Crown Life Insurance Company, Toronto.

Mr. H. Victor Brayley, who has been connected with engineering department of the Transcontinental Rail- at Ottawa, has become manager for Canada for Messrs. n, Richards and Company, the well-known business en- ers and auditors. Mr. Brayley's offices will be at 263 James' Street, Montreal.

GENERAL TRADE CONDITIONS

Prices Firm—Grain Exporters are Busy—Cautious Ordering is Noted

The fine spring weather has been a stimulus to many lines of merchandise and a hopeful feeling prevails at Toronto. A large retail trade is being done in the city and country business is picking up. In wholesale departments dry goods orders are coming in freely for autumn delivery, and in seasonable lines the demand is fairly active. Prices of the leading staples are generally very firm. Payments have been rather better with the improvement in the money market The grocery trade is moderately active, with little change in prices. Sugars are steadier and teas and coffees firm. All kinds of building material are in brisk demand at firm prices, while metals are in fair request. Leather shows much strength, with trade good, while hides are unchanged. The grain trade has been quiet, with prices of wheat firm. Offerings are rather restricted. Nearly all the grain in Georgian Bay elevators has been sold. Oats continue unchanged. Hog products are steady. There is little change in butter, and fine, new grades are rather scarce. Eggs are plentiful and easier.

Week Earlier than Usual.

The water was let into the St. Lawrence canals on the 22nd—a full week earlier than usual—and ocean and inland navigation is now fully opened. The first grain boats from the upper lakes are expected at Montreal about May 1, and, as already noted, grain exporters are looking for an unusually busy season. In addition to increased shipments of wheat and oats, large quantities of western flaxseed are coming forward, Manitoba having, it is said, from 12,000,000 to 14,000,000 bushels for export. It is reported that some twenty tramp steamers have already been chartered by local grain shippers, in addition to freight space engaged on regular liners. The country roads are still in unsettled shape in some sections, but the fine weather has brought out city shoppers in larger numbers, and wholesale dry goods merchants report increased sorting business.

Money Conditions are Unchanged.

Prospects for fall business in heavy dry goods, however, are not altogether flattering, and travellers now in the West for clothing manufacturers write in rather a doleful strain, states Dun's Review. Commission agents representing textile manufacturers report wholesalers as placing orders cautiously for future delivery. Hardware and metals are fairly active and values steady, as a rule. Paints, oils and glass are also moving out quite freely. Shoes and leather are comparatively quiet Groceries show a steady movement. One of the large sugar refineries has been shut down several weeks and is rather short of stock in some grades, but nothing in the way of a decline in sugar prices is looked for in the near future. There is no apparent improvement in general collections, nor are money conditions any easier.

◆

BONDS FOR THE STATES

Messrs. Spitzer, Rorick and Company, Toledo, Ohio, have purchased $500,000 5 per cent. 20-years Regina S.D. debentures.

The Monetary Times has been informed that the city of Toronto has disposed of a further issue of bonds to the extent of $1,000,000, to Messrs. G. A. Stimson and Company, Toronto. These bonds presumably are for clients of this firm in the United States.

◆

UNITED INVESTORS, LIMITED

The first annual report of the United Investors, Limited, of Winnipeg, shows a satisfactory year's operations. The profits resulting from sales of properties amounted to $23,896. The principal assets are given as follows:—City properties, $126,568; farm lands, $70,346; agreements and mortgages, $93,461; Park Manor subdivision, $25,886. The liabilities: Agreements and mortgages, $185,865.83; accrued interests, $1,429.68; discounts suspense, $248.50; capital stock, $122,037.95. The company's officers are: President, Mr. R. D. Waugh; vice-president and managing director, Mr. A. H. Oakes; secretary-treasurer, Mr. T. E. Moffat.

At the annual meeting, the shareholders voted to increase the capital stock to $1,000,000 by the issue of $450,000 common stock and $300,000 7 per cent. preferred stock to be divided into 7,500 shares at par value $100 each; but the ordinary shares to be sold at a premium.

There is a public offering of these now being made, as will be seen from another page of this issue.

ONE HUNDRED AND TWENTY-ONE NEW CORPORATIONS

Varied Activities Represented—Prince Edward Island Still Adds to its Fox-farming Companies

One hundred and twenty-one new companies received charters this week. Their total capitalization amounts to $17,405,000. The largest companies are:—

Company.	Capital.
Phoenix Bridge and Iron Works, Montreal	$1,500,000
Societe d'Eclairage et d'Energie Electrique du Saguenay, Chicoutimi	1,000,000
Lavoie Motor, Montreal	1,000,000

IN THE INSURANCE ARENA

adians Invited to Congress — Vice-President of Mexico—Complies with Insurance Act

The Pacific North-West Underwriters' Congress will be at Seattle, Wash., June 2nd and 3rd, during President s visit. The congress is to be under the auspices of the and, Tacoma and Seattle Associations.

An invitation is being extended to all licensed agents in s of Oregon and Washington, and other insurance men ighout United States and Canada. The general head-ters of the congress is Hotel Washington. Mr. I. A. eau has been elected president, and Mr. J. C. Reid, sec-y. The following are chairman and secretary of the us committees: Organization, Mr. W. A. M. Smith, ıal Life; publicity, Mr. W. D. Mead, Pacific Mutual; ramme, Mr. Malcolm Hughes, Travellers'; entertain-, Mr. W. H. Siliman, Mutual Life.

President was Insured.

The Sun Life of Canada has just paid a death claim of oo gold in connection with the recent assassination of President Suarez, of Mexico, who was shot to death with President Madero by their military guard, under euphemistic excuse that they were "trying to escape." "Lex Fuega," as it is called, is quite customarily in-d in Mexico when the demise of a political prisoner is idered desirable by those in authority.

Senor Suarez had two policies in the Sun Life of Can-both taken out before his elevation to the vice-presi-y. President Madero had on several occasions during ast couple of years tried to take out insurance with the company, but the management had refused to assume risk.

plies With Insurance Act.

The Travellers' Life of Canada in complying with the rance Act, have added to the board of directors of the ellers' Life of Canada, representing the policyholders: srs. W. Lyall, Montreal; A. K. Maclean, M.P., Halifax; Ryan, Kingston; Paul J. Myler, of the Canadian West-ouse, Hamilton; J. F. Cairns, Saskatoon; and Charles ennock, general manager of the Bank of Vancouver,

Life Company.

A life insurance company with a capital of $1,000,000 head offices at Calgary will be formed shortly.

Several professional and business men of Calgary are to be interested in the scheme and at a meeting held a days ago it was decided to go ahead with the project.

◆

Messrs. Gordon, Mackay and Company are establishing western wholesale warehouse at Brandon.

The number of directors of the Trent River Paper Com-, Limited, has been increased from four to seven.

The Austin Fire Insurance Company, and the Common-th Fire Insurance Company, of Texas, have received ish Columbia licenses. Mr. W. S. Holland, Vancouver, ttorney for both companies.

MIXED FARMING CONVENTION

(Special correspondence.)

Lethbridge, Alberta, April 26.

The first Mixed Farming Convention held in the proce of Alberta, in the city of Lethbridge, unanimously pted the following resolution:—

Whereas, the government is inquiring into the banking tem with the evident purport of endeavoring to effect cer- remedies to meet the repeated complaints and demands the farmers of Western Canada for relief from an oppres- system, and

Whereas, existing banking facilities are entirely inadete for the proper and reasonable financial accommoda- of the farmers, and the condition thus created tends to ard and discourage the adoption of mixed farming meth- and the proper development of the agricultural resources Southern Alberta; therefore be it

Resolved, that this convention, the first mixed farming vention of Alberta, and representing farmers to the num- of four thousand within a radius of 100 miles from the of Lethbridge, boards of trade in all the progressive es and towns, and various other commercial bodies, while preciating and commending any movement in the direc- of improvement to our present Bank Act, believes that lly efficient relief to the existing difficulty experienced by farmer in obtaining needed financial assistance can best met by the legalization of co-operative credit societies ilar to those which have been so successful in Europe India; and be it further

Resolved, that a copy of these resolutions be forwarded the Dominion and Provincial Governments.

Mr. O. T. Lathrop was chairman of the convention and ssrs. D. J. Hay, A. Jack and W. D. Finley, secretaries.

CALGARY INCREASES INTEREST

The finance committee of the Calgary city council has decided to raise the rate on all unsold city debentures to 5 per cent.

◆

Edmonton's fire loss during March as reported by Fir Chief Louder, amounted to $8,257, the insurance involv amounted to $295,135.

A by-law to grant the Snedicor-Hathaway Shoe Com pany $25,000 and a free site was carried at Tillsonbur Ont.

The yearly cycle of affairs which begins and ends at jus this time marks a new year more significantly than th calendar day for that purpose. As this is written, the firs ship to navigate the St. Lawrence since last fall has r the port of Montreal; the water route of grain transportat from the west is again a fact; the seeding of the new crop i taking place. Financial affairs were subject to the same s of conditions and influences before January as after that dat and in passing that milestone the country entered into no new highway. To day, however, one can feel that an old year ha been definitely put behind and that what is to come is no merely a continuation of the forces and influences of yester day. Messrs. Greenshields and Company's April review.

Nova Scotia Steel and Coal Company

LIMITED

(Incorporated under Special Acts of the Province of Nova Scotia, Canada)

**BANKERS BOND COMPANY, LIMITED, AND
F. B. McCURDY & CO., OWN AND OFFER**

$1,500,000 SIX PER CENT. PERPETUAL DEBENTURE STOCK

(Being part of an issue of $2,000,000, the balance having been sold)

Secured by Mortgage and issued in denominations of $100 or multiples thereof. Redeemable at 105 and accrued interest at any time after July 1, 1919, upon six months' notice. Transferable at Eastern Trust Company, Montreal and Halifax, or at Toronto General Trusts Corporation, Toronto.

Interest payable by cheque half-yearly, January 1st and July 1st, at par at any Branch of the Bank of Nova Scotia or Royal Bank of Canada.

Price 98 and Accrued Interest

Payable as follows:

10% on Application
88% on Allotment
98%

OR

25% on Application
25% on June 1st, 1913
25% on July 1st, 1913
23% on August 1st, 1913
98%

Permanent Engraved Certificates Will Be Issued on Receipt of Payment in Full.

Interim Receipts for payments on account of Debenture Stock will be issued, bearing interest at 6 per cent. per annum from dates of payment. Interest on Debenture Stock will be payable from January 1st, 1913, and accrued interest thereon and on instalments will be adjusted when all payments have been completed.

Legal opinion of Mr. Hector McInnes, K.C., of Halifax, will be furnished upon request.

Important Features of the Issue

(as furnished by the President and General Manager of the Company).

(1) A conservative valuation of the Company's mortgaged assets is $20,000,000.

(2) This issue of Debenture Stock ranks equally with $1,000,000 now outstanding, and is secured by a Mortgage to the Eastern Trust Company on the Company's assets, subject only to an issue of 5% Bonds, limited to $6,000,000.

(3) After making provision for the Bonds issued, there remain assets to the value of $14,000,000, equal to nearly five times the Debenture Stock issued.

(4) The Debenture Stock is a senior security to $1,030,000 Preferred Stock (which receives 8% dividends) and $6,000,000 common stock (which receives 6% dividends).

(5) In addition to a large and modern manufacturing industry, including blast furnaces, open hearth and steel plant, steel rolling mills, coke ovens, etc., etc., the Company owns 83½ square miles of iron ore areas at Conception Bay, Newfoundland (containing, according to reports of eminent engineers, 200,000,000 tons of proven ore, and over 1,200,000,000 tons of ore reasonably supposed to exist), and coal areas at Cape Breton estimated to contain over 2,500,000,000 tons of coal.

(6) The average earnings of the Company for the last three years (after providing interest and sinking fund on the Bonds) amounted to $723,500 per annum, equal to over four times interest on Debenture Stock, including this issue.

UNITED INVESTORS LIMITED

Head Office - - - WINNIPEG

CAPITAL $1,000,000

President
RICHARD D. WAUGH
Ex-Mayor City of Winnipeg

Vice-President and Managing Director
ALBERT H. OAKES
President 1912 Winnipeg Real Estate Exchange
Manager Oakes-Gray Realty Co.

Secretary-Treasurer THOMAS E. MOFFAT

Directors

Controller J. W. COCKBURN; E. R. CHAPMAN, Barrister; JOSEPH GRAY, Capitalist, Minneapolis; FREDK. W. MOORE, Treasurer Grain Growers' Grain Co.; DUNCAN MARSHALL, Retired Farmer, Clearwater, Man.

The "UNITED INVESTORS, LIMITED," was first incorporated in January 1912, with a capital stock of $250,000. The greater part of this stock was taken up during the ensuing twelve months.

At the first Annual Meeting held on January 8th last, the Shareholders voted to increase the capital stock to $1,000,000, by authorizing the issue of $450,000 worth of additional common or ordinary stock, and $300,000 worth of 7 per cent. preferred stock to be divided into 7,500 shares, par value $100 each; but the common or ordinary shares to be sold at a premium of $10.00.

THIS STOCK IS NOW OFFERED FOR PUBLIC SUBSCRIPTION

Management The Corporation is managed by Directors elected annually by the Shareholders. The present Board is composed of prominent and successful business men, who are large Shareholders.

No Bonus Stock In the formation of this Company no bonus stock in any form was allowed. Every stock certificate will have been paid for in hard cash at one hundred cents on the dollar.

No salaries are paid to any officers or directors, and the Company pays no office rent.

What the "United Investors, Limited," Offers - -

1. The free advice of nine experienced and reputable business men, all of whom are large Shareholders. Their interests are identical with those of the smallest Shareholder.

2. The opportunity to enrich yourself, not only in one real estate deal, but on a dozen or more at the same time.

3. A share in certain "hidden" profits. Profits for which as yet no credit has been taken in the Profit and Loss Account.

THESE ARE—(a) "Park Manor" subdivision. Estimated profits $140,000.00. (b) Properties bought for $205,914.32, upon which $121,591.33 is still owing, but which are valued in December, 1912, at $274,790.00 by the Winnipeg Real Estate Exchange Valuation Committee.

4. An interest in a Company which had organization expenses of only $578.60.

5. If you become a Shareholder, you participate in all the profits and other advantages of the Company. You are offered an opportunity to become a partner in a "going concern" which offers you an interest in profits already accumulated—a Company which has passed beyond the experimental stage—a Company the future of which is assured—a Company for the Shareholder, small and large.

How to Buy "United Investors, Limited," Shares

You can buy any amount from one share up. You can pay on full or on easy instalments, without interest, and every payment participates fully in profits.

You can own one common share by paying $30.00 cash and the balance in four equal, consecutive semi-annual payments.

You can own one hundred common shares by paying $3,000.00 cash and paying $2,000.00 every six months for two years.

You can buy the Preferred Shares by paying $20.00 per share cash with application, and the balance in four semi-annual payments.

THIS IS GOOD BUSINESS

Put some of your money in Winnipeg, the billion-and-a-half-dollar-bank-clearing-city—the city with the largest annual bank clearings for its size on the continent.

Postal card will bring Prospectus, Auditors' Report and full information.

LEGAL NOTICE

BRITISH AND COLONIAL LAND AND SECURITIES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of April, 1913, incorporating James Steller Lovell, Charles Delamere Magee, accountants; William Bain, bookkeeper; Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz. —(a) To purchase, take on lease or otherwise acquire, to hold, sell or otherwise dispose of property, movable or immovable, land, or any right or interest therein, water powers, power sites, timber limits or licenses, mines, mining rights, mining licenses, quarries, oil wells and products of quarries, and mineral lands and any interest therein; to develop, produce, deal with or otherwise turn to account any lands of the company or any kind of natural or artificial product which may be taken therefrom, and without limiting the generality of the aforesaid words, to mine, raise or otherwise produce minerals of all kinds, and to refine and otherwise treat and make merchantable or otherwise marketable the same; to manufacture or produce timber, lumber, logs, pulp wood or any article made in whole or in part from wood or any product or by-product thereof; to quarry, smelt, refine, dress, amalgamate and prepare for market, ore, metal and mineral substances of all kinds, and to deal in stone and the products thereof; (b) To engage in catching, freezing, salting, smoking, curing, canning, drying, preserving, selling, disposing of and dealing in fish taken in water flowing through lands owned or controlled by the company or adjacent thereto and in producing, manufacturing, selling and disposing of manufactures of every kind and nature whatsoever from fish and fish products; to engage in the sale, exportation and distribution of such fish, fish products and manufactures therefrom; to erect such plant and machinery as may be necessary to preserve or cure fish or for the purpose of changing fish or its products into any form in which the same may be sold; to manufacture fertilizer from fish; to manufacture cans, barrels, packages, or other receptacles for the preservation of goods and products, and to purchase, build, lease or otherwise acquire, and to maintain and carry on cold storage and refrigerating processes; (c) To subscribe for, purchase or otherwise acquire, own, hold, sell and otherwise dispose of and deal with and to transfer shares in the capital stock of any corporation, foreign or otherwise, and bonds, debentures, obligations or other securities of any government, municipality or corporation, foreign or otherwise, and while the holder thereof to exercise all the rights and privileges of ownership including the right to vote thereon, notwithstanding the provisions of section 44 of the said Act; (d) To buy, sell, manufacture and deal in minerals, plant, machinery, implements, conveniences, provisions and things capable of being used in connection with the operations of the company, or required by workmen and others employed by the company; (e) To construct, carry out, maintain, improve, manage, work, control, operate and superintend any roads, streets, tramways, sidings, sidewalks, drains, water mains, sewers, and any other improvements on lands belonging to or controlled by the company, and any bridges, reservoirs, water courses, artesian wells, waterworks, pumping stations, aqueducts, filtration plants, mains, connections and other accessories to such waterworks, furnaces, mills, crushing works, lighting plants, shops, stores and other works and conveniences which may directly or indirectly be conducive to any of the objects of the company, and to contribute to, subsidize or otherwise aid or take part in any such operations; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To issue fully or partly paid shares of the company in payment or part payment of any property, assets, franchises, options or other rights or privileges; (h) To construct, acquire by purchase, lease or otherwise, and to own, develop and operate works for the production, sale and disposal of steam, electric, hydraulic, pneumatic or other power or force, and to produce, create, develop, acquire by lease, purchase or otherwise, and to control and generally deal in, use, sell, lease or otherwise dispose of such steam, electric, hydraulic, pneumatic and other power, or force for any uses and purposes for which the same are adapted, provided that all sales, transmission or distribution of electric or other power, or force, beyond the lands of the company, shall be subject to local and municipal regulations in that behalf; (i) To construct, acquire, own, manage, charter, operate, hire and lease all kinds of steam and sailing vessels, boats, tugs, barges and other vessels, wharves, docks, elevators, warehouses, freight sheds and other buildings necessary for the purposes of the company, and to [illegible], carry goods, freight and passengers for hire and generally to carry on the business of an elevator, navigation and transportation company; (j) To contract for, build, construct, and equip public and private works of every description, and to acquire, purchase, hold, sell, dispose of, supply, manufacture and produce all manner and kinds of material for use in the construction and equipment of such public and private works; (k) To promote, or to assist in the promotion of any company or corporation carrying on a business similar in whole or in part to that of this company or for the purpose of acquiring the undertaking of the company or any part thereof; (l) To transact and carry on a general financial agency and brokerage business, and to act as agents and brokers for the investme loan, payment, transmission and collection of money, for the transfer a recording of bonds, debentures, shares or other securities and for the p chase, sale and improvement, development and management of any p perty, business or undertaking and the management, control or directi of syndicates, partnerships, associations, companies or corporations; A general meeting of the Golden, B.C., board of trade s held recently, when the election of officers for the en- ng year took place, and the following were elected: Mr. A. Warren, president; Mr. N. M. Foukes, first vice-presi- t; Mr. H. N. Rogers, second vice-president; Mr. A. J. chell, secretary-treasurer; and Dr. Taylor, Messrs. H. Parsons, Hedley Dart, Hugh McDonald and W. J. Grubbe council.

The number of directors of the Mutual and Land Company, Limited, has been changed from five to seven.

The "Canadian Allis-Chalmers, Limited," has been incorporated with $500,000 capital and head offices in Toronto. The new company will take over as a going concern the business and good-will of the Allis-Chalmers-Bullock Company, of Montreal. The company has been bought by the Canadian General Electric Company.

INDUSTRIAL BONDS AND STOCKS

Scotia's Offering of One and Half Millions—New Cotton Company

An offering of $1,500,000 six per cent. perpetual debenture stock of the Nova Scotia Steel and Coal Company is being made by the Bankers' Bond Company, Toronto, the offering being at 98 and interest. The prospectus shows that after making provision for the bonds issued, there remain assets to the value of $14,000,000, equal to nearly 5 times the debenture stock issued. The debenture stock is a senior security to $1,030,000 preferred stock (which receives 8 per cent. dividends) and $6,000,000 common stock (which receives 6 per cent. dividends).

Mr. Robert E. Harris, president of the company, states that the company has orders for the whole of its output of iron and steel for the first half of the present year. He estimates that the output of the collieries for 1913 will be somewhat in excess of that in 1912.

The proceeds of the debenture stock now issued, will be used to repay a part of the expenditure on capital for the past year, and the balance will be applied in equipping a new colliery, a new open hearth plant, and other improvements and additions to plant and equipment to provide for still larger outputs, thereby adding to the earning power of the company.

Stocks and Bonds.

An offering of $150,000 of 7 per cent. cumulative preferred stock, part of an issue of $300,000, of the Dunlop Tire and Rubber Goods Company, Limited, is being made by Messrs. McCuaig Brothers and Company, Montreal, and A. E. Osler and Company, Toronto. The company has been in successful operation for a great many years past, and has paid the dividend on its preferred stock without interruption for the past fourteen years. The prospectus shows that the net assets, exclusive of goodwill, after deducting the $566,400 of outstanding bonds, equal to $200 per share on the preferred stock.

An issue of $350,000 6 per cent. Canadian-Connecticut Cotton Mills first mortgage 20-year bonds is shortly to be marketed by Messrs. McCuaig Brothers and Company, Montreal. This is a newly-organized cotton manufacturing company, locating at Sherbrooke, Que. The capitalization is $600,000 common stock and $150,000 7 per cent. preferred, in addition to this issue of bonds.

Grand Trunk in London.

The underwriters of the recent issue of £2,000,000 four per cent. debenture stock of the Grand Trunk Pacific Railway have been left with 50 per cent. of the issue. The scrip was afterward quoted at 1 discount.

The purposes of the visit of Mr. J. H. Plummer, president of the Dominion Iron Company, abroad, is stated to be to raise a loan of $3,000,000.

The following issues have been listed on the London Stock Exchange: British Columbia Electric, £750,000; Canada Southern Railway, $22,500,000 fives; Edmonton and Dunvegan Railway, £738,356, fours.

◆

NEGOTIATING WITH HOME LIFE ASSOCIATION

The Home Life Association, Toronto, has been the centre of interest during this week owing to various indefinite rumors which have appeared in the press. It having been stated that a meeting was to have been held on Wednesday, negotiations were to have been completed for its absorption by the Sun Life Assurance Company of Montreal. The presence of Mr. T. B. Macaulay in Toronto was thought to be for the purpose of attending the meeting, but he was in reality on his way to Detroit with Mr. J. A. Tory.

The officials of both companies are reticent on the matter. Negotiations between the companies have been proceeding for some time and it will probably be found when they are completed that the Sun Life has arranged to re-insure the life assurance business of the Home Life, the Sun Life taking over a portion of the Home Life's assets in consideration of the same.

MONTREAL'S LOAN

Alderman Lapointe Would Reserve Portion for Loca Investors—Money is Needed for Public Works

Montreal's civic loan for $11,904,000 authorized by th city council will contain a provision by which a certain amoun of it will be offered to the Montreal public, according to statement made by Alderman L. A. Lapointe, leader of th council.

The recommendation of the board of control stated tha the increase of property values entitled the city to raise th foregoing sum this year, and they suggested that a by-law b adopted as a preliminary to the loan. The first reading of th by-law was agreed to, and when the second reading comes u Alderman L. A. Lapointe announced that he proposed to as the council to agree to the plan of offering a part of the loa to the public.

Montreal People Would Buy.

"My opinion," he said, "is that many people in Montre would like to buy the city's bonds if the denominations we small enough, let us say from $50 up. Suppose we decide offer from $300,000 to $500,000 of the new loan in that wa I am sure we should get par. These bonds would be ma payable to bearer and redeemable say in one year. If t holder wanted to sell his investment before that time he cou do so, and those who wanted their money back could get at the City Hall, with the interest we decide to pay."

As the last civic loan brought the city but 86 at 4 p cent., though the net return was ten points higher, the ci for the first time paying 4½ per cent. interest, Alderm Lapointe remarked that the Montreal public will proba offer better prices than last secured for a moderately sm sum anyway.

When asked whether amounts borrowed by the city for year would be satisfactory, Alderman Lapointe replied th seeing the city re-issued loans, the same course might be f lowed with the short-term loan. At any event, the city co make provision to redeem the bonds at the end of a year.

Negotiate With Bank of Montreal.

When the municipal by-law has been adopted in a week two, then the board of control will have been empowered negotiate with the Bank of Montreal, the city's financ agent, for the placing of the loan on the London market. the council accepts the suggestion of Alderman Lapoin about a half a million dollars of the loan will be offered to Montreal public in general. The city would pay 4 or even per cent. interest.

The money is required by the administrators of the for the construction and continuation of public works of v ous descriptions, including street improvements and impr ments to the city water works.

IXED FARMING AND MANUFACTURING IN WESTERN CANADA

Recorded observations of one whose duty in life is can closely men and matters are far more likely to orrect and convincing than those of one who merely s a casual glance and writes what appears on the ace at that immediate moment.

Mr. S. R. Tarr, M.A., has a close acquaintanceship Western Canada, and the proof of the foregoing ements will be shown in the following quotations an address he gave before the Canadian Credit 's Association at Winnipeg:—

There is a dual development under way in Western ada that bodes well for sound progress. Movements ards diversified agricultural and industrial production now characteristic of rural and urban development, ectively throughout the West. And the movements co-related more closely than appears at a casual ce.

Take, for instance, the relation between the cereal ing industry and animal husbandry. Partly, no doubt, take advantage of the Panama route, and partly on unt of the cheapness of power (which in milling is relatively greater importance than in industries reing more manual operatives), the milling and packing panies are gradually making Southern Alberta an strial territory of importance.

Now glance at what this means to diversified agriture, as well as to the revival of ranching over less tile districts. In the first place, the upgrowth of ustrial centres supplies ready and profitable markets the varied products of the soil. Produce too perishe for long shipment will find ready sale close at hand. en the available by-products from cereal mills should much in re-establishing and expanding the live stock dairying industries throughout the West. Lately, the provincial governments, the railroads and the packers have turned their hands in a systematic effort towards the upbuilding of the live stock industry. The increased interest along these lines is having a salutary effect already upon the financial condition of the Western farmer. The manager of a large loaning institution not long ago remarked that he could always tell when any district began to go in for mixed farming by the increased promptness of the company's collections throughout the locality.

The drop in wheat prices will not have been an unmixed evil for the Western farmer if it prompts him to realize the advantage of having other strings to his bow.

The matters of better local roads and of improved marketing and storage facilities for supplying Western towns and [illegible] are now coming in for careful attention. Around Winnipeg the leaven had been working notably of late. And all through the West similar interest is growing. A mixed farming convention has been held at Lethbridge.

As to manufacturing, during the five years from 1905 to 1910, the three prairie provinces more than doubled the annual value of their industrial output, the census figures for 1910 being $77,000,000. That the annual total now runs well up to the $100,000,000 mark admits of small doubt.

In the laying of foundations for industrial development, individual cities have an important part to play. There are mistakes to be avoided—and among the foremost is the bonusing fallacy, which has in so many instances brought set-back to the real progress of various Eastern towns.

It is a matter for encouragement that at the recent organization convention of the civic and industrial commissioners of Western Canada a resolution was adopted, deprecating the bonusing practice and calling upon the several Western provincial governments to take steps to the end that uniform legislation be enacted, reducing the evil to a minimum, and, if possible, abolishing it.

During the coming days important delegations of manufacturing interests from England and Germany are to investigate the opportunities for the establishment of industries, and the evidence seems to point out that the dual development spoken of above will receive further acceleration.

BORROWED IN ONE MONTH

Economic conditions may affect adversely the monetary markets of the world. This fact is not always recognized, and a would-be borrower sometimes wonders what is wrong when a refusal is given to his request for a loan.

Canadian municipalities in some instances have been burdened with similar thoughts, and their citizens have wondered what has been wrong with the municipalities' credit.

Those who really did overstep the mark or were near the limit, realized their mistake and economized to a considerable extent, while those who read the signs of the time aright saw the days of four per cents. were ended, and perhaps four and half per cents. as well, and have suited their interest rates to existing demands.

During April the total municipal borrowings were $15,488,936.

The following four cities made issues in London:—

		Per cent.	Price.
Prince Albert	£ 100,000	4½	86
Port Arthur	415,700	5	99
Regina	553,900	5	101
Edmonton	1,068,000	5	101½
	£2,137,600		

United States bond houses were buyers of issues to the extent of $1,007,079, and Port Alberni, B.C., disposed of $100,000 of treasury bills.

The total sales were:—

Municipal bond sales in London...........	$10,688,000
Municipal bond sales in Canada...........	3,693,857
Municipal bond sales in United States.....	1,007,079
Treasury bills	100,000
	$15,488,936

This is far from a reflection on Canada's credit—indeed, it is the reverse, but still a circumspect attitude on the part of the municipalities is necessary to keep it thus high.

A prominent United States financial house is quoted as saying in relation to industrtial borrowers the following words, which may in some degree be applicable to municipalities:—

"It would be a very good thing for the world to borrow less and save more for a few years, and for the corporations to have to live within their own resources."

BRIDGES AND BANKS THAT ARE WEAK

The explanation of the Bankers' Association concerning the charges that the Banque de St. Hyacinthe was arbitrarily closed by the association appears on another page of this issue. Mr. Rainville, who brought up the matter before the Banking and Commerce Committee, was given a copy of the report, which, if he so desires, will be further discussed.

If Mr. Knight's conclusions were correct, and the bank was a weak and failing institution, the best interests of the creditors and owners immediately concerned were the ones rightly to be considered.

Here is what a high United States authority says about weak banks: "A weak bank in the financial system of any state has no more right to continue in business than has a weak bridge in a public highway. The duty of the public authorities and of public opinion in the one case is the same as in the other. Once an element of weakness has developed, the defect in the structure is to be remedied without delay, so as to make it capable of bearing the full weight of its proper burden, or the thing should be closed up. The weak bank takes away legitimate business from the bank that is safe, and does injury to the business as a whole by spreading general distrust. It should, therefore, be put out of existence with no less expedition than we put out a fire or block up a highway or suspend traffic on a tumbled-dowr bridge."

CONTROLLING THE RATE OF INTEREST

There is nothing so completely subject to the lav of supply and demand as credit, and nothing whicl depends so much upon well-based confidence. Controlling the rate of interest throughout the country by a Government "board" in Washington would be quite as absur as controlling the prices of commodities in a like manner Does Senator Owen, chairman of the senate committe on banking and currency, know what he means by tha "great symptom of evil," the fluctuating rate of interes on the Stock Exchange? queried the New York Journa of Commerce recently. He seems to think it is something which "commerce and trade in general" depend upon instead of a rate per annum for the use for a da of money available for the purpose, which must be repai on call, and is usually called in a day or two.

Sometimes, largely on account of our defective banking system, the demand for the moment is out of proportion to the available supply and the rate goes mounting up, but ordinarily it is somewhat lower than th general rate because funds are idle and looking for us from day to day.

But bank rates in general depend upon the deman for time loans, the funds available for them and th basis of confidence or security for lending. They wi vary at different times and in different places accordingl

Those who deal in credit can exercise control ove them only within the limits of safety, and having "board of control" to dictate what they shall be th country over is such a preposterous idea that we devoutl hope that it never entered the brain of the chairman the senate committee on banking and currency is th further comment of that journal.

These remarks are of interest to Canadians in vie of the recent discussion on interest rates before th Banking and Commerce Committee.

SMALL CHANGE

Packers' piscatorial profits were plus.

* * * *

Regina has wisely resolved to pay premiums for i fire insurance policies.

* * * *

Progressive cities have fire prevention and clean-u days. Is the city in which you reside on that list?

* * * *

In fifty-one months Canada's money factory turne out 222,000,000 cents, 18,580,000 nickels, 13,030,00 dimes, 10,000,000 quarters, 1,500,000 half dollars, an $2,000,000 worth of gold pieces.

LIFE INSURANCE AND THE AGENT

Importance of Field Men—Selection of Agency perintendents—Condemn Unsatisfactory Methods

BY R. W. BARTON, A.I.A.

t is hard to say which is the most important functionary cted with a life office. Just as each member of the body fulfil its function to make a healthy human being, so the "field" men and the "inside" men work, each in his urn and in unison, to obtain a good result. It cannot be d, however, that the responsibility of the agent is a one. His is the channel through which new blood flows stain and build up the corporation [illegible] and uality of this blood is of vital importance.

'he class of lives he introduces is the quality of this The question of moral hazard—the possibility of un- and intemperate habits or other unseen disability being n by an applicant from the company—must be left to a extent to the agent on the spot to determine.

Subject of Life Assurance is a Difficult One to Grasp.

'o detect and point this out at the loss of his own re- ration owing to the consequent refusal of the applicant stern duty of the agent. The agent must, therefore, be of integrity.

n intelligent appreciation of the different classes of es issued, not only by his own company, but also by ompetitors, the various methods of allotting profits or ends adopted by the companies, and some knowledge of aw as it affects life policy owners are some of the ele- ary needs of a good agent.

an Agent Must Be.

'he agent must, therefore, be a man of some education. od mixer, of good address with patience, tact and de- nation added to the qualities already stated give us the sary qualifications for this work. Judged by this ard, too large a proportion of the agents to-day solicit- rdinary life assurance must be condemned. It is largely is reason that all agents find the public hard to approach. succession of ignorant and untrained agents brought rofession to a low ebb. Any man was good enough for ob. To those failing at many other occupations it be- not the refuge, but the resort of the destitute.

'he position is recognized by the companies and is being died, but the fact remains that too often the good agent ulsed at times, even insulted by the public, because of npetents permitted by the companies to represent them. companies have on their side some excuse.

n common with all other enterprises in a young and ly developing country they have suffered from the lack illed labor in the market, and have consequently had to e best they could with what they had.

'he unskilled workers have spoiled a lot of valuable raw rial.

fications of an Agency Superintendent.

'he public want to understand insurance, but the agency rintendent too often tells his agents you do not go out to insurance, you go out to sell it. This is the mistake hich good agents pay to-day in unmerited rebuffs from an ted public.

uccess in the field is not the only qualification that should to the position of agency manager or superintendent. rent men have different temperaments. And the methods oyed by the superintendent when in the field himself if forced on an agent and unsuited to his own methods, nly be ineffectual, but altogether paralyze his abilities. e interests of the public, the agents, and the companies, suitable selection of an agency superintendent is of su- e importance. The maxim of the too many superin- ents and agents is "get business decently if you ca anyway get business." The insurance journals [illegible] at times to encourage this view. As witness the follow- stories taken from recent editions.

"I want your signature here, George." "What for?" ers George. "Never you mind," says the agent. "See nicely you can write here." In many cases George ges, and then wants to know what the blankety blank it neans. "That form, George," 'says the agent,' "is an ication for life assurance." "But I don't want life assur- ." yells George. "Oh yes you do," says the agent, "only don't know it."

pathy Instead of Condemnation.

On another occasion an agent canvassing for a large cy was told by his prospect that another company offered er terms. His answer was said to have been, "good heavens! u think a blankety blank office like that is fit to be associ- with mine, take your d—— business to them." and paper goes on to say, "I ought to say that his language he good city of Toronto cost him the business. But as I am talking only facts, I, alas, have to record that the client came running after him and begged him to take the proposal. And the agent adds, "that is keeping up the tone of the business."

Other instances as crude as these are printed until one feels that the paper is in sympathy with agents of this type, instead of sternly condemning them to the pillory of public exposure.

Bacon's striking words are applicable to all professions, but to none more so than that of the life insurance agent. "I hold every man a debtor to his profession, from the which as men, of course, do seek to receive countenance and profit, so ought they of duty to endeavor themselves by way of amends to be a help and ornament thereunto."

VALUE OF LIFE INSURANCE

XI.

The Policy for Professional Men

By C. A. Hastings

There is just as much variety in domestic assurance as in business assurance. In my foregoing articles I have endeavored to point out the several different uses of assurance in business, and that a first-class office offers up-to-date policies which will meet all needs. For some professional men a known sum at a given age is desirable, for others a provision for their families. The reply is endowment assurance, but it has one disadvantage, and that is, hardly a man will carry a policy that is adequately large. At all events, there are several persons to whom a few thousand dollars at a given age would not mean much.

What Is Wanted.

They really want two things:—

(1) Provision for the wife;
(2) No anxiety and no risk of investment.

Professional men, like solicitors, doctors, accountants and so on, cannot invest their money in their businesses (an excuse which is so often given) which only require sufficient capital to establish themselves. Therefore, they must invest their surplus in property and so on, and whether it is done on a large or a small scale, it must prove a source of anxiety, though they may or may not know it, and, lastly, but not least, it means valuable time and consideration which could be more profitably employed in other pursuits. A small investor cannot afford to lose one cent of his savings, and a large investor has so many securities that he must be continually on the "qui vive" watching the market fluctuations.

Whole of Life Policy.

Therefore, in some way or other, the surplus of a professional man may clash with:—

(1) His health;
(2) The time he devotes to his profession;
(3) His leisure.

The plan of assurance which I can strongly recommend to the attention of these men is a whole of life policy, with profits, with a limited number of payments, for example, twenty years. Though the premiums are in the neighborhood of $9 per $1,000 higher than a whole life policy with continuous premiums, in reality they are low, for the assured is paying his premiums when he is in the prime of life and when his income is at its highest. I would advise that the beneficiary (for example, the widow) be directed to purchase an annuity with the capital, thus relieving the widow from all anxiety, which her late husband avoided; in this way neither have have any anxiety as to investments, nor is there any possibility of loss of capital—and, after all, are not these the benefits above all others that in truth man longs for, and who has a dire horror of foolish investments by his executors?

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.
(4) March 22nd—The automatic production of capital.
(5) March 29—How to redeem debentures.
(6) April 5th—Value of goodwill and how to preserve it.
(7) April 12th—How to protect capital in land, etc.
(8) April 19th—Short term policies.
(9) April 26th—Endowment policies.
(10) May 3rd—Single premium policies.

Mr. H. H. Hamblin, general manager, and Mr. J. Caulcutt, foreign manager of the London and Southwestern Bank, are expected in Vancouver this month. They will investigate the question of securities in the United States as well as Canada as investments for British banks.

PHŒNIX BRIDGE AND IRON WORKS COMPANY

Bond Issue — President Issues Statement — Plant is Located in Montreal's Manufacturing District

Monetary Times Office,
Montreal, May 8th.

The Phœnix Bridge and Iron Works Company is making a new issue of bonds and stock this week, through the Quebec Savings and Trust Company. This stock has already been underwritten, and is now being distributed to the public. The offering consists of $750,000 of 6 per cent. first mortgage bonds, and of $800,000 of common stock. The bonds are being offered at 96 per cent. of par, and the stock at $50 per share. The offering is being made simultaneously in London and in Canada. Approximately $450,000 of the bonds and $405,000 of the stock have been taken firm. A new company has just been incorporated at Ottawa with a capitalization of $1,500,000. This company in every way takes the place of the company which has heretofore operated under the same title. After the present issue has been accomplished, there will remain in the treasury to provide funds for future expenses and for the general purposes of the company, $700,000 of the common shares of the company. All the bonds will have been issued.

Statement From President.

Accompanying the offer is a statement from the president of the company to the effect that the average net earnings, after depreciation, for the 3½ years ending December 31st, 1912, amounted to $89,159. As the interest on the entire bond issue of $750,000 or six per cents. would amount to $45,000 per year, it will be seen that over $44,000 would remain after the bond interest had been paid. In other words, the average earnings for over three years past have been sufficient to provide bond interest twice over. Or, looking at it from the standpoint of the shareholder, the surplus over bond interest requirements is equal to about 5½ per cent. on the stock of the company. When the earnings for the past eighteen months alone are taken, the surplus represents about 6¾ per cent. on the stock of the company.

Has Excellent Facilities.

The Phœnix Bridge and Iron Works Company has a plant situated in the centre of the manufacturing district of Montreal, where shipping facilities are all that could be desired. The concern manufactures and erects structural steel for bridges and buildings. The cost of delivery, owing to the central location of the concern, is smaller than in the case of most other companies. Operations have now been carried on satisfactorily since 1898, and save for an occasional year, earnings have shown a fairly constant increase, beginning with $51,000 in 1898 and progressing gradually to upwards of $600,000 during the past couple of years. The land owned by the company allows of an expansion to the works. The assets of the company at the end of last year, including $25,000 which is being provided for improvements, amounted to $1,400,000, while total liabilities were but $57,000. This leaves a surplus of $1,243 against the present bond issue of $750,000.

Mr. James W. Pyke is president of the company, and Mr. T. Palmer Howard is general manager.

◆

INTEREST RATES INCREASED TWENTY-FIVE PER CENT.

The three great commercial nations of the world, the United States, England and Germany, have been investing enormous sums of money during the last few years in new developments. The supply of capital though by no means exhausted, has consequently greatly diminished and owners are enabled to exact much more onerous terms. It is safe to say that interest rates on permanent investments have risen 25 to 30 per cent. in the last four or five years, states Henry Clews, the well-known financier. Such a striking change must have a marked effect upon values, and this imperative readjustment is one of the important elements in the present market situation. Whether the decline on this account has reached its limit or not, it is premature to say. So far as high-grade bonds are concerned, the rise in interest rates would appear to have been nearly discounted, but owners of high-grade securities are not frequently exchanging a portion of the latter for the new high interest rate issues.

The capital stock of the Pioneer Fox Farming Company has been increased from $1,700 in shares of $10 each, to [illegible] in additional shares of $40 each.

MEDICINE HAT TO BE AN INDUSTRIAL CENTRE

Banking Situation — People to Vote Upon Stre Railway—Cheap Power and Good Water

(Special correspondence.)

Medicine Hat, Alta., May 5.

Medicine Hat has experienced a wonderful awaker during the past year or so, and just when we had hoped or great activity in the building line this spring, the build must go slow owing to the loan companies shutting d on mortgage loans. It is, no doubt, for the best, for a estate sales were altogether too active to last, and value many cases were not taken into account so long as t could unload upon another.

The banks have kept strictly out of any loans of a s ulative real estate nature, and for this reason have been able to take care of their clients, and at no time have been obliged to refuse regular customers who are engaged in leg mate business what money they required, and drafts m by merchants for goods have been paid at maturity in majority of cases, and not more than 25 per cent. of banks' customers' paper has been renewed. Except in c of mortgage loans for dwelling house and business blo s. Medicine Hat has not felt the money tightness so far.

Probably Vote for Street Railway.

There has been considerable outside money expend for real estate of late, which no doubt accounts for the ti ness not being felt to any extent. Our city council h signed up with a number of industries who intend loca factories here, and the citizens will be called on to vote or or against the granting of a charter to The Max Aik s' Company for a street railway franchise on the 23rd of is month, and it will probably carry as the people feel the g necessity of a street railway right away if this is to be industrial city that its citizens expect it will be within next five years, and while civic ownership is favored, taxpayers feel they cannot afford to build it at present, the city reserve the option of taking it over in 20 years.

Revenue from Natural Gas.

The city will have a revenue this year of $125,000 f m the natural gas, which is found money, and the convenience of having natural gas in the homes and places of busin s not to speak of the small cost, is a great inducement aga st the use of coal and wood.

Medicine Hat, in my opinion, is destined to be a la e industrial centre. It has a good start. The money ti ness may check its rapid growth for a time, but it has essentials which go to build up a city, namely, cheap p er and good water, and plenty of it.

◆

GEOGRAPHICAL DISTRIBUTION OF BANKS

Banking practices are much to the fore in Canada o to the discussions taking place at Ottawa on the new bank But banking is not often thought as a profession emplo 13,000 persons throughout the Dominion. A course on M Banking is being conducted by the Shaw Correspon School, Toronto. Included in this are eight lessons on " Geography," by Mr. H. M. P. Eckart, the well-known aut who has contributed many valuable articles on banking jects to The Monetary Times.

These lessons form part of the introductory cours banking subjects. The object is to inform the younger m bers of the banking staffs regarding the geographical tion of each of the Canadian banks, and regarding the of business transacted by the branches in each one of the adian provinces, and by the branches abroad. Als chapter is devoted to a description of geographical posi of the various railway systems and the relationship of the ways to the banks.

The courses of study to which bank geography belo s make their direct appeal to bank employees. First, they vide a means whereby the individual bank clerk may imp his knowledge of banking practice and theory, and th increase his chances of promotion and better pay.

Besides giving bank clerks an opportunity to study ir profession systematically, the lessons also serve to give best men an opportunity to display their knowledge of b ing practice independently of local managers and inspect

The following securities have been listed on the M real Stock Exchange:—8,514 additional shares of c stock, and 8,000 additional shares of preferred stock Dominion Canners.

BANKING HISTORY

he Events of Nineteen Hundred and Twelve—Mergers —Bank Act Introduced

Among the important events of 1912 should be mentioned e absorption of the Eastern Townships Bank by the Can- dian Bank of Commerce, which went into effect March 1st, nd the absorption of the Traders Bank of Canada by the oyal Bank of Canada, effective September 3rd. Through e acquisition of the Eastern Townships the Commerce was laced in position for challenging the lead of the Bank of ontreal, which has been for over ninety years the premier anadian bank in point of amount of total assets, writes Mr. . M. P. Eckardt, in the Bankers' Magazine. Shortly ter the amalgamation the Commerce passed the older bank d retained the lead for several months; but according to the st bank statement published—that for December 31st—the ank of Montreal was then again in the ascendant by a nar- w margin.

oyal Traders Merger.

Through its acquisition of the Traders the Royal Bank came an institution with about $180,000,000 of assets—the ank of Montreal and the Canadian Bank of Commerce pos- ssing $239,000,000 and $237,000,000 respectively. The Royal so acquired during the year the Bank of British Honduras d now, therefore, possesses a branch at Belize. This move, d the movement of the bank to increase the number of its anches in the West Indies, doubtless represent a part of the an for taking full advantage of the prospective opening of e Panama Canal.

wo Other Absorptions.

Two other absorptions were announced during the year, go into effect in 1913. The Bank of Nova Scotia (founded 32) entered into agreement to absorb the Bank of New unswick (founded 1820). Although the Bank of New Bruns- ck is one of the oldest banks in the Dominion, its opera- ns were confined, until a comparatively recent period, to e city of St. John, and, therefore, its assets did not rise to e large proportions attained by the other old established nks. At the end of the year 1912 the Nova Scotia had total sets of $12,000,000. Thus the consolidated bank will pre- mably compete with the Merchants Bank of Canada for rth place. The absorption of the Internationale by the me marks the end of a notable venture by French bankers the Canadian field.

The year 1912 saw the introduction to the Ottawa Parlia- nt of the new bank act.

MAGNESIA PRODUCTS, LIMITED

Monetary Times Office,
Montreal, May 8th.

An offering is being made in Montreal of the bonds and ck of the "Magnesia Products, Limited." This concern s formed some time since for the purpose of taking over plant and mines of the Canadian Magnesite Company, and undertaking of the Magnesia Products Company, of wark, N.J. The new company acquires control of a valu- e deposit of magnesia, at Calumet, Que., through the rchase of the former company, and through the plant of latter company it obtains immediate access to markets eady established throughout the United States. In addition this, however, it is expected that the new company will ct a factory near Montreal with a view to taking care of the ds of Canada.

Engineers' reports on the properties at Calumet are to effect that the company has under its control 100,000 tons magnesite rock, which is sufficient to last thirty-three rs. The valuation placed on the property of the company as follows:—

Mines and plant near Calumet	$368,721
Manufacturing plant and site at Newark....	231,530
	$600.251

Against this the company is issuing the following securi- :—

Bonds, $6	$325,000
Preferred 6 per cent. stock	200,000
Common stock	600,000

Estimated profits are $140,000 per annum. Bond interest ounts to $19,500 per annum, and preferred stock dividends $12,000, making a total of $31,500. This, deducted from imated profits, leaves a balance of $108,500, or equal to r 18 per cent. on the common stock.

The offering is of $200,000 of the bonds at 95 per cent. of , carrying a bonus of 40 per cent. of common stock, and eing made by the National Bond Company.

PROVISION FOR DEPRECIATION

Determining Amount to be Set Aside—Four Methods Discussed

The real work in connection with providing for depreciation consists of estimating the probable life of the property involved, of determining the amount that should be set aside annually to cover such depreciation, and of deciding upon proper methods of recording the same upon the books of the company.

The most complicated and difficult part of this work is, perhaps, that of estimating the probable life of the different classes of property which make up a utility plant, remarked Mr. H. Erickson, member of the railroad commission of Wisconsin. There are many reasons for this. This life varies with the kind or class of property or equipment and with many other conditions. In the case of waterworks some parts of a plant have a life of only five years or less, while other parts again have lives of ten, fifteen, twenty-five, fifty, and even a hundred years. These parts must be classified on the basis of age and dealt with in such age groups.

Four Methods in Use.

Four methods of providing for depreciation and of equalizing it as between the various years in the period covered are often suggested. These methods are: The "straight line," the "sinking fund," the "diminishing value," and the "annuity methods." The first two in order of these methods seem to be the ones that are most generally employed in this country. The last two, or the diminishing value and the annuity methods are mostly suggested by English writers upon this subject.

Under the straight line method, the amount that should be set aside annually to cover depreciation is obtained by dividing the balance between the cost new of the property and its scrap value by its estimated life. The straight line method is much more simple and direct than any of the other methods. It is advocated by the inter-state commerce commission, and for certain purposes also by the Wisconsin and other state commissions.

Assumptions and Determinations.

Under the sinking fund method it is assumed that the amounts set aside for depreciation are invested or used at compound interest, and that the interest so obtained also goes into the depreciation reserve. Since in this case the interest on the sum thus set aside, as well as these sums themselves, becomes a part of the fund, it necessarily follows that the matter need not be as large as would be the case if no interest was allowed thereon.

Under the diminishing value method, a certain percentage is determined which is first applied to the total cost-value for the first year. The depreciation allowance thus obtained is then deducted from the original cost-value of the property. The same percentage is then applied to this reduced value the second year, and to the diminishing values for each year thereafter until the end of the estimated life of the plant, when the balance remaining should agree with the scrap value of the property. In this way the base to which depreciation is applied during this period is continually diminishing and the annual depreciation allowance is constantly decreasing. Under this method the rate for depreciation is high.

In favor of the diminishing value method it may be said that under it the charges are highest during the earlier years, when the cost of repairs are the lowest, and that these charges decrease as the cost of repairs increases. Another argument frequently offered in support of this method is that during the earlier years the new equipment is competing with old equipment, while in the latter years it is competing with more efficient machines of a better type; for these and other reasons the plant is better able to bear a heavy depreciation charge in the earlier years than later on.

High Enough to Write Off Value.

The annuity method is based on the assumption that the depreciation charges should be high enough to write off the value of the property during its life, as well as to cover the interest charges from year to year on the gradually diminishing value of this property. It is also based on the further assumption that interest is allowed on the balances in the depreciation reserve in much the same way as under the sinking fund method. As the annual charge to operating expenses is constant or remains the same throughout the period, and as the proportion of this charge that is required to cover the interest is gradually decreasing, it necessarily follows that the depreciation charges are increasing. These increases in the depreciation charges represent the interest that is allowed on the balances in the depreciation reserve. That part of the annual charges to operating expenses which is represented by interest on the value of the property is also credited to the interest account.

PACIFIC COAST HARBORS AND DOCKS

Work Has Commenced — Elevator Proposals — Pulp Industry

(Staff Correspondence.)

Vancouver, May 5th.

Different opinions regarding conditions in the money market are voiced in two instances in Vancouver this week. Mr. Harvey Haddon has arrived here from London and states that there is no prospect of immediate improvement in the money situation of the world. He takes quite a pessimistic view. On the other hand, Colonel A. D. McRae, who is prominent in connection with the Mackenzie-Mann interests and enterprises on the Pacific coast, direct from an extended trip to London, declares that the stringency is over, and, while money is not yet cheap, he looks for a decided betterment of conditions. He points out that the real estate movement, which was so general across the whole of the continent, is now passing, and that more money will be available for industrial and commercial purposes. Colonel McRae spent some time on the prairie on his way back and reports that no houses are to rent in any of the towns there, and that labor is scarce.

A winter sojourner returning from Southern California reports that financial stagnation has resulted from the damage wrought to the fruit crop there by the frosts of a few weeks ago. He declares the havoc to the oranges was greater than at first thought, and that growers will be very hard hit. The orange crop brought a lot of money into circulation, and this year everything is quiet.

Powell River Company's Plans.

A short time ago a notice appeared in the local papers calling for accounts against the Powell River Paper Company, it being published that the company was going into voluntary liquidation. The company does not intend to close up its plant, but on the contrary is changing its name and greatly increasing its investment at Powell River, where it has a pulp and paper mill. The money spent there runs already into the several millions, and it is proposed to put in another million dollars. The plant turns out 150 tons of paper daily, and contracts are in hand for the output for at least a year. An extensive and wide sales campaign is to be conducted, the company planning, among other things, to go after trade in the Orient. This is, perhaps, the biggest industrial enterprise on the coast, and it is gratifying to note that it bids fair to be successful. There are great areas in the province available for pulp purposes, and if the Powell River Company, as it is now known, makes progress, it may be an incentive to others in the future to embark along this line. The time will come when the wooded areas on Vancouver Island, especially in the northern end, will be the scene of such industries.

A few weeks ago it was mentioned in these columns of the plan of the Western Fuel Company at Regina to open a new mine. At a depth of 1.046 feet a ten-foot seam of coal has been struck the quality of which is said to be of the kind which ranked the best on the Pacific coast. There is an immense amount of it on the property. By the end of this year the company expects to be shipping 500 tons per day, and inside another year the output will be 1,500 tons per day. The operation of a mine of this capacity, in addition to other industries at Nanaimo, will create greater activity in central Vancouver Island.

Harbor Commission and Works.

Plans for harbor improvements progress steadily. This year Victoria will have its large docks well under way. These are to be built by Sir John Jackson & Company, and something will be accomplished also in connection with the dredging of False Creek in Vancouver. To give better facilities for shipping, it is announced that the government will establish a drydock at Esquimalt, this being stated as part of the naval scheme on the Pacific. Mayor Baxter, of Vancouver, who was in Vancouver in connection with harbor and other matters, returned on the 1st instant, and reports that it is very probable that a drydock will be built at Vancouver along the lines of some of the schemes proposed heretofore.

News of the government grain elevator is also brought back by the mayor. He does not say however, that this will be erected right in Vancouver, but it will be close enough for the [illegible] from the business. Along the waterfront of Vancouver there is hardly room for a large grain elevator, since it is a very busy place. Moreover, if an elevator is erected some distance out it will help to give strength to the outlying [illegible] of Greater Vancouver.

With the passage at Ottawa of the bill to incorporate the harbor commissioners of Vancouver, no time should be lost in completing the personnel of this board, so that this legislation may be effectively implemented. It will be found that there will be many matters for a board of this kind to adjust and adjudicate upon, and if trade grows as it has in the past and as is anticipated, the harbor commissioners will be [illegible] down to steady business.

IN THE INSURANCE ARENA

Ottawa to be Rendezvous of Life Underwriters i August—Fire Business in New York State

Canadian Life Underwriters are busy discussing wa and means and making preparations for the Ottawa conve tion in August.

At a banquet given by Mr. William McBride to t Winnipeg Life Underwriters' Association, Dr. J. L. Gord gave an address on "Twelve things I would do if I were insurance agent." Prior to Dr. Gordon's address, M McBride was presented with a purse of gold, which was w by him in the recent membership contest. Mr. McBri secured 103 new members.

The Brantford Life Underwriters' Association were a dressed at their recent dinner by Mr. N. A. Mitchell, ge eral manager of the Federal Life Insurance Company, a Mr. J. A. Tory, of the Sun Life. Among those present w Messrs. Hendry, Burbank, Hammond, Thorburn, Per Reid, Creasser, Secord, Thurlow, Ritchie, Weldon, Suthe land of Delhi, Bunnell, Burtch, Wood, Watson, McGraw Burbank and Hall.

Regina to Place Insurance.

Regina city council has decided to place the city's fire surance with all the approved companies doing busine through agents in the city. A blanket policy, totalli $538,000, is to be prepared and each accredited company w take its share of the risk.

The responsibility for the placing of the insurance w be placed on the shoulders of Finance Commissioner Rei His directions are: First, to satisfy himself as to the s vency of the companies, and, having done so, to divide t city's insurance that the accredited companies will sha alike in it. It is expected that about five of the compani appearing on the list will be dropped.

In the matter of employer's liability, a motion w made by the Regina council by which tenders for the bus ness may be called for.

Mr. E. A. Fisher, Saskatchewan's provincial superi tendent of insurance, has supervision and general regul tion of the business of insurance in all its classes or branch as transacted by both "joint stock" and "mutual" co panies within the province of Saskatchewan.

The supervision of insurance as conducted by the va ous fraternal societies has also been entrusted to this bran

Realizing the importance of the question of hail insu ance, affecting, as it does, the chief industry of this p vince, the government is closely supervising the operati of the various companies underwriting this class of insu ance. Mr. Fisher is willing to assist any enquirers in t province relative to insurance matters.

New York State Report.

A summary of the business of fire, fire-marine and ma ine insurance companies operating in New York State du ing 1912, contained in Part I. of the annual report of t state insurance department issued by Superintendent E met, shows that at the close of the year the 234 fire, fir marine and marine insurance companies doing business New York were possessed of $679,659,784 of admitted sets, not including assets held abroad nor the premium no of mutual companies, an increase of $51,517,662 as compa ed with the financial returns of the companies for 1911. T liabilities other than capital were $[illegible],141, an [illegible] of $26,634,468 over those of the preceding year. The tot income was $381,724,687, and disbursements $[illegible] an increase as compared with 1911 of $27,477,920 in inco and $23,944,413 in disbursements. The premiums writt increased $[illegible]. The losses paid show an [illegible] over the previous year of about $[illegible], the unpa losses being somewhat in excess of those outstanding December 31, 1911. The total insurance in force at the of 1912 was slightly more than $52,[illegible],000, an [illegible] over the previous year of about $1,[illegible]. The [illegible] writing gain, as shown by the underwriting and investment exhibits [illegible] was about $1[illegible], while the [illegible] in surplus from all sources was $12,378,225, a decrease fr 1911 of nearly $[illegible]. Twenty-one more compa [illegible] ported in 1912 than in 1911.

The fire companies wrote in the State of New York du ing 1912 $5,8[illegible]5,715,118 of insurance, an increase of mo than $[illegible]1,500,000 over the amount written in 1911. The e cess of fire premiums received over fire losses incurred a estimated expenses of New York State business for the ye was $5,561,000. The fire premiums received increased $2, 600,000, while the incurred losses decreased about $1,000 000. The marine and inland risks written in this State du ing 1912 by fire and fire-marine companies show an increa of nearly $629,000,000

BANK ACT ENQUIRY RESUMED

rest Rates—Discounts Discussed—Merger was in Interests of Banking and Also of the Public

What interest rate the banks shall be allowed to charge oans or discounts was the first consideration when the king Committee resumed its enquiry on Tuesday into Bank Act.

Mr. E. W. Nesbitt favored leaving the rate to be deterd by competition, while Mr. W. B. Northrup said it was oper to limit the banks to 7 per cent. when 8 per cent. easily secured on mortgages.

The committee adopted an amendment by Mr. Emmerthat the banks must make a return to the department of ighest rate of interest received each month. It rejected oposal to make any excess charges over 7 per cent. rerable at law.

Hon. W. T. White stated that, in the West particularly, itation would recoil on the borrowers. He was agree for any one of three courses—to allow the clause to d, to strike it out, or to make the maximum rate to be by the Minister. If he thought the rate charged exonate, the remedy would be in his hands.

Sir Edmund Osler protested that limitation of interest would injure the borrowers. "It will mean," he said, t a third of the new branches will have to be shut up." system could be devised to give the information called y the monthly return showing the maximum rates ged.

Mr. White then submitted this amendment: "The bank stipulate for, take, reserve or exact such rate of interest iscount as may be agreed, and may take in advance any rate, but no higher rate of interest than seven per cent. annum shall be recoverable by the bank."

entration of Capital.

When the chairman reminded Mr. Duncan Ross that he given notice of an amendment respecting the guarantee eposits, the Middlesex member remarked "It would be se to press such amendment now."

After considerable discussion as to the charges for dist, an amendment by Mr. F. B. McCurdy carried on a ion. It fixed the charges at one-eighth of one per cent., provided for a minimum of fifteen cents. For collections een banks the rate of one-half of one per cent. was ged to one-quarter and the minimum charge was fixed cents.

Mergers were discussed, and Major Sharpe spoke against concentration of capital by amalgamations. He referred e evidence of Mr. Pease, that after the Traders Bank tors had sold out to the Royal, they were pensioned or ided for. He insisted upon an act of parliament being ssary to mergers, and moved to strike out the clause.

Hard and Fast Rule.

Hon. Mr. White: "You cannot lay down any hard and rule. Very large banks should not be allowed to amalate. I have no hesitation in saying that the Royallers merger was in the interests of banking, and also of public. I think the new provision that the consent of minister shall be a condition precedent to agreements erge is sufficient."

Major Sharpe's amendment was voted down.

Following considerable discussion, the committee reject- Ir. Sharpe's proposal to make the government instead of banks the custodian of unclaimed bank deposits.

On Wednesday, when the committee continued its eny, Mr. Emmerson expressed the opinion that the amendts respecting interest were distinctly favorable to the ks, and Mr. Carvell wished the clause with the seven per limitation to stand as it was. Mr. White agreed with view that if interest rates were arbitrarily fixed, it would ar against the development of banking facilities in the parts of the country.

Mr. McCraney stated that in the west there is a prevailview that the Bank Act operates against the borrower in r of the lender. Whatever limitation was put on, should ived up to.

Mr. Sexsmith wanted to know why the banks could charge t they like while usurers were limited. "You are allowthe banks to take the place of usurers, that's all," he said.

"You are taking the lid off usury," opined Mr. Emmer-

"Banks," said Colonel McLean, "are not benevolent intions. If you restrict the banks to a low rate of interest estern Canada, it will be very bad for them."

White's Amendment Adopted.

Finally the amendment of Mr. White, which is given e, was adopted.

Major Sharp afterwards presented an amendment that notes with banks should stipulate on their face the rate of interest.

Mr. Nesbitt: "You might as well legislate to determine the price of peas."

Mr. Nickle supported the amendment, stating that people were entitled to know the exact rate of interest they were paying.

"You are making a crazy quilt of the act," asserted Claude MacDonell. "One class of notes are illegal and another legal."

"If you ask my views," said Mr. White, "I am of the opinion that we should not change the act." The amendment was defeated. Mr. Emmerson's proposed monthly statement of maximum rates charged was defeated.

Mr. MacDonell wanted the clause respecting collection charges, reconsidered. The committee declined.

Mr. McCurdy's amendment which makes it an offence for directors, officers or clerks of banks to accept gifts from those seeking or obtaining banking accommodation was approved.

Then Major Sharpe moved an amendment against restraint of competition and providing imprisonment or fines where banks agree upon rates or to limit branch competition. It was rejected.

Mr. Carvell complained that in the Maritime Provinces bank managers act as insurance agents and compel those dealing with the banks to place their insurance with them. He proposed an amendment prohibiting this business.

"I agree with that," said Mr. White, "if the branch managers are not paid enough—and I consider that in the outside field they are greatly underpaid—their salaries should be raised."

Colonel Currie, who objected to depriving branch managers of any privilege they now enjoy. The Carvel amendment was carried.

◆

MR. SOMERVILLE MADE A DIRECTOR

At a recent meeting of the board of directors of the Manufacturers' Life Insurance Company, Mr. Geo. A. Somerville was elected to the directorate to fill the vacancy on the board caused by the resignation of Mr. W. B. Strachan, of Montreal. Mr. Somerville, who has been general manager of the company since 1907, now becomes a policyholders' director in Mr. Strachan's stead.

PROGRESS IS SHOWN AT MOOSE JAW

"Excellent" was the optimistic remark regarding Moose Jaw conditions, expressed in an interview at Toronto, with The Monetary Times, by Mr. Richard Loney, of the well-known Moose Jaw firm of R. Loney and Company, during his visit to Eastern Canada. "While the monetary stringency has been felt, money has not been actually tight," said he, "and building prospects are good." Questioned as to the flax mill which is to be built at Moose Jaw, Mr. Loney stated:—

"The Metzger Seed and Oil Company, of Toledo, had rerently completed an agreement with him whereby they are to build at Britannia Park, Moose Jaw, a flax mill capable of grinding 8,000 bushels of flax per day.

"The mill will be a twenty-four press mill when completed according to the plans which have been prepared although my agreement and the agreement with the city calls for only a six press mill. The company expect to begin excavating and levelling the ground during May, and they expect to have the plant in operation to handle the flax crop of this year which will mean by September 1st or thereabouts. The agreement calls for the completion and operation of the mill by the 1st of April, 1914, but every effort will be made to have the plant operating this fall."

"When asked as to what the size of the plant will be Mr. Loney stated that a site of twenty-five acres had been given to the company and their buildings would occupy about five acres.

"Commercial interests, both wholesale and retail, are fairly busy, and the Moose Jaw board of trade is increasing in its activities and numbers nearly eight hundred members, who are watching for industries desiring a location. Moose Jaw Street Railway is making further extensions this year.

"The prospects thus early are for a satisfactory crop.

"Moose Jaw real estate is in demand, especially good inside city properties, was Mr. Loney's reply to a question regarding the real estate situation in his city."

The British Crown Assurance Corporation has been licensed to do business in British Columbia. The head office for the province is at 107 Bank of Ottawa Building, Vancouver.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensio Dividends and Future Plans

Twin City Rapid Transit Company.—For the last nine days of April the earnings of the Twin City Rapid Transit Company were $204,511, an increase over the corresponding period last year of $17,093, or 9.12 per cent.

Nova Scotia Steel and Coal Company.—The April outputs of the Nova Scotia Steel and Coal Company are the best since the beginning of the year. Ore mined, 55,000 tons; coal mined, 68,300 tons; pig iron made, 7,580 tons; steel made, 7,300 tons.

Cape Breton Electric Company.—While the complete annual report is not available, it is known that Cape Breton Electric Company, Limited, has passed through its best year. Announcement has been made that the directors had decided to increase the dividend rate from 5 to 6 per cent., the new rate going into effect for the present quarterly declaration.

Lucky Jim Zinc Mines, Limited.—Directors of the Lucky Jim Zinc Mines, Limited, elected at the annual meeting of stockholders at Kaslo, B.C., were: Hon. Hugh Armstrong, Hon. G. R. Coldwell, Messrs. W. B. Lanigan, and John R. Batterell, of Winnipeg; G. Weaver Loper, of Spokane; T. G. Proctor, of Victoria; and T. H. Montgomery, of St. Paul, Minn.

Mexican Northern Power Company.—Messrs G. F. Greenwood, one time president, and E. B. Greenshields, formerly vice-president of the Mexican Northern Power Company, have retired from the directorate of the company, and their places have been filled by the appointment of Mr. Lawrence MacFarlane, representing the Montreal interests, and Mr. W. W. Freeman, New York, the American interests.

Robert Simpson Company.—The net earnings of the Robert Simpson Company for the year just ended, before deducting interest on bonds and loans and the amount written off for depreciation and for special expenditures, amounted to $777,472.20. After payment of interest charges on bonds, and on dividends on common and preferred shares, there was carried forward to profit and loss account a surplus of $219,223.84.

Rudd Paper Box Company.—Mr. O. A. Poritt, formerly general manager of Price Brothers, Limited, has severed his connection with the latter firm, and is going to Toronto, where he will join the Rudd Paper Box Company. In connection with the Rudd Paper Company, he will build a new box-board mill in Toronto, at a cost of $350,000. The new plant will be operated with one machine of six cylinders. Work will commence on the new plant at once.

Havana Electric Railway, Light and Power Company.—The Havana Electric Railway, Light and Power Company has issued its first report for the nine months ended December 31, 1912. It is as follows:—Gross earnings, $1,653,145; operating expenses, $540,471; net earnings, $1,112,674; interest and taxes, $517,672; balance, $595,002; income from securities owned, $487,247; balance for dividends, $1,082,249; preferred dividend, $450,000; balance for common, $632,249; common dividend, $337,500; surplus, $294,749.

Duluth Superior Traction Company.—The comparative weekly statement of gross passenger earnings of the Duluth-Superior Traction Company is as follows:—

	1913	1912.	Increase
First week	$23,385.03	$21,742.55	$1,642.48
Second week	23,116.39	20,833.50	2,282.89
Third week	22,788.45	20,730.10	2,058.35
Remainder of month	29,383.80	26,997.45	2,386.35
Month to date	99,573.67	90,303.60	9,270.07
Year to date	373,262.42	348,181.70	25,080.72

Labrador Pulp and Paper Company.—The Labrador Pulp and Paper Company, according to Mr. H. R Reid, the vice president, has now two large sawmills at work at Hamilton Inlet and have started on the construction of a large pulp mill at the inlet that will have a yearly capacity of 90,000 tons. They intend also to put up another mill with an annual capacity of 50,000 tons at Sandwich Bay, but wish to have a partial outlet from the larger mill before they commence the building of the smaller. The output of both mills is already contracted for, the British Wall Paper Company having agreed to take the largest portion.

Illinois Traction Company.—The comparative statem of earnings and expenses of operating companies of the linois Traction Company for March, 1913, is as follows

Gross earnings:	1913.	1912.
Interurban lines	$229,654.35	$224,463
Electric lighting	153,111.68	130,574
Steam heating	29,006.54	27,236
City lines	174,630.47	161,709
Gas	35,243.12	31,660
Miscellaneous	2,423.52	14,632
Total city properties	$394,415.33	$365,813
Total gross earnings	$624,069.68	$590,277
Per cent. of increase over previous year	5.72	7
Expenses operating companies	$348,148.24	$333,803
General expense:		
Illinois Traction Company	5,755.66	4,375
Taxes	22,948.40	18,796
Total expenses and taxes	376,852.30	356,975
Net over expenses and taxes	$247,217.38	233,301
Per cent. of increase over previous year	5.96	18

For three months ending March 31, 1913:—

Gross earnings:	1913.	1912.
Interurban lines	$ 669,464.04	$ 659,472
Electric lighting	492,751.98	428,093
Steam heating	96,107.21	91,413
City lines	504,611.64	476,710
Gas	111,673.31	102,339
Miscellaneous	5,852.66	32,332
Total city properties	$1,210,996.80	$1,130,889
Total gross earnings	$1,880,460.84	$1,790,361
Per cent. of increase over previous year	5.03	8
Expenses operating companies	$1,026,117.82	$1,003,583
General expense:—		
Illinois Traction Company	18,111.38	14,911
Taxes	69,893.07	54,591
Total expenses and taxes	$1,114,122.27	$1,073,08
Net over expenses and taxes	$ 766,338.57	$ 717,275
Per cent. of increase over previous year	6.84	12

◆

TOTAL NUMBER OF FOXES IN CANADA

The following is an estimate of the number in captivi according to the Commission of Conservation report, in e province in October, 1912:—

	Silver.	Cross.	Bastard and red.	No ranch
Prince Edward Island	650	150	1,000	20
Nova Scotia	32	30	150	1
New Brunswick	30	10	50	
Quebec	40	10	50	
Ontario	30	40	150	14
Other provinces and territories	18	10	50	..
Total	800	250	1,450	241

The silver fox industry is centred about the followi points: Alberton, Summerside, Charlottetown and Montag in Prince Edward Island; Port Elgin in New Brunswic Piastre Bay on the north shore of the Gulf of St. Lawren Quebec city in Quebec, and Wyoming in Ontario. T number of silver foxes within driving distance of each po is approximately as follows: Alberton, 300; Summersi 200; Charlottetown, 100; Montague, 25; Port Elgin, N 25; Quebec city, 20; Piastre Bay, 20; Wyoming, Ont., 1 Carcross, Yukon, 18.

BOARD OF INSPECTORS

be Appointed by General Manager of Chartered Banks —Bank Bill Will Now be Reported to the House

Mr. F. B. McCurdy's amendment that no paid executive ial of a bank shall be elected a director, was discussed Chursday, when the Bank Act consideration was resumed he Banking and Commerce Committee. In theory, Mr. urdy said the general manager of a bank was supreme, ect only to the directors. Under the old act, a man it be president as well as general manager. How could ard of directors discipline a general manager if he were of themselves? Mr. McCurdy said he was willing to e an exception of present cases.

Hon. Mr. Kemp held the motion to be radical. The s more than ever now required men of experience, and proposal would inflict an indignity upon many of the bank directors. The result would be their retirement.

Mr. McCraney, in opposing the amendment, thought ific instances should be given of any abuse of present ers by officers who are directors, and Hon. Mr. Barker cted to dictating to shareholders as to whom they should . Colonel Clark thought it an advantage for the general ager to be on the directorate.

Mr. McCurdy urged the adoption of the amendment only matter of principle. He recalled a case where a man- of a bank became involved with customers, with the re- that he was retired.

The committee rejected the amendment.

d of Inspectors.

A proposed amendment by Hon. Mr. White that a bank open and maintain in each province in which it has lent shareholders a share registry office, was opposed by Edmund Osler and Mr. Wallace Nesbitt, K.C., one ing that it would be an inconvenience, and possibly to fraud, and the other holding that litigation over suc- on duties based on such holdings would result. How- the amendment was carried.

There was some discussion as to the wording of the ndment recently adopted as to the registration of privi- d liens by the banks. It will go to the House for deter- tion.

This brought the committee down to the vital clause of t and inspection. Major Sharpe withdrew his amend- t providing for government inspection. "I am still in r of external inspection," he said, "but I withdraw it in of the attitude of the government and the committee."

Hon. Mr. White stated that it had been shown that the rican system of government inspection was not a suc- but the clearing house inspection was effectual.

"I am of opinion," he said, "that a proper inspection best be carried on by the Bankers' Association.

"This was approved some years ago by the association, there was dissent, some of the banks declining to as- e the responsibility involved. Moreover, it was urged the larger banks might injure the smaller ones through process of these inquiries. I have given a great deal of tion to the question of audit and the qualification of tors.

"I had come to the conclusion that it is best to leave the tion to the shareholders, but in view of the evidence we heard, I have a suggestion to make. It was proposed Ir. McLeod that a board of inspectors should be appoint- y the general managers of the banks. I have adopted idea.

lifications of Auditors.

"If the government undertake any work it must do it oughly. We are not in a position to do it as thoroughly he banks do now. The question comes down largely to qualifications of auditors. I propose for the considera- of the committee, that the members of the Bankers' As- tion shall select by ballot persons competent to act as tors."

These selections would be limited to forty. The list of ons so selected shall be submitted to the minister for approval within ten days after the 30th of September this and within sixty days in subsequent years. If one-third he shareholders are dissatisfied with the selection made ny auditor, they shall have the right to appeal to the ster for the appointment of another. The minister is to the right to name any outside auditors he pleases for ial reports on any bank or banks.

The committee accepted the amendment subject to the t of discussion in the House. The bill was then reported ly and goes to the House as amended during the six s hearing in committee.

FUR-FARMING IN THE DOMINION

Sales of Breeding Stock—Highly Speculative Trading at Present

The amount of capital required to finance a ranch containing even three or four pairs of foxes involves the organization of companies or extensive partnerships among people whose experience and location are suitable for fox ranching. In the autumn of 1912, at least $50,000 was required to build, equip, and stock a ranch in Prince Edward Island with five pairs of first-class stock. Many ranches have been equipped for less money, but either cheaper wild or unselected stock from Newfoundland or elsewhere was purchased, or options had been taken at an earlier date on pups for delivery at that time.

Time of Delivery.

Because of the keen demand for breeding stock, it has been customary to sell options for future delivery. Usually the options are taken on the unborn pups, and 10 per cent. of the price agreed upon is paid when the options are taken. Time of delivery is made the essence of the contract, and, if the rancher has not as many pups as he has sold options for, the orders are filled consecutively; i.e., the earliest orders are filled first. In case delivery cannot be made, the agreement provides that the deposit must be returned with 6 per cent. interest per annum. In 1912, options were sold on more pups than could be delivered because of the unusually small number of pups. At the present time (December, 1912), many options on 1913 stock at an average price of about $10,000 per pair have been sold. As large ranchers carefully number the options, the holder of the first option has the best chance of securing the choice of pups when the deliveries are made.

All over North America, wherever the common red fox is found, agreements are being constantly made with lumbermen, miners, missionaries, fur traders, trappers, government officials and others for future delivery of wild animals captured in their respective districts. The supply of fur, however, will not be appreciably diminished by the capture of wild fur-bearers alive.

Were All Sold to Breeders.

In 1911 and 1912 all available foxes were sold for breeders. The first general sales were made in 1910 at prices not far above the fur-value, viz., about $3,000 to $4,000 a pair. In 1911 the price rose to $5,000 a pair, and, about littering time in 1912. one pair was sold for $20,000. This, however, was for a pair of excellent proved breeders, which, a few weeks later, produced five whelps which were sold for $20,000 in August, 1912. By September 1st, when the deliveries of stock began, the price was $8,000 a pair for pups and a month later, $11,000. By December, 1912, $12,000 and $13,000 was the ruling price, with few sales. Old proved breeders of good quality were valued during the last months of 1912 at from $18,000 to $35,000 a pair.

Highly Speculative Trading.

It can thus be readily understood how highly speculative fox trading is at the present time, states Mr. J. Walter Jones in the report on Fur-farming issued by the Commission of Conservation. The tendency towards inflation is encouraged and fostered by many of the older breeders. Their optimism is accounted for by the fact that they have become wealthy in the last three years, whereas six or eight years ago, some of them possessed only mortgaged farms and a few foxes. All but three or four have made their fortunes by selling breeding stock, and, with the exception of, possibly, $200,000, obtained for pelts, all of the million or more dollars received by ranchers has been made in this way.

The present system of buying for future delivery is another indication of the optimism of investors. In December, 1912, many of the unborn pups of 1913 were purchased and partly paid for, delivery to be made in the first week of September, 1913. The difference between purchasing futures in foxes and gambling in futures in May wheat or October cotton is more apparent than real.

◆

The present is an opportune time for investment, suggest Messrs. A. E. Ames & Company, Toronto, in a recently issued circular, as, owing to the market conditions, securities generally are available on favorable basis.

Sir William Mackenzie, interviewed in Montreal on his return from England, said that he would not consider selling the Toronto Railway apart from the Electric Light Company. The price for the former would be $160 and the latter $125, plus the extra amount expended by the companies on the properties. "It is now up to the city of Toronto," he said. He stated that despite the tightness of the money markets he had secured ample funds for some time to come for all the Canadian projects under way.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

IV.

Bonds

BY M. P. LANGSTAFF, A.I.A., F.A.S.

Having dealt with investment of a company's funds in real estate mortgage loans in the previous article, I will now consider the advisability of investing in bonds.

Bonds have a very tangible and substantial appearance on a company's statement, and yield a fair rate of interest;

They possess in many cases a prospect of appreciation;

They are usually readily convertible, i.e., by selling on the market, or assigning as collateral. This point has to be especially considered by those companies whose policyholders make very free use of the loan privilege;

They can be used in most cases (and are required as well) for government deposits;

They run for a long term of years, thus doing away with too frequent re-investment of funds, with the greater risk thereby entailed of a poor investment slipping in accidentally.

They bear a fixed rate of interest—an advantage in times of falling interest rates, and the reverse when interest rates are rising;

They entail very little labor, with no difficulty in collection of interest or principal.

On the best bonds, the interest rates are too low for very large holdings;

In case of default, the bondholder has to co-operate with other bondholders to obtain his rights. On the other hand, the insurance company is probably one of the largest holders, and moreover with the modern devices of re-organization committees, the insurance company might be occasioned less direct trouble than in the case of a mortgage foreclosure.

Their value, as represented by market quotations—which quotations indicate the average verdict arrived at by a great multitude of investors—must, as a rule, represent very closely their intrinsic worth.

While not as stable in value as are mortgages, they are more so than are stocks. A decline in value, which may or may not be only temporary, and undeserved, will nevertheless cause difficulty in arriving at their true value in a company's statements;

By carefully considering market conditions before making a purchase or sale of bonds, a life insurance company can sometimes make large profits due to market fluctuations. But this might be looked upon as a disadvantage in the sense that a company might be led into speculation—a danger above all others to be avoided by a life insurance company.

An investment in bonds may be made with great facility and expedition, and in this respect they are to be preferred to mortgages, since the money ready for investment is left idle for the shortest possible time.

As Between Different Classes of Bonds.

Bonds having only a short time to run before a fixed maturity date, will naturally not fluctuate greatly in value, and on this account, have an advantage over long-term bonds. Again, they may sell on a somewhat more favorable basis, owing to less demand for them, since the ordinary investor in bonds is looking for a more prolonged investment. As a rule, however, insurance companies prefer long-term bonds. Mr. T. B. Macaulay, referring to "length of time," says, "If the assumption be granted that the existing period of prosperity is not to last always, it seems to me that it is hard to escape from the conclusion that it is good policy to pass by all short-term securities unless they yield unusually attractive rates of interest, and to select those which run for long periods—25, 40, or 50 years—or, better still, perpetuities such as the guaranteed or preferred stocks of established and prosperous corporations. In this way it is possible to ensure that the high rates of interest now prevailing will continue far in the future on the investments now being made." From this we can deduce the axiom, "Other things being equal, buy short time securities when prices are high and the net return consequently small, and buy long time securities when prices are low and the net return high."

A point to bear in mind is that the best known securities, and those most readily convertible, will, for those very reasons, fluctuate more in financial crises than those securities of perhaps equal value, but which are not dealt in, to such an extent, on the Exchanges. Securities of the smaller cities or towns, e.g., have shown less depreciation than has been the case with other bonds.

If now we take the large security holdings of any company and rank them from the standpoint of safety, they would probably range as follows: Government, municipal, railroad, public utility (other than railroad), and industrial.

In buying government securities, a company sacrific a good interest rate for unexcelled security. Too much co petition on the part of banks, trustees, etc., has reduced t yield on government securities to a figure so low that v large holdings on the part of life insurance companies a prohibitive, and their main use is for government deposi Besides their absolute safety, however, government secu ties are not without their advantages. They lend presti to a company's statement, are readily convertible in case need, are very stable in value (very seldom being subject wide variations), and supply a permanent investment for company's funds. Moreover, United States governme bonds are non-taxable in all parts of the United Stat either by government or municipality.

Security Is Good.

The security behind municipal bonds has increas enormously in recent years, and the best municipal bon are really gilt-edged, and consequently they usually sell a higher premium than do bonds of railroads and corp tions. A great deal of the credit for the improved posit of municipal bonds is due to the bond-dealers, who h been instrumental in improving the laws regulating their suance and in forcing the municipalities to live up to the and who have discouraged excessive debt creating e where legally permissible. Municipal bonds are among most stable of the securities from which the investor m choose. They are sometimes difficult to negotiate in ca due to the fact that there is no open market for them, it is an easy matter to raise money on them from the bank and, moreover, bond-dealers can often find ways of disp ing of them.

Railway bonds of the better class are held in high teem by insurance companies, as evidenced by the lar number purchased. Some of them, indeed, are of o secondary merit to government issues. The bonds being well secured, naturally sell at a high premium, and on t whole do not yield a rate of interest much in excess of t to be obtained on good municipals. They are, howev more easily convertible than any other security, they run a considerable number of years, have a wide market, a their potential appreciation is high. Railroad stocks usually very speculative, yet in some cases the stocks better investments than the bonds.

This would be the case, however, only with those roa that have passed through their experimental days, are n firmly established and that have shown they can earn th dividends in times of depression as well as in prosper periods. When considering the purchase of any of the secu ties of a railway, too much stress cannot be laid on the f that railroads are transporters, not producers of wealth, a that their earnings fluctuate greatly with the business c ditions of the country. During a long period of depressi the safety of many good railroad bonds will be strained the utmost, and the stocks of even the best roads might f helter-skelter on the Exchanges. Another point that shou not be overlooked is that of government interference, whi if carried too far, may make even standard railroad bon less desirable than some other forms of investment.

Wide Field for Selection.

We now come to the consideration of the securities public utility corporations (such as gas, electric light, te phone, and so forth). The rate of interest obtainable public utility securities is a little better than in the case municipals and railroads, due largely to the fact that public is not so familiar with the former. The great maj ity of these securities are not listed on any exchange, a therefore, they have the advantage pertaining to all unlist securities of not fluctuating so widely in value. But v frequently they have a wide market and this is one of factors in keeping down their interest yield.

Numerous public utility securities can be obtained off ing everything required by way of security, but it must remembered that the most careful selection must be ma for there are good, bad, and indifferent public utility secu ties, just as there are all sorts of railroad and indust securities. The question of the franchise, and to what gree the corporation is or may be subject to political municipal interference, must always receive the utmost tention. But the field for selection is wide and must nec sarily increase with the development of the country, and p ticularly with the growth of the cities and towns

For and Against Industrial Securities.

Turning to industrial securities, we find ourselves de ing with a more speculative class of investment. The su cess, or otherwise, of most industrial concerns varies close with that of the community at large, its earnings bei greatly affected by business conditions. Industrial secu ties are, therefore, not very stable in value, but, on the oth hand, many of them present great prospects of appreciatio Views differ widely as to the merits of industrials.

One writer states: "Industrial bonds are rarely purch ed by the most conservative life insurance companies. Th

so dependent upon that personal feature which stands
good management and so affected by industrial depres-
s that, with few exceptions, they are disapproved. The
ket for most industrial bonds is more limited, than for
lic utility bonds of like standing, but they are not, as a
, superior in yield."

Another writer holds opposite views which may perhaps
partly accounted for by the fact that he is a Canadian
is dealing with Canadian securities. He says: "Suf-
nt proof can be adduced to show that carefully selected
ds, especially industrial bonds, are to-day quite as secure
respect to principal and income, as any other form of
stment. The enormous development in Canada during
nt years has resulted in an increasing demand for the
lucts of Canadian industries.

This development has only commenced—it will surely
v for many years to come. In order to meet the demand,
companies are being formed, and existing companies
rganized or expanded. To accomplish this, additional
tal is required, and is usually secured through a bond
e. These bonds are almost invariably secured by mort-
e on real estate and assets, largely in excess of the sum
owed. Many of these re-organized companies are safe-
rded against dangerous competition by the cost of estab-
ng the business itself, and by the impossibility of dupli-
ng the strategic position occupied by the company.

Personally, I see no reason why good investments can-
be obtained in the industrials. Moreover, the competi-
for good industrials is so slight as compared with that
say, good public utility bonds, that it would seem easier
nd investments of the former type which would give a
rior rate of interest, and yet provide the necessary se-
y. Great care, however, is necessary in selection.

ntages of Investing Company.

When searching for an investment, there is one thought
h I think should be always kept uppermost in the minds
e management, viz., **the greater the competition, the**
r the interest rate. Should not a life insurance com-
, with its superior advantages by way of organization,
s, etc., over the private and small investor, and with the
paratively wide latitude allowed it by law, avoid, as
as possible, those investments where competition is
t, and interest rates low, such, e.g., as trustee invest-
ts, which have been defined as "a class of securities,
marked by a paternal government for the investment of
funds which come under the administration of trustees
may possibly be either dishonest, ignorant, lazy or too
to devote the time required for the proper selection of
stments," and should they not search diligently for those
stments which, while not so well known to the public—
f known, not so readily attainable or investigated—yet
equal or at least sufficient security and, what is of im-
se importance, an appreciably higher interest rate?

Take, for example, certain classes of public utility se-
ies. The investment value of many of these is only be-
ing to grow upon the public and they consequently
fine rates of interest at the present time. But, as years
y, they will become better known, and competition for
securities will drive up their price with a consequent
ction in the yield returned on the investment. It would
, therefore, that now would be the time to invest in
rities of that nature, which, while affording adequate
rity, will considerably enhance the interest earnings of
mpany.

TO DEVELOP NORTHERN ONTARIO

That every board of trade in the north country will be-
a member of the United Boards of Trade of New On-
is the opinion of Mr. J. F. Black, president, who stated
he Monetary Times: "Our object is to unite the North
broad strong policy towards the development of her
ulture, mineral, white coal and other resources. There
movement on foot now towards state development of her
r powers.

'We feel we have not received our full share of the im-
ants nor have we done anything to retain in the home
nce the farmers' sons.

'Another of the objects is to gather together all the
ral products of Northern Ontario in a section by them-
s at the great exhibitions."

The Delaware Insurance Company, of Philadelphia, has
d to do business in British Columbia.

HOW THE NEW YORK LIFE INVESTS ITS FUNDS

Special Articles Appearing in The Monetary Times—Purchases in Wall Street—Employment of Capital

Mr M. P. Langstaff, in recent issues of The Monetary Times, has been writing on the subject of "Investment of Life Insurance Company's Funds." An article on "Bonds" appears on the preceding page. Therefore the following article concerning the New York Life Company's investments should be of special interest to readers of The Monetary Times.

"Once in a long time one is still met with the argument that the New York Life Insurance Company invests its money in Wall Street. Wall Street happens to be the trading centre for securities. If a man has fish to sell, he goes to the fish market; if he has cotton to sell, he goes to the cotton market; if he has securities to sell, he goes to the security market.

Methods of Purchase.

Naturally, therefore, as the New York Life is always looking for good investments, it is apt to buy securities from people who may have their offices in or adjacent to Wall Street. Of course, as you know, this money really goes out to San Francisco, New Orleans, Boston, or some other place where public improvements are being made, or a railroad is being improved, newly equipped or built.

"The company's finance committee meets twice a week; at their meetings offerings of bonds are laid on the table; the name of the broker or banking house is not mentioned; simply a statement of the character of the bond, the security behind it, etc., the rate of interest and the price. From these offerings the best propositions are selected by a unanimous vote of all the members present. So fair are these selections that no one can tell in advance from what source we are likely to buy the next lot of bonds; that this has become pretty well known in the financial community, and that the interest earnings are good is shown in the following quotation from an item in the Wall Street Journal.

Sixty Banking Houses.

"The New York Life in 1912 acquired about $24,000,000 of bonds. This business was spread out over three score or more of banking houses—no one concern received more than $1,500,000, and the various purchases pointed down from that figure to ten or twenty bonds. And a more significant fact still is that a considerable portion of this $24,000,000 was invested through bond houses which have no pretensions whatever of association with the 'money trust.' Apparently the humble bond house is here not at a disadvantage because of its size.

"While this big investment institution acquired, roughly, $24,000,000 of bonds last year, the net addition to its holdings of this class of investments was but $8,000,000 inasmuch as $16,000,000 were redeemed, sold or otherwise disposed of.

Three-Fourths in Real Estate Mortgage Loans.

"Of the total amount of capital which the New York Life had seeking employment last year, roughly three-fourths went into real estate mortgage loans and loans to policy-holders; bonds took the other quarter.

"The old truism that money, like water, seeks its own level is strikingly emphasized in the financial operations of this company. While $6,500,000 of bonds of states, countries and municipalities in the United States were acquired, this total included not a dollar's worth of the bonds of any state, city or county in New England, where such bonds sell on a relatively low income basis."

◆

COBALT ORE SHIPMENTS

The following are the Cobalt ore shipments, in pounds, for the week ended April 25th:—Peterson Lake, 63,962; Temiskaming, 83,717; Dominion Reduction, 87,950; Cobalt Townsite, 151,704; La Rose, 320,661; Nipissing, 256,856; McKinley-Darragh, 129,567; Beaver, 72,460; total, 1,166,877 pounds, or 583 tons.

The shipments for the week ended May 2nd were:—Cobalt Lake, 63,600; La Rose, 63,600; Cobalt Comet, 64,100; Nipissing Reduction, 45,000; Hudson Bay, 85,147; Cobalt Townsite, 171,737; Trethewey, 141,670; Coniagas, 147,624; Kerr Lake, 60,512; total, 842,990 pounds, or 421 tons.

The total shipments since January 1st are now 13,341,568 pounds, or 6,670 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; 1912, 21,509 tons.

COMMERCE IN RAW FURS

Quantities of Skins—Centres of Fur Trade—London Market

The raw furs of America are mostly collected by large companies having elaborate systems for gathering the skins from the trappers. The chief operators in Canada are the Hudson's Bay Company and Revillon Frères, and, in Labrador, the Harmony Company. During the past ten years a change has taken place in marketing, and many furs, particularly the more valuable ones, are consigned direct to London or to American fur houses. In the Old World, furs are collected at fairs at the following places:—

Town.	Time of Fair.
Frankfort-on-the-Oder	January.
Irbit, Siberia	February.
Leipzig, Germany	Easter.
Nijni-Novgorod, Russia	August.
Ishim, Siberia	December.

Many of the skins, particularly those of finer quality, are ultimately offered at the London sales, where the majority of the world's fine furs are sold. In recent years, however, Germany and the United States have been purchasing a larger proportion, states Mr. J. Walter Jones, B.S.A., in a report on fur-farming issued by the Commission of Conservation.

Total Sales in London.

The total sales in London are generally utilized in estimating the quantities of furs at the world's disposal. Of the undressed skins not usually sold at London sales, there are the Persian lambs, broadtails and karakules, of which Thorer estimates that 2,900,000 come to Leipzig alone. A United States consular report of 1911 estimated that Russia produces 4,525,000 squirrels, whose raw pelts are valued at $2,000,000. Of squirrel tails, Russia, in 1911, produced twenty-one tons, valued at $5.50 per pound. Owing to the growing popularity of muskrat or "Hudson Bay seal," the use of this skin has increased enormously, and the sales now amount to over 9,000,000 annually, London selling 6,000,000, Leipzig 1,000,000, and America retaining 2,000,000. Two hundred thousand ermine pelts, valued at $350,000, are sold annually in Russia. About 83,000,000 rabbit skins are imported into Great Britain annually, while immense quantities of skins are used in the felting industry in Australia.

Leipzig Most Important Centre.

Leipzig, Germany, is the most important city for the dressing and manufacture of furs. Its raw supplies are drawn from all parts of the world, but particularly from London and Moscow storehouses and the Nijni-Novgorod Fair. Moscow is the largest storehouse for Russian and Asiatic furs, while New York, St. Louis and Montreal are important American centres which are rapidly increasing their facilities for fur-dressing and fur-dyeing. London is the largest selling centre, and is still of great importance in the dressing, dyeing and manufacturing of furs.

Many skins are manufactured and used in the country of their origin, but the bulk of the world's fine furs are sold at auction in London. These sales are held in June, October, January and March, but most skins are sold at the winter sales, particularly the March sale, which attracts numerous buyers from all parts of the world. A large proportion of the pelts are purchased by brokers on a commission basis. The Hudson's Bay Company's auction sales are held first, and, as no reserve bids are placed on the skins offered, the results are taken to represent the state of the market. Messrs. C. M. Lampson and Company, Messrs. A. and W. Nesbitt, Frederick Huth and Company and Henry Kiver and Company are the chief firms selling American furs.

◆

MUNICIPAL FINANCING

Despite the unsatisfactory conditions in the money market, The Monetary Times bond record shows Canadian municipalities managed to secure $3,693,857 in April with which to carry on developments.

This is over three times the amount borrowed in the preceding month and makes a total of upwards of $7,000,000 so far this year.

"While it is interesting to know that developments are not being too seriously interfered with in that particular direction, it should not be forgotten that topnotch interest rates will have to be paid on these loans," suggests The Montreal Star.

"In years to come a good many will wonder why there was such a hurry to borrow under the circumstances."

No satisfactory offers have been received for the $80,000 5 per cent. 20 year street debentures of North Bay, Ontario.

Six offers were received for the $10,000 5 per cent. 20 year roads and bridges debentures of Grass Lake Rural Municipality No. 381, Sask. The debentures were awarded to Mr. H. C. Thompson.

PERSONAL NOTES

Mr. N. D. P. Jarvis has been elected a member of the Toronto Stock Exchange.

Mr. R. D. McDonald, of Guelph, has been appointed publicity commissioner at London, Ont.

Mr. J. O. Willgress, manager of the Hamilton branch of the Bank of Montreal, died in London, England.

Messrs. J. H. Crockett and J. R. Day, managers of the National Finance Company's branch offices in St. John and Ottawa, respectively, have recently returned from a visit to Vancouver and Victoria.

Mr. Del L. Constable has been admitted into partnership with Mr. F. W. Maclean, barrister. Messrs. Maclean and Constable's, barristers and solicitors, offices are at 24 King Street West, Toronto.

Mr. J. V. Harrison, manager of the Union Bank, Sargent Avenue branch, Winnipeg, was tendered an address and presentation in honor of his wedding. The gift, which took the form of a grandfather's clock, was made by a delegation of business men.

Capt. Patrick J. Daly, D.S.O., Calgary; Messrs. Fred. L. Haszard, Calgary; Hugh A. Power, Halifax, N.S.; Richard Reid, agent for Ontario Government in London; James W. Richardson, Calgary, have been elected to the fellowship of the Royal Colonial Institute.

◆

CANADA'S ANNUAL ASH HEAP IS TOO LARGE

The fire loss in the United States and Canada for 1912 is stated as being about $225,000,000, while for 1911 it was $234,000,000, the average for the past five years being slightly over $227,000,000, states a bulletin of the State of New York Insurance Department.

It would seem that while the business of 1912 produced more satisfactory results from an underwriting standpoint than that of the preceding year, the lower values of the securities owned by the companies, however, fully offset the increased trade profit of the business when the aggregate gain in surplus is considered.

In looking over the fire situation, the prime factors to be taken into account are, of course, those of prevention and defense, and it would appear that with even a partial elimination of arson insurance, so-called, if that result can be accomplished, with stricter building laws rigidly enforced and with the means of fire defense in all communities brought up to the most efficient standard possible, the annual ash-heap of the country should be reduced to much smaller dimensions within a reasonable time. Certainly it is self-evident that any measures that will result in materially reducing the physical and moral hazards of the fire insurance business must operate toward lower premium rates.

A large percentage of the national fire loss is due to gross carelessness and negligence, and if it were possible to punish by law all such proven offenders, as is done in some European states, it would be of great benefit, not only as a matter of example to others, but in its ultimate results as a money-saver to the community at large.

Another matter that deserves more than passing attention is the lesson taught by the conflagrations of the past which shows that a recurrence of similar conditions is liable to be met at any time and in the natural course of events is sure to be presented sometime. It therefore behoves the companies to so conserve their resources by careful writing and economy of administration that when the call comes (as it surely will) they may be in a position to successfully withstand the financial strain that will be necessarily placed upon them.

◆

NOTES

The Banking and Commerce Committee has reported the Bank Act to the House of Commons, after an exhaustive consideration extending over several months. So thorough has been the study of the new Act in committee that there is good prospect of the bill passing through the House within two or three days of its being taken up.

The next issue of city of Toronto bonds will be put on the London financial market the latter part of this month, and will amount to $2,500,000.

Montreal Light, Heat and Power Company will hold a special meeting June 4th, to authorize issue of $5,000,000 additional capital. About $3,000,000 will be issued this summer.

BRITISH COLUMBIA'S COMPANIES' ACTIVITIES

Regarding the progress of various British Columbia companies, Messrs. F. W. Stevenson & Company, of Victoria, in their monthly review state that "following the passing of the quarterly dividend on British Columbia Copper last month the board of directors issued the following statement: 'The net earnings of the company, after charging off all ordinary development work on their proprietary mine for the calendar year ended December 31st, 1912, were $425,985. During the year the company paid on account of new properties and in their exploration and development $229,489. The company has also under option numerous properties upon which payments are to be made during the current fiscal year and the board deems it best to use the available net revenue for the purpose of supplementing the company's ore reserves, and therefore considers it advisable to defer distribution to shareholders for the present.' The annual meeting of the company was held on the 3rd inst., at which the company's business for the year was fully covered.

"The second annual report of the Canadian Northern Pacific Fisheries, Limited, will make rather unsatisfactory reading for the shareholders. The statement shows a deficit for the year of $63,655.81 after payment of debenture interest. This result, according to the report, is attributable to the diminished catch of whales and the lower prices obtained for the oil and other products of the company. The small catch of whales was apparently due to the very adverse weather conditions prevailing, and better results are looked for this year.

"Current prices for Granby remain practically unchanged from those of last month, fluctuations being dependent more or less on the price of the metal and the movement of the general market. The company has declared the regular quarterly dividend of 1½ per cent., payable June 2nd next.

"The annual meeting of the Lucky Jim Zinc Mines, Limited, was held at Kaslo, B.C., on May 1st, at which meeting the usual balance sheet and financial statement was submitted and other business transacted.

"Considerable progress, it is reported, has been made on the work undertaken by the Portland Canal Tunnels Company, Limited, and as this undertaking has a great bearing on the future of the Portland camp in general, further progress will be watched with interest."

CUBA'S COMMERCIAL REQUIREMENTS

Hints to Canadian Traders as to Methods—Europeans Suit Customers—One Successful Merchant from Dominion

A large number of Canadian merchants have asked the trade commissioner at Havana whether or not the reciprocity treaty between Cuba and the United States is an obstacle to them in approaching the Cuban market. As this idea seems to prevail in Canada a quotation from an annual report made by United States Consul-General at Havana Mr. James Linn Rogers, which appeared in a former report on this question, may again be inserted. This should be carefully read by all Canadian merchants who entertain the hopes of entering the Cuban market, remarks Mr. A. T. Quilez, acting Canadian trade commissioner at Havana, as the circumstances which then inspired Mr. Rogers are the same as at the present time and will remain the same for many years to come:—

"Even a hasty study reveals how dependent Cuba is upon the outside world. In foodstuffs she purchased to the amount of $16,073,473 from the United States and $19,211,078 from the rest of the world in the fiscal year of 1908, this meaning that the American corn, flour and other cereals were more than offset by Indian rice and Canadian flour; that her codfish came from Canada and Spain; that while the bulk of her meat came from the United States, Europe more than outsold the United States in milk, cream, cheese and other light products; that the oils and wines came from Europe; that Canada sold more potatoes and Spain more onions, and Mexico more beans, than the United States; and France, Germany, Spain, South America and other countries contributed nearly twice as much of other foodstuffs. In the matter of textiles the United States contributed only to the extent of $1,528,183, while the rest of the world (principally England through its cotton goods), sold $14,368,898 worth. . . ."

Comply with Customers' Desires.

Then he goes on to explain the causes of this state of affairs in the following excerpt, which clearly reflects the circumstances prevailing:—

"It must be remembered that in buying Cuba is influenced much by sentiment, her merchants being principally Spanish, and that the freight rates offered from Europe, when combined with a low selling price for commodities, soon offset all chances for a reciprocity provision. There is still another and potent reason in the fact that Europeans, especially German manufacturers and vendors, know the Cuban market and how to sell the goods it requires. The representatives of these European business houses come to Cuba and stay until they get acquainted. They use few catalogues, and do not attempt to alter the Cuban taste and suit their own convenience or experience. They are not impatient with the whims of their customers, and comply as far as possible with the desire of the latter, especially in the matter of credit. They make shipments as nearly in accordance with their promise as possible, and pack the goods in the way the customer desires. In nearly all of these things the European method and policy differ from the average American plan. . . ."

Canadian Firm Secures the Business.

It might be added, however, that the European method and policy differs from the average United States and Canadian plan. The following example taken at random will also contribute to dispel the apprehension referred to:—

One of the largest jewellery stores in Cuba, and probably of Latin-America, buying their stock from all over the world, were purchasing large quantities of silver deposit ware from the United States. A firm in Canada expressed the desire to sell their ware in Cuba, and offered every facility to the Cuban firm mentioned above in order that their agent should go to Canada and inspect their output. Mr. Quilez finally persuaded the principal of the firm in question to accept the invitation of the Canadian firm, and, even though both were doubtful as to whether they could enter into any arrangement more beneficial than what the American firm offered, when the parties met, the result was that a substantial order was placed with the Canadian firm, and in a conversation that the writer had recently with the head manager of the Cuban firm, the latter declared that the Canadian goods were not only as good, or even superior, to those manufactured in the United States, but even their terms and prices were more in harmony with their expectations than those offered by the latter.

Under this state of affairs it is more advantageous to foreign firms to have a representative to look after their interests and to use his influence in the event of, through a mishap or through some pretext, the importer refusing to accept the merchandise, the foreign exporter would fare badly if there is no friendly arbitrator.

INTEREST RATES ON FARM LOANS

Subject Attracting Attention in Canada—Average Ra Paid in United States—Bankers and Mixed Farming

The departure of the Saskatchewan Monetary Commissi to Europe, the discussions at the banking and commerce co mittee's sessions have attracted considerable attention to t subject of Loans to farmers in Canada.

The United States department of agriculture through circular mailed to 3,000 country banks, arrives at the co clusion that in 1913 the average rate of interest paid by far ers on loans of funds needed for their work, was 7.75 p cent., compared with 7.79 per cent. in 1912.

It has usually been assumed that the average rate pa by farmers is approximately 8 per cent. The departmen average, representing 90 per cent. of the banks addressed therefore, not wide of the mark of the general financial es mate. It likewise affords a fairly definite basis from whi to discuss the question of farm loans and their bearing up the future of farm improvements, suggests the Wall Stre Journal.

It is doubtful whether any other important division national enterprise pays so high a rate as this for its sh term loans. Of course, the farmers' borrowings are ge erally for a longer term than those of merchants and ma facturers in the same locality, whose turnover is more f quent.

Cotton and Grain Growers.

The cotton farmer borrows from the beginning of the n calendar year until the cotton begins to market in Octob making a nine-month note.

Grain growers borrow for a somewhat shorter term. T divisional average for the cotton belt last year was 9.51 p cent. and 9.68 per cent. for 1912.

It is from this quarter that relief is most urgently d sired, and Senator Fletcher of Florida, who heads the fa credit commission, who are to visit Europe, should find so means of mitigating what appears to many an undue han cap. New England by contrast paid 5.98 per cent. as an av age, New Hampshire reporting the minimum of 5.8 per ce The corn belt states pay from 6.23 per cent. in Ohio to 8. per cent. in Kansas, and the western wheat belts average per cent.

Conditions Have Changed.

Within recent years United States farmers have been ke ing larger deposits on account with their local banks, ther improving their status as borrowers. Many of the main ris of farming have been reduced, adding another source of duction to the cost of capital. But nothing has done more improve the position of farmers as borrowers than (1) diversifying of their crops, when the single cropping te to undermine farm values by impairing productivity; and the turning from merely vegetable production to the breedi and preparation of animals for market. Some western ba ers are even now giving preference to farmers in their lo who have livestock as a feature of their farm economy.

One thing which will add still more to the reduction borrowing costs is the employment of farm capital in all-ye round enterprises, such as dairying, cattle feeding and ot forms of productivity. This would tend to keep local ba from being put to the necessity of sending to large cen their supplies for a half year's interest allowance at a rate. This phase of the problem is highly important as a rective to an interest rate of 7¾ per cent.

◆

A forest reserve, in spite of its name, is not an area tended to be reserved altogether from public use. On contrary, the idea in setting it aside is not to keep it from use of the public, but rather so to manage the area that, w the present users are accorded the freest possible use of tract, the natural resources contained in it may be conti unimpaired for the use of future generations. Following this general policy and striving to make the areas now served of use to the people, whose property they are, forestry branch of the department of the interior is endea ing to make known to the public of the neighboring cou the advantages of the Turtle Mountain Forest Reserve summer resort, in which people may spend a period of v tion during the summer months. The reserve is located mediately north of the international boundary, and appr mately fifty miles east of the boundary between Manitoba Saskatchewan. It can easily be reached, by motor or horse vehicle, from Boissevain or Whitewater, two p which are easily accessible by either Canadian Pacific Rai or Canadian Northern Railway.

ANITOBA, A MIXED FARMING PROVINCE

reased Production Shown in Provincial Report—Live Stock Improvement—An Attractive Feature

A bountiful crop of grain, far exceeding any previous r, the aggregate being over twenty-two million bushels e than that of last year, which was a record crop, was duced in Manitoba last year, according to the report of essor S. A. Bedford, deputy minister of agriculture, just ed. This increase, states the professor, is not confined rain alone, for the yield in nearly all kinds of farm pro- e shows a very marked increase. In a country so de- dent on agriculture as is this, such a bountiful harvest t of necessity affect all lines of commercial activity. truth of this is found in the enormous increase shown the statements of bank clearings, by the ever-growing unts being expended in building operations, and by the recedented demand for all classes of labor, at highly re- erative wages.

ds and Increases.

The average yield of grain in 1912 was 20.7 bushels per , as against 18.29 in 1911. Oats showed an increase in age, yield and total production; barley showed a large ease with an average yield of 35.1 per acre, while flax- recorded the phenomenal increase of 1,466,000 bushels the year previous. Potatoes, field roots, summerfallow, breaking, poultry marketed, etc., etc., are all in the in- se columns and in spite of the unfavorable harvest ther that prevailed last year Manitoba has no need to be amed of the year's results.

In his introduction Mr. Bedford points out once more importance of systematic crop rotation and includes lfa among the crops suggested. The department has rly demonstrated that alfalfa can be grown in any part of province, and many farmers have signified their inten- to sow some alfalfa this year.

Stock Is Improving.

The seventh annual report of the Manitoba Agricultural ege, which is also included, reveals a satisfactory show- of progress. Professor J. W. Mitchell, of the dairy andry department, and superintendent of dairying, repre- s some interesting facts which point to the necessity of stock taking a more prominent part in farming. There many indications that conditions are ripe for a rapid for- movement in the dairy industry of Manitoba. There is rgent need for the importation and distribution both of y cows and pure-bred sires of superior quality; this is a lition that applies to the entire west.

Prof. Herner, reporting upon poultry interests in Mani , comments upon the improvement of farm flocks in gen- and the increased demand for information on the care management of poultry. The quality of dressed poultry bited at various seed fairs, etc., has shown a marked im- ement and the interest generally manifest in this very ortant industry is keen.

The work of the Manitoba Dairy Association and other or- izations in the province is reviewed in the respective re- s submitted to the minister of agriculture. The Dominion ep Breeders' association expect to spend a part of the $25,- received from the Dominion this year, in distributing pure sheep throughout Manitoba.

The live stock associations also report that pure-bred hogs being produced in greatly increased numbers, that the ever-increasing demand for horses to a great number of pure-bred horses being imported last with the result that this year the benefits will be recog- d in the improved quality of nearly all farm horses in the ince.

Enviable Prestige.

The chief attractive feature of Manitoba, when it is lied by English or American agriculturalists, as one of the eral very alluring propositions for the home, lies in the that it possesses all the essentials of an ideal mixed farm- province, suggests Mr. J. J. Golden, superintendent of im- ration, in his portion of the report, and this quality alone es to Manitoba an enviable prestige.

◆

The annual fire loss of the United States would be enough uild a Panama Canal every two years; it would pay the onal debt in four years; it would support the United States y and navy for a year; it would pay the entire pension ; it is about half of the annual output of gold, silver, cop- and petroleum of United States; it is equal to half the of all new buildings each year in the United States. It wice the annual value of the cotton crop. It exceeds the ual value of wheat, hay, rye and oats.

BANKERS' ASSOCIATION AND BANQUE DE ST. HYACINTHE

Bank's History Reviewed — Paid-up Capital — Four Conclusions

The explanation of the Canadian Bankers' Association concerning the charges that the Banque de St. Hyacinthe had been arbitrarily closed up by it in April, 1908, although its condition was solvent, was laid before the banking and commerce committee on Tuesday by Hon. W. T. White, in the form of a report from Mr. John Knight, secretary of the Bankers' Association.

Mr. Knight reviewed the history of the bank. The subscribed capital was $504,600, of which $331,235 was paid up. The total deposits at the end of May, 1908, showed a decline of $75,000 compared with the previous month.

By reason of the knowledge that the president of the Bankers' Association, the late Sir Edward Clouston, had as to the situation, the cashier, Mr. L. F. Philie, was asked to come to Montreal. He was asked to prepare a valuation of the assets, and this showed that the whole of the paid-up capital was gone.

Unfair to Depositors.

The chief one was a doubtful claim against the Quebec Southern Railway, then insolvent. The bank's claim was valued at $612,000. Mr. Knight thought this exorbitant.

He denied that he had told the directors to close their doors, but it was known that the bank was in difficulty, and he told the directors, that if they did not suspend he would report that the bank was insolvent. He thought it unfair to the depositors to open up again.

Mr. Knight's Conclusions.

Mr. Knight's conclusions were:

(1) That at the time the Bankers' Association began its investigation there were well founded rumors to warrant them in making inquiries.

(2) That the statement of the bank disclosed that its capital was lost, this being admitted by the directors.

(3) That the association's recommendation to the directors to suspend payment was proper.

(4) That the result justifies that recommendation, and that the creditors have been paid their claims, without the full amount for interest, only after the liquidator called up the unpaid capital and had recourse to the full amount of double liability.

The Minister gave a copy of the report to J. H. Rainville, M.P., who had brought up the matter. If he desires, it will be discussed later.

◆

CAPITAL CHANGES

The capital stock of the L. McBrine Company, Limited, has been increased from $50,000 to $300,000, by the creation of 2,500 shares of new stock of $100 each.

The capital stock of Thomas Brothers, Limited, has been increased from $500,000 to $600,000 by the creation of 1,000 shares of new preferred stock of $100 each, and converting 2,500 existing and unissued common shares of the capital into preference shares.

The capital stock of the Lymans' Brothers and Company, Limited, has been increased from $150,000 to $400,000, such increase consisting of 5,000 shares of $50 each.

◆

Messrs. Young and Lillie will begin at once the erection of twenty-five houses, ranging in price from $1,500 to $2,000, to help out "the scarcity of houses" situation at Fort William. The opinion is held by many prominent citizens that the most acute question now before the people of Fort William is the housing problem, and unless some action is taken and taken quickly, there will be great inconvenience and many prospective residents of Fort William will be lost to the city.

As the sub-division of land has been tending to extend beyond reasonable limits in the instances of some cities and towns in the province of Saskatchewan, the provincial department of works has drafted new regulations which will place a more severe check on wild-catting than hitherto. In the new provisions, there will be many changes, such as the rule that no low-lying land can be sub-divided until it is properly drained by a reliable drainage system. The 25-foot frontage lots have also fallen into disfavor. In future all lots will have a frontage of at least 33 feet. The fees charged for registration of plans of sub-divisions have been changed so as to encourage wider lots. A charge is made at the rate of so much per lot instead of so much per acre as in the old regulations.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Preston, Ont.—April 30.—Gillies planing mills.

Verdun, Que.—April 30.—204 Ethel Street. Loss $5.

Chemainus, B.C.—April 22.—Nine shacks in Chinatown.

Brudenell, Que.—April 28.—Home of Mr. W. McMillan.

Cranbrook, B.C.—April 29.—Model variety store, Aiken block damaged.

Lethbridge, Alta.—April 23.—Palace clothing store. Small damage.

Lachine, Que.—April 30.—Naphtha distillery, owned by by Fisk Company.

Niagara Falls, Ont.—April 30.—Residence of Mr. Aden E. Dell. Loss $600.

Brandon, Man.—May 4.—Farm building on old Sifton farm. Loss $2,000.

Woodstock, N.B.—April 26.—Smith Lumber Company's sawmill. Insurance $2,000.

Elbow, Sask.—April 26.—Six farmers burned out. Loss $10,000. Cause, prairie fires.

Medicine Hat, Alta.—May 1st.—Express car of Canadian Pacific Railway. Loss $125,000.

Causapscal, N.B.—April 21.—Store and dwelling owned by Chaleurs Bay Mill Company.

St. John, N.B.—April 26.—Dwelling of Mr. Fred. Belyea, Victoria Lane. Loss $200.

St. Catharines, Ont.—April 27.—Transformer building at McKinnon Dash Plant. Loss $500.

Sundridge, Ont.—April 26.—Barn of Mr. Thomas Hodgson, containing 1 cow and flock of fowl.

Delhi, Ont.—April 29.—Sovereign Hat, Globe and Robe Company. Loss $30 000. Cause unknown.

St. Thomas, Ont.—May 5.—Two baseball grandstands at Pinafore Park. Cause, cigarette stub.

Oshawa, Ont.—May 1.—Cold storage plant owned by Mr. J. O. Henry, destroyed. Loss $30,000.

North Battleford, Sask.—Office building, occupied by Messrs. Panton and Walker, lawyers, and others.

Trenton, N. S.—April 24.—Barn of Mr. Phillip Dunn, also two tons of hay and implements. Loss $400.

Brandon, Man.—April 29.—Mr. C. Goldstein's store, Assiniboine Avenue and Tenth Street N. Loss $500.

McLeod's Crossing, N.S.—April 24.—House occupied by Mr. H. Murphy, owned by Mr. W. Power. Loss $700.

Rainy River, Ont.—April 25.—House of Mr. Art Nadon, Sixth Street and Broadway. Cause, turpentine explosion.

Dawson City, Yukon.—May 3.—Power house of Dawson Electric Light and Power Company. Loss $200,000.

Lindsay, Ont.—May 1.—Mr. Frank Forbert's house, Russell Street. Small damage. Cause, spark from engine.

Portsmouth, Ont.—May 4.—Two dwellings owned by Mr. R. Ewart. Loss $600. No insurance. Cause unknown.

Rodney, Ont.—May 5.—Cottage on Harper Street, owned by N. Ludy and occupied by J. Horton. Roof damaged.

Richmond Hill, Ont.—May 4.—Barn, 8 horses, 20 head of cattle, owned by Mr. Joseph Hoad, lot 27, cons. 2, Markham.

Lyster, Que.—May 2.—Fifteen houses and two general stores. Loss $20,000. Stores owned by Thibodeau and Gagnon.

Cobden, Ont.—April 26.—Barn of Mr. Frank Barry, also granary, two horses, cow and calves. Loss $3,000. Cause, lightning.

Stirling, Alta.—April 28.—Two Canadian Pacific Railway boarding cars, box car and freight loading platform. Cause, tramps.

Wychwood, Toronto.—May 3.—Mr. J. L. Case's house, unoccupied, 60 Eleanor Avenue. Loss $150. Cause, spontaneous combustion.

Steveston, B.C.—April 19.—Barn at Woodward's, together with one horse, ten sets of harness, quantity of hay and oats. Cause unknown.

Midland, Ont.—May 3.—Barn owned by H. E. McCartney, rented by Woon and Noland. Also 5 horses, harness and rigs. Cause unknown.

North Bay, Ont. May 2.—Sherwin's boat works and carriage shop. Loss $3,000. Cause, boys smoking in motor boat caused gasoline explosion.

Iroquois, Ont.—April 30.—Dakin block, occupied by annex of Commercial Hotel, J. Adams, clothing store, and G. Reefter, grocer. Loss $15,000.

Bradford, Ont.—May 2.—Midland Railway Company's freight sheds, containing large quantities of dress goods, carpets and wool. Loss $500,000.

Port Hope, Ont.—April 25.—Home of Mr. John White Cavan Township. Loss $1,000. Cause, overheated chimney Building owned by Mr. Wesley Howson.

Moncton, N.B.—May 6.—Victoria Rink, Baptist Brotherhood Hall, Baptist Church and parsonage. Loss $100,00 Fire started in rink. Supposed cause, incendiary.

Sintaluta, Man.—April 29.—Dominion Elevator Company's elevator, rented by Mr. George Hill; also 7,000 bushels of grain. Cause, spark from passing engine.

North Vancouver, B.C.—April 21.—Building in rear o 2nd and Lonsdale Avenues. Loss $2,000, sustained b Messrs. Curry and Company, R. Evans and Mr. Oser.

Mimico, Ont.—May 5.—Eight loaded freight cars destroyed and three damaged in Grand Trunk Railway yards Loss $10,000. Cause, spark from engine ignited leaking o car.

Cobourg, Ont.—April 30.—Residence of Mr. Joh Breeze, Murray Township. Also stable and drivehouse o Mr. Herb. Stoneberg's farm adjoining, occupied by Mr. G Vansyke.

Gladstone, Man.—April 22.—Residence of Mr. C. F Nairn, 642 Battery Street. Small damage.

April 21.—Captain Fletcher's residence, 467 Gorge Roa Loss $25.

Cobalt, Ont.—April 26.—Residence of Mr. Fishenbin Small loss.

May 1.—Town public incinerator. Loss $7,000; no insurance.

Calgary, Alta.—April 29.—Temporary post office. Caus explosion of natural gas. Independent Messenger Servic quarters damaged. Cause, lighted match dropped on gaso line soaked floor.

Grimsby Beach, $300,000. R. C. Jennings, A. R. Clute, J. Jennings.

◆

CROP OUTLOOK IS SATISFACTORY

Reports received in Winnipeg from over 200 points in the Canadian West say seeding is well on the way to general completion. At 114 points over 75 per cent. of the whea area is reported seeded. Taking into account the acreag of surrounding pqints, which report a less amount seeded it is reasonably safe to assume that fully [illegible] per cent. of th land intended for wheat this year has already been sown t that cereal. Fifty-five points report the acreage seeded t be just about the same as in 1912; 35 points reported th acreage as less than that of 1912, while [illegible] points report increase of acreage running from 5 per cent. to as high 25 per cent., though this last figure occurred but seldom thus indicating that there probably is no increase in whea acreage this year, and possibly a fractional decrease.

The reports, almost en masse, declare that, while the season is, on the whole considerably later than in 19 owing to the condition of the ground, seeding is actually i advance of what it was on the corresponding date of las year, and with a better general outlook for the season.

Taken as a whole, the report is a very satisfactory one The fact that the acreage of wheat is not being materially increased is really a very healthy and satisfactory sign, as it shows that the farmers are slowly but surely awakening to the danger of seeding wheat late, and have confined themselves largely to land that was prepared last year

UNITED INVESTORS LIMITED

Head Office - - - WINNIPEG

CAPITAL $1,000,000

President
RICHARD D. WAUGH
Ex-Mayor City of Winnipeg

Vice-President and Managing Director
ALBERT H. OAKES
President 1912 Winnipeg Real Estate Exchange
Manager Oakes-Gray Realty Co.

Secretary-Treasurer THOMAS E. MOFFAT

Directors

Controller J. W. COCKBURN; E. R. CHAPMAN, Barrister; JOSEPH GRAY, Capitalist, Minneapolis; FREDK. W. MOORE, Treasurer Grain Growers' Grain Co.; DUNCAN MARSHALL, Retired Farmer, Clearwater, Man.

The "UNITED INVESTORS, LIMITED," was first incorporated in January 1912, with a capital stock of $250,000. The greater part of this stock was taken up during the ensuing twelve months.

At the first Annual Meeting held on January 8th last, the Shareholders voted to increase the capital stock to $1,000,000, by authorizing the issue of $450,000 worth of additional common or ordinary stock and $300,000 worth of 7 per cent. preferred stock to be divided into 7,500 shares, par value $100 each; but the common or ordinary shares to be sold at a premium of $10.00.

THIS STOCK IS NOW OFFERED FOR PUBLIC SUBSCRIPTION

Management The Corporation is managed by Directors elected annually by the Shareholders. The present Board is composed of prominent and successful business men, who are large Shareholders.

No Bonus Stock In the formation of this Company no bonus stock in any form was allowed. Every stock certificate will have been paid for in hard cash at one hundred cents on the dollar.

No salaries are paid to any officers or directors, and the Company pays no office rent.

What the "United Investors, Limited," Offers - - 1. The free advice of nine experienced and reputable business men, all of whom are large Shareholders. Their interests are identical with those of the smallest Shareholder.

2. The opportunity to enrich yourself, not only in one real estate deal, but on a dozen or more at the same time.

3. A share in certain "hidden" profits. Profits for which as yet no credit has been taken in the Profit and Loss Account.

THESE ARE—(a) "Park-Manor" subdivision. Estimated profits $140,000.00. (b) Properties bought for $205,914.32, upon which $121,591.33 is still owing, but which are valued in December, 1912, at $274,790.00 by the Winnipeg Real Estate Exchange Valuation Committee.

4. An interest in a Company which had organization expenses of only $578.60.

5. If you become a Shareholder, you participate in all the profits and other advantages of the Company. You are offered an opportunity to become a partner in a "going concern" which offers you an interest in profits already accumulated—a Company which has passed beyond the experimental stage—a Company the future of which is assured—a Company for the Shareholder, small and large.

How to Buy "United Investors, Limited," Shares You can buy any amount from one share up. You can pay on full or on easy instalments, without interest, and every payment participates fully in profits.

You can own one common share by paying $30.00 cash and the balance in four equal, consecutive semi-annual payments.

You can own one hundred common shares by paying $3,000.00 cash and paying $2,000.00 every six months for two years.

You can buy the Preferred Shares by paying $20.00 per share cash with application, and the balance in four semi-annual payments.

THIS IS GOOD BUSINESS

Put some of your money in Winnipeg, the billion-and-a-half-dollar-bank-clearing-city—the city with the largest annual bank clearings for its size on the continent.

Postal card will bring Prospectus, Auditors' Report and full information.

April 19.—Building owned by Mr. R. H. Duke, occupied by Mr. M. Brown, plumber. Loss on contents, $50; insurance, $1,500 in London and Lancashire. Cause, defective wiring.

MONTREAL AND TORONTO FIRE WASTE

The number of alarms that Montreal fire-fighters of the city responded to during the first four months of this year was nearly exactly the same as they turned out to during the first four months of 1912.

The number of calls Chief Tremblay and his men responded to during January, February, March and April this year was 1,007, while for the same months of last year they had seven less runs, the total for the four months being 1,001.

The largest number of runs this year was during April, when the fire-fighters were called out no less than 285 times. The second largest number during a month was in February, the shortest month of the year, when they responded to 246 calls in twenty-eight days. January came next with 239 calls. The month of March had the least number of alarms, 236, but the most serious fires occurrel during March, as there were no less than three second and two three-alarm fires.

During the third month of the year second alarms were turned in for fires in the factory of C. H. Cottelli, DeBellechasse Street; Miller Bros., machine shop, Dalhousie Street; G. E. Jacques, sheds and steamer City of Montreal, Lachine Canal. Three alarms were turned in during the same month for Larue & Cloutier's warehouse, St. Paul Street, and the Semi-Ready building, St. James Street.

There was one death due to fire during March, Mrs. J. Laberge, who was asphyxiated in her home, 804 Albert Street.

There were two second alarms during January for fires in the premises of the Ontario Lantern and Lamp Company, St. Dizier Street, and the Bass Fur Company, St. Paul Street.

There were two second alarms during the month of February. The first was for a blaze in the factory of the Canadian Rubber Company, East Notre Dame Street, and the second for an outbreak in the premises of S. H. Ewing & Sons, King Street.

Toronto's April fire waste, according to the fire department's report, was as follows: Estimated damage, $25,407; number of alarms, 96; false alarms, 8; unknown causes, 23; grass fires, 9; gasoline, 6; electric wires, 4; chimneys on fire, 4; children and matches, 3; incendiary, 2; mice and matches, 2; oily rags, 2.

During April the firemen only had 96 calls to answer, being the smallest number this year. But two of the fires were of incendiary origin. The damage was greater than for the month of March, but not as large as the other two months.

There were but eight false alarms this month as compared with nine the month before, and most of these were caused through accidental setting off of automatic wires. There were no fires from thawing pipes.

The figures compared for the first four months are:—

	Jan.	Feb.	March.	April.
Damage	$42,828	$81,806	$8,180	$25,407
Alarms	154	217	126	96
False alarms ...	26	18	9	8

RED DEER'S FINANCES

Red Deer's assessment in 1913 was land only, $5,953,985; exemptions, $591,200; net, $4,462,785. The city's debenture debt including issues totalling $263,608 now being made, is $317,452, less waterworks and local management debentures of $146,765, leaving a net debenture debt of $170,687. Red Deer has a floating debt of $1,000. Its assets are: Real estate, $228,636; equipment, $7,997, sewers, waterworks, cement walks, etc., $265,030. The city will probably issue about $45,000 more debentures this year. It has a population of 4,000. The revenue obtained from all sources in 1912 was $73,511. The revenue from waterworks in 1912 was $3,528. The city pays a private company $50 per hydrant, and 60 per cent. of gross water rates for operating. Red Deer's rate of taxation in 1912 was: General, 10.5 mills; school, 3.5 mills; total, 14 mills, with 5 per cent. discount.

LEGAL NOTICE

GRIMSBY BEACH, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 29th day of April, 1913, incorporating George Patrick Reid, broker, Robert Cumming Jennings, accountant; Arthur Roger Clute and John Jennings, barristers-at-law, and Hilda Seager, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, lease or otherwise acquire any land and buildings wheresoever situate and any estate or interest in any rights in connection with any such land and buildings; (b) To develop and turn to account any land acquired by the company, or in which it is interested and in particular by laying out and preparing the same for picnic grounds, excursion purposes, building purposes, summer resort purposes and constructing, altering, pulling down, decorating, maintaining, fitting up and improving buildings and conveniences and by planting, paving, draining, farming, cultivating, letting on building lease or building agreement or otherwise; (c) To construct, maintain, improve, develop, work, control, operate, carry on and manage upon the property or properties of the company or elsewhere any summer resorts, picnic and excursion grounds, water-works, gas-works, reservoirs, roads, electric power, heating and lighting supply works, telephone works, hotels, clubs, restaurants, baths, places of worship, places of amusement, pleasure grounds, parks, gardens, reading rooms, stores, ships, dairies and other works and conveniences which the company may think directly or indirectly conducive to the objects of the company, and to contribute or otherwise assist or take part in the construction, maintenance, development, work, control and management thereof, and to lease or grant concessions for the carrying on of any of the said works or businesses; (d) To construct, maintain, improve, develop, control, operate, carry on and manage upon the property or properties of the company, tramway lines to be operated by any form of energy; (e) To erect, construct, repair and alter buildings, structures and other erections and to buy, sell and deal in stone, sand, lime, cement, brick, timber, hardware and other building requisites; (f) To purchase, take, exchange or otherwise acquire, hold, maintain, operate and manage ships and vessels and any shares and interests in ships and vessels and also shares, stocks and securities of any companies possessed of or interested in ships and vessels, and to maintain, operate, repair, improve, alter, sell, exchange or let out to hire or charter or otherwise deal with and dispose of ships and vessels, shares or securities as aforesaid, warehouses, wharves, lighters and quays; (g) To apply for, purchase or otherwise acquire, any trade marks, trade names, patents, licenses, concessions and the like conferring any exclusive or non-exclusive or limited rights to use or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly to benefit the company, and to use, exercise, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired; (h) To buy, sell, manufacture, refine, manipulate, export and import and deal in all substances, apparatus and things capable of being used in any such business as the company is authorized to carry on or which may be acquired by any customers of or persons having dealings with the company; (i) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with any business of the company or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (j) To acquire or undertake the whole or any part of the business, property and liabilities of any company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purpose of this company, and to pay therefor in fully paid-up or partly paid-up preference or ordinary shares of the company or in the bonds, debentures or other securities of the company; (k) To enter into partnership or any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company; and to lend money to, guarantee the contracts of or otherwise assist any such company, and to take or otherwise acquire shares and securities of any such company and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (l) To take or otherwise acquire, hold, own or otherwise dispose of shares in the capital stock of and the bonds, obligations or other securities of any company having objects altogether or in part similar to those of this company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this company or enhance the value of its undertaking, notwithstanding the provisions of section 44 of The Companies Act; and to guarantee the payment of dividends of any such bonds, obligations or other securities and to aid in any manner any such company; (m) To enter into any arrangements with any authorities, supreme, municipal, local or otherwise, whether domestic or foreign, that may seem conducive to the company's objects or any of them, and to obtain from any such authority any rights, privileges and concessions which the Company may think it desirable to obtain, and to carry on or exercise and comply with any such arrangements, rights, privileges and concessions; (n) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of this company or for any other purpose which may seem directly or indirectly calculated to benefit this company; (o) To invest and deal with the moneys of the company not immediately required in such manner as may from time to time be determined; (p) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any company; (q) To remunerate, with the approval of the shareholders, any company for service rendered or to be rendered to the company in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital, or any bonds, debentures or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (r) To issue fully paid-up shares, bonds or other securities for the payment, either in whole or in part of any property, real or personal, rights, claims, privileges, concessions, chose in action services, rendered or other advantages which the company may lawfully acquire, and to issue such fully paid-up shares, bonds or other securities in payment, part payment or in exchange for shares, bonds or other securities of any other company; (s) To sell or dispose of the whole or any part of the assets and undertaking of the company as a going concern or otherwise, for such consideration as the company may think fit and in particular for shares, bonds, debentures or securities of any other company having power to acquire the same; (t) To obtain any provisional order or Act of Parliament for enabling the company to carry any of its objects into effect, or for effecting any modification of the company's constitution, or for any other purpose which may seem expedient, and to oppose any proceedings or application which may seem calculated directly or indirectly to prejudice the company's interests; (u) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company, or as agents for a commission or other remuneration, to buy, sell, improve, manage, develop, exchange, lease, dispose of or otherwise deal with any real or personal property of any kind whatsoever; (v) To do all such other things as are incidental or conducive to the attainment of the above objects; (w) To draw, make, endorse, accept, execute and issue, promissory notes, bills of exchange and other negotiable and transferable instruments; (x) To cause or to allow the legal title, estate and interest of any of the property, real or personal, owned by the company, or in which it has any interest, to remain in or be vested in or registered in the name of any individual or individuals or corporation, either in trust for or as agents or nominees of the company in accordance with the terms of any instrument creating such trust or agency; (y) To procure the company to be registered, licensed or otherwise recognized in any foreign country and to designate and appoint any person or corporation as attorneys or representatives of this company, with full power to represent this company in all matters according to the laws of such foreign country, and to accept service for and on behalf of this company of any process or suit; (z) To do all or any of the above things and as principals, agents, contractors, trustees or otherwise and by or through trustees, agents, or otherwise and either alone or in conjunction with others; (aa) To amalgamate with any other company having objects altogether or in part similar to those of this company; (bb) The word "company" in clause (1) to (ii), both inclusive, shall be deemed to include any person, partnership, or other body of persons, whether incorporated or not incorporated, and whether domiciled in Canada or elsewhere, and the objects specified in each of said clauses shall be in no wise limited or restricted by reference to or inference from the terms of any other clauses or the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Grimsby Beach, Limited," with a capital stock of three hundred thousand dollars, divided into 3,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 2nd day of May, 1913.

THOMAS MULVEY,
Under-Secretary of State.

SASKATCHEWAN MORTGAGE CORPORATION

Saskatchewan Mortgage Corporation's fourth annual report shows profits amounting to $29,931 from revenue account, $647 from premium account, this with $497 brought forward made the total available for distribution [illegible]1,076.

The directors' report shows that the assets have nearly doubled in the past year. The total amount loaned on first mortgages at the close of the year 1911 was $352,493.34, and the present figures of $514,002.73 show an increase of $161,509.39. The gross receipts are $40,717.48. Expenses amounted to approximately $10,000. Dividends at the rate of 7 per cent. were paid during the year, and crediting of interest at the rate of 5 per cent. on the accumulative stock was $22,038.24. The net amount to the credit of the profit and loss was appropriated by carrying $8,000 to the reserve fund, which is now $60,000, and the balance was carried forward.

The directors have adhered to the policy adopted at the commencement of business of confining loans to not more than 50 per cent. of the actual appraised value, and all valuations have been made by practical inspectors.

The capital of the company is $1,150,600 subscribed, [illegible] paid up and $60,000 reserve fund.

IMPERIAL FINANCIAL CORPORATION

The Imperial Financial Corporation of Canada, Limited, has been organized with the primary object of creating a reliable channel of investment of capital from Eastern Canada, United States, Great Britain, France, etc. The corporation is capitalized at $500,000, divided into 5,000 one hundred dollar shares, which are being offered for subscription. The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICE

BRITISH AND COLONIAL LAND AND SECURITIES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of April, 1913, incorporating James Steller Lovell, Charles Delamere Magee, accountants; William Bain, bookkeeper; Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.: (a) To purchase, take on lease or otherwise acquire, to hold, sell or otherwise dispose of property, movable or immovable, land, or any right or interest therein, water powers, power sites, timber limits or licenses, mines, mining rights, mining licenses, quarries, oil wells and products of quarries, and mineral lands and any interest therein; to develop, produce, deal with or otherwise turn to account any lands of the company or any kind of natural or artificial product which may be taken therefrom, and without limiting the generality of the aforesaid words, to mine, raise or otherwise produce minerals of all kinds, and to refine and otherwise treat and make merchantable or otherwise marketable the same; to manufacture or produce timber, lumber, logs, pulp wood or any article made in whole or in part from wood or any product or by-product thereof; to quarry, smelt, refine, dress, amalgamate and prepare for market, ore, metal and mineral substances of all kinds, and to deal in stone and the products thereof; (b) To engage in catching, freezing, salting, smoking, curing, canning, drying, preserving, selling, disposing of and dealing in fish taken in water flowing through lands owned or controlled by the company or adjacent thereto and in producing, manufacturing, selling and disposing of manufactures of every kind and nature whatsoever from fish and fish products; to engage in the sale, exportation and distribution of such fish, fish products and manufactures therefrom; to erect such plant and machinery as may be necessary to preserve or cure fish or for the purpose of changing fish or its products into any form in which the same may be sold; to manufacture fertilizer from fish; to manufacture cans, barrels, packages, or other receptacles for the preservation of goods and products, and to purchase, build, lease or otherwise acquire, and to maintain and carry on cold storage and refrigerating processes; (c) To subscribe for, purchase or otherwise acquire, own, hold, sell and otherwise dispose of and deal with and to transfer shares in the capital stock of any corporation, foreign or otherwise, and bonds, debentures, obligations or other securities of any government, municipality or corporation, foreign or otherwise, and while the holder thereof to exercise all the rights and privileges of ownership including the right to vote thereon, notwithstanding the provisions of section 44 of the said Act; (d) To buy, sell, manufacture and deal in minerals, plant, machinery, implements, conveniences, provisions and things capable of being used in connection with the operations of the company, or required by workmen and others employed by the company; (e) To construct, carry out, maintain, improve, manage, work, control, operate and superintend any roads, streets, tramways, sidings, sidewalks, drains, water mains, sewers, and any other improvements, on lands belonging to or controlled by the company, and any bridges, reservoirs, water courses, artesian wells, waterworks, pumping stations, aqueducts, filtration plants, mains, connections and other accessories to such waterworks, furnaces, mills, crushing works, lighting plants, shops, stores and other works and conveniences which may directly or indirectly be conducive to any of the objects of the company, and to contribute to, subsidize or otherwise aid or take part in any such operations; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To issue fully or partly paid shares of the company in payment or part payment of any property, assets, franchises, options or other rights or privileges; (h) To construct, acquire by purchase, lease or otherwise, and to own, develop and operate works for the production, sale and disposal of steam, electric, hydraulic, pneumatic or other power or force, and to produce, create, develop, acquire by lease, purchase or otherwise, and to control and generally deal in, use, sell, lease or otherwise dispose of such steam, electric, hydraulic, pneumatic and other power or force for any uses and purposes for which the same are adapted, provided that all sales, transmission or distribution of electric or other power, or force, beyond the lands of the company, shall be subject to local and municipal regulations in that behalf; (i) To construct, acquire, own, manage, charter, operate, hire and lease all kinds of steam and sailing vessels, boats, tugs, barges and other vessels, wharves, docks, elevators, warehouses, freight sheds and other buildings necessary for the purposes of the company, and to tow, carry goods, freight and passengers for hire and generally to carry on the business of an elevator, navigation and transportation company; (j) To contract for, build, construct, and equip public and private works of every description, and to acquire, purchase, hold, sell, dispose of, supply, manufacture and produce all manner and kinds of material for use in the construction and equipment of such public and private works; (k) To promote, or to assist in the promotion of any company or corporation carryi on a business similar in whole or in part to that of this company or f the purpose of acquiring the undertaking of the company or any pa thereof; (l) To transact and carry on a general financial agency a brokerage business, and to act as agents and brokers for the investme loan, payment, transmission and collection of money, for the transfer a recording of bonds, debentures, shares or other securities and for the pu chase, sale and improvement, development and management of any pi perty, business or undertaking and the management, control or directi of syndicates, partnerships, associations, companies or corporations; a to accept, fulfil and execute any trust committed to the company by a corporation of which the company holds shares, debentures or other curities, or with which the company has business relations, or by a court of law, on such terms as may be agreed upon and as the co shall approve, and to take, hold, receive and convey all estates and p perty, real and personal, which may be granted, conveyed or committ to the company with its assent upon such trust or trusts; and to act trustees in respect of bonds, debentures, mortgages, hypothecs or other curities of companies or corporations with which the company has busine relations, and to deal with such property in accordance with the inst ment creating the same; (m) To act as agents for others in the inve ment of funds for the carrying out of any business which this company authorized to carry on; (n) To distribute any of the property of the co pany in specie among the shareholders; (o) To apply for, purchase a acquire by assignment, transfer or otherwise, and to exercise, carry and enjoy any statute, ordinance, order, license, power, authority, franchi concession, right or privilege, which any government or authority, supre foreign, municipal or local or any corporation or other public body m be empowered to enact, make or grant, and to appropriate any of the co pany's stock, bonds, and assets, to pay and defray the necessary co charges and expenses thereof; Dated at Toronto this 21st day of April, 1913.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for
BRITISH & COLONIAL LAND & SECURITIES COMPANY, LIMIT

ULTIMATELY REFINE ALL GOLD PRODUCED

Hon. W. T. White, finance minister, stated at Ottawa that ultimately the Canadian mint would refine all the gold produced in Canada. The silver production, however, presented a more difficult problem. The erection and operation of a refining plant would involve a large outlay; moreover, there was but a limited market for silver in the country.

The minister said that the total amount of coinage of silver between January 1, 1908, and March 31, 1913, was $5,710,944, divided as follows: Fifty-cent pieces, $750,000; twenty-five cent pieces, $2,500,000; ten-cent pieces, $1,393,000; five cent pieces, $979,000. Bronze cents were coined to the amount of $[illegible]; gold sovereigns to the value of $1,400,000, and Canadian five and ten-dollar gold pieces to the value of $1,800,000.

Gold received at the mint in 1912 for refining totalled 101,636 troy ounces, of which 3,000 ounces came from Nova Scotia, 11,000 from Ontario, 85,000 from the Yukon, and less than 1,000 ounces from Quebec. Fine gold bars were sold by the mint in that year to the value of $206,000. The mint last year brought 755,000 ounces of silver, of wh 70,000 ounces came from the Coniagas Mine in Cobalt, 685,000 from the United States, the purchases being m by tender.

The following comparison of coinage was given as sh ing the increased operations of the mint:—

	1908.	1912.
Silver coined	$313,000	$1,383,000
Bronze coined	23,000	51,000
Gold coined	3,000	1,477,000

HANGES IN CANADIAN TRADE COMMISSIONER SERVICE

The commissioner's office in Holland, formerly at Am- dam, has been transferred to Rotterdam as being more ral and in touch with commercial activities. Mr. J. T. gow, originally appointed to Glasgow, but who has been acting for some time in the Amsterdam office, has been placed in charge. Mr. J. E. Ray will look after the Glasgow office temporarily as well as that in Birmingham, his regular post.

In Germany, a new trade commissioner, Mr. C. F. Just, formerly connected with the Canadian Immigration Department in London, has been appointed in Hamburg. The Berlin office has been closed.

CORPORATION FINANCING

Brazilian Traction, Light and Power Company—Good Time for Investors

Cables have been received from London telling of a proposed issue of $10,000,000 six per cent. preference stock by the Brazilian Traction, Light and Power Company.

The funds are needed to complete the financing of the large works under construction, which are expected to be finished during the summer. When this work is completed hydraulic power will be available for the Rio and Sao Paulo Companies from a second river, the course of which will have been diverted, and as a result of which a great saving in cost of power will be effected. Power which is now generated by steam plant will be obtained from the hydraulic source. More contracts will be entered into by the Sao Paulo Electric, which at present cannot fill the demands for power.

Phœnix Bridge and Iron Works.

The Phœnix Bridge and Iron Works Company has made an offering of £154,100 six per cent. bonds and $800,000 common stock. The bonds are being offered at 96 and the common stock at $50 per share. Mr. James W. Pyke, the president of the company, in a letter to the purchasers of the issue, outlines the record of the company since its origin in 1898, and states that the average net earnings for the past three and a half years were equal to 5½ per cent. on the common stock and at a rate of 6¼ per cent. during the eighteen months ended December 31st last. The new financing of the company is to provide for extensions to plant and equipment. The Quebec Savings and Trust Company, through which the offering is being made in Montreal, simultaneously with an offering in London, states that applications had been received for £90,000 of the bonds and $405,000 of the common stock previous to the public offering, and that these applications are to be allotted in full.

Financing Has Been Effected.

In unofficial Dominion Iron circles it has been stated that President Plummer had arranged in London what necessary financing the company requires to do. The April figures from the plant at Sydney indicate that good results are now being obtained from the plant extensions, and that the current year should show increased returns. The report for the fiscal year ended March 31st will probably be in the form of a consolidated statement combining the Steel and Coal in one, instead of being treated separately as heretofore.

An issue of $450,000 worth of additional common or ordinary stock and $300,000 worth of 7 per cent. preferred stock of the United Investors, Limited, Winnipeg, to be divided into 7,500 shares, par value $100 each, but the common or ordinary shares to be sold at a premium of $10, is being offered by the Oakes Gray Realty Company, Winnipeg.

Barcelona Power Company.

Despatches from Montreal state that Barcelona Power Company, in which Dr. F. S. Pearson, Mr. H. S. Holt and several other Canadians have a large interest, is contemplating an issue of stock in the near future.

There have been listed on the London Stock Exchange. Algoma Central Terminals, £527,300, 5 per cent.; Province of Manitoba, £400,000 4½ per cent.

◆

DEBENTURES AWARDED.

Crass Lake R.M., Sask.—$10,000 5 per cent. 20 instalments, to Mr. H. G. Thompson.

Lethbridge, Alta.—$200,000 5 per cent., to Messrs. Wood, Gundy & Company, Toronto.

Conquest, Sask.—$6,500 6 per cent. 15 instalments to Messrs. Flood Lands Company, Regina.

Oshawa, Ont.—$76,87[illegible] 5 per cent. 20 annual instalments to Messrs. Brent, Noxon & Company, Toronto.

Niagara Falls, Ont.—$14,257 5 per cent. 15 and 30 annual instalments to Messrs. C. H. Burgess & Company.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Calgary, Alta.—$75,000 4½ per cent. 20-year debentures to Messrs. G. A. Stimson and Company, Toronto.

Lunenburg, N.S.—Until May 15th for $15,000 sewerage debentures, 4½ per cent. 20-year. G. R. Love, town clerk.

Virden, Man.—Until May 26th for $10,000 5 per cent. 20-year municipal hall debentures. W. Whiteford, secretary-treasurer.

Last Mountain Valley R. M., No. 250, Sask.—Until June 1st for $10,000 6 per cent. 20-year debentures. A. Graham, secretary-treasurer.

Strassburg, Sask.—Until May 20th for $5,000 fire protection and $12,000 electric light debentures. S. L. A. Smyth, secretary-treasurer.

Watson, Sask.—Until May 14th for $1,500 6 per cent. 10-year debentures. W. T. Smart, secretary-treasurer. (Official advertisement appears on another page).

Elkhorn, Man.—On May 17th the ratepayers will vote on a by-law to issue $6,000 5 per cent. debentures for rink purposes. A. McNab Frazer, village clerk.

Winnipeg, Man.—The electors carried the by-laws relative to the proposed water scheme, and the construction of a subway on Salter Street, the latter to cost $1,250,000.

Russell Township, Ont.—Until May 31st for $10,000 5 per cent. 20-year bridge debentures. F. J. Larocque, treasurer, St. Onge. (Official advertisement appears on another page).

St. Urbain S.D. No. 903, Man.—On May 17th the ratepayers will vote on a by-law to issue $2,500 5 per cent. 20-ye school debentures. D. LaBossiere, secretary-treasurer, Lorne

Macleod, Alta.—Until May 15th for $335,000 5 per cent 40-year water and light, sewer, municipal building, and waterworks debentures. E. Forster Brown, secretary-treasurer.

Dalhousie, N.B.—Until June 10th for $30,000 5 per cent 30-year waterworks and electric light debentures. A. J. Le Blanc, town clerk. (Official advertisement appears on another page.)

Red Deer, Alta.—Until May 22nd for $26,368.97 6 pe cent. 30-year local improvement debentures. A. T. Stephenson, secretary-treasurer. (Official advertisement appears o another page).

Swift Current S.D. No. 167, Sask.—Until May 25th f $20,000 20-year 8 per cent. debentures. J. T. Dodds, secretary-treasurer, Swift Current. (Official advertisement appear on another page).

Edmonton, Alta.—Until May 15th for $500,000 40-year per cent. school debentures. W. D. Bradey, secretary treasurer, Edmonton Public School Board. (Official advertisement appears on another page).

North Vancouver, B.C.—Until May 14th for $313,5 50-year 5 per cent. road making machinery, waterworks subway and school debentures. W. Austin Brown. (Official advertisement appears on another page.)

Vermilion, Alta.—Until May 31st for $4,000 electri light extension, and $4,000 streets and highways debentures 6 per cent. 20-year. H. P. Long, secretary-treasurer. (Official advertisement appears on another page.)

Dryden, Ont.—The following by-laws have been passed $2,500 for lands for waterpower developments; $2,500 f telephone system; $5,000 for municipal hall; $6,000 to acquire from the Dryden Timber and Power Company, Limited, electric light system.

Barrie, Ont.—Until May 22nd for the following debentures guaranteed by the county of Simcoe:—$9,757.25 5 per cent. 10-year sewers; $25,600 5 per cent. 20-year roadway etc.; $7,000 5 per cent. 30-year hydro-electric; $50,000 per cent. 30-year collegiate institute. E. Donnell, tow clerk.

THE BORROWER'S OWN PLEDGE.

When the matter of the secret liens was being shed out in committee at Ottawa a number of the bers evinced considerable hostility to the Bank Act ses which cover them. The ground taken by these bers was that the secret lien worked an injustice e general body of creditors. Mr. Waldron cited the of a manufacturing company which failed for ooo. There were English creditors with unsecured ns for $10,000.

The bankers of the company, however, had every- g covered by their secret lien, and, presumably, other itors would get nothing. Apparently it was the re to prevent the occurrence of cases of this kind h moved the committee to pass the amendment re- ing that liens given by farmers on threshed grain ld be registered. The Western members objected uously to this amendment. Mr. Aikins, the member Brandon, pointed out that the registration would ssitate a fee of $10 or more, and that the amendment ld practically nullify the clause; but, notwithstanding protest, the amendment was passed.

It should be said that the secret lien, or borrower's pledge, as it is often called, is used extensively. ns to wholesale dealers in grain and other produce, umber companies, and to manufacturers, are often ed on this security. In the case of the grain and r produce loans, it does not appear that the secret works injustice to the general body of creditors.

Take the wholesale grain merchant, for example. rybody who has dealings with him is aware that his kers advance to him practically all of the funds he s in buying grain, and that the bank holds the grain security for its claims. Even if his elevators are sting with grain, the fact would not influence parties to give him credit, since everyone supposes or knows that the grain is pledged to the bank. Again, grain and produce generally is a cash commodity.

The party who buys and sells it in wholesale manner must deal for cash, and thus it might be said that he has no creditors other than the bank. These circumstances probably explain why the secret lien works satisfactorily on the whole, so far as outside creditors are concerned, in the cases of the wholesale produce dealers.

The banks at times suffer losses when they give credit in this way to undeserving parties; but outside creditors have not suffered to any noticeable extent.

In case of secret liens given by manufacturers there are more complications, for the simple reason that the manufacturer is apt to have more outside creditors.

There may be unpaid vendors of raw material; and various other parties may have extended credit to the manufacturer. However, even in this case, the parties extending credit will be mostly business men, who are well aware that the manufacturer is obtaining advances from the bank, and who surmise that the bank probably has all the bills receivable, and perhaps a lien on the raw material and material in process.

There would be some distinction made when the raw material used by the manufacturer consisted of a commodity which is customarily bought and sold on credit. In that case the presumption would be that there were unpaid vendors; and it is not likely that the bank would make any advances on the borrower's own pledge of the stuff, unless the banker knew that the vendors had been duly satisfied.

When the manufacturer's raw material consists of something which is invariably bought and sold for cash, the justification for the secret lien is more apparent.

Then there are no unpaid vendors of raw material to be considered; and, as regards the sundry outside parties who extend credit to him, they probably do so, not on the strength of the merchandise contained in his factory, but because they consider his business to be sound and profitable.

When one considers the farmer's case, it is seen that there is, perhaps, a greater possibility of the secret lien working injury to his creditors in general. The farmer may get credit from quite a number of parties throughout the season. He probably buys goods on time from the groceryman, the dry goods store, the tailor, the implement dealer, the butcher, the baker, etc.

All of these creditors extend credit on the strength of the farmer's growing crops. That is, perhaps, the only source from which payment can be made. If when the farmer threshes his grain he proceeds to pledge it to the bank, and with the money thus borrowed pays off his other creditors, no harm would be done.

But if, as would often occur, the farmer conveyed his grain to the bank, and failed to pay his other debts, his creditors would consider that they had a grievance. But even in that case they might not be justified in claiming that the secret lien injured them. The farmer's inability to pay his unsecured creditors may have been due, in reality, to the fact that his expenses were too heavy or to the fact that his farm did not produce enough.

If, instead of pledging his stuff to the bank, he had sold it outright and distributed the proceeds among his creditors, there would still have been a shortage.

And, in favor of permitting the farmer to borrow on his own pledge, it might be argued that a farmer who is going to default will never leave any grain or anything else that is readily saleable on his place for the creditors to attach. He will sell everything as soon as it is ready to sell. However, the banking committee has insisted that all such liens given by the farmer shall be registered, so that his creditors shall know about them; and it is to be hoped that those who were so anxious to have the Bank Act give permission to farmers to borrow on their own pledges understand fully that the banks were in no wise responsible for the mutilation of the privilege.

STOCKS, BONDS AND NOTES

Many investors in a period of pressure or stringency, such as that now prevailing, find it advantageous to take the attitude of creditor rather than that of owner. That is to say, they serve their interests best, in certain respects, through buying bonds or other evidences of debt, instead of buying stocks, which constitute them part-owners of the concerns to which their funds are entrusted. When money is scarce and interest high, it usually means that the cost of operation or of production is swelled by the extra prices paid to creditors for capital supplied by them.

As tightness in the money market has a tendency to force sales of commodities, it is not, perhaps, possible to increase the selling prices of goods so as to maintain the margin of profit. Hence profits may shrink; and if the stringency is protracted probably a slacking of activity may be seen.

This, of course, militates against the stocks which represent the ownership of the concerns thus affected. The prospects of dividend increases grow less favorable; and in some cases doubts may be engendered as to the maintenance of dividends presently in force.

Such considerations make for a decline in stock quotations; and the holder or owner of stocks is perhaps subject to considerable uneasiness as he sees the quotations for his securities fall below the prices at which he purchased.

On the other hand, if the owner of liquid capital and debentures of industrial and mercantile corporations or to other parties who are reasonably certain to meet their obligations at maturity, he can look upon the monetary pressure with more favorable eyes.

It is noteworthy that investors in Canada have recently had the opportunity of buying short-date bonds and debentures of industrial and mercantile corporations in good standing at prices yielding from 6 to 6¼ per cent. A number of other issues of this kind are being held back in expectation that the money market will take a favorable turn.

Apparently some of these corporations have been accustomed to supply their capital needs through borrowing in London; but the transatlantic centre has not yet fully recovered from the unsettlement consequent upon the Balkan war.

And, as Canadian municipalities have had to pay 5 per cent. in London, the rate for our industrials has been fixed rather high. Hence the appeals to the Canadian investor. In order to induce him to respond freely or extensively it has been necessary to offer attractive rates. Judging from present conditions the corporations which are holding back their issues may be forced eventually to put them on the market at prices no better than those now prevailing.

In spite of the large amount of new money coming into the country through the Canadian Pacific Railway stock issue and other flotations, the bankers apparently look for the continuation of a very strong demand for credits throughout the summer.

The evidence before the banking committee showed that the bankers are, and have been, holding the borrowing classes in severe restraint.

Apparently the municipalities and other corporations which have large loans from the banks are being pressed to liquidate them through sales of bonds or debentures. The general manager of one of the large banks recently remarked in reference to municipal loans that "the difficulty of getting municipal councils to accept the market price for their issues does not grow less as the rate of interest moves slowly against them."

The underlying motive of the banks, in thus seeking to induce these large borrowers to issue bonds and debentures, is the desire to strengthen cash reserves and to prepare for the movement of the Western crops. So the indications are that in the next three months the bond dealers in Montreal and Toronto will have further attractive offers to announce. It is quite within the possibilities that good bonds will be offered in the summer months at prices to yield 6½ per cent. When interest rates rule so high some companies may prefer to offer notes instead of bonds.

The practice of offering notes is more common in the United States. The other day the United Fruit Company, of Boston, offered its four-year notes bearing interest at 6 per cent. at 98, the net yield being 6½ per cent; and the American railways often resort to this method of financing.

The advantage of issuing notes is that the corporation does not bind itself to pay the high rate for a long term of years. Thus at present the rate of interest on long-term bonds must necessarily be placed at a high figure; and the debtor company must go on paying interest at the high rate for the whole term of the bond—unless it reserved the right to refund the loan.

It might happen that a cheap money era would be encountered in two or three years; and in that case, if notes had been used in the first place, the opportunity is presented of replacing them at a comparatively low rate for a long term. On the other hand, the American railways have found that the practice of issuing notes has its dangers.

Sometimes the note issue falls due in a period of great strain; and the company responsible therefor may have great difficulty in meeting them; and once in a while the maturity of a big note issue of this kind may serve to throw the debtor company into bankruptcy.

SMALL CHANGE

"House to Rent" has been superseded by "House Wanted" signs in many Canadian cities.

MINION'S RETURNS FOR FISCAL YEAR

W. T. White's Budget Speech—Details of Estimates—Trade Agreement with West Indies and Tariff

:on. W. T. White, in his budget address, first dealt in with the revenues and expenditures of the fiscal years ı and 1911-12. The total revenue of the former period $117,780,409, and of the latter $136,108,217. In ten he pointed out, the revenue of the country had doub- a result of the increase of population and the develop- of great enterprises, such as the Transcontinental Rail- The ordinary expenditure of 1911-12 was $98,000,000, nillion more than in 1910-11.

he expenditure, the minister added, had slightly more doubled in twelve years. In 1911-12, therefore, there surplus of $37,946,776 of revenue over ordinary ex- ture. At the same time there was capital expenditure 8,980,641. There was an outlay of $1,156,456 on sink- und, taking which into account the national debt was ed $122,591.

urning then to the fiscal year 1912-13, which closed arch 31, the minister estimated that the total revenue be $168,250,000, or an increase over the previous year re than $32,000,000. The increase in revenue for the ear almost equalled the total revenue of the country y years ago. The current expenditure for 1912-13 not exceed $113,250,000. There would thus be a sur- of $55,000,000 against outlays upon capital and special nts. These capital expenditures would probably not d $33,000,000, and, bearing in mind the investment of 0,000 in sinking fund, it would be seen that reduction net debt would amount to about $23,300,000.

Loans Had Matured.

That we have been able in a period of great financial gency," said Mr. White, "not only not to resort to the sted money markets of the world, but to reduce the debt Dominion, diminish our interest charges and enhance tanding of our securities, must be a matter of grati- on for this house and the people of Canada."

wo loans had matured during 1912, the first a loan of 1,870 at 3¾ per cent., of which £3,563,858 had been med in cash and £1,118,011 had been converted into 3½ ent. long term stock. The second was a balance of 5,000 outstanding of the 4 per cent. loan of December, This was paid off in cash. Owing to the favorable of the finances the government had been able to effect ing to the Dominion by the purchase, under the legis- of the present session, of 3 per cent. 50-year deben- of the Grand Trunk Pacific, guaranteed as to principal nterest by the Dominion in respect to the Western on of the National Transcontinental Railway, with re- to which the Dominion, by virtue of a judgment of the Council, was required to implement the net selling so that the full par value would be obtained and ap- in the construction of the railway.

ecurities of the par value of $13,961,006 had already purchased and further purchases would be made until hole issue was acquired. If the whole £14,000,000 au- ed by the statute was issued by the Grand Trunk Pa- as seemed likely, the government would eventually $35,000,000, par value, of these securities. The Do- on had by the purchase avoided the necessity of placing anteed securities on the London market at a price which have reflected upon the value of Canadian standard

Dollars Per Capita.

s a result of the reductions effected the net debt stood arch 31st last at approximately $316,619,460, or less two years' revenue, or $40 per head of the population. two loans remained to be provided for until 1930; one ,700,000 was a portion of the 4 per cent. loan issued in which would mature in October, and for the payment hich provision would be made. The other, a 3¾ per loan, was repayable on three months' notice between and 1919.

The finance minister dealt with the financial stringency ad, and the consequent high rates of interest which some e municipalities in Canada had been obliged to pay on issues of securities. Canadian standard 3½ per cent. had suffered a slight decline, but on the whole had tained a satisfactory level.

The fiscal year 1911-12 was characterized by a very con- able trade expansion, the aggregate of imports and ex- totalling $874,637,790, or over $105,000,000 in excess e previous year; and Mr. White was happy to say that rade of the fiscal year just closed showed a still greater ase, the total volume amounting to more than one bil- dollars.

Imports from the United Kingdom during the fiscal year 1913, amounted to $138,652,198 as compared with $116,906,212 in 1912; exports amounted to $177,982,002 as compared with $151,833,379, and the aggregate trade to $316,634,200 as compared with $268,739,561. Imports from the United States for 1913 totalled $435,783,343, as compared with $330,428,502; exports totalled $150,961,675 as compared with $112,956,295, while the aggregate trade amounted to $586,745,018, as compared with $443,384,795 in the year 1912. It would be observed that while imports from the United States had more than doubled in six years, our exports to the United States had increased but 50 per cent. But, as offsetting this so-called adverse balance of trade in favor of the United States of $250,000,000, there was to be considered the large augmentation of capital brought into Canada by American settlers.

The minister estimated that the 140,143 immigrants entering Canada from the United States last year had brought in capital and effects to the value of over $140,000,000.

Dealing with the fiscal year 1913-14, Mr. White said the estimates now before the House now provided for ordinary expenditure of $125,850,338, and capital expenditure of $53,301,845. Besides there would be suplementary estimates and other provisions.

West Indies Trade Agreement.

As had been generally known, continued Mr. White, there was no tariff revision of far-reaching character in contemplation. He thought that tariff modifications should be made sparingly, if at all, until the period arrived for a general revision of schedules. The major part of the changes now proposed were those rendered necessary by the trade agreement between Canada and the West Indian colonies.

The new tariff duties, announced by the minister of finance in his budget, compare with the old duties as follows. Only the preferential and general rates are given here, except where the intermediate rate alone is changed:

Cocoa paste, etc., unsweetened, increased from 2½ and 3 cents to 3½ and 4 cents per pound.

Cocoa butter, reduced from 2¾ and 3½ cents to 1½ and 2 cents per pound.

Cocoa paste, etc., sweetened, increased from 2¾ and 3½ cents to 3½ and 4 cents per pound.

Cocoa and chocolate powders, increased from 15 per cent. and 20 per cent. to 20 per cent. and 25 per cent.

Chocolate preparations and confectionery, N.O.P., a duty of ½ cent, in addition to the present 22½ per cent., and 35 per cent.

Rice, flour, sago, cassava and tapioca flour and rice meal, ¾ cent and 1 cent. Cassava and rice flour are added to the old item.

Arrowroot is added at ½ cent and 1 cent.

Rice bran is added at 12½ per cent. and 17½ per cent.

Cattle food, containing molasses, added, at 15 per cent. and 20 per cent.

Crude tonquin, vanilla and locust beans are still free, but cocoa beans, unroasted, are dutiable under the general tariff at 75 per cent.

Limes, out of the free list, now dutiable under general tariff, at 10 per cent.

Nuts, reduced from 1¾ cents and 3 cents to 1 cent and 2 cents.

Cocoanuts, N.O.P., per hundred, reduced from 65 cents and $1 to 25 cents and 75 cents.

Cocoanut, imported direct under British preference, formerly 30 cents, now free. General tariff unchanged. Cocoanut, dessicated, preferential rate reduced from 3 cents to 2 cents.

Copra, not prepared, new item, free under preference, ¾ cent under general, per pound.

Sugar, Refined and Raw.

Sugar, refined, up to 88 degrees, general tariff, reduced from $1.08 to 93 cents. For each additional degree, general tariff reduced from 1½ cents to 1⅓ cents.

Sugar, N.O.P., drainings, molasses, etc., reduced from 31½ cents and 52 cents to 25 cents and 31¼ cents.

For each additional degree over 75 degrees, reduced from 1 cent and 1½ cents to ¾ cent and 1¼ cent.

Raw sugar, when imported, to be refined, up to the quantity of Canadian beet sugar refined in 1912 and 1913. changed from 31½ cents to 25 cents. For each additional degree over 75 degrees, reduced from 1 cent to ¾ cent. This item to expire December 31, 1914.

Molasses, of cane, between 20 and 35 degrees, added, at 1½ cents under general tariff. Free under the preference.

Shredded sugar cane added, at 12½ per cent. and 17½ per cent.

Sugar candy, etc., N.O.P., intermediate tariff rate increased from 32½ per cent. to general rate of 35 per cent.

Lime juice and fruit juices, intermediate, raised from 17½ per cent. to 20 per cent. per gallon.

Papaine, added, at 17½ and 12½ per cent.

Raw lime juice, general tariff, 5 cents, formerly free.

Photographs, as news pictures, formerly 15 per cent. and 25 cents, now free.

Cassava root, unground, added to list, free.

Essential oils, N.O.P., general tariff, reduced from 10 per cent. to 7½ per cent.

Peppermint oil, reduced from 15 and 20 cents to 5 cents and 7½ cents.

Cottonseed oil, N.O.P., added, at 12½ per cent. and 17½ per cent.

Cocoanut oil, N.O.P., added, at 12½ per cent. and 17½ per cent.

Cement Duties Reduced.

Cement, Portland and waterlime, including weight of containers, reduced from 8 and 12½ cents to 7 and 10 cents per cwt.

Type casting and setting machines and parts, formerly 12½ and 20 per cent., now free.

Glassware and other scientific apparatus for hospitals, new item, free.

Traction ditchers for farm work, up to $300, formerly 27½ per cent., now free.

Cotton sewing thread, in hanks, reduced from 10 and 15 per cent., to 7½ per cent. and 10 per cent.

Asphalt, not solid, 12½ per cent., under preference 17½ per cent. under general new item.

Crude balata, new item, free.

Nitrate compounds, for manufacture of explosives, new item, free.

Sponges, of marine production, new item, 12½ per cent. to 17½ per cent.

Miners' rescue appliance, new item, free.

Such of the above goods as are taken from the unenumerated class were formerly dutiable at 15 per cent. and 20 per cent.

◆

CORPORATION FINANCING

National Drug Company to Increase Capital Stock—International Cotton Mills' Canadian Interests

The directors of the National Drug and Chemical Company have decided to call a special general meeting of the shareholders on June 3rd to sanction a by-law increasing the capital stock by $2,000,000, divided into two hundred thousand 6 per cent. cumulative first preference shares of £1 each, equal to $973,333 and 10,000 7 per cent. preference shares of $100 each. It is the intention to offer the first preference shares in England, (where all of the present first preference shares are held) some time in June, at a price equivalent to 105. The president, Mr. D. W. Bole, and the vice-president and general manager, Mr. C. W. Tinling, have just returned from England, where during a stay of one week they made all arrangements for the placing of the stock in that country.

International Cotton Mills.

Messrs. Lee, Higginson and Company, and Blair and Company, have arranged to purchase $4,000,000 5-year 6 per cent. gold notes of the International Cotton Mills, recently incorporated in Massachusetts. The notes are dated June 1, 1913, and will, it is understood, be offered at about 98, to yield around 6¾ per cent.

In the recent reorganization more than $6,500,000 cash has been supplied by the sale of these notes and capital stock thus providing for the payment of all the company's indebtedness and leaving it with about $3,300,000 net working capital. The company agrees to create no mortgage or to guarantee any securities, except for the acquisition of additional property, while these notes are outstanding.

Valuation of plants, machinery and net current assets aggregate 2¾ times the amount of these notes. Profits for the calendar year 1912 were 2 8-10 times the interest on the notes. The notes are part of an authorized issue of $5,000,000, and are callable on any interest date on or after June 1, 1914, at 101 and interest.

Interested in Canadian Companies.

International Cotton Mills has taken over substantially all the properties formerly owned by the International Cotton Mills Corporation and Consolidated Cotton Duck Company. It owns or controls 19 mills, containing 366,000 spindles, with a combined annual capacity of 70,000,000 pounds of finished product. It owns the Bay State Cotton Corporation, through possession of $945,000 out of $1,212,100 stock, and has a stock majority ownership in the Cosmos Cotton Company of Yarmouth, Nova Scotia, and Imperial Cotton Company of Hamilton, Ontario; the J. Spencer Turner Company of New York, and the Mount Vernon-Woodberry Cotton Duck Company, and owns the entire capital stock of the Boston Yarn Company.

All the mills owned or controlled are in operating condition, some $2,000,000 having been put into modern machinery and equipment in the last three years.

MODERN CHANGES IN LIFE ASSURANCE

Ratio of Expense to Premium Income — Guarantee Surrender and Loan Value—Companies' Attitude

BY R. W. BARTON, A.I.A.

A few years ago an American life company published statement that not 5 per cent. of persons carrying life a surance were protected for an amount equal to one year's i come. One of the reasons for this is the pressure by t companies through their agents of limited premiums, i. 20 pay life and endowment assurance policies instead whole life continuous payment policies. This suited t agent because of the larger commission. On the company side, however, it was probably due to their anxiety to hi the high expense rate at which business was conducted.

It is often the practice to compare two or more co panies by their ratio of expenses to premium income wit out investigating the incidence of the premium income Take, for example, two offices A and B. A writing on whole life continuous premium business while B writes pay life and endowment assurance policies—each offi writes an equal volume of business—obtained apart fro commissions—at an equal cost. It will be seen that sin the premiums are smaller in the case of office A, its ratio expenses to premium income is higher than in the case office B.

Tendency to Expansion.

This alone is, however, no evidence either of extrav gance of management by office A or of economy of office No office actually restricts itself in this way, but the in dence of the premium income does at times tend in the directions, and in judging this ratio it is important to wat the point.

This point is specially referred to because there is tendency to expansion in the whole life continuous premiu business and in non-participating policies, a tendenc which, if much emphasized, might show an apparent i crease in the expense ratio of the companies.

Guaranteed Loan and Surrender Value.

One of the great changes introduced in life companie the force of which will be felt more and more in the futur is the guaranteed loan and surrender value payable imm diately on proof of title. The boon that this is to the pu lic was perhaps first realized in the financial crisis of 190 when the New York life offices in one week loaned up security of their policies $16,000,000. What it cost t companies to do this at a time when the goldest of gilt edg securities were hardly saleable and the banks could get per cent. for 7 day loans, we are not told.

It is certain, however, that many business men realiz at that time a new value in life assurance and that ma large policies are being carried to-day in consequence. future emergencies, therefore, the companies must expect increasing strain in this respect. The companies are qu alive to the fact and will be prepared to meet it. It is a us ful illustration to the policyholder, however, that each exte sion of benefit by the companies costs something, and th what at first sight seems a small thing may in a mom become a vital question.

Tontine Dividend Policies.

It is interesting to note that while tontine dividend po cies are being forbidden in the States and discouraged Canada, they are being revived by British companies. marked difference in the British practice is, as is now t law in Canada, to declare at each periodic distribution surplus the amount of dividend provisionally allotted.

These dividends do not vest until the life assured atta the tontine age. In the event of the policy becoming a clai before the vesting, or tontine age, the dividends declare simply fall back into the surplus of the current period.

Had this custom always obtained in the States and this country, the Life Insurance Investigation Commissio ers would have had a very different problem before them was another case of "How oft the means to do ill dee makes deeds ill done." The possession of a huge unatta ed surplus is not good for either the management or t policyholders.

Perhaps the greatest modern change is the attitude the companies towards their agents and the public. In t last few years men carefully trained in at least one head fice are to-day carrying out a campaign of intelligent pu licity all over the country.

Both the agents and the policyholders are sharing this and it is producing results worthy of the foresight its originators. The most marked and perhaps most des able result being a continuous reduction in the lapse rate the districts in which these men are working. May the lig spread.

ATIONAL DRUG AND CHEMICAL COMPANY

Trading Profits Increased—Company's Expansion is Shown—To Increase Capital Stock

The financial report of the National Drug and Chemical npany for the year ended June 31st last, showed net trad- profits of $292,509, after all trade expenses, salaries to ectors and officers, interest on bank advances and inter- on real estate mortgages had been paid, and provision de for bad debts.

Net trading profits have practically doubled in four rs, as the following returns for four years ending June in each case shows:

1909-1910	$154,199
1910-1911	201,898
1911-1912	278,156
1912-1913	292,509

Surplus profits in the last year after payment of pre- ed stock dividends and writing down were equal to about per cent. on the outstanding common stock of $1,835,700.

ious Appropriations.

With a balance brought forward from the previous year $112,915, trading profits of $292,509 and a profit of $92,- on property sold, the directors had a total of $497,917 at r disposal. This was appropriated as follows:

Dividend, 1st preference stock, $112,468; dividend, pre- nce stock, $83,039; assets written down, $42,000; writ- off organization expenses, $11,000; to general reserve, ,000; to contingent account, $100,000; balance, February 1913, $99,409.

The annual meeting of the company was followed by a ference of the managers of the fourteen branches through- Canada. Only one change took place in the list of of- rs, Mr. W. W. Knox, of Montreal, retiring from the vice- sidency and the managership of the Lyman-Knox branch, account of ill-health. At the request of the directorate, remains on the board, while Mr. C. W. Tinling, the gen- manager, becomes also a vice-president.

Facilities are Proposed.

The directorate is as follows: President, D. W. Bole, ntreal; vice-president, Alfred B. Evans, Montreal; vice- sident and general manager, C. W. Tinling, Montreal; surer, W. S. Kerry, Montreal; secretary, W. S. Elliott, ntreal; directors, Messrs. L. W. Barker, Montreal; W. Bole, Toronto; William Henderson, Vancouver; T. M. derson, Vancouver; J. W. Knox, Montreal; James Mat- on, Montreal; L. J. Mylius, Halifax; W. C. Niblett, milton; Theo. H. Wardleworth, Montreal; and W. H. ob, Halifax.

The company's business has been everywhere outgrow- its facilities, and a number of new buildings are now er way or projected. In Toronto a six-story structure of forced concrete is being erected on Beverley Street, and ix-story warehouse is also being built on Beatty Street, couver. New warehouses are also about to be erected in nipeg and Edmonton, two large warehouses have been chased at Hamilton, and it will before long be necessary provide a new building in Montreal. The directors of the ional Drug and Chemical Company have decided to call pecial general meeting of the shareholders on June 3rd sanction increasing the capital stock by $2,000,000.

The company's present authorized capital is $5,996,667, which the following is outstanding: 384,524 six per cent. nulative first preference shares of £1 each, equivalent to 871,350; 12,274 seven per cent. preference shares of $100 h, equivalent to $1,227,400; and 18,357 ordinary shares $100 each, equivalent to $1,835,700.

◆

AMERICAN SECURITIES, LIMITED

The American Securities, Limited, was organized in April, 2, by Mr. Harry F. Stirk, president of the company, and company's business has been transacted from their head ce, at Moose Jaw. The subscribed capital of the company he time of organization was $100,000. The charter of the npany has been amended and the authorized capital of 0,000 increased to $250,000 at the beginning of this month. is stock was over-subscribed, no commission was paid for selling of this stock.

The officers of the company are as follows: President, H. F. Stirk; vice-president, Mr. L. M. Rosevear; secre- y-treasurer, Mr. G. A. Stirk; directors, Messrs. R. H. rke, W. F. Dunn, John W. Jermyn, and J. S. Holmested.

The business of the company is building fully modern ellings and the placing of loans on centrally-located busi- s and residential property in Moose Jaw, and on farm pro- ty in Saskatchewan.

CROP CONDITIONS

Winter Killed Wheat—April Weather Was Favorable—Dairying and Mixed Farming in Saskatchewan

The Census and Statistics Office state the condition of crops and live stock on April 30, as reported by agricultural correspondents throughout Canada, as follows:—

It is estimated that in Ontario about 18 per cent. and in Alberta about 43.5 per cent. of the areas sown to wheat last fall have been winter-killed. These percentages represent a deduction of 261,000 acres from the total area sown to fall wheat, viz.:—1,086,800 acres; so that the area remaining to be harvested is now 825,800 acres.

The condition of fall wheat on April 30 was in Ontario 83.4 per cent. and in Alberta 76 per cent. of a standard representing the promise of a full crop, the corresponding percentages on the same date last year being 71.2 for Ontario, and 76.8 for Alberta.

Above Last Year's Returns.

For all Canada the condition on April 30 of this year was 82 per cent. of the standard representing the promise of a full crop, or 101 per cent. of the average yield of the past four years. Last year at the same date the corresponding figures were only 72.6 per cent. of the full crop standard and 87 per cent. of the average of the three previous years.

Spring seeding has made good progress throughout the greater part of Canada, and was much further advanced at the end of April than it was on the same date last year. In the Maritime provinces seeding does not begin until May, but the weather was favorable and the indications were for an early spring. In Quebec there was also the prospect of an early season and about 12 per cent. of the total seeding was completed by April 30.

In Ontario conditions were more variable, but 40 per cent. of the total seeding was reported as finished. In Manitoba and Saskatchewan over 50 per cent., and in Alberta about 75 per cent. of spring wheat had been sown during the favorable weather of April.

More Attention to Mixed Farming.

In Saskatchewan there is an apparent tendency to sow less wheat and devote more attention to dairying and mixed farming. For Quebec, Ontario and the three North-west provinces the proportion of seeding completed on April 30 was for wheat 43 per cent., for oats 20.5 per cent., for barley 13.7 per cent., and for all crops 34.7 per cent.

About 22 per cent. of the area in hay and clover meadows is reported to have been winter-killed; but the average condition of these crops at the end of April was 89.6 per cent. as compared with 74.6 per cent. last year.

The condition of live stock remains generally satisfactory, being for all Canada over 90 per cent. of a standard, representing a healthy and thrifty condition.

◆

IN THE LONDON MARKET

The poor response which the public has made to recent offerings of the more or less gilt-edged securities which underwriters and bankers have endeavored to place is evident from the following table, which shows the percentage of a few prominent issues which has been taken up:—

	Offerings.	Taken up P.C.
Brazilian 5's	$55,000,000	6
Edmonton 5's	5,340,000	20
Grand Trunk Pacific 4's	10,000,000	20
Madras Railway 4's	12,500,000	10
Madeira Mam. 5½'s	8,000,000	13
New South Wales 4's	15,000.000	16
State of Bahia 5's	5,000,000	15
South African 4's	15,000,000	6
West Australia 4's	10,000,000	13

Of these nine loans, aggregating $135,840,000, the public actually subscribed for only $14,008,000, or slightly better than 10 per cent.

It is quite evident—and this is a phase of the matter which is receiving attention in London—that the public are loath to subscribe for securities which they believe underwriters can afford by reason of their commissions to sell subsequently at a lower figure than the issue price.

Regarding the heavy borrowing in April, The Financial Times of London says: "The persistence of borrowers is the more noteworthy as investors have apparently given a cool reception to some of the best loans. We say apparently, because we think the attitude of the investor does not imply any hostility to these loans or reflects on their status, but merely indicates that he is not unwilling to share part of the commission the underwriter secures."

CALGARY'S FINANCES

Mayor Sinnot's Recommendations — Sinking Fund Investment—Crop Conditions

(Special Correspondence.)

Calgary, May 13th.

Mayor Sinnot's report, and his recommendations following the recent trip east, have been presented to the finance committee and passed along to the legislative committee. The recommendations, if adopted, as seems quite probable, will bring about several decided changes in the methods by which the city's business has hitherto been transacted. The mayor reports that the majority of cities pay for their local improvements in from five to ten years, and he, consequently, advocates reducing the twenty-year period of Calgary's local improvements debentures.

With regard to the aggregate indebtedness of the city, it is pointed out that, deducting the public utilities owned by and operated by the municipality at a profit, the other indebtedness compares favorably with cities of similar population and conditions. It would be easier to carry on the finances of the city if these utilities were separate from the other departments, so the mayor believes.

City's Sinking Fund.

By virtue of the charter it has been permissible for the city in the past to loan its sinking fund by first mortgage on city property. "By this method we are taking for security the very property which the bond houses already hold as security for the money we have borrowed on the credit of the city's various improvements." It is suggested that the sinking fund be invested hereafter in some other class of securities.

That it would be wiser to protect the city's bond sales by purchasing any small amount of floating bonds which may be interfering with the sale of annual issues, is another change proposed.

"For a permanent policy in regard to carrying out the city's business, and particularly its financial interests, it is my opinion that the aldermen should be elected for a longer term, say, two or three years," says his worship as he concludes by mentioning that the aldermen should receive salaries, and that estimates for the year should be prepared in the previous September, thus giving the city's officials an opportunity to secure the necessary funds while the market is good.

So many of these recommendations are in line with what is demanded by the changing condition of the city that they are expected to receive, perhaps modified in some instances, a hearty support.

Approved of Expenditure.

By large majorities on a small vote the ratepayers approved of $881,000 expenditure included in five by-laws, of which the principal part, $527,000, is for trunk sewer extensions.

Crop conditions may be summed up in this way: Alberta is from four to five days later than last year. Rain and damp weather have held back the putting in of ten per cent. at least of the wheat which would otherwise have been sown, and this will be replaced with barley and oats. Everything is favorable to a good growing period: there is a sufficiency of moisture now for a month or more of average weather.

◆

IMPERIAL BANK

Net profits of $1,125,971 for the year ended April 30th are shown in the annual statement of the Imperial Bank of Canada, compared with $1,004,340 for the previous year. This is at the rate of about 16.58 on the paid-up capital stock at the end of the year, compared with 15.18 the previous year.

With the transferring of $1,000,000 to reserve that account is increased to $7,000,000. Paid-up capital is $6,788,169. A balance of $1,003,988 is carried forward.

Deposits are $56,802,111, an increase of nearly two millions in the year.

Total assets of the bank have increased in the year in greater proportion than liabilities, the former being $77,964,168, against $7[illegible],751,667. Cash reserves are $22,754,556, or 36.20 per cent. of liabilities, while total liquid assets are $34,904,450, or 55.50 per cent. of liabilities.

Call loans in Canada are $[illegible],135,507, slightly less than a year ago, while call loans abroad have nearly doubled to $2,000,000.

Business loans of $40,502,609 show a very slight increase during the year.

The annual meeting will be held May 28th.

◆

The Western Drydock and Shipbuilding Company, Port Arthur, employs 850 men.

WESTERN CANADA

Seeding Operations are Nearly Completed — Busines Conditions in Brandon and Regina

(Staff Correspondence).

Regina, May 13th.

Satisfactory weather has enabled the farmers of Man toba and Saskatchewan to make splendid progress with seec ing operations.

In the Portage la Prairie district the land was in goo condition to receive the seed, and most of the wheat seedin was finished. There is only little increase in acreage at man of the Manitoba points, but the provincial acreage will prob ably show an increase.

In the Brandon district the farmers were everywhere see on the land and seeding was almost completed. The cro is being planted under most favorable conditions.

Brandon's Street Railway.

Business in Brandon is steady and the city is becomin more and more a distributing centre. The streets of Brando present a fine appearance, and in a few days the municipa street railway system will be operation.

The Dominion Exhibition is to be held in Brandon thi year, and it will be probably the best agricultural fair hel in the west.

In the Regina district seeding was observed to b practically completed.

Saskatchewan's Capital City.

Saskatchewan's capital city has a stability which create confidence. It is the financial centre of the province an several head offices of financial institutions are located here

Managers of insurance, loan and mortgage companie report payments coming in fairly well, and considerably bette than was the case six weeks ago. A manager of an invest ment company stated to The Monetary Times that April pay ments due of $22,000 had all come in with the exception o $4,000, and that was the only amount he had overdue for las month. This, he considered, was a satisfactory return.

Business conditions which have been quiet show an im provement, and both wholesalers and retailers are satisfie with the outlook though payments are stated as somewha slow.

Railways and Civic Works.

The following civic works will be carried out this year:— Street railway extensions, $825,000; gas plant investigations $25,000; trunk sewer (48-inch), $240,000; waterworks exten sion, $200,000; storm sewer mains, $60,000; power plant (new one), $425,000; electric light extensions, $250,000; health an scavenging equipment, $117,000; road making, $22,000; fir hall and motor equipment, $60,000; footbridge over Canadia Pacific Railway tracks, $35,000; winter fair auditorium, $134, 000; police station and court, $180,000; hospital addition $125,000; complete subways, $37,000; remodel market build ing, $7,500; domestic sewer mains, $630,000; domestic wate mains, $420,000; paving, $580,000; paving (under old by law), $550,000, (debentures sold); concrete sidewalks, $115, 000; collegiate extension, $100,000.

As a railway centre Regina occupies a fine position. A three of the great transcontinental lines operate in and out o Regina. The Canadian Pacific Railway was the pioneer, bu the Canadian Northern and the Grand Trunk Pacific ha entered into an agreement with the city council to spend $1, 000,000 on the erection of a large hotel, which will contai 275 sleeping rooms. This railway will also erect a large st tion at a cost of about $500,000. About eight hundred feet o train sheds will be built adjoining the station so that all trai arriving in the city will be under cover.

Mayor Martin in welcoming the delegates to the Retailer convention held recently in Regina, pointed out the agricultur possibilities of this great province. Said he: "This countr has been keeping too many eggs in one basket. The poss bilities were here to make Saskatchewan the wealthiest pro vince in Canada. Farmers were beginning to realize the fac that it was well to raise other things besides wheat."

◆

DIRECTORS HAVE NOT INVITED PROXIES

Mr. H. B. Mackenzie, general manager of the Bank of British North America, advises The Monetary Times that his recent statement before the banking and commerce committee, that the directors of the bank, at the annual meeting, vote in respect of proxies from other shareholders as well as upon their own shares, was made under a misapprehension. The directors, in fact, have not invited or accepted proxies and, with regard to the appointment of auditors and other matters, they vote only upon their own shares.

BRAZILIAN STOCK ISSUE

ceeds to Repay Bank Loans—Extensions of Company's System—Increased Earnings Expected to Pay Dividend

The Brazilian Traction, Light and Power Company has ed an explanation to its shareholders of its forthcoming 000,000 par value 6 per cent. cumulative preferred issue. Mr. J. M. Smith, secretary of the company, states in circular:—

"I am directed to inform you that such increase is re- d for the purpose of providing for the financial require- s of the Rio de Janeiro Tramway, Light and Power pany, Limited, and the Sao Paulo Tramway, Light and r Company, Limited, of both of which this company is principal shareholder, owning about 99 per cent. of the al stock of the latter.

'The tramway, electric light, power, gas and telephone ces of these two companies are extending rapidly, and s been necessary to provide funds for the extension and gement of the systems.

irements of the Company.

'Proceeds of this issue will be used to repay bank loans, acted for the above extension and enlargements, and ovide moneys required for the completion of the works under construction, including the tunnel carrying the of the Prirahy River into the Rio das Lages reservoir the new 32,000 horse-power hydro-electric installation r construction for the past two years and will be com- d by next July. Additional water obtained is capable eveloping about 70,000 horse-power, of which 30,000 -power will be utilized at once, and the remaining 40,- horse-power held in reserve for future requirements. the hydro-electric installations of the Rio de Janeiro way, Light and Power Company the total capacity will ,000 horse-power.

'Increased earnings from sale of this power and from extensions will greatly exceed the amount required to the dividend on the preference shares.

ct to Shareholders' Authority.

'Without taking these increased earnings into account ncome of the company available for dividends for the nt year should be at least £1,800,000.

'Subject to the shareholders authorizing its creation issue of preference shares has been underwritten and be publicly issued in London at par, Canadian terms, before June 1, 1913, and shareholders of record May 913, who so desire will be given a preferential allotment e preference share for each fifteen ordinary shares held em, provided they notify the company on or before the of issue.

'Subscribers will receive on July 1 interest of 1½ per Regular quarterly dividends will be October, January, and July.

'The company cannot issue any debentures or mortgage s without the consent of two-thirds of the preference s.

'Shareholders who do not desire to exercise their privi- of subscribing for the new shares, may assign their s up to date of closing of the issue."

◆

SASKATCHEWAN'S CROP CONDITIONS.

As compared with the average for the past seven years, atchewan's crop of 1913 will have a very fair chance to re in good time. According to the provincial records ng became general in 1909 about May 10th, and it will emembered that the crop of 1909 was the biggest crop ood wheat this province ever reaped. There has been ccessive amount of moisture in the ground this year, due art to the late rains of 1912, and to the heavy snow- of February and March of this year. This filled up the hs and the streams and soaked the land, so that rea- bly dry conditions will be considered desirable for the month. It will be noticed from the reports received by Saskatoon Phœnix that no very large amount of grain ing held for immediate shipment: that the car shortage nger exists; that the elevators are not loaded up, and not more than 25 per cent. of last year's crop is in ge, either in elevators and granaries. The railways a great record during the past season in the way they led the big grain crop of 1912. Reports would indicate there is an increased acreage of grain, somewhat more heat: possibly about the same of oats, with less of flax, an increase possibly for barley.

DEVELOPMENT INTERESTS NEW ENGLAND

Opportunities for Expanding Trade—Excess Railroad Business—Transcontinental Lines Must be Supported

New England has a greater interest in Canadian development than any other section of the country, and if New England would stop listening to political agitators, says the Wall Street Journal, she might hear of opportunities for expanding trade with her northern neighbor.

Three great transcontinental lines in Canada are each expending money by the hundred million, and each of them needs trade and commerce through New England. But how helpful is it to trade to have American politicians endeavoring to put Canadian railroad officials into American jails? Canada needs men and money and winter ports and outlet. Canadian railroads have a better credit than American railroads because they can better command foreign capital and have government protection instead of government prosecution. They are therefore for New England insurance for future low rate transportation, if reciprocal instead of antagonistic arrangements can be made.

Canada's Tremendous Development.

"From all over the world immigration is flowing into Canada. Three thousand emigrants, all with money in their pockets, landed one day recently at Montreal.

"Yet notwithstanding Canada's tremendous development, there are not enough rails or equipment in the Dominion to do the business offering. The Canadian Pacific is still a single track north of Lake Superior, and recently from Ottawa three-quarters of the business offered the Canadian Pacific had to be moved through Chicago. It will be 1915 before the Canadian Pacific is double-tracked from ocean to ocean.

"Meanwhile the Canadian Northern, which formerly was able to raise its money at 3 per cent. under government guarantees, and later at 3½ per cent., must now go before the Canadian parliament and ask the government to guarantee another $50,000,000 at 4½ per cent.

Transcontinental Lines Must be Supported.

"It is generally realized throughout Canada, not only by the financial and transportation and official interests, but by the people as well, that the development of Canada and her future depend entirely upon the government support given to the railroads that are now opening up her great territories. Her three transcontinental lines must be given every possible support to insure the country's proper development.

Nevertheless, money is tight in Canada and the need is almost universal there for both men and money."

Drummond	30.5
Kerr Lake	30.3

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions Dividends and Future Plans

Toronto Paper Manufacturing Company.—Toronto Paper Manufacturing Company, Limited, will hold their annual meeting on May 21st in the Dominion Bond Building, Toronto.

Brazilian Traction Company.—Brazilian Traction Company's approximate gross earnings for the week ended May 3 are $432,194 against $377,507 in the same week last year, an increase of $54,687.

Northern Ohio Traction and Light Company.—The gross earnings of the Northern Ohio Traction and Light Company for the week ending May 7th were $47,994.78, increase $4,288.20, and from January 1st, $821,895.08, increase $66,892.31.

Canadian Western Natural Gas, Light, Heat and Power Company.—The earnings of the Canadian Western Natural Gas, Light, Heat, and Power Company for the month of March were $81,714 being at the rate of $980,570 per annum. The company's available supply of gas at the present time is 170,300,000 cubic feet per day.

Canadian Western Lumber Company and Columbia River Lumber Company.—The lumber manufactured during March by the Canadian Western Lumber and Columbia River Lumber Company amounted to 15,500,000 feet, an increase of 1,374,000 feet, while the quantity sold amounted to 21,156,000 feet, an increase of 5,182,500 feet, the price realized being $367,611, an increase of $99,906.

Detroit United Railways.—Detroit United Railways for the first quarter of 1913 shows a remarkable increase in gross, net and surplus earnings. The gross earnings for the quarter were $2,913,589, an increase of $445,378 over the first quarter of 1912. Operating expenses increased $348,363, leaving the total income for the company at $987,450, an increase of but $247 in interest and taxes, leaving the surplus applicable to dividends on the stocks for the quarter at $450,036, an increase of $105,503, or 36 per cent.

Western Canada Flour Mills, Limited.—The assets and good will of the Brackman Ker Milling Company in Alberta and British Columbia have been acquired by the Western Canada Flour Mills, Limited. The deal involves about $1,000,000. Mr. S. A. McGaw, of Winnipeg, said the assets acquired comprise an oatmeal mill at Edmonton, an oatmeal and flour mill at Calgary, an oatmeal mill at New Westminster, and an oatmeal mill at Victoria. It is proposed to enlarge the Calgary mill immediately to a capacity of 1,500 barrels daily.

Trust and Loan Company of Canada.—The half-yearly reports and accounts of the Trust and Loan Company of Canada for the six months ending 31st March last are being circulated in London, and, according to a private cable received at the head office of the company, they show that the net profits for the past six months amount to $301,733. The directors have recommended a dividend at the regular rate of 8 per cent. per annum, and have increased the reserve funds to $2,122,000, being an increase for the past half-year of $133,800.

Granby Consolidated Company.—It is understood that the stockholders of the Granby Consolidated Mining, Smelting and Power Company, Limited, who were recently offered the privilege of subscribing to the $1,500,000 six per cent. fifteen year convertible bonds, and known as series A, at par and accrued interest, have subscribed for about ten per cent. of the issue, the balance going to the underwriters. The total authorized issue of bonds amounted to $5,000,000, of which $3,000,000 are to remain in the company's treasury for future needs. They are secured by a mortgage on all the company's mining and smelting properties in British Columbia.

Murray-Kay, Limited.—The balance sheet of Murray-Kay, Limited, for the year ended January 31st, shows a gross profit on sales of $651,889, as against $631,760 last year, which was the first year of combined operation. The expenses, however, were $27,000 heavier, so that the net profit for the year dropped from $212,241 in 1911 to $204,375 in 1912. This is practically 14 per cent. earned on the preferred stock, as against the 7 per cent. paid. The profit for the year was appropriated as follows. To reserve for bad and doubtful debts, $5,473; to reserve for depreciation, $6,282; to written off catalogue account, $20,000; to organization expenses written off, $5,000; to dividends Nos. 6, 7 and 8, $77,096.25; to reserve for dividend No. 9, $25,698.75; t balance to surplus account, $64,825.80. Total, $204,375.

Dominion Iron and Steel Corporation.—Records wer made in the pig iron, steel ingots and all wire departments including the wire drawing, wire and galvanized nails an wire mills of the Dominion Iron and Steel Corporation. Th total shipments were also very large for the month, and th total was only a shade below the highest record in stee shipments. The following are the figures, in tons, of th output in the various departments of the steel plant for April

Coke	54,010
Pig iron	32,680
Steel ingots	31,400
Sleel blooms	26,550
Steel rails	12,770
Steel billets	7,765
Rods	3,550
Total shipments	32,330

Consolidated Mining and Smelting Company.—Th Consolidated Mining and Smelting Company of Canada Limited, ore receipts at Trail smelter for week ending Ma 2 and from July 1 to date, in tons:—

Company's mines—	Week end May 2.	July 1 to date.
Centre Star	3,064	134,012
Le Roi	1,050	41,355
Sullivan	864	27,788
No. 7	32	2,182
No. 1	....	1,016
St. Eugene	....	1,218
Molly Gibson	....	1,277
Richmond-Eureka	....	960
Other mines	1,537	70,581
Total	6,547	280.393

Bank of Montreal.—The half-yearly statement of th Bank of Montreal, covering up to April 30, shows profits fo the half-year, after deducting charges for management an making provision for bad and doubtful debts, were $1,299,646. This compared with $1,236,399 a year ago, shows gain of $63,307. When the condition of the world's mone markets for this period of six months is considered, th bank's position and report are the more remarkable. Th percentage of liquid assets is strong. Assets total $245,435,044, compared with $236,927,519 a year ago. Curren loans show a big gain. The 1913 figures are: $129,457,03 43; 1912, $115,157,029.55, the increase thus being $14,300,003.88. The balance carried forward to profit and loss i $892,461.36, compared with $696,463.27 a year ago. Tw dividends and a bonus of 1 per cent., payable June 1, 1913 took $960,000. Last year dividend disbursements w $945,780.70; last year, $265,000 was expended on bank pr mises; this half-year the provision for bank premises tota $250,000.

◆

CAPITAL CHANGES

The following companies have increased their capita stock: Dunlop Tire and Rubber Goods Company, Limited from $993,000 to $1,300,000, by the issue of 3,070 shares o new preference stock of $100 each; the Walkerville Ligh and Power Company, Limited, from $25,000 to $100,000, b the issue of 750 shares of new stock of $100 each; th Hercules Garment Company, Limited, from $20,000 to $50,000, the increase consisting of 300 shares of $100 each; th Security Lumber Company, Limited, from $500,000 to $750,000, the increase consisting of 2,500 shares of $100 each; the Maritime Nail Company, Limited, from $250,000 to $3,250,000, the increase consisting of 30,000 shares of $100; the Carritte-Paterson Manufacturing Company, Limited, from $50,000 to $300,000, the increase to be divided into 2,500 shares of $100 each.

◆

The Dominion Bond Company have opened offices at Winnipeg where Mr. W. F. Irwin is in charge. The offices are located temporarily in the Carlton Building, Portage Avenue, until the permanent quarters of the company in the Electric Railway Chambers are completed.

CANADIAN COTTONS, LIMITED

pany Considered Deferred Action re Dividend Ad-isable—Principal Returns—Analysis of Statement

Monetary Times Office,
Montreal, May 14th.

The annual statement of the Canadian Cottons, Limited, just been published. The figures are for the year ended h 1st, 1913, and show that this was the company's most essful year. The earnings of the year, after making ance for depreciation and bad debts, bond interests and rred stock dividends were sufficient to provide a surplus l to 7.55 per cent. on the common stock of the company. compares with about 6.42 per cent. of a year ago.

Notwithstanding the surplus thus shown, the directors de- l not to declare dividends on the common stock at the nt moment. The reasons for this decision are that the pany is experiencing an active demand for its products, ctive in fact that it is unable to turn the goods out fast gh. Under the circumstances, it is considered advisable more machinery should be added, and the directors are e opinion that this machinery had better be paid for out e surplus than to unnecessarily increase the [illegible]d or issues, so that it has been decided to defer declaration e dividend, which, on the strength of earnings alone, d be justified.

Years' Returns.

The results of the past year, as compared with those of ous year, will be found in the following table:—

	Year ending March 31st, 1912.	1913.
for the year	$3,859,801	$4,407,164
value of products in process of nanufacture	1,247,336	766,998
	$5,107,137	$5,174,162
inventory at beginning of year.	1,259,464	1,247,337
	$3,847,673	$3,926,825
of raw material manufacturing, narketing, administration, re-pairs, maintenance and de-preciation	3,413,673	3,455,322
profits for a year	$ 434,000	$ 481,503
als, Mount Royal Spinning Mill, etc.	155,977	167,008
receipts	$ 589,977	$ 648,511
rve for bad debts	....	20,000
	$ 589,977	$ 628,511
l interest	201,000	207,500
aining for preferred and com-mon dividends	$ 388,977	$ 421,011
erred 6 per cent. dividend	214,500	215,798
lus available for common stock dividends out of operations of year	$ 174,477	$ 205,213
lus brought forward at be-ginning of year	426,283	600,760
l surplus carried forward	$ 600,760	$ 805,973

As will be seen, the sales of the year were about $550,000 than a year ago. On the other hand, however, the pro- s in processes of manufacture were about half a million rs less than the previous year.

nges and Appropriations.

In the statement of profit and loss published a year ago, nention was made of provision for bad debts, while this the sum of $20,000 has been appropriated for that pur- . This added to the $20,000 already at the credit of re- e for bad debts, brings total of this account to $40,000.

There was nothing in last year's statement to indicate any allowance was made for depreciation. In the manu- ring account, this year, an allowance for depreciation has made, although the amount of such allowance is not fied.

To what extent the surplus earnings for the year would been effected had the statement been prepared on the of that a year ago is difficult to say, but the probabilities that the surplus would have been in excess of 8 per cent. is of no importance, save from a standpoint of compari- inasmuch as the appropriations mentioned are essential.

Bond interest, as will be seen, was $6,500 more during the past year than in the previous year. An adjustment in the bonded indebtedness took place during the year. A year ago there was $1,850,000 of 6 per cent. bonds of the Canadian Colored Cotton Mills Company, and $1,800,000 of the 5 per cent. bonds of Canadian Cottons, Limited. This year the bonded indebtedness amounts to $5,000 of the Canadian Cottons 5 per cent. bonds.

Current liabilities now amount to $1,535,186, this being $471,977 less than a year ago. This reduction takes place through a falling off of $180,000 in open accounts, and of $25,000 interest and dividend accrued, and of $480,000 in general bank advances, there being increases to the extent of $120,000 in secured bank advances, and of about $100,000 of bills payable.

Assets and Indebtedness.

Total current assets now amount to $2,248,343. The cash is about the same as a year ago, while open accounts and bills receivable amount to $702,701, being about $120,000 more than a year ago. The inventory is now $1,534,230, being about $220,000 more than a year ago. In addition to this the sum of $796,300 is available in bonds against liability, and there is also $463,800 in stocks in other companies, and advances including discount of bonds.

The entire indebtedness to the bank by way of general loan account is $542,073, and this is more than covered in the value of the raw cotton, namely, $550,190. Mills, properties, and water powers, etc., now were taken in at $10,249,715, or only $28,000 more than a year ago.

The Canadian Cottons, Limited, is the new name for the Canadian Colored Cotton Mills, which for many years did a successful business in Canada, and which a few years ago took over the Mount Royal Spinning Company, of Montreal, and the Gibson Cotton Company, of Marysville, N.B., and gave up its old title.

◆

NEW PROVINCIAL TREASURER

Hon. I. B. Lucas has been sworn in as provincial treasurer of Ontario. Mr. Lucas takes up the treasury portfolio in succession to the late Col. Hon. A. J. Matheson.

◆

GOODWIN'S, LIMITED

Monetary Times Office,
Montreal, May 15th.

A satisfactory report of the business of the past year was presented at the annual meeting of Goodwin's, Limited, in Montreal. The statement was for the fiscal and calendar year 1912, and the company was able to show gross profits of no less than $1,194,744. After bond interest was met, net profits of $162,632 were shown. The report of Mr. W. H. Goodwin, managing director, after setting forth the above, says: "From this net profit, dividends have been paid and depreciation allowed to the amount of $102,493.82, leaving a balance of $60,138.15, which balance has been placed to the credit of surplus profits, bringing the latter up to $289,657.83."

The store now has forty-two departments, most of which are now on a paying basis, and steps are being taken to place the exceptions on a paying basis as quickly as possible. The size of the buildings, the magnitude of the plant and the extent and value of the business property, the managing director pointed out, were on a par with the world's famous stores and the problem which was now being solved was to get a volume of business adequate to the fixed charges. During the year 1912, the business of the company had increased 25 per cent. over the previous year, so that the problem was nearing solution. In wages, alone, the firm paid out during the year the sum of $653,272.

Mr. D. Lorne McGibbon, president of the company, made his report and pointed out that the net profits were equal to about 13 per cent. on the preferred stock, and after dividends on this were paid, the surplus remaining was equal to about 4 per cent. on the common stock.

The officers were re-elected, being Mr. McGibbon, president; W. J. McConnell, vice-president, and Mr. Goodwin, general manager.

◆

Stratford, Ont., ratepayers carried a by-law guaranteeing the bonds of the Stratford Mill Building Company for $30,000, and fixing the assessment at $12,000 for ten years, in return for which the company agree to erect a $60,000 plant for the manufacture of flour mill machinery, and to employ 50 hands at the start, increasing to 100 within three years. The old plant was destroyed by fire late last fall.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

V.

Stocks, Loans, and Real Estate

By M. P. LANGSTAFF, A.I.A., F.A.S.

By their nature, stocks possess the disadvantage, from an insurance standpoint, of unstableness in value. In times of severe depreciation the statements of a company with large stock holdings would be seriously affected, and it is difficult to value stocks by an "averaging" method and impossible to use the amortization plan. Stocks, as a class, yield higher rates of interest than bonds or mortgages; they sometimes offer great prospects of appreciation.

They do not rank with either bonds or mortgages from the standpoint of safety, although a well-selected cumulative preferred stock often ranks with the best bonds. Indeed, if a portion of the extra rate of interest yielded be looked upon as a "risk premium," the preferred stock of a well-established, prosperous concern might, as a profitable, conservative investment, rank ahead of the same company's bonds. However, it should be remembered that a corporation's bonds always have precedence in respect to security and dividends over its stocks, and are always safer, using the word in its strictest sense. As a rule, they are too speculative, particularly in the case of the common stocks, which depend almost entirely on the future success of the business. In a great many cases the common stocks do not represent actual money paid to the company, but may belong to the "watered" variety. A life company should avoid any stock where there is the slightest suspicion that everything is not "above board," and they are, indeed, well protected from that class of investments by certain prohibitory insurance laws.

Stocks have another serious objection, that their purchaser becomes an owner in the business, and if an insurance company obtained large holdings in any corporation, serious complications might arise.

Stocks, more than any other class of security, offer temptations to the seller or purchaser by way of speculation. The gambling instinct is inherent in all of us, and the management of any insurance company cannot be too careful in eliminating this element from its "make-up." At the same time, where the prices of securities that are perfectly sound in every way have drpoped far below their intrinsic values, as, e.g., in the panic of 1907, I think such an opportunity to make large profits should not be ignored.

As to Policy Loans.

They form what may be called a "passive" investment; i.e., they are not sought after nor controlled by the management. If, however, the company finds that policies with loans against them have a greater tendency to lapse than is otherwise the case, they can do much to discourage the practice through their agents, literature, etc.

While the loan feature can be used as a canvassing argument, yet the wisdom of this course is doubtful.

If its policies are borrowed upon to any extent, the company may find it necessary to keep a larger proportion of its funds in easily-convertible securities, with a corresponding reduction in its interest earnings.

The loan privilege may cause trouble in a peroid of great financial stringency. The demand will be greatest during such a period, and securities can then only be disposed of at a loss. It is, therefore, well to have a clause in the policy deferring the loan for a short period at the option of the company.

The rate of interest charged should be as high or higher than that yielded on its funds, and elastic, so that it can be kept above the market rate. With companies earning 7 or 8 per cent. on their funds, the former course will be very objectionable to policyholders and discourage borrowing. On the other hand, it will lead to a higher rate of lapse among those who do borrow, and will also afford an argument for rival agents. In many cases, however, the rate of interest chargeable on policy loans is fixed or limited by insurance laws. The security for these loans is absolute, and, as there is practically no expense in the handling of the loans, the gross rate may be looked upon as a net rate.

As to Collateral Loans.

The rate of interest is low; they require considerable watchfulness; they are a safe investment, provided sufficient margin is allowed. They afford a favorable opportunity for getting a fair interest rate on funds awaiting permanent investment, and should be used only for this purpose. It might be deemed advisable, however, to have such liquid assets as would enable a company to meet demands in excess of its current receipts, and investments in "call" loans would come in very timely in case of sudden and abnormal demands for policy loans or cash surrenders in a period of financial stress. A company might thus be in a position to meet such demands without disturbing any of its permanent investments.

Office premises are desirable when a company is large Any unused portions can be let, and the company has th additional advantages given by the prestige and greate convenience that can be obtained from a permanent hea office building. It is a mistake for a young company t invest in an expensive head office building. In this connection Zartman says: "Those companies who have had othe weak elements in their management have been ruined by th heavy burden of a costly home office, and in a number o cases these magnificent buildings stand not as monument of strength, but rather as tombstones to departed companies."

The interest rate earned has been very unfavorable, bu there are reasons for this. Companies have not been permitted to invest freely in real estate. Consequently, the majority of real estate holdings consists of office buildings an that acquired under foreclosure. It is, therefore, hardl reasonable to condemn real estate investments on this basis Had the companies been able to invest freely in real estat a much better showing would have been made, as instanc by the French companies. And again, companies may hav had losses on account of foreclosed mortgages, which loss may have been charged against real estate instead of agains the mortgage account. Another reason for the low interes rate shown may be adduced from the practice of some companies of charging themselves with a very low rental for th space occupied by themselves in the head office building, thu making the return on their real estate apparently small.

But it must be admitted that real estate calls for considerable care, and depreciation losses are also great. Th net interest rate earned is, therefore, considerably below th gross rate.

In a growing and prosperous community no doubt grea profits could often be made through real estate investments but such investments lead to much speculation, and th present restrictive laws seem just.

Touching lightly on the subject of legislation, I may stat that there seems to be a growing tendency in the State and Canada to restrict the freedom of investment. Perhap those laws, similar to the Robertson law of Texas, tha endeavor to compel companies to invest given proportion of their funds in certain districts, are the most to be feare In this connection Mr. R. L. Cox says: "During 1911 measures were introduced in four states to restrict the investments of foreign insurance companies geographically alon the lines of the Robertson law of Texas. . . . When th Robertson law was enacted by Texas in 1907, twenty-thre —nearly all—of the leading foreign life insurance compani doing business in that state retired. This law requires tha 75 per cent. of the reserves set aside to meet obligations t Texas policyholders shall be invested in certain specified loc securities. The avowed object of the law was to comp foreign companies to make investments in Texas. This man made statute utterly ignores the natural law of supply an demand, affecting the flow of investments. It also take from the managers and trustees of life insurance funds th right of exercising their judgment as to investments although it does not relieve these managers and truste from being responsible if the compulsory investments shou prevent their companies from meeting the test of solvenc . . . Beginning with 1907, the subject of such compulso investment has been considered in twenty-four states, eith in the form of legislation actually introduced or talked seriously among state officials."

In Great Britain the companies are not restricted i their investments. As one writer has expressed it: "Freedo and publicity is the English theory; paternalism and publicity is the United States result; supervision and publicit is the Canadian practice." Personally, I hold the opinio that broad, general laws should exist, limiting the field investment. It might be argued that such laws are mor necessary in the case of the American companies, where competition is more rife, and managers more eager for leadership, than in the case of their more phlegmatic Britis cousins who err, perhaps, on the side of over-cautiousnes and over-conservativeness. However this may be, it seem right that the powers of investment should not be restric within too narrow limits. New forms of safe and advantageous investments are constantly arising, and some latitude should be allowed to the sagacity and ingenuity of th management. A too limited area would lead to over competition in certain lines of investment, with consequent decrease in the rate of interest obtainable. Since, however life company's funds are to a certain extent in the nature "trust funds," the law should see that the investments made in securities of unquestioned value, and that the elemen of speculation is entirely eliminated.

Mr Rose, in the proceedings of the international congress of actuaries, says: "In the end, manifestly what tel's in the choice of investments, as in every other departmen of the life insurance business, is wise and prudent management, and no general principle can take its place; neither can hard and fast rules be laid down for different companies with different conditions, or for the same company at different periods in its history, when conditions may hav changed for it. Still, it does seem, especially in view slation already enacted and certain tendencies of the s and of the life business, that United States companies east cannot afford to ignore the lessons taught by the t fluctuations in the ordinary stock exchange securities ne last two or three years, and should lay their plans to d as far as possible the inconveniences and dangers ndant upon such fluctuations whenever they may occur. e other precautions should not be neglected, the most tical way of accomplishing this end to a sufficient extent d appear to be to increase considerably the investments ood mortgages, and, if the experience of the past is to epended upon, another important advantage, that of an ease in the rate of interest earned, will be gained at the time."

But under ordinary conditions we shall find, in the re, as in the past, that different companies will differ ly in their investment views. Some will prefer to paddle investments crafts in the placid lake of the aristocratic l: others will choose an unsensational course through quiet but substantial middle-class sea of the mortgage; still others, so far as permitted by law will venture near shoals of the tantalizing, beckoning stock.

LONDON AND LANCASHIRE FIRE INSURANCE COMPANY

The London and Lancashire Fire Insurance Company re- y held their fifty-first annual meeting. Mr. J. H. Clayton, chairman, in moving the adoption of the annual report d. The year 1912 has been a successful one for the com- , and just equalled that of last year, which was the Lon- and Lancashire's jubilee year.

In the fire insurance world during 1912 the home field was cially quiet. In the foreign field, the United States open- ith a heavy record, but it improved as the year went on, in the end, has added substantially to our profits. Con- ations were unimportant throughout, and, with no single in excess of £10,000, we have made good average profits world over. The net result from our fire business is not as good as in our Jubilee year, but, after making the l reserve of 40 per cent. for the increase in our premiums, after deducting income tax on our profits, we still show a underwriting surplus on the fire account for the year of ,585, or nearly 14 per cent. of the premiums, which, con- ing the accentuated competition from old and new ces, and the steady increase in the cost of obtaining and ning our business, may be regarded as a high standard h we cannot always expect to reach.

It was only in 1901, twelve years ago, that we commenced any accident business at all, and our marine account dates from 1907. And yet, on the accident account, we make, in 1912, a real underwriting profit of £59,293, and e marine department a real profit of £38,080—together st £100,000. Indeed, the percentage of profit on these tional departments is such that we make over 13 per cent. he entire premiums of the company—now amounting to 35,703. Whilst, therefore, the fluctuations and the diffi- es of insurance business are not diminishing, but rather contrary, and whilst it may be that one of our three de- ments may some day show a loss, we do feel that these tional sources of revenue and profit for the company, h have been gradually acquired from one source or an- r during the last 10 or 12 years, will steadily produce in summary of the annual record of our business a sub- ial contribution towards our net available surplus.

Mr. Rutter, the general manager, in responding to a vote hanks, said:—"The first shareholder whom I met after publication of our accounts remarked to me that we seem- have stated our results with great simplicity, but that ssumed the task of earning those profits had not been such a simple matter. He was, of course, right. As dy has been said, it means hard work, and for that work are largely, if not chiefly, indebted to those who year in out have supported me in the charge of this company— sub-manager, our assistant-secretaries, our accident man- , our marine underwriter, our London manager, and all army of workers throughout this country and abroad."

Alfred Wright, the Canadian manager, is in charge of the pany's activities throughout the Dominion, and his efforts d to that success so felicitously referred to by the general ager.

The number of directors of the National Tube Company, ited, has been increased from three to five.

VALUE OF LIFE ASSURANCE

XII.

A Life Policy as Collateral Security

BY C. A. HASTINGS.

In the United States of America and in Germany life assurance is a usual proceeding because it is thought as simple, as natural, as common, as fire insurance is in this country. There are two reasons why a life policy is so advantageous as collateral security, because,

(1) It has a definite cash value,
(2) It can be immediately realized.

This is the position of the company when the policyholder applies for a loan. Out of the premiums which the company has received, some of it has been spent in administration and the rest is invested and is earning interest; similarly with the premiums that come due and interest on same.

Holding Money in Trust.

Therefore the company is holding in trust money for the policyholder, and when he cashes in his policy, the company hands over the money standing to his credit. It comes down to this then, when a policyholder borrows on his policy, he is borrowing money on the security of his policy which will be paid to him (or his beneficiary) at some later date—this loan being less than the surrender value, the security to the office is complete.

Then again the policy is so simple to transfer, and it is —in cases of a policyholder of good repute—more especially advantageous, for then it is only necessary to make provision in the event of the death of the borrower.

Twenty Payments with Profits.

To the man who is in the happy position of not having to get the most protection for the least money, the best policy is the twenty payment life policy with profits. This costs a proportionately higher rate than whole of life with profits, but, on the other hand, there is a higher cash value. He never can make more than twenty payments, and it can also be used as security for a loan if the guarantors of the premiums are satisfactory.

Some of my readers may say that all these points are obvious—that is quite true—but they do not become so until they are pointed out. "The best way to conceal a letter is to put it in a prominent position, because then nobody would see it," was once written by a well-known author. There are other things to which that might be applied, and life assurance is one of them.

The following articles in this series have already appeared:—

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended May 9th: Trethewey, 49,550; Nipissing Reduction, 52,691; Dominion Reduction, 87,311; Hudson Bay, 63,225; McKinley-Darragh, 64,359; Coniagas, 201,615; Cobalt Townsite, 104,540; Kerr Lake, 60,210; total, 683,501 pounds, or 341 tons. The total shipments since January 1st are now 14,025,069 pounds, or 7,012 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

In a pamphlet issued by Mr. Andrew Miller, Calgary's industrial commissioner, openings for the manufacture of many lines of products, including the following, are shown: Farm machinery, construction machinery, building material, bags, binder twine, implements, boots and shoes, tanned leather goods, gloves, knitted goods, overalls, etc., flax-straw products, tar and building paper, paints and oils, oil products, food products, flour and oatmeal, packing and packers' products.

ONE HUNDRED AND ELEVEN NEW COMPANIES

Many Corporations for Development of Natural Resources—Fifteen Millions of Capital

Charters have been granted to one hundred and eleven companies this week, the total capitalization of which is $15,363,650. The largest corporations are:—

Company.	Capital.
Peace River Mining and Milling Company, Vancouver	$2,000,000
Simplex Puncture Proof Tire Company, Toronto	1,000,000
Sea Products, Toronto	1,000,000
Public Service Corporation, Vancouver	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Ontario	26	$3,881,000
Quebec	20	2,878,500
Alberta	20	1,315,150
British Columbia	13	4,725,000
Saskatchewan	12	940,000
Manitoba	9	805,000
New Brunswick	8	569,000
Prince Edward Island	2	200,000
Yukon Territory	1	50,000
Total	111	$15,363,650

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Ponoka, Alta.—F. E. Algar, $25,000.

Field, B.C.—Field Trading Company, $50,000.

Vernon, B.C.—Austin Hotel Company, $125,000.

Malmo, Alta.—Malmo Trading Company, $10,000.

Daysland, Alta.—Anderson, Reid and Orr, $15,000.

Chinook, Alta.—Banner Hardware Company, $9,000.

Nanton, Alta.—Auditorium Hotel Company, $25,000.

Suffield, Alta.—McGregor Hardware Company, $100,000.

Redcliff, Alta.—Redcliff Light and Power Company, $500,000.

Acton Vale, Que.—J. A. Vincent,, $49,000. J. A. Vincent, J. U. Dumont, A. Rochon.

Sherbrooke, Que.—Sherbrooke Cigar Company, $50,000. F. R. Darche, W. J. McManus, E. D. Kelly.

Dalhousie, N.B.—Dalhousie Land Company, $75,000. W. S. Montgomery, J. Wallace, A. J. LeBlanc.

Glencoe, Ont.—Glencoe Canning Company, $100,000. T. J. Medland, T. P. Loblaw, R. J. Muirhead.

Ormstown, Que.—Ormstown Brick Company, $500,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan.

Bothwell, Ont.—Bothwell Garage and Sales Company, $3,000. S. P. Campbell, F. H. Moore, F. McRae.

Papineauville, Que.—L'Union Sociale, $45,000. E. Daigmault, P. Picard, Papineauville; Z. Whissell, Fassett.

Hamilton, Ont.—Mountville, $40,000 (land and building). F. W. Reinke, T. M. Chambers, J. E. Peart.

Day's Lake, N.B.—Day's Lake Fish and Game Club, $1,000. G. M. Blizard, S. A. Thomas, G. C. McAvity.

St. Stephen, N.B.—Haley and Son, $80,000 (woodworking). H. E. Haley, J. L. Haley, J. M. Flewelling.

Sault Ste. Marie, Ont.—Sault Ste. Marie Land Company, $50,000. J. A. McPhail, T. T. Barnes, G. W. Baid.

Walkerville, Ont.—Williamson Construction Company, $100,000. V. Williamson, C. V. Williamson, C. K. Hall.

Moose Jaw, Sask.—Manufacturers' Investment Company, $200,000. Moose Jaw Profession Baseball Club, $20,000.

St. John, N.B.—New Brunswick Transportation Company, $99,000. J. C. Berrie, W. A. Dougherty, H. A. Powell.

London, Ont.—Edward Adams and Company, $150,000 (wholesale grocers). S. Screaton, W. Turnbull, W. Percival.

Welland, Ont.—Quality Furniture Makers, $40,000. E. Jefferies, J. A. McLaughlin, Toronto; B. J. McCormick, Welland.

Port Arthur, Ont.—Marsh-Hutton-Powers Company, $200,000 (contractors). H. E. D. Hutton, L. C. S. Hallam, F. Roberts.

Welsford, N.B.—Welsford and Hampstead Telephone Company, $5,000. H. W. Woods, Welsford; A. A. Lewis, Welsford.

Tillsonburg, Ont.—Tillsomburg Electric Car Company, $40,000. T. J. Bailie, A. E. Medhurst, J. Chandler, Prescott.

Napanee, Ont.—Napanee Brick and Tile Company, $100,000. J. L. Madill, W. Madill, Napanee; C. S. Madill, Montreal.

Prince Albert, Sask.—Prince Albert Oil and Mineral Company, $250,000. Prince Albert Transfer Company, $20,000.

Calgary, Alta.—Retail Merchants' Association of Alberta, $60,000. Western Motors, $50,000. Rex Realty Company, $25,000.

Dawson City, Yukon.—Canadian Yukon Navigation Company, $50,000. H. Fisher, L. P. Sherwood, S. Metcalfe Clark, Ottawa.

L'Epiphanie, Que.—Compagnie Canadienne du Sucre, $49,500. J. B. T. Richard, S. Richard, L'Epiphanie; A. Brunelle, Three Rivers.

Fredericton, N.B.—Fredericton Steamship Company, $5,000. E. G. Hoben, Fredericton; F. D. Swim, Blissfield; W. G. Clark, Fredericton.

Medicine Hat, Alta.—T. Hutchison Company, $25,000. J. E. Douglas Contracting Company, $25,000. Ellis Land Company, $25,000. Metzner Park, $150,000.

Loggieville, N.B.—Great Canada Northern Black Fox Company, $299,000. A. Loggie, Dalhousie; W. B. Prowse, Charlottetown; R. Loggie, Loggieville.

Long Reach, N.B.—Kingston Peninsula Telephone Company, $5,000. C. V. Fulton, Whitehead; H. Williams, Long Reach; S. McColgan, Summerville.

Thornloe, Ont.—Pioneer Rural Telephone Company, $8,000. H. Welch, Armstrong Township; H. Bennett, Cane Township; G. Eaton, Henwood Township.

St. Jean, Ile d'Orleans, Que.—Orleans Cement Manufacturing Company, $50,000. L. McDuff, Montreal; P. Pouliot, F. Pouliot, St. Jean, Ile d'Orleans.

Saskatoon, Sask.—Saskatchewan Abattoirs, $200,000. Moose Jaw Permanent Investment Company, $25,0000. Olton Investment Company, $10,000. Concrete Contractors, $10,000.

Victoriaville, Que.—Compagnie Parc Victoria, $99,000. P. Tourigny, A. Pepin, H. Roux. Fonciere Victoriaville, $45,000. P. H. Cote, L. P. Crepeau, Arthabaskaville; J. E. Alain, Victoriaville.

Regina, Sask.—Minard-Lampman Land and Natural Resources Company, $25,000. Canadian Housing Company, $20,000. North-West Townsite Company, $10,000. Tenn Manufacturing Company, $150,000.

Edmonton, Alta.—Northwestern Hospitals, $175,000 Tripure Water Company, $25,000. Queen's Hotel, $10,000. St. Paul Investments, $10,000. Peerless Cafeteria Company, $12,150. Investors of Alberta, $40,000.

Prince Edward Island.—Bay Oyster Company of Malpeque, $150,000. M. McKinnon, J. Eden, A. Ross, Charlottetown. Huntley Silver Fox Company, $50,000 J. C. Valley, Station, N.S.; C. R. Rogers, Summerside; G. Rogers, Summerside.

Vancouver, B.C.—Fraser Lake Townsite Company, $25,000. Marcum Lumber Company, $50,000. Phoenix Securities Corporation, $250,000. British Columbia Black Foxes, $250,000. Bridge River Timber Company, $350,000. Peace River Mining and Milling Company, $2,000,000 False Creek Gravel and Supply Company, $50,000. Boyd's, $500,000. Fox Motor Truck Company, $50,000. Nicomen Agricultural Company, $25,000. Public Service Corporation, $1,000,000.

Winnipeg, Man.—St. Andrews Land and Improvement Company, $250.000. E. E. Sharpe, D. A. Stacpoole, L. J Elliott. Alert Transfer Company, $20,000. W. L. Roblin, C. A. Abraham, B. F. Sprung. Bowes Dairy Lunch, $100 000. B. Bowes, J. F. Bowes, J. W. E. Armstrong. Canada National Securities, $60,000. M. Steinkopf, W. A. Hebblewhite, A. H. Aronovitch. Acme Construction Company, $200,000. F. Brandon, Man.—Until June 2nd for the following 5 per cent. debentures:—$12,000 10-year city hall improvement; $17,000 20-year land purchases; $3,927.33 20-year roadway; $61,313.98 20-year street paving; $30,656.99 20-year street paving; $21,509.11 20-year sidewalk; $41,901.52 30-year sewerage; and $26,618 street lighting 20-year. H. Brown, city clerk. (Official advertisement appears on another page).

PROBLEMS AND PROSPECTS ON PACIFIC COAST

General Development—Shipping Interests' Services—Real Estate for Distant Buyers

(Staff Correspondence).

Vancouver, May 12th.

Although fault is found with general trade conditions in instances, consequent upon the stringency in the money situation, in Vancouver things are looking bright. In Victoria large public works are in hand, and announcement is made of the dry dock to be constructed there as part of the naval policy of the government at Ottawa. Lumbering operations create activity from the neighborhood close to Victoria to the northern end of the island, and with good existing conditions in this branch of industrial activity, much is doing. The Victoria Lumber and Manufacturing Company, with its big mill at Chemainus, is to start logging its extensive limits on Cowichan Lake, and will bring the logs to tidewater over the new line built by the Canadian Pacific Railway. These logging operations will be in the same district as those of the Empire Lumber Company, which proposes shortly to commence activities on its big proposition.

Benefits of Agricultural Development.

At Duncan, also in the Cowichan district, is to be seen the benefits of agricultural development. The Cowichan creamery is one of the most successful co-operative institutions of its kind in Canada, and last year distributed over $195,000 among its 300 patrons. Not only does it produce a standard butter that commands a price of five cents over that prevailing in the local market, but it makes a specialty of gathering eggs daily. This enables the small land holder at Duncan and in vicinity to market his produce at the best price obtaining. The result is that Duncan is a prosperous community and expanding rapidly. The land is well situated and with so many settlers it is well kept and productive. It is doubtful if there is another community of its kind in Canada.

That expansion is steady on the lower mainland is indicated by the growth of the directory of the British Columbia Telephone Company, the May number of which has been issued. This book has increased 118 pages in a fourteen months. While the increase in the January directory was thirty pages, it was thirty pages this time in the Vancouver section alone. The classified section, made up of business and professional names, increased ninety inches. It is reckoned that the company installs about 500 new net phones per month, and has an immense amount of new construction on hand, all over its territory which includes also Vancouver Island.

Shipping Service Inaugurated.

Inauguration of the service of the Hamburg-Amerika-Dampf-Actien-Gesellschaft was effected by the arrival of the first steamship of the line at Vancouver this week. This was the Sithonia, which is the first on the new service of the company to the Orient and Pacific ports. When the Panama Canal is open the boats will likely take that short cut and make around the world trip. The Royal Mail Steam Packet Company starts its service to this coast in July, and with the Blue Funnel and the Danish East Asiatic line four large concerns will be operating freight boats to western ports of Canada. These show the development of shipping, so that when a large dry dock is ready it ought not to be used so much for naval as for commercial purposes.

If the government builds its dock at Esquimalt, it is not probable that several millions will be forthcoming for another dock on Burrard Inlet, though most of the commercial shipping finds its way to the later harbor, and where repairs might be more conveniently done. There is not likely to be enough business on this coast for two large concerns. Since the government has signified its intention of increasing the amount of the subsidy, it might be that capital for the enterprise, long talked of, can be secured.

Buyers Should Investigate.

Speculative real estate in and about Vancouver has fallen off during recent months, though sales are taking place in property in the city which has established values. Big subdivision companies are not putting through many sales locally, but a feature of their business is the outside enquiries and far-away buyers. People here know and understand the situation, and are not misled by gilded literature, but those remote from the scene of operations, thinking to realize the profits which have made Vancouver famous, are led to purchase. Before buying they should consider conditions and analyze statements made, else later on they may find their money tied up for a long term of years.

The Royal Agricultural Commissioners, who are holding sittings in different parts of the province, were at Abbotsford this week, where they were entertained at a banquet. Mr. Charles Hill-Tout, president of the Abbotsford Board of Trade, pointed out that the commission should do good work, and before agriculture could be placed on a favorable footing there must be a restoration of the balance between industrial an agricultural development. Almost all the legislation for the last half-century the world over had been in favor of industrial enterprises, and Mr. Hill-Tout quoted the banking ac of Canada as an example. While every opportunity was give business men to borrow from the banks, the farmer could ge little assistance. It was suggested that banks for the ac commodation of farmers was absolutely essential if agricultur was to be placed on the same footing with other industries.

Railway Assurances.

The Pacific Great Eastern is giving another assurance o the starting of the operations, which according to agreemen should have been started last July. Now the proposition i being made that the owners of land should grant free right of-way. The proposition is that the company will build it line through West Vancouver to Horseshoe Bay and operat either gasoline or electrically-driven cars until such time a the regular tram service is instituted. This suggestion c free right-of-way is something along the line of that of th British Columbia Electric Railway Company. It had the pe ple whose property fronted on proposed extensions in certai parts of the city pay so much per front foot.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized t borrow money. The particulars are given in order, nam and number of school district, amount required and name secretary-treasurer:—

Alberta

Boyle, No. 2910, $1,200. A. Young, Bentley.
Jewett, No. 2276, $300. C. H. Piper, Veteran.
Dejay, No. 2765, $1,800. J. W. Jones, Wastina.
Avonroy, No. 2738, $1,100 T. S. Scott, Camrose.
Cappon, No. 2811, $2,000. C. A. Sloan, Cappon.
Sedalia, No. 2858, $1,800. E. Goodwyn, Sedalia.
Rush Point, No. 2710, $5,000. L. Bierinckx, Castor.
Holyrood, No. 2596, $1,200. T. A. Torrance, Islay.
Coyote Flat, No. 2901, $1,500. C. H. Starling, Leo.
Burns, No. 2569, $1,500. A. Ellacott, West Wingham.
Viola, No. 2874, $1,600. A. L. Robertson, Sunnynook.
Froebel, No 2821, $1,300. M. J. Dieringer, Wild Hors
Avonlea, No 2868, $1,600. C. M. Butterfield, Wheat Bel
Edmonton, No. 7, $1,250,000. W. D. Bradey, Edmonto
Avondale, No. 1775, $1,700. F. W. Grainger, Grainge
Pontmain R.C., No. 20, $3,000 T. S. Blanchfiel Trochu.
Ferndale, No. 2804, $2,000. W. C. Bergquist, Stran Muir.
Maypole, No. 2889, $1,500. T. N. Battrick, Macklin. Sask.

Saskatchewan

Scofield, No. 2895, $1,800. F. Halvorson, Kuroki.
Lovedale, No. 838, $2,000. T. McDonald, Brock.
Abermule, No. 1319, $1,700. J. D. Tennant, Leigh.
Saskatoon, No. 13, $175,000. W. P. Bate, Saskatoon.
Lambton, No. 767, $1,500. H. J. Daubney, Bengough.
Broadview, No. 5, $12,000. H. W. McDonald, Broadvie
Alexander Plain, No. 1029, $1,500. 'F. Assmus, Schmi
Snipe Lake, No. 1096, $1,500. T. C. Warren, Norema
Teo Lake, No. 1358, $2,200. J. T. Vallance, Glenlon
Silver Creek, No. 519, $1,200. A. F. Brigham, Kamsa
Battleford, No. 71, $1,500. F. W. D. Thompson, Battl ford.
Hazel Bank, No. 1054, $1,600. H. W. Walker, Ha Bank.
Yellow Grass; No. 539, $25,000. M. A. Wilkinson, Yell Grass.
Swift Current, No. 167, $20,000. J. T. Dodds, Swi Current.
Red Wing, No. 2857, $1,000. W. A. Riggs, Box 5 Prince Albert.

◆

The Boston Insurance Company has been licensed transact the business of fire insurance in British Columbi Mr. George R. Thomson, Vancouver, is the company's a torney.

A by-law to grant a bonus of $10,000 to the Canad Boving Manufacturing Company on certain conditions w carried at Lindsay, Ont. The Boving Company is already going concern, it having assumed the property and plan the Madison Williams Company, manufacturers of hydrau and other heavy machinery, and this bonus is for the purp of helping the new firm to extend the works.

CANADA'S TRADE WITH AUSTRALIA

ıde Agreement Between Dominion and Common-wealth—Suggestions by Canadian Trade Commissioner

The Australian minister of trade and customs and Hon.
rge Foster, Canadian minister of trade and commerce,
arrived at a general trade agreement between the Com-
wealth and the Dominion. The schedule will be discus-
after Mr. Foster's visit to Tasmania. Both ministers
ess their keen gratification with regard to the agree-
t.

In view of this important agreement the following brief
ments respecting the marketing of Canadian manu-
ıres in Australia, which are the result of recent close in-
igation made by Mr. D. H. Ross, Canadian Trade Com-
ioner at Ottawa, are worthy of consideration:

On the whole the Canadian chair trade has been more
factory than for some time past. Deliveries, in most
ances, have been more prompt than hitherto and this has
appreciated by importers. Several complaints were
e that the outside casing was not strong enough and the
king of packages in transit allowed the smaller parts to
out, thus causing considerable loss and inconvenience
the parts are assembled for putting together the com-
chair in the importers' warehouses.

Importations of Canadian office equipment such as
s, filing cabinets, tables, etc., in 1912, showed some in-
se in volume. The existing high freight rates and the
monwealth customs duty (38½ per cent. net) militated
nst large business being done. At present it costs im-
ers 70 per cent. advance on invoice prices to land this
of furniture in store at Melbourne and Sydney. The
ing difficulty has, to a large extent, been overcome and
goods being strongly cased, open up bright and fresh
out paper sticking to them.

and for Canadian Refrigerators.

Several Canadian makes of refrigerators for household
oses are doing more or less trade in the Australian mar-
despite the keen competition and energetic action of
etitors in the United States. With the exception of a
complaints as to green timber being used in the cheaper
es, the goods have opened up well. On account of the
ease in the cost of ice, the trade is expanding and re-
rator manufacturers in Canada will find a recurrent de-
d in Australia which is worthy of their most persistent
ts through their selling representatives.

For a time the advance in Canadian prices of organs
not met with a corresponding advance by United States
ufacturers, but, generally, the business transacted in
is reported to have been satisfactory. Deliveries have
fairly prompt, but more attention requires to be paid
areful packing, as some shipments have arrived in a
aged condition.

The importation of Canadian wringers into Australia is
dily growing and the 1912 figures show considerable ex-
ion. Despite strong opposition from other sources of
ly the "made in Canada" line is gradually being intro-
d and is meeting with the approval of importers and
s. The slowness in which orders from Australia are
ıted has caused justifiable complaints from importers
have found their season half over before the goods have
ed.

ll Trade in Lawn Mowers.

Comparatively small trade is being done by Canadian
ufacturers of lawn mowers with Australia, whereas the
rts from the United States show considerable increase.
claimed that the Canadian mowers are too heavy in con-
tion and the patterns are not quite suitable for the
ralian trade, which is well catered for by United States
ers. A large market awaits the Canadian mower made
the right lines at a competitive price. Possibly some
ufacturer may specialize in this particular line and will
an effort, through direct selling agents, to obtain a
on of this large trade. Orders from one Melbourne firm
recently made available for the inspection of this office
in 1912, over 500 lawn mowers were imported—this is
o means an exceptional example of the trade being done.

A steadily increasing business is being transacted in
Australian market by Canadian makers of corundum
ls and the line is giving complete satisfaction to users.
shipments are promptly made and the goods are care-
packed.

Probably the trade returns for 1912 will show that the
ralian importations of butt-welded tubing doubled over
previous year. The tubing is giving every satisfaction
importers state the Canadian line is equal in quality to
United States best.

Canadian nail wire has been in demand at regular intervals but manufacturers, owing to the domestic demand, have frequently been unable to quote for export business although small shipments have arrived in Australia in recent months. Prices being equal, Australian nail makers prefer Canadian to United States wire. For some time a fair quantity of wire gauze (fly wire) 12 mesh came to Australia from Canada, but recently no business has been done owing to United States quotations being lower.

Importers of Canadian carbon paper and ribbons report an improved demand. Boxes bearing printed advertisements thereon are dutiable at the rate of 6d. (12 cents) per lb., while plain boxes—containing carbon paper—are duty free. In some of the bi-chrome ribbons the colors are not sharply defined—the red running into the purple or black—and some complaints have been made on that account. Attention having been drawn to this disadvantage, the makers will quickly remedy the trouble.

Rates of Exchange on Invoices.

While the trade in Canadian shoe polish does not run into large figures, yet the 1912 importations into Australia were larger than in 1911. Shipments having been made from Montreal in summer, few complaints have recently arisen as to damage by frost in transit.

Canadian artificial leather is making steady headway in Australia owing to excellent representation and to the undoubted quality of the goods.

According to order No. 1635 recently issued by the Commonwealth department of trade and customs, the rates of exchange on importations of goods from any countries which have adopted the gold standard, regardless of the invoiced rate of exchange, must be in accordance with the table of rates furnished. The conversion of dollars into sterling is fixed at $4.86 to the £1 for Canada, Newfoundland and the United States.

◆

UNITED STATES APRIL FIRE LOSSES

The losses by fire in the United States and Canada during the month of April as compiled from the carefully kept record of The Journal of Commerce aggregate $16,738,250, as compared with $16,349,400 in April, 1912, and $17,670,555 the same month a year ago.

The following table gives a comparison of the fire losses for the first four months of 1913 with the same months of 1912 and 1911, together with the losses by months for the balance of those years:—

	1911.	1912.	1913.
January	$21,922,450	$35,653,150	$20,193,250
February	16,415,000	28,601,650	22,084,600
March	31,569,800	16,650,850	17,511,000
April	17,070,550	16,349,400	16,738,250
Total, four months.	$87,577,800	$97,255,050	$76,527,100

Canada's losses by fire amounted to $1,470,622, according to the record of The Monetary Times. There were twenty-three fires at which the loss was $10,000 and over.

◆

CAPITAL ISSUES IN ENGLAND

If capital continues to be issued in England as fast as it has been in the last four months the amount that will be raised in the year 1913 will be much greater than ever before. The amount already subscribed since the beginning of the year is £109,000,000, against £75,000,000 in the corresponding four months of last year, and £85,000,000 in 1911, remarks The Statist. The colonies are specially big applicants for capital, the amount supplied to the dominions over the sea so far in the current year having been as much as £56,000,000 against £20,000,000 in the corresponding period of last year, and £22,000,000 in 1911. The foreign issues at nearly £35,000,000 are slightly larger than last year, but less than in 1911, when they reached £48,000,000 for the four months. The new issues for home purposes are rather less than £16,000,000, against £18,500,000 last year and £11,000,000 in 1911. The amount of new issues in April amounted to the large total of £29,000,000, in comparison with £15,000,000 last year, when the coal strike still affected the market for capital, and £22,000,000 in 1911. No less than £13,000,000 of the sum subscribed in the past month has been for British colonies, against £4,000,000 last year and £8,000,000 in 1911.

◆

Mr. Howard Murray, of the Shawinigan Water and Power Company, and Mr. T. P. Howard, of the Phœnix Bridge and Iron Works, Limited, were elected chairman and vice-chairman, respectively, of the Montreal branch of the Canadian Manufacturers' Association.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Sutherland, Sask.—May 2—Residence of Mr. H. Noble.

Grenfell, Sask.—May 7—House of Mr. William Burry destroyed.

Irondale, Ont.—May 3—House of Mr. James Flood. No insurance.

Frontenac County, Ont.—May 13—Forest fires in northern part of county.

Lindsay, Ont.—May 8—Unoccupied house owned by Mr. Charles O'Neill.

Putnam, Ont.—May 10—Home of Mr. Frank Atkins. Cause unknown.

Palmerston, Ont.—May 7—Damage to school. Cause, spark from chimney.

Quebec.—May 3—Residencey 45, Transcontinental Railway. Four deaths.

Fort William, Ont.—May 8—Powerhouse between elevators A and E. Loss $5,000.

Colborne, Ont.—Residence of Mr. Charles Haynes, destroyed. Small insurance.

Deseronto, Ont.—May 5—Residence of Mr. John Tompkins. Partly insured.

Windsor, Ont.—May 6—Small damage to McKee Lumber Company, Pitt Street.

Watrous, Sask.—May 1—Stable at rear of Central Meat Market. Small damage.

Edmonds, B.C.—April 26—Home of Mr. Alfred Hall, 16th Avenue West. Cause, lamp upset.

Fairbank, Toronto.—May 5—House of William Scott, Caledonia Avenue. Insurance $500.

Ottawa, Ont.—May 7—Sheds at 71 Sweetland Avenue. Cause, fire lighted to burn caterpillars.

Souris, Man.—April 30—Mr. K. Murchison's stable, hay, horse, two sets of harness. Loss $700.

Darling, Ont.—May 6—Home of John McFarlane, Franch line, destroyed. Cause, defective stovepipe.

Treherne, N.S.—May 1.—Store of Mr. S. Fried, Main Street. Small damage. Cause, incendiary.

North Sutton, Que.—May 6—Barns of Miss Amelia Grimes. Partially insured. Cause, lightning.

Welland, Ont.—May 5—Home of Mr. William Beckett, O'Reilly's Bridge. Cause, defective chimney.

Grafton, Ont.—May 12—Residence of Lieutenant-Colonel C. H. Rogers. Loss $12,000; partially insured.

Eardley, Que.—May 3—Home of Mr. Henry Moose. Cause, heating grease and turpentine. One death.

Woodstock, N.B.—May 7—Barn and outbuildings of Mr. John C. Arnold. Cause, spark from locomotive.

Niagara Falls, Ont.—May 13—Sand and cement warehouse of Mr. W. C. Thomas, Erie Avenue. Loss $3,000.

Gravenhurst, Ont.—May 14—Grand Trunk Railway station, coal sheds and several cars. Cause, defective wiring.

Buctouche, N.B.—April 28—House of Mr. Levi A. LeBlanc. Loss $800; insured for $250 in Law, Union and Rock. Cause, defective chimney.

Cobalt, Ont.—May 7—Shaft house, hoist house, blacksmith shop and some smaller buildings at Penn. Canadian mines.

Dorchester, Ont.—May 11—General store and dwelling occupied by Mr. Albert Hodder. Loss $2,000. Cause, defective chimney.

Edmonton, Alta.—May 4—Unoccupied shack at 593 Kennedy Street, owned by E. S. Elliott. Cause, children playing with matches.

Emyvale, P.E.I.—May 1—Barn of Mr. Patrick Keoughan, together with 8 cattle, 200 bushels of oats, farm implements, etc. Loss $1,500.

Port Lambton, Ont.—May 7—House owned by Mr. John D. McDonald, occupied by Mr. L. Marsh. Loss, $1,400; insurance, $400.

Winnipeg, Man.—May 11—J. Arbuthnot sash and door factory, Pembina and Highway Avenues, destroyed; five dwellings damaged. Loss $20,000.

Trenton, Ont.—May 11—Miller and Company's canning plant, and Barr Register Company. Loss $100,000. Fire started in storeroom of canning plant.

Renfrew, Ont.—May 12—Storehouse of Stewarts, Limited, destroyed; Ottawa Hotel, Albion House and stables, and McGowan's livery barns slightly damaged.

Waterloo, Ont.—May 10—Dwelling on Webber Street owned by Salle estate, and occupied by Italians. Los $1,500. Cause, spark from town steam roller.

St. Thomas, Ont.—May 10—House occupied by Mr George Hunter, Balaclava Street, owned by Mr. D. Manigan Detroit. Loss $150. Cause, defective stovepipe.

Peterborough, Ont.—May 7—Shed and outbuildings at 46 Elm Street, occupied by Mr. John Bolton, owned by Mrs. Geo Carton. Loss $200. Cause, boys smoking cigarettes.

Moncton, N.B.—May 5—Grocery store of Mrs. Phili White. Loss $800. Cause, lamp.

May 6—Oil warehouse in Intercolonial Railway yard Loss $8,000.

Blissville, N.B.—May 12—Luther B. Smith's saw mill a Centre Blissville. Loss to mill, $13,000; lumber, $4,000. In sured for $12,000 in Royal and Union of Paris. Suppose cause, dropped match.

Stratford, Ont.—Store occupied by Mr. J. Higgins, owne by Mr. J. Keys. Loss on stock, $500; on building, $1 Insurance on stock, $2,500; on building, $5,000. Caus cigarette stub.

May 13—Knox Church. Loss, $50,000; insurance, $34 000. Cause, lightning. Three killed by fall of spire.

Truro, N.S.—May 1—House occupied by Mr. Harr Burris, owned by Mr. James Page, New York. Loss on build ing, $120; insured in Norwich Union for $1,000. Cause, de fective chimney.

May 6—Dwelling of Mr. G. Clyke, Jr., Fort Street. Sma damage.

Vancouver, B.C.—May 1—House at 931 Hornby Stree Small damage. Cause, kitchen stove. Y.W.C.A. Buildin Loss $1,500. Cause, defective chimney.

May 9—Steamer Ophir, owned by Lincoln Steamshi Company, Vancouver. Six deaths.

Kingston, Ont.—May 10—Donoghue's grain elevator, Or tario Street. Loss $7,000. Stables of Crawford's broom fa tory, King Street.

May 9—Paint shop of Kingston Shipbuilding Compan Loss $600. Cause unknown.

Orillia, Ont.—May 12—Stephens' Electrical Supply Stor Loss, $18,600, as follows:—Overand and Lowry, hardwar $12,000, insurance, $8,500; W. T. Stephens, $2,600, insu ance, $500; George Vick and Sons, building, $4,000, insu ance, $1,000.

London, Ont.—May 11—Home of Mr. H. E. Lawson, 5 Bruce Street. Loss $1,200. Cause, defective gas grate.

May 9—Shed in rear of 133 William Street, owned by Mr S. Winslow. Cause, spark from chimney. Small loss.

May 8—Rev. E. Appleyard's residence, 881 Dundas Stree Loss $50. Cause, spark from chimney.

Chatham, Ont.—May 10—Rosery greenhouses. Damag $200. Supposed cause, incendiary.

May 9—Daily Planet office. Loss $75,000. Fire start in stock room. Two deaths. Insurance, $36,000 on stock $8,000 on building.

May 5—Livery barn, next Rankin dock. Rented by M E. Brisco.

Belleville, Ont.—May 5—Mr. John Miller's tallow pla Loss $600. Property owned by Mrs. James Gilroy.

May 12—Coal chutes of the Grand Trunk Railway, gether with five coal cars and about 250 tons of coal. Lo $20,000. Cause unknown.

May 14—Bridge across Bay of Quinte between Bellevil and Prince Edward shore, damaged. Cause, cigar stub

Ste. Rose, Que.—May 6—10,000 cords of pulpwood stor in Quebec Central Railroad yards, owned by Quebec and S Maurice Industrial Company, and Mr. J. Gagnon, of S George, of Beauce; Mr. B. C. Howard, of Sherbrooke, a Mr. J. R. C. Chabot, of St. Justine. House owned by M J. E. Nalin, Ste. Rose. Cause, forest fires. Forest fires a along line of Quebec Central and Chaudiere Valley Bran Dorchester County; and near Morissette Station.

St. Catharines, Ont.—May 12—Following totally destro ed:—St. Catharines Ice and Fuel Company's ice-house, lo of $7,000 to $8,000, with insurance of $1,000. Joseph Ne man's barn, loss $1,000, partly insured; Harper's machi shop and barn, loss $1,500, partly insured; Wm. Begy's ca shop, loss $4,000, no insurance; barn owned by Joseph Add loss $500, no insurance. Houses of Thomas Joy, Claren Harper and Lawrence Teeter were damaged. Total loss, $ 000. Supposed cause, bonfire.

Hamilton, Ont.—May 5—Shed and chicken coop at Carlisle Street. Loss $125 Carpenter shop on Ottawa Stree Loss $15

May 6—Garage of Mr. Thomas Barnes, Main Street Ea also automobile. Loss $2,000.

May 7—Grand Trunk Railway box car. Small damag

May 9—Barn of R. B. Patterson, 101 Ferguson Aven North, destroyed, and three houses damaged. Loss on barn $500; insurance, $300. Supposed cause, children playing wit matches.

May 12—St. Peter's Infirmary, East Main Street. Loss o. Cause unknown.

◆

DEATH OF MR. H. L. WATT

Mr. H. L. Watt, treasurer of the Canada Life Assurance Company, died at his residence in Toronto on Thursday.

Mr. Watt, who was a barrister by profession, joined the investment department of the Canada Life in 1897, having previously obtained valuable experience as to investments and securities with a well-known legal firm. He rose rapidly in the company's service, and in 1904, upon the office of treasurer becoming vacant, he was appointed to it. Mr. Watt's ability and sound judgment in financial matters rendered his services invaluable. Mr. Watt was also a director of the National Trust Company.

◆

NOTES

Messrs. C. Meredith and Company, Limited, according to a Montreal despatch, have practically completed negotiations for the purchase of the Diamond Glass Company, the Sydenham Glass Company, and the Canadian Glass Company. A new company will be formed called the Canada Glass Corporation, Limited, with an authorized capital of $8,000,000. The securities of the new company have all been disposed of in London.

The Dominion Appraisal Company has been organized at Toronto, with offices at 47 Wellington Street E., to carry on the work of making appraisals and valuations of industrial properties, etc.

◆

FREE ENTRY FOR EUROPEAN NATIONS

The United States Customs Court at Washington decided that European nations are entitled to the free entry of wood pulp and paper under the "most-favored-nation clause" of their commercial treaties with the United States, because the free entry privilege is granted to Canada under the only operative clause of the Canadian reciprocity agreement.

The court also held that the treasury department had placed a correct interpretation upon the Canadian reciprocity act by immediately admitting wood pulp and paper free without reciprocal action by Canada. Dissenting opinions were delivered.

The decision applies to all nations with which the United States has "favored-nation" treaties, admitting their wood pulp and paper to the United States free of duty provided the foreign nations concerned do not prohibit or restrict the exportation of those products.

The Underwood tariff bill now before the Senate grants free entry to wood pulp and paper not exceeding 2½ cents per pound in value. The Canadian reciprocity agreement makes the limit of value four cents per pound.

The court rendered two decisions on two distinct issues. One related to importations of wood pulp from Europe by the American Express Company and F. Burtch and Company, who claimed free entry under the treaties and the other related to a test importation of wood pulp from Canada by the Cliffe Paper Company, claiming the right to pay duty on the ground that wood pulp and paper from Canada were not entitled to free entry until all parts of Canada had removed all export restrictions.

In the Cliffe paper case, the court upheld the ruling of the treasury department, that the right of free entry from Canada referred to the particular shipment involved, and if there was no restriction upon its importation or the material of which it was manufactured it was entitled to free entry irrespective of the conditions surrounding importations from other parts of Canada.

UNITED INVESTORS LIMITED

Head Office - - - WINNIPEG

CAPITAL $1,000,000

President
RICHARD D. WAUGH
Ex-Mayor City of Winnipeg

Vice-President and Managing Director
ALBERT H. OAKES
President 1912 Winnipeg Real Estate Exchange
Manager Oakes-Gray Realty Co.

Secretary-Treasurer THOMAS E. MOFFAT

Directors

Controller J. W. COCKBURN; E. R. CHAPMAN, Barrister; JOSEPH GRAY, Capitalist, Minneapolis; FREDK. W. MOORE, Treasurer Grain Growers' Grain Co.; DUNCAN MARSHALL, Retired Farmer, Clearwater, Man.

The "UNITED INVESTORS, LIMITED," was first incorporated in January 1912, with a capital stock of $250,000. The greater part of this stock was taken up during the ensuing twelve months.

At the first Annual Meeting held on January 8th last, the Shareholders voted to increase the capital stock to $1,000,000, by authorizing the issue of $450,000 worth of additional common or ordinary stock and $300,000 worth of 7 per cent. preferred stock to be divided into 7,500 shares, par value $100 each; but the common or ordinary shares to be sold at a premium of $10.00.

THIS STOCK IS NOW OFFERED FOR PUBLIC SUBSCRIPTION

Management The Corporation is managed by Directors elected annually by the Shareholders. The present Board is composed of prominent and successful business men, who are large Shareholders.

No Bonus Stock In the formation of this Company no bonus stock in any form was allowed. Every stock certificate will have been paid for in hard cash at one hundred cents on the dollar.

No salaries are paid to any officers or directors, and the Company pays no office rent.

What the "United Investors, Limited," Offers - -

1. The free advice of nine experienced and reputable business men, all of whom are large Shareholders. Their interests are identical with those of the smallest Shareholder.

2. The opportunity to enrich yourself, not only in one real estate deal, but on a dozen or more at the same time.

3. A share in certain "hidden" profits. Profits for which as yet no credit has been taken in the Profit and Loss Account.

THESE ARE—(a) "Park Manor" subdivision. Estimated profits $140,000.00. (b) Properties bought for $205,914.32, upon which $121,591.33 is still owing, but which are valued in December, 1912, at $274,790.00 by the Winnipeg Real Estate Exchange Valuation Committee.

4. An interest in a Company which had organization expenses of only $578.60.

5. If you become a Shareholder, you participate in all the profits and other advantages of the Company. You are offered an opportunity to become a partner in a "going concern" which offers you an interest in profits already accumulated—a Company which has passed beyond the experimental stage—a Company the future of which is assured—a Company for the Shareholder, small and large.

How to Buy "United Investors, Limited," Shares

You can buy any amount from one share up. You can pay on full or on easy instalments, without interest, and every payment participates fully in profits.

You can own one common share by paying $30.00 cash and the balance in four equal, consecutive semi-annual payments.

You can own one hundred common shares by paying $3,000.00 cash and paying $2,000.00 every six months for two years.

You can buy the Preferred Shares by paying $20.00 per share cash with application, and the balance in four semi-annual payments.

THIS IS GOOD BUSINESS

Put some of your money in Winnipeg, the billion-and-a-half-dollar-bank-clearing-city—the city with the largest annual bank clearings for its size on the continent.

Postal card will bring Prospectus, Auditors' Report and full information.

A. E. Jennings, Esq.,
Advertising Manager, Monetary Times,
Toronto, Ont.

Dear Sir:

You will be interested to learn that an enquiry from a comparatively small advertisement of ours in the MONETARY TIMES has resulted directly in the forming of an important connection by this house.

A clipping of our advertisement in your paper was mailed to us by an English reader. This has led to the sale of over $20,000 of bonds in which we are interested.

The incident gives us pretty good evidence as to the character of your circulation. We are glad to let you know about it for whatever satisfaction or use it may be to you.

Yours very truly,

Greenshields & Co.

of Canada, bearing date the 29th day of April, 1913, incorporating
e Patrick Reid, broker, Robert Cumming Jennings, accountant;
Rogers Clute and John Jennings, barristers-at-law, and Hilda Sea-
tenographer, all of the city of Toronto, in the Province of Ontario,
e following purposes, viz.:—(a) To purchase, lease or otherwise
e any land and buildings wheresoever situate and any estate or in-
in any rights in connection with any such land and buildings; (b)
velop and turn to account any land acquired by the company, or in
it is interested and in particular by laying out and preparing the
for picnic grounds, excursion purposes, building purposes, summer
purposes and constructing, altering, pulling down, decorating,
ining, fitting up and improving buildings and conveniences and by
g, paving, draining, farming, cultivating, letting on building lease or
g agreement or otherwise; (c) To construct, maintain, improve, de-
work, control, operate, carry on and manage upon the property or
ties of the company or elsewhere any summer resorts, picnic and
ion grounds, water-works, gas-works, reservoirs, roads, electric
heating and lighting supply works, telephone works, hotels, clubs,
rants, baths, places of worship, places of amusement, pleasure
ls, parks, gardens, reading rooms, stores, ships, dairies and other
and conveniences which the company may think directly or indirectly
ive to the objects of the company, and to contribute or otherwise
or take part in the construction, maintenance, development, work,
and management thereof, and to lease or grant concessions for the
g on of any of the said works or businesses; (d) To construct,
in, improve, develop, control, operate, carry on and manage upon
operty or properties of the company, tramway lines to be operated
form of energy; (e) To erect, construct, repair and alter buildings,
res and other erections and to buy, sell and deal in stone, sand,
ement, brick, timber, hardware and other building requisites; (f)
rchase, take, exchange or otherwise acquire, hold, maintain, oper-
d manage ships and vessels and any shares and interests in ships
essels and also shares, stocks and securities of any companies
sed of or interested in ships and vessels, and to maintain, operate,
improve, alter, sell, exchange or let out to hire or charter or
ise deal with and dispose of ships and vessels, shares or securities
resaid, warehouses, wharves, lighters and quays; (g) To apply for,
se or otherwise acquire, any trade marks, trade names, patents,
s, concessions and the like conferring any exclusive or non-exclusive
ted rights to use or any secret or other information as to any in-
which may seem capable of being used for any of the purposes
company, or the acquisition of which may seem calculated directly
efit the company, and to use, exercise, develop or grant licenses in
of or otherwise turn to account the property, rights or information
uired; (h) To buy, sell, manufacture, refine, manipulate, export and
and deal in all substances, apparatus and things capable of being
n any such business as the company is authorized to carry on or
may be acquired by any customers of or persons having dealings
he company; (i) To carry on any other business, whether manu-
ng or otherwise which may seem to the company capable of being
iently carried on in connection with any business of the company or
ted directly or indirectly to enhance the value of or render profit-
ny of the company's property or rights; (j) To acquire or under-
e whole or any part of the business, property and liabilities of any
ny carrying on any business which the company is authorized to
on, or possessed of property suitable for the purpose of this com-
and to pay therefor in fully paid-up or partly paid-up preference or
y shares of the company or in the bonds, debentures or other securi-
the company; (k) To enter into partnership or any arrangement
aring of profits, union of interests, co-operation, joint adventure, re-
l concession or otherwise with any company carrying on or engaged
about to carry on or engage in any business or transaction which
mpany is authorized to carry on or engage in, or any business or
ction capable of being conducted so as directly or indirectly to benefit
mpany; and to lend money to, guarantee the contracts of or other-
ssist any such company, and to take or otherwise acquire shares
curities of any such company and to sell, hold, re-issue, with or
guarantee, or otherwise deal with the same; (l) To take or other-
cquire, hold, own or otherwise dispose of shares in the capital stock
the bonds, obligations or other securities of any company having
altogether or in part similar to those of this company, or carry-
any business capable of being conducted so as directly or indirectly
efit this company or enhance the value of its undertaking, notwith-
g the provisions of section 44 of The Companies Act; and to
tee the payment of dividends of any such bonds, obligations or
ecurities and to aid in any manner any such company; (m) To enter
y arrangements with any authorities, supreme, municipal, local or
se, whether domestic or foreign, that may seem conducive to the
y's objects or any of them, and to obtain from any such authority
ghts, privileges and concessions which the Company may think it
le to obtain, and to carry on or exercise and comply with any such
ements, rights, privileges and concessions; (n) To promote any
y or companies for the purpose of acquiring all or any of the
y and liabilities of this company or for any other purpose which
eem directly or indirectly calculated to benefit this company; (o) To
and deal with the moneys of the company not immediately required
manner as may from time to time be determined; (p) To lend
to customers and others having dealings with the company and
rantee the performance of contracts by any company; (q) To re-
te, with the approval of the shareholders, any company for service
d or to be rendered to the company in placing or assisting to place
ranteeing the placing of any of the shares in the company's capital,
bonds, debentures or other securities of the company, or on or
the formation or promotion of the company or the conduct of its
s; (r) To issue fully paid-up shares, bonds or other securities for
yment, either in whole or in part of any property, real or personal,
claims, privileges, concessions, chose in action services, rendered
r advantages which the company may lawfully acquire, and to issue
lly paid-up shares, bonds or other securities in payment, part pay-
r in exchange for shares, bonds or other securities of any other
y; (s) To sell or dispose of the whole or any part of the assets
dertaking of the company as a going concern or otherwise, for
onsideration as the company may think fit and in particular for
bonds, debentures or securities of any other company having power
ire the same; (t) To obtain any provisional order or Act of Parlia-
or enabling the company to carry any of its objects into effect, or
ecting any modification of the company's constitution, or for any
purpose which may seem expedient, and to oppose any proceedings
lication which may seem calculated directly or indirectly to prejudice
npany's interests; (u) To sell, improve, manage, develop, exchange,
lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company, or as agents for a commission or other remuneration, to buy, sell, improve, manage, develop, exchange, lease, dispose of or otherwise deal with any real or personal property of any kind whatsoever; (v) To do all such other things as are incidental or conducive to the attainment of the above objects; (w) To draw, make, endorse, accept, execute and issue, promissory notes, bills of exchange and other negotiable and transferable instruments; (x) To cause or to allow the legal title, estate and interest of any of the property, real or personal, owned by the company, or in which it has any interest, to remain in or be vested in or registered in the name of any individual or individuals or corporation, either in trust for or as agents or nominees of the company in accordance with the terms of any instrument creating such trust or agency; (y) To procure the company to be registered, licensed or otherwise recognized in any foreign country and to designate and appoint any person or corporation rein as attorneys or representatives of this company, with full power to represent this company in all matters according to the laws of such foreign country, and to accept service for and on behalf of this company of any process or suit; (z) To do all or any of the above things and as principals, agents, contractors, trustees or otherwise and by or through trustees, agents, or otherwise and either alone or in conjunction with others; (aa) To amalgamate with any other company having objects altogether or in part similar to those of this company; (bb) The word "company" in clause (1) to (ii), both inclusive, shall be deemed to include any person, partnership, or other body of persons, whether incorporated or not incorporated, and whether domiciled in Canada or elsewhere, and the objects specified in each of said clauses shall be in no wise limited or restricted by reference to or inference from the terms of any other clauses or the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Grimsby Beach, Limited," with a capital stock of three hundred thousand dollars, divided into 3,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 2nd day of May, 1913.

THOMAS MULVEY,
Under-Secretary of State.

THE CANADA MALTING COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of April, 1913, incorporating James Steller Lovell, Charles Delamere Magee, accountants; William Bain, bookkeeper; Robert Gowans, Joseph Ellis, William George Flood and Robert Musgrave Coates, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, construct, lease or otherwise acquire and operate malting plants, and generally to carry on the business of a malting company; (b) To buy, sell and otherwise deal in and deal with all kinds of grains, cereals and cereal products, and by-products thereof, and to manufacture the same; (c) To construct, acquire, operate, hire, lease, sell or otherwise dispose of elevators for elevating grain or other produce, with the requisite engines, plant, machinery and appliances therefor, and also sheds, stores and warehouses for the reception and storage of grain and other produce, and any other goods, wares, merchandise and effects, and generally to carry on an elevator and storage business in connection therewith; (d) To construct, acquire, charter, operate, hire, lease, mortgage, sell or otherwise dispose of all kinds of steam and sailing vessels, barges, boats and other vessels, wharves, docks, dry docks, workshops, warehouses, freight sheds, stations and other buildings, railway and steamboat terminals, and generally to carry on the business of a ship-building, engineering, navigation, transportation and terminals company, for the purposes of the company; (e) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (f) To assist in the promotion, organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (g) To issue and allot, as fully paid up, shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (h) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (i) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds or for services rendered, shares of the company's capital stock, whether subscribed for or not as fully paid and non-assessable, or the company's bonds; (j) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out, and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body, may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (k) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (l) To purchase or otherwise acquire, hold, sell or otherwise dispose of shares or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (m) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign

(Continued at foot of next page).

The lowest or any tender not necessarily accepted.

A. T. STEPHENSON,
Secretary-treasurer.

According to figures issued by Fire Chief Davis, Victoria's April's fire loss aggregated $9,163, of which $1,638 was loss on buildings and $7,525 on contents thereof. Insurance was carried on the buildings to the amount of $38,200 and on contents, $11,100. The heaviest loss was incurred in the fire at the carpenter and refitting shop of the Canadian Pacific Railway at the Inner Harbor wharves early in the month. Alarms numbered sixteen, twelve telephone and four box. Permits numbering 327 were issued by the chief for the burning of rubbish, and seventy-six buildings were inspected.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED

BANK MANAGER, with twelve years' experience (six years in West), wishes responsible position. Thirty years of age. Married. Address Box 201, Monetary Times Office, 820 Union Bank Building, Winnipeg.

A GENTLEMAN who has had a very wide experience as an accountant, a first class office man and who at the same time has excellent connections which should be of value to a Bond firm, is open for engagement. Has also had success as a stock salesman. Address Box 205, Monetary Times, Toronto

WANTED, exclusive agency for Calgary, for a strong board Insurance Company; have fair amount of business at present with good prospects. Reply, giving terms, to Jas. Smalley and Company, 131 8th Avenue W., Calgary.

UNITED STATES STEEL CORPORATION IN CANADA

Mr. James A. Farrell, president of the United States Steel Corporation in testifying as to the corporation's export trade in the United States Government suit, referred to the Canadian business in part as follows:—

"Through Montreal we sell about 60,000 tons of wire product a year, sheet iron, mine rails, and sometimes standard rails, when they cannot be supplied by their own corporations. We are now supplying the Canadian Northern Railway with 25,000 tons of rails shipped by boat from Chicago and thence by rail to Calgary, where they cost $47.13, delivered.

At Vancouver we supply much material, but the freight rate from Pittsburgh there is $18 a ton. Material from Liverpool or Antwerp may be shipped for $6 to $8 a ton. After we established our office there we found it necessary to run a steamship service there. Our ships leave about every two months, making stops all along the line. On the return we go into a general merchandising business. The steamships come back sometimes laden with chalk, and just at present we are bringing in a load of tin plate. We own four ships and we charter two more. The round trip takes from six to eight months.

The witness named other agencies in various parts of the world to which subsidiaries contributed their products. In spite of a preferential tariff in favor of British steel products, the corporation recently obtained the contract to supply the rails for a new transcontinental railway in Australia, he said, and for the construction of the Sydney bridge.

Speaking of export business into Canada, he said that the Canadian preferential tariff in favor of British rails prevented American manufacturers from selling that product there at a profit. The duty on American rails is $7.84 a ton, he said, and on British $5.04.

NEW INSURANCE COMPANY

(Special Correspondence).

Calgary, May 12th.

About two months ago, Mr. Block, a former treasurer of the State of Minnesota, visited Calgary and interested a number of financial men of this city in the formation of an insurance company. This company is the United States and Canada Life Insurance Company.

Among those who will be prominently identified with the company, and some of whose names will likely appear on the board of directors, are, Col. James A. Walker, Col. Armstrong, Messrs. John Breckenridge, F. Beveridge, A. D. McLean, Dr. Egbert, Ald. T. P. Frost, and Capt. Robie.

A charter has been obtained for the company in the State of Minnesota, and Minneapolis and Duluth interests have agreed to subscribe $50,000 of the capital, all fully paid up, while the remaining $50,000 is to be subscribed in Western Canada, the greater portion of it in Calgary and Vancouver.

Duluth, Minnesota, will be the head office of the company in the United States, and Calgary the head office of the company in Canada.

There will be twenty-one directors, ten each from both countries, and the twenty thus selected will then select the remaining member of the board. It is likely that Colonel Walker, of Calgary, will be the president, and the other named gentlemen from Calgary will be directors, in addition to two or three gentlemen to be selected from Vancouver.

It is the intention of the company to secure a Dominion charter.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LEGAL NOTICE

BRITISH AND COLONIAL LAND AND SECURITIES COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 11th day of April, 1913, incorporating James Steller Lovell, Charles Delamere Magee, accountants; William Bain, bookkeeper; Robert Gowans and Joseph Ellis, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To purchase, take on lease or otherwise acquire, to hold, sell or otherwise dispose of property, movable or immovable, land, or any right or interest therein, water powers, power sites, timber limits or licenses, mines, mining rights, mining licenses, quarries, oil wells and products of quarries, and mineral lands and any interest therein; to develop, produce, deal with or otherwise turn to account any lands of the company or any kind of natural or artificial product which may be taken therefrom, and without limiting the generality of the aforesaid words, to mine, raise or otherwise produce minerals of all kinds, and to refine and otherwise treat and make merchantable or otherwise marketable the same; to manufacture or produce timber, lumber, logs, pulp wood or any article made in whole or in part from wood or any product or by-product thereof; to quarry, smelt, refine, dress, amalgamate and prepare for market, ore, metal and mineral substances of all kinds, and to deal in stone and the products thereof; (b) To engage in catching, freezing, salting, smoking, curing, canning, drying, preserving, selling, disposing of and dealing in fish taken in water flowing through lands owned or controlled by the company or adjacent thereto and in producing, manufacturing, selling and disposing of manufactures of every kind and nature whatsoever from fish and fish products; to engage in the sale, exportation and distribution of such fish, fish products and manufactures therefrom; to erect such plant and machinery as may be necessary to preserve or cure fish or for the purpose of changing fish or its products into any form in which the same may be sold; to manufacture fertilizer from fish; to manufacture cans, barrels, packages, or other receptacles for the preservation of goods and products, and to purchase, build, lease or otherwise acquire, and to maintain and carry on cold storage and refrigerating processes; (c) To subscribe for, purchase or otherwise acquire, own, hold, sell and otherwise dispose of and deal with and to transfer shares in the capital stock of any corporation, foreign or otherwise, and bonds, debentures, obligations or other securities of any government, municipality or corporation, foreign or otherwise, and while the holder thereof to exercise all the rights and privileges of ownership including the right to vote thereon, notwithstanding the provisions of section 44 of the said Act; (d) To buy, sell, manufacture and deal in minerals, plant, machinery, implements, conveniences, provisions and things capable of being used in connection with the operations of the company, or required by workmen and others employed by the company; (e) To construct, carry out, maintain, improve, manage, work, control, operate and superintend any roads, streets, tramways, sidings, sidewalks, drains, water mains, sewers, and any other improvements, on lands belonging to or controlled by the company, and any bridges, reservoirs, water courses, artesian wells, waterworks, pumping stations, aqueducts, filtration plants, mains, connections and other accessories to such waterworks, furnaces, mills, crushing works, lighting plants, shops, stores and other works and conveniences which may directly or indirectly be conducive to any of the objects of the company, and to contribute to, subsidize or otherwise aid or take part in any such operations; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To issue fully or partly paid shares of the company in payment or part payment of any property, assets, franchises, options or other rights or privileges; (h) To construct, acquire by purchase, lease or otherwise, and to own, develop and operate works for the production, sale and disposal of steam, electric, hydraulic, pneumatic or other power or force, and to produce, create, develop, acquire by lease, purchase or otherwise, and to control and generally deal in, use, sell, lease or otherwise dispose of such steam, electric, hydraulic, pneumatic and other power or force for any uses and purposes for which the same are adapted, provided that all sales, transmission or distribution of electric or other power, or force, beyond the lands of the company, shall be subject to local and municipal regulations in that behalf; (i) To construct, acquire, own, manage, charter, operate, hire and lease all kinds of steam and sailing vessels, boats, tugs, barges and other vessels, wharves, docks, elevators, warehouses, freight sheds and other buildings necessary for the purposes of the company, and to tow, carry goods, freight and passengers for hire and generally to carry on the business of an elevator, navigation and transportation company; (j) To contract for, build, construct, and equip public and private works of every description, and to acquire, purchase, hold, sell, dispose of, supply, manufacture and produce all manner and kinds of material for use in the construction and equipment of such public and private works; (k) To promote, or to assist in the promotion of any company or corporation carryi on a business similar in whole or in part to that of this company or t the purpose of acquiring the undertaking of the company or any pa thereof; (l) To transact and carry on a general financial agency a brokerage business, and to act as agents and brokers for the investme loan, payment, transmission and collection of money, for the transfer a recording of bonds, debentures, shares or other securities and for the pu chase, sale and improvement, development and management of any pr perty, business or undertaking and the management, control or directio of syndicates, partnerships, associations, companies or corporations; a to accept, fulfil and execute any trust committed to the company by a corporation of which the company holds shares, debentures or other s curities, or with which the company has business relations, or by a court of law, on such terms as may be agreed upon and as the co shall approve, and to take, hold, receive and convey all estates and pr perty, real and personal, which may be granted, conveyed or committe to the company with its assent upon such trust or trusts; and to act trustees in respect of bonds, debentures, mortgages, hypothecs or other curities of companies or corporations with which the company has busine relations, and to deal with such property in accordance with the instr ment creating the same; (m) To act as agents for others in the inves ment of funds for the carrying out of any business which this company authorized to carry on; (n) To distribute any of the property of the co pany in specie among the shareholders; (o) To apply for, purchase a acquire by assignment, transfer or otherwise, and to exercise, carry o and enjoy any statute, ordinance, order, license, power, authority, franchi concession, right or privilege, which any government or authority, suprem foreign, municipal or local or any corporation or other public body m be empowered to enact, make or grant, and to appropriate any of the co pany's stock, bonds, and assets, to pay and defray the necessary cost charges and expenses thereof; Dated at the office of the Secretary of State of Canada, this 14th d of April, 1913.

THOMAS MULVEY,
Under-Secretary of State.

42-2

Dated at Toronto this 21st day of April, 1913.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for
BRITISH & COLONIAL LAND & SECURITIES COMPANY, LIMITE

SMALL COMPARED WITH TOTAL FIRE LOSSES.

The Insurance Review of London analyzed notable fire losses issued from 1860 and divided them into American and Canadian losses, those of Great Britain, of Europe, and of other parts of the world. The total loss was the enormous sum of £206,979,722. The United States and Canada easily came first in point of magnitude, being responsible for £129,989,720. Great Britain comes lowest with £10,855,000, and for Europe £37,695,000 does not look excessive, particularly as the Paris terrors of 1871 were alone responsible for £28,440,000. It is interesting to note that the total losses outside America and Canada were £76,990,000. These figures only cover the more noteworthy fires, but are of a magnitude which, colossal in itself, must be very small compared with the total fire losses paid out by the companies. A little further thought will soon convince one that without fire insurance the trade and commerce of the world would have been greatly hindered in its development.

MONTREAL STOCK EXCHANGE OFFICERS

At the Montreal Stock Exchange's annual meeting t following were elected Mr. J. J. Pangman, chairman; M H. B. McDougal, vice-president; Mr. J. Pitblado, secreta and the following as committee: Messrs. A. A. Wilson, McDougall, C. F. Gault, A. Bruneau, F. N. Smith and C. Oswald

◆

From data of the census of manufactures of 191 it is estimated that the total production of the four Canadi linseed oil companies in 1910 was 1,711,463 Imperial gallo of the value, at 92 cents per gallon, of $1,574,646. The tot production of oil cake was 16,004 short tons of the valu $472,711 in addition to seed and meal to the value of $ 671. The total value of the flaxseed used as raw mate was $1,750,511, and the total value of all products w $2,066,028.

MUNICIPALITIES AND THEIR FINANCES

Failures in the London Market—Toronto's Expenditures —Moose Jaw to Issue Consolidated Stock

The long series of rebuffs to new loans at the hands of the investor reached a climax in the ill-success of the great Rothschild issue. It will remain a topic of financial discussion for many a day, and many in the city are expressing the opinion that it may have a revolutionary effect upon the present system of loan issuing and underwriting, says the London Daily Mail.

"It is an event when the Rothschilds make a loan issue at all, and much more when it is not a success.

"Such an amount as $55,000,000 is abnormal, even allowing for the fact that Brazil is a borrower.

"Another remarkable circumstance of the splendid failure was that only 6 per cent. of the issue was subscribed by the public, that is to say, only $3,300,000 out of $55,000,000, leaving more than $50,000,000 in the hands of the underwriters.

"Perhaps the most remarkable circumstance of all is that as soon as the prospectus appeared, offering the loan at 97, it was offered on the Stock Exchange at 96, and has been obtainable at that or lower ever since, so that it paid investors to buy the stock in the market rather than subscribe for it on the prospectus.

Mr. C. R. Hosmer on his return from a three months' trip abroad declares London is somewhat apprehensive over excessive municipal borrowing in Canada. Not that the "backing" was doubted. But for instance, Canadian municipalities have secured 100 millions in London in six months.

Queen City's Budget.

Toronto's City Treasurer's budget for 1913 calls for a total expenditure of $39,046,142 and a current expenditure of $11,744,956. This means an increase of $7,778,843 on the total and $2,734,856 over the current expenditure in 1912.

The difference in the figures is due to the amounts to be expended under local improvement and other by-laws being included in the total.

The following figures show Toronto current expenditure for the last ten years:—

1903	$3,503,984
1904	3,794,463
1905	4,091,193
1906	4,479,635
1907	4,989,341
1908	5,520,188
1909	6,081,532
1910	6,874,800
1911	8,073,927
1912	9,010,100
1913	11,744,956

The ordinary revenue of the city will amount to $3,421,788, as compared with $2,753,024 last year. There was a deficiency in the revenue estimated in 1912 of $119,038. The taxes will amount to $8,442,206.

City of Moose Jaw Consolidated Stock.

Moose Jaw city council passed Consolidated Stock By-law No. 1, authorizing the city to issue stock to be known as "City of Moose Jaw Consolidated Stock" to be issued at par and bearing interest at 5 per cent. per annum, payable half-yearly. The total issue under the by-law which consolidates fifteen important local improvement by-laws and by-laws for raising money to construct public works is $1,311,428.94 or £269,471-14-1.

The passage of this by-law is the result of the visit to Eastern Canada during the past two weeks of mayor Pascoe and finance commissioner Heal, and after several conferences with the city's fiscal agents, Messrs. Wood, Gundy and Company, and the Bank of Montreal authorities.

The stock will be issued and registered by the Bank of Montreal at its London, England, office in Threadneedle Street, and for the sale and all expenses thereto the bank will receive ½ of 1 per cent. of the amount of such interest and also ⅛ of 1 per cent. of the principal sum at the redeemable date in 1953. Also a sum equal to 1-40 of 1 per cent. on stock outstanding. The exchange of money to and from the Bank of Montreal in London, England, to be made at the current rate of interest. After the whole of the stock has been issued, the city, under an agreement with the Bank of Montreal, which was also ratified, can cancel the registry of the stock. This means that should the city be able to secure a fixed charge of exchange or a better rate than 1-40 of 1 per cent. on outstanding stock they may change to another bank.

The cost of selling and placing consolidated stock on the market is approximately 3½ per cent., made up as follows: Underwriting, 1½ per cent.; agents' commission, ½ per cent.; issuing bank and underwriting broker, ¼ per cent. each, equals ½ per cent.; making stock transferable free of tax, 1 per cent. To this must be added legal fees, printing, etc., making the total of 3½ per cent.

Increased Interest, Options and Bids.

Improvement by-laws aggregating $5,112,800 in value with interest increased from 4 to 4½ per cent., have been approved by Vancouver electors.

Dundas, Ont., is selling its bonds locally. Mr. Fry, the town clerk, expects that the remaining $30,000 will soon be absorbed by the residents in that town.

A thirty-day option has been granted to a Toronto bond house on $250,000 5 per cent. Calgary school debentures.

Two offers were received for the $12,000 6 per cent. 20-year roads and bridges debentures of Elmsthorpe Rural Municipality, Sask. The offer of the Flood Land Company, Regina, was accepted.

For the $12,257 5 per cent. 30-year pavement, and $3,900 5 per cent. 15-year fire hall improvement debentures of Niagara Falls, Ont., three bids were received from Toronto bond houses. As previously noted, the bonds were awarded t Messrs. C. H. Burgess and Company, Toronto.

ANALYSIS OF CANADIAN BONDS

Under the inscription "Canadian Bond Issues," Messrs Greenshields and Company, Montreal, have issued a valuable investment manual. Nearly two hundred Canadian bond issues are classified under the following tables: (1) Cotton and Textiles, (2) Milling, (3) Pulp, Paper and Timber, (4) Steel, Iron and Equipment, (5) Industrial, (6) Public Utilities. Each security in these tables is dissected under fifteen separate heads.

This is a practical reference work and guide in the selection of Canadian bonds, and one which will meet with considerable usage by bondholders. The statistical departmen of this well-known firm will furnish further detailed information to persons requiring same.

DEBENTURES AWARDED

Elmsthorpe R.M., Sask.—$12,000 6 per cent. 20 years, t Flood Land Company, Regina.

Athabasca Landing S.D., Alta.—$40,000 6 per cent. 3 years, to Western School Supply Company.

Milton R.M., Sask.—$8,000 6 per cent. 20 instalments, t Messrs. Wood, Gundy & Company, Toronto.

Spy Hill, R.M.—$10,000 5½ per cent. 20 instalments, t Messrs. Wood, Gundy and Company, Toronto.

BRIGHTON'S PROGRESS

Brighton, Ont., is making satisfactory progress. Thi town is installing an up-to-date gravity system of waterwork It also has cheap power, and the secretary of the board trade is willing to forward particulars of opportunities fc industries desiring a location.

UR HOLDINGS OF UNITED STATES GOLD

Hon. W. T. White, the finance minister, when dis- ing the Canadian gold coinage and the operations the Ottawa mint in parliament, explained that of amounting to something over $100,000,000 held ie Dominion treasury, $90,000,000, or nearly 90 per ., was represented by American coins.

At the same time, the banks held in their vaults e $39,000,000 specie. It is probable that two or e millions of this would represent Canadian silver s. Allowing for that, and assuming that 80 per cent. ie remainder consisted of American coins, that would e altogether about $118,000,000 United States gold s held in Canada.

Each member of the Dominion parliament is na- lly anxious to forward the interests of the particular tituency he represents. As gold mining is the prin- l industry prosecuted in the Yukon, the member for territory looks regretfully at this huge mass of al bearing the superscription of a foreign power. He, others with him, would like to see the foreign coins rted and replaced by Canadian coins minted from own gold.

From the point of view of the Yukon mines, so long hey get the best possible prices for. their output of or nuggets, it does not matter whether the metal to the States or to Ottawa.

The action of the Minister in abolishing the fee tofore charged by the assay office at Vancouver was it as far as, it would seem, the government could at present in encouraging the home gold-mining stry.

Suppose one of the banks in Canada undertakes to ice one or more new enterprises and places itself er obligation to advance, say, $1,500,000 in connection therewith. The bank has reason to believe that when the advance is made it will have to meet an adverse balance at the clearing house of $1,500,000. It does not wish to disturb Canadian borrowers, so it calls loans in New York and lodges the money with its New York correspondents.

Then it tries to sell New York exchange in Montreal and Toronto—that is, it offers its drafts on New York in exchange for "legals."

But it happens that the other banks do not wish to buy the drafts at this time. So the only thing to do is to ship gold to Montreal. The bank's agents or correspondents in New York take gold certificates to the sub-treasury and receive ten-dollar and twenty-dollar pieces. They are boxed up and sent by express.

Next day they are in Montreal; and the bank, perhaps, has them delivered to the receiver-general. The packages are verified, and the receiver-general gives the banks $1,500,000 in $5,000 Dominion notes. This illustration shows how the amount of American coin held in Canada tends to increase.

Sometimes it happens that gold has to be shipped to New York. The customers of one of our banks may have imported a large amount of American goods. They ask the bank for loans to pay off these debts.

The loans are granted and proceeds placed to credit of the borrowers' accounts. Then the borrowers ask for drafts on New York for remittance to their creditors. The bank's account in New York has not enough funds to meet the drafts. So it tries to buy New York funds from the other banks, offering "legals" in exchange. But the other banks have no New York funds to spare; and it develops that gold must be exported.

The bank takes its large $5,000 Dominion notes to the receiver-general and gets American coin, which is shipped to New York. As soon as it arrives it goes into the subtreasury and gold certificates of large denomination are given in exchange.

There is no delay; the money goes to credit in the other market next day; the cost of sending gold from Montreal to New York is about 5-64 of 1 per cent. New York is the place at which the Canadian banks have to meet their international liabilities and the international liabilites of their customers; and it is for the advantage of all concerned for them to have in their possession a large reserve in money which is legal tender at face value in that market.

Imagine next that the gold held by the Dominion treasury and by the Canadian banks was all Canadian coins. Sooner or later there would arise an occasion in which the banks were obliged to ship gold to New York for the purpose of paying the international debts of their customers. They would, therefore, have to send the Canadian coins. The shipment would get to New York next day, the same as in the other case, but the coins would not pass at face value. They would be of no use to the New York banks; and the subtreasury would buy them by weight.

It would take, perhaps, three days to assay them and determine the exact weight. Then the money would be paid over—probably with deductions for short weight. The loss of three days' interest on a shipment of $1,000,000 would be quite an item; and the deduction for short weight also might be important. The coins would be melted down and recoined into United States money.

So it is easy to see that as there is no demand for gold coins in day-to-day business in Canada, and, as they are not suitable for sending to the only market in which the banks can use gold coins, it would be an economic blunder to coin a vast amount merely to have them lie in the vaults of the Dominion treasury and of the banks. Nobody except a few officials would ever see them; and when they were exported they would be demonetized at once.

FOXES FROM COAST TO COAST

"The investor has every reason to exercise the greatest caution in his patronage of the latest channel for the absorption of his funds," was the comment of *The Monetary Times* on fox farming investments. In addition to reasons there pointed out, Mr. J. W. Jones, in his comprehensive volume on "Fur Farming in Canada," issued by the Commission of Conservation, gives other pertinent pointers, as will be seen by the following excerpts:—

"It is necessary that the general public should realize that the industry is becoming a highly speculative one, and that the individual who puts his money in companies loaded with a heavy burden of capitalization assumes a great risk."

Inexperienced management is drawn attention in the following words: "In most cases lack of success may be attributed to a inexperienced keeper."

While no serious diseases have been observed in foxes on Canadian ranches, Dr. Alexander Ross is quoted as saying: "Foxes bred in captivity are more liable to diseases than those which roam the wilds."

In regard to values of breeding stock and pelt values Mr. Jones says: "While statistics of the low prices obtained for pelts obviously could not be secured, it is quite probable that at least 30 per cent. of the silver foxes would bring a price from $50 to $500. At the present quotations, probably another 30 per cent. would be priced between $500 and $1,000, and the other 40 per cent. would bring from $1,000 to $4,000 each."

The ability to recognize a cheap grade of fur instantly is essential in the present state of the business, as traders represent a silver fox as such regardless of quality; and, usually only a short and distant examination of the animal is possible. Besides, the sales are made at a season when the fur is not in prime condition to pass judgment on."

Existing prices of breeding stock is shown in the following remark: "So great is the demand for breeders that the prices of breeders have risen in two years from $3,000 a pair to $15,000, and at December, 1912, the best stock could not be obtained at the last named figure."

Then as to future values of breeding stock, the writer adds: "Since under present ranching conditions silver foxes increase in numbers approximately 100 per cent. each year, it seems evident that the present prices for foundation stock must decline to near the pelt value before many years. The price of the scrub stock and of specimens with the poorer grade of skins will decline first. It is likely that this inferior stock will be used for mating with red and cross foxes, which, by the year 1916, should be producing a large number of silvers, mostly of poor quality, however."

Concurrent with the usual principles that are noticed when investing funds, the important points as to expert management of animals in captivity, the need and prices of good breeding stock, ultimate values, etc., mentioned above, need to be considered when perusing the publicity matter used by the promoters of the numerous fox farms which are being founded from the Atlantic to Pacific coasts.

MANY HOMES WANTED

The housing problem is a serious one, and Toronto should do all in its power to solve the question was the summing up of one of the city's controllers when discussing the guaranteeing of eighty-five per cent. of the bonds of the Toronto Housing Company, which are preparing for an issue of $850,000 of their bonds. Their proposition is to erect houses for two communities within the city limits. A tract of 200 acres has been acquired, and homes which may be purchased at a reasonable figure will be built on it. After the disposal of the $850,000 issue, a larger proposition will be carried out.

At Regina another proposal is being prepared. The details of the scheme have been worked out by the city commissioners. The scheme, in brief, suggested by the city commissioners and city solicitors is as follows:—

The purchaser to make his own terms as to payments, length of time, etc.

The city to set the purchase price and stipulate that the purchaser erect a home on the property, and also occupy the house until the lot is fully paid for.

It is further suggested that the city get into touch with some contracting firm, and make an arrangement whereby the purchasers may have homes erected on the rent-as-payment plan. As the city has title to the property it will, therefore, not be hard to come to such an arrangement. The health and relief committee has already endorsed the scheme, and it will now be brought before the city council. If the council endorses it, it will then remain for the finance committee to carry out the arrangements.

Many other municipalities of the Dominion have a similar problem, which their administrators should assist in solving for the benefit of their citizens and the upbuilding of the particular cities or towns concerned.

Private enterprise and capital are being used to the fullest extent, and the existing financial stringency is not of assistance to the housebuilder, as will be seen from the remarks of *The Monetary Times'* Vancouver correspondent on another page of this issue.

The incoming and increasing populations need and are acquiring every available domicile before it is even completed.

Municipalities that are endeavoring to aid the homeseeker, whether it is proposed to assist individual homeseekers to acquire homes, or whether the city guarantees a company's bonds or aids a building contractor, or whatever proposal they may adopt, they should see it is based on a sound, legitimate and ultimately remunerative financial basis, and not likely to add to the growing expenditures of Canada's modern communities or to injure the person requiring an abode within their governance.

PRODUCTS OF EMPIRE

eat is White Man's Primary Cereal — Canada's Output—Improved Transportation Facilities

'heat is the white man's primary cereal and its produc- ias always had a peculiar fascination and interest. Its enance and extension is one of the most fundamental of our time. Like most vital problems it is highly com- it touches many interests, and raises questions, both po- and economic, of supreme importance. Agricultural e which, for research and experiment, has hitherto only ed indifferent and local support, finds awaiting it many ved difficulties upon the settlement of which even the ies of nations may depend. The political controversies past few years have had at least one beneficial effect; nave directed public attention to the urgency and the mo- usness of the problem of food supplies under modern tions, and awakened general interest in the Imperial sity of maintaining their security.

'he importance of wheat, viewed from its double aspect e chief agent in supporting the dense populations of the countries and as the pioneer crop in the vast regions e New World, depends, of course, on its primary char- stics. It is easily grown, yields specially heavy crops eviously unbroken grounds, and demands comparatively capital; moreover its cultivation serves admirably to get nto condition for any subsequent scheme of husbandry economic considerations may show to be desirable.

ally Adapted by Nature.

t is thus specially adapted by Nature to meet the present nstances and the future anticipations of the constant n of emigrants from countries of denser populations and opportunities. The repeated waves of expansion in the World have affected reflexively the agricultural disposi- of the Old; the increasing world supplies and lowness of s have for the past twenty or thirty years (until quite re- y) tended to convert wheat into a by-product rather than remier object of the farming industry in the Old World, at home have involved many farmers in difficulties and cial loss.

'he general rise in prices during the past few years has, ver, done something to redeem the situation at home, and e overseas dominions has brought considerable profit, and led encouragement and support for still greater ex- on, writes Mr. J. Watson Grice, in United Empire, the al of the Royal Colonial Institute. For the purpose of a deration of wheat supplies, both present and future, the ed Kingdom, Canada, Australia, India, and New Zealand be taken as representing the British Empire.

At present the yield of Canada's wheat region is roughly bushels per acre greater than that of any other American etitor. In 1883 it was nearly 14 bushels per acre, in 1903- the average was nearly 20. The figures for her southerly bor for the same dates were 12 and 14 bushels. The northerly extension will still further enhance Canada's ntage in the production of the finest high-grade wheats. tific application and the intensive cultivation which is uallly proceeding in the eastern provinces would seem to hadow a nearer approach in time to the 32 bushels per of the mother country.

ovement of Facilities.

The improvement of facilities for handling grain in bulk for transportation has been, of course, an absolute neces- for the opening up of the vast prairie regions of the h-West. By 1910 there were in Manitoba, Saskatchewan, rta, and British Columbia nearly two thousand elevators elevator warehouses with capacities varying from 500,000 els (at St. Boniface) to the much smaller ones which are principal objects at many of the prairie stations on the adian Pacific. The average capacity is about 30,000 els. The gradual spread of good roads in the more settled icts, and even more, the rapid multiplication of trunk- s and branches and freight wagons have made possible transportation of the grain with dispatch to the local and ary markets and to the seaboard. Primary markets such as nipeg with elevators at Port Arthur and Fort William are railway centres and foci of districts of enormous wheat luction and quickly growing industrial importance. Win- g, the natural market-place of the north-west, now handles e 200,000,000 bushels annually.

To her magnificent waterways, by lake, river, and canal, ada has owed much of her prosperity: more recent enter- e has been concentrated on the extension and equipment transport purposes of the principal railway systems which g the products of the prairies to the seaboard. In 1901, 40 miles of railway were in operation, ten years later there e over 25,000 miles, and the Canadian Pacific is for the sent year contemplating a further laying down of upwards of 1,000 miles of track. The programmes of the three transcontinental lines include, in extension and double tracking, over 2,700 miles for 1914.

A complete network of the eight great railways carrying wheat produce will soon connect all parts of Canada with the Pacific as well as the Atlantic. The Canadian Pacific, the Grand Trunk, and the Canadian Northern have during the past three years handled with more expedition than ever before large proportions of the bumper crops of 150,000,000 bushels in 1910, 215,000,000 in 1911, and 206,000,000 in 1912. Enlarged rolling stock and better organization have recently done much to relieve the congestion of traffic between the threshing season and the close of navigation: for instance, last season at the close of navigation on December 15, more than 83,000,000 bushels had been shipped outward from Port Arthur and Fort William, as compared with 43,000,000 bushels for the previous year. The Canadian Northern expects to have a through line to the Pacific before the end of 1914, and there is every reason to anticipate that during the following year the Grand Trunk will be in operation from ocean to ocean.

By co-operation with the facilities afforded by the opening of the Panama Canal a great effect on the production and exportation of wheat from the North-West and British Columbia may be anticipated. Experiments are also at present being conducted under the auspices of the Dominion Government with a view to reducing somewhat the period during which the great waterway of the St. Lawrence is closed to ocean traffic. The opening up of the Hudson Bay route and the construction of the Georgian Bay Canal will in time remove the grievance of the farmers who have found the railways unable adequately to cope with the immense crops ready for transport in the short interval between harvest and the winter season. Canada recognizes her needs, and is making gigantic efforts to remove these obstacles to her continued prosperity.

The most rosy outlook for Canadian wheat production is that of Dr. William Saunders, an agricultural expert of great authority, who in 1904 prophesied 800,000,000 bushels as a possible crop on one-quarter of the land said to be capable of cultivation; this would feed, at the present rate of consumption of 7¾ bushels per head, a Canadian population of 30,000,000 and allow a surplus for export of 600,000,000 bushels.

Position and Outlook are Favorable.

There is no need, however, to indulge in these speculations. The present position and immediate outlook are favorable enough. In 1912 the total crop reached 206,000,000 of bushels as against 215,000,000 in the previous year, and only 85,000,000 so recently as 1901: during the past decade her average crop has more than doubled. For the same period her exports of grain and flour to the mother country have risen from 12,000,000 bushels in 1901 to over 50,000,000 bushels in 1909. Even reasonable forecasts would seem to show that after allowing for the gradual diversion of wheat lands to other crops (which is gradually now going on and is being constantly urged as desirable), and making deductions for enlarged domestic needs for food and seed, Canada will probably be able to provide an annual surplus for export of over 100,000,000 bushels during the next five years.

During the years 1909-11 Canada sent to the United Kingdom an average 4,500,000 quarters, representing 21 per cent. of her crop; India sent 9 per cent., or 4,000,000 quarters; Australia's contribution of 3,000,000 quarters was no less than 28 per cent. of her wheat crops on the average of those years. New Zealand, though supplying a comparatively small quantity, dispatched to the Mother Country about 15 per cent. of her total harvest.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the week ended April 30th:—

	1913.	1912.		Increase or decrease.
Can. Pac.	$3,513,000	$3,387,000	+	$126,000
Grand Trunk	1,523,144	1,318,817	+	204,327

The head office of the Dominion Casket Company, Limited, has been changed from Toronto to Guelph.

CANADIAN COMPANIES IN MEXICO

No Serious Damage Done During Political Disturbances—Annual Statements of two Corporations

The Monetary Times in February drew attention to the considerable interest that Canada has in the Republic of Mexico. About $200,000,000 of British capital is there invested by Canadian companies. Canadian merchants are also interested in Mexican trade.

Mr. P. Tamayo, Mexican Consul at Toronto, writing at a later date regarding commercial conditions, stated: "Judging from actual results and from the fact, which has come to my notice, that some of the Canadian exporters did not send their agents to Mexico last year as they had done in previous years, it seems that the political disturbances have caused more harm to them than to the rest of the world's traders. This is regrettable, as it means a relative loss in their sales. It is to be hoped, judging from the above outlined facts, that they will regain confidence in the Mexican market."

It is, therefore, gratifying to learn from the annual reports of two of the prominent companies, those of the Mexican Light and Power Company, Limited, and the Mexico Tramways Company, that no serious damage was done to them, and the companies' services were satisfactorily maintained, though the managements were obliged to incur extraordinary expenditure to ensure the proper protection of the companies' properties and continuous operation of service during the recent disturbance in Mexico. The reports of these companies are appended herewith.

MEXICAN LIGHT AND POWER COMPANY

The eighth annual report of Mexican Light and Power Company shows the net revenue in gold for 1912 amounted to $1,372,686.44, which, with $984,127.21 balance brought forward from 1911 makes a total credit balance to profit and loss of $2,356,813.65.

The directors paid 7 per cent. on preferred and 4 per cent. on ordinary, absorbing $963,400, and placed to reserve $209,008.36.

The reserve account, after crediting the amount carried forward from profit and loss account, has been reduced to $300,000 by debiting $336,892.30 for extraordinary expenses incurred during the year.

Increased Sale of Power.

The table of statistics shows an increase in the sale of power over the previous years, but not so great as it should have been if the condition of the republic had been normal. Operating expenses, however, show a reduction from 31.06 per cent. in 1911 to 24.68 per cent. in 1912.

The extension of the system of canals and tunnels to divert several rivers into the Necaxa Watershed has been proceeded with as rapidly as the conditions have permitted, and although the work has not been completed quite as soon as was anticipated, the board expect the entire system will be finished and in operation during the year.

Acquired New Company.

During the year The Mexican Light ana Power Company, Limited, acquired the El Oro Light and Power Company (Cia. de Lu y Fuerza de El Oro, S.A.), which the board have every reason to believe will prove a profitable investment for the company.

The storage in all the reservoirs on the 31st of December, 1912, was 68,400,768 cubic meters, or an increase of 13,958,489 cubic meters over the same day of the preceding years, and greater than ever in the history of the company.

THE MEXICO TRAMWAYS COMPANY

The Mexico Tramways Company's sixth annual repor shows that net revenue in gold for 1912 amounted to $1,830,480.33, which, with the balance brought forward from 1911, makes a total credit balance to profit and loss accoun of $2,617,046.51, out of which the directors paid four quarterly dividends at the rate of seven per cent. per annum leaving a balance in the profit and loss account of $1,462,928.51 carried forward. The ratio of operating expenses t gross income for 1912 was 47 per cent., compared with 48.5 per cent. in 1911.

In Excellent Condition and Repair.

On December 31, 1912, the tramway system consisted o 208.30 miles of single track, of which 193.30 miles were operated by electricity, and 15 miles by mules—the electric track mileage having been increased by 17.80 miles and the mul track mileage having been reduced by 4.55 miles.

The property has been maintained in excellent condition and repair; for this purpose $735,074.72, Mexican currency has been expended during the year. The company constructed eleven first class electric passenger cars, as well a eight other cars.

New Officers.

The first sections of the suburban lines to Toluca and Puebla respectively, have been placed in operation; the Toluca section, a distance of 5,405 miles from Santa Fe and th Puebla section, a distance of 6,878 miles from Xo Chimilco The mule lines were electrified during the year from Ixtacalc to Ixtapalapa and from Tacubaya to Santa Fe.

Since 1913, Mr. Robert C. Brown has been appointe vice-president, and Mr. Harro Harrsen, after being electe a director, has been appointed managing director, residen in Mexico City, Mr. Charles B. Graves, late vice-presiden and general manager of the Manila Electric Railway an Light Company, being appointed general manager.

ACTUARIAL SOCIETY OF AMERICA

The annual meeting of the Actuarial Society of America took place at the Astor House, New York, last week.

A meeting of the council of the society was held on Thursday, and the regular business meeting of the members followed. About ninety fellows and associates were present. Colonel W. C. Macdonald, president of the society, presided.

Following the opening address of the president, the officers were re-elected for the ensuing year as follows:—President, Colonel W. C. Macdonald, Confederation Life Association, Toronto; vice-presidents, Mr. Arthur Hunter, New York Life, New York; Mr. James M. Craig, Metropolitan Life Insurance Company, New York; secretary, Mr. Robert Henderson, Equitable Life Insurance Society, New York; treasurer, Mr. D. G. Alsop, Provident Life and Trust Company, Philadelphia; editor of the transactions, Mr. Wendell M. Strong, Mutual Life Insurance Company, New York.

The three vacancies on the council created by the retirement in rotation of Messrs. Moir, Messenger and Wood, were filled by the appointment of Mr. E. E. Rhodes, Mutual Benefit Insurance Company, Newark, N.J.; Mr. J. H. Woodward, New York State Insurance Department, New York; Mr. Morris Torrey, Manhattan Life Insurance Company, New York The other members of the council are: Messrs. Herbe B. Dow, W. A. Hutcheson, E. P. Marshall, F. H. Johnston P. C. H. Papps, William Young and the ex-presidents of th society.

The following papers were submitted, and read and discussed: "Concerning the American Experience Table o Mortality," by Mr. S. A. Joffe; "Mortality Surplus and its Distribution," by Mr. Henry Moir; "Mortality after the Deferred Dividend Period," by Mr. Arthur Hunter; "Charles Gill—the first Actuary in America," by Mr. Emory McClintock; "Total Disability Benefits," by Mr. J. F. Little "Provision for Expenses in Savings Contracts," by Mr. H M. Dawson.

The members of the society dined togethed at the Astor House on Thursday evening. The speakers were Messrs. J. M. Craig, E. B. Morris, V. R. Smith, Henry Moir, A. C Washburne, John B. Lunger and T. B. Macaulay.

Sixty-five thousand shares of common stock of the Dominion Bridge Company, Limited, have been listed on the Montreal Stock Exchange.

APRIL BANK STATEMENT

Decrease in Circulation—Total Deposits Increased by Nearly Fifteen Millions.

	April, 1912.	March, 1913.	April, 1913.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$345,365,183	$357,756,659	$365,340,002	+ 5.8	+ 2.1
Deposits after notice	615,370,348	630,434,708	631,160,280	+ 2.5	+ 0.1
Current loans in Canada	833,242,621	890,513,446	898,964,181	+ 7 8	+ 0.9
Current loans elsewhere	31,469,847	38,277,672	36,310,033	+ 15.3	— 5.1
Call loans in Canada	69,243,791	70,731,030	69,757,912	+ 0.7	— 1.3
Call loans elsewhere	103,558,392	109,227,927	103,212,185	— 0.3	— 5.5
Circulation	95,145,371	102,202,047	98,100,111	+ 3.1	— 4.0

The principal items of the April statement of the char-ed banks of Canada are shown above. From these figures vill be seen that increases in deposits on demand totalled 583,343, and in deposits after notice $725,572.

Deposits elsewhere than in Canada, which in March e $97,869,300, had been augmented, and in April were 3,925,361, so that the total increase in deposits was ,364,973. Circulation, which in March showed an in-ase of nearly $5,000,000, in April decreased four millions.

The following table shows the course of current and call ns in Canada during the past thirteen months:

ns.	Current in Canada.	Call in Canada.
2—April	$833,242,621	$69,243,791
y	837,282,550	68,305,157
e	848,940,088	68,701,855
y	852,256,651	70,407,734
gust	852,045,624	75,194,735
tember	859,341,193	72,205,261
ober	879,676,055	73,959,866
vember	874,721,593	70,668,521
cember	881,331,981	70,655,661
3—January	874,705,616	71,376,510
ruary	882,112,726	71,286,799
rch	890,513,446	70,731,030
il	898,964,181	69,757,912

It will thus be seen that current loans in Canada were reased by nearly eight and a half million dollars, the exact ures being $8,451,735, while call loans decreased $973,- . The aforementioned increase in deposits gave the ks additional capital for current loans, which were pro-ly granted to municipalities for actual requirements and legitimate business enterprises.

The growth of current and call loans in Canada during the past few years is shown below, and is evidence of the extensive development of the Dominion during that period:

April.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909	$524,168,988	$35,874,530	$50,213,950	$114,493,570
1910	638,247,238	38,636,636	59,621,328	122,359,531
1911	712,032,758	33,783,963	57,832,690	84,535,658
1912	833,242,621	31,469,847	69,243,791	103,558,392
1913	898,964,181	36,310,033	69,757,912	103,212,185

The following table traces the on demand and after notice deposits accounts during the past thirteen months:

	On demand.	After notice
1912—April	$345,365,183	$615,370,348
May	376,953,217	625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,596
September	374,368,917	640,536,652
October	383,814,572	040,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,340
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280

The total increases in Canadian deposits is shown in the following table:

April.	On demand.	After notice.	Total.
1909	$207,039,031	$450,450,722	$657,489,753
1910	246,746,180	521,427,072	768,173,252
1911	281,964,369	555,822,930	837,787,299
1912	345,365,183	615,370,348	960,735,531
1913	365,340,002	631,160,280	996,500,282

CALGARY'S BUSINESS CONDITIONS

(Staff correspondence.)

Calgary, May 19.

Seeding in Alberta is completed, and the wheat fields are en in all parts of the country. Conditions seem to be al for a good crop as there is plenty of moisture in the und to carry the wheat for some time.

Business conditions in Calgary are sound, and retailers wholesalers are doing an increased volume of business. llections are reported slow in nearly all parts of the pro-ce, although satisfactory improvement has been notice-e during the last 6 weeks.

The new farm implement and machinery act, which has n put in force by the local government, is affecting many ge firms in Alberta doing business in those lines.

Civic works have been held up for some time on ac-nt of financial conditions, but a large programme of im-vements is laid out for this year.

The Bank of Montreal are fiscal agents for the city of lgary and arrangements are now complete whereby the will have placed to its credit for immediate use $2,000,-, so that the season's work can now be proceeded with.

The Canadian Pacific Railway are actively engaged on branch lines and the double tracking of the main line is ng rapidly pushed forward. The ready-made farm plan one of much importance in the development of this pro-ce.

◆

Considerable rain has fallen this week over the Calgary trict and the soil is in condition to stand a long period of weather. Some light frosts occurred but without causing damage. The outlook for spring grains is good and the vent of warm weather leaves nothing further to be desir-just now.

MERCHANTS BANK

Monetary Times Office,
Montreal, May 22.

At the meeting of the Merchants Bank a report for five months' earnings, only, was presented. It may be recalled that at the last annual meeting of the Merchants Bank the announcement was made that it was the intention to alter the closing of the year from the 30th November to the 30th April. This policy was deemed advisable in view of the fact that at the 30th November the demands upon the bank were at their height, that being perhaps the busiest period of the year. It was considered advisable to have the year terminate after the heavy crop movement was over and at a time when the slackness in business would give the officials a better opportunity of preparing their reports. Accordingly the bank has just presented its report for the five months period ending April 30th. The earnings, together with the charges against them so far as these have been revealed in the annual report, were as follows during the period mentioned:

Net profits for 5 months ending April 30th, 1913, after payment of charges, rebate on discounts, interest on deposits, and after making full provision for bad and doubtful debts		$533,653
Dividend No. 102 for 3 months	$168,750	
Dividend No. 103 for 2 months	112,607	
		281,357
		$252,296

As the rate of the above dividends was 10 per cent. per annum, it will be seen that the total amount earned was approximately 19 per cent.

St. Eugene	138	1,356
Molly Gibson	2	1,279
Richmond Eureka	...	909
Other mines	1,808	72,389
Total tons	6,997	287,395

Harvey Knitting Company.—The first annual meeting of the Harvey Knitting Company, Limited, was held at Woodstock, Ontario, May 19, 1913. The company has made a wonderful showing for the first year's business.

The company manufacture sweater coats and summer underwear. The machinery for underwear was installed during the year, and a dye and bleach house constructed. It was decided to put in some additional machinery, and build a warehouse. The present output is three times greater than last year, and the goods in both departments were placed in about six weeks time.

A dividend of seven per cent. was declared on the preferred stock to the end of March 31st, and will be payable 10th June. To maintain the output and add additional machinery, preferred shares are being offered the shareholders, in proportion of one share for every two held.

The following directors were re-elected:—Messrs. E. W. Nesbitt, K. W. Harvey, William Barrowclough, Woodstock; John Campbell, St. Thomas; Stanley Mills, Hamilton; T. B. Escott, London; and E. B. Thompson, Toronto.

Canadian Express Company.—The Canadian Express Company reports to the United States interstate commerce commission for January and seven months compared as follows:

	1913.	1912.	Changes. Inc. or dec.
Tot. receipts from op. ..	$ 232,235	$ 191,303	+ $ 40,932
Express privileges	108,823	86,728	+ 22,095
Total oper. revs.	123,412	104,574	+ 18,837
Total oper. exp.	126,169	104,962	+ 21,206
Net oper. deficit	2,756	387	+ 2,369

New Brunswick Telephone Company.—That there are about 13,000 telephones in New Brunswick was stated at the annual meeting of the shareholders of the New Brunswick Telephone Company by President S. H. White in his report. During the past year 1,624 new telephones were installed, bringing the exact total up to 12,915.

The amount for expenses and depreciation is $297,326.04, leaving a net revenue of $88,680.95. On profit and loss account $14,473.68 is carried forward to credit. The financial statement showed assets to the value of $1,647,916.16; a surplus of $14,473.68 over the liabilities. The gross revenue was shown as $386,006.99.

The officers and directors were re-elected as follows:—President, Mr. S. H. White, Sussex; 1st vice-president, Mr. F. P. Thompson, Fredericton; 2nd vice-president, Mr. F. B Black, Sackville; secretary-treasurer, Mr. S. A. W. McMackin, St. John. Directors—The president, vice-presidents, Messrs. G. W. Ganong. St. Stephen; L. B. MacFarlane, Montreal; F. B. Carvell, M.P., Woodstock; R. O'Leary, Richibucto; W. B. Snowball, Chatham; F. W. Sumner, Moncton; A. W. Bennett, Sackville; A. R. Slipp, M. L. A., Fredericton; R. B. Emerson, H. P. Robinson, J. L. McAvity, and J. M. Robinson, St. John. The directors decided to open an exchange at Gagetown.

Canadian Cottons Company.—At the Canadian Cottons Company's annual meeting, apart from a somewhat spirited request for a dividend on the common stock, nothing of importance transpired.

In his annual address, President Morrice spoke of the heavy demands occasioned by new machinery necessary to keep abreast of the times in the cotton world, and stated that Canadian Cottons at the present time had five or six mills which, from the standpoint of efficiency and excellence of product, had no superiors on the American continent.

The dividend question was first raised by Mr. A. Haig Sims, and later by Sir Thomas Tait, but neither of these shareholders succeeded in drawing out the president of the company, Mr. D. Morrice, with any degree of success in this regard.

"The dividend may come along some day or other," the president stated, in answer to queries of the meeting, but further than this would not commit himself or his confreres on the board.

"The books are closed for last year," said Mr. Morrice, with a smile. "We are in a new year, and what it will have in store for us is hard to say. Wait until we see how the raw cotton market acts, and perhaps we will have something to say in this connection."

The number of directors was reduced to nine, and the following were elected: Mr. David Morrice, president; Mr. C. R. Hosmer, vice-president; Hon. F. L. Beique, K.C., Sir H. Montagu Allan, Messrs. George Caverhill, D. Morrice Jun., A. A. Morrice, A. O. Dawson and Theophilus King

DOMINION STEEL CORPORATION

Issue in London—Requirements of Corporation— Charges and Interest

Monetary Times Office,

Montreal, May 22nd.

An announcement of much importance to the share- ers of Dominion Steel Corporation came over the cable London the other day. This was to the effect that the pany was about to issue $2,500,000 more of its 6 per preferred stock. As this issue would add an additional ,000 to the dividend disbursements of the year, which would take precedence to the dividends on the common , and as the possibilities of the dividends on the com- being passed had already been discussed, the effect of announcement was anything but encouraging so far as price of the common shares was concerned. The stock on the Montreal Exchange until it reached 47¼ on Wed- ay, this being the lowest price Steel Corporation stock sold at in a considerable time past.

l Issue of Stock.

The corporation has already made an issue of this same erred 6 per cent. stock, some $7,000,000 of it having exchanged for the $3,500,000 of 6 per cent. income s of the Dominion Iron and Steel Company and for a lar amount of the income 6 per cent. bonds of the Do- on Coal Company. Adding to this the $2,500,000 just led to, would make a total issue of $9,500,000 of this of stock.

From all that can be learned the table which appears be- will give a fairly accurate idea of the requirements of corporation for bond interest and stock dividends. In table the charges against the two subsidiary companies shown separately and instead of showing the $7,000,000 referred stock as a charge against the holding company, has been shown the income bonds against each of the idiary companies.

Not Altered.

As the total of the income bonds and the interest thereon e same as the amount of the preferred stock, the charges in no way altered.

inion Iron and Steel Company.	Outstanding.	Annual charge.	
7% cum. stock......	$5,000,000.00	$350,000	
t mortgage 5% bonds	7,245,000.00	362,250	
. mortgage 5% bonds	6,812,846.66	340,642	
me bonds 6%	3,500,000.00	210,000	
Total Dominion Iron and Steel charges			$1,262,892
inion Coal Company.			
7% cum. stock	$3,000,000.00	$210,000	
t mortgage 5% bonds	6,904,500.00	345,225	
me bonds 6%	3,500,000.00	210,000	
otal Dominion Coal charges			765,225
			$2,028,117
inion Steel Corporation.			
entures 5%	$1,500,000.00	$ 75,000	
erred 6% stock report- l about to be issued..	2,500,000.00	150,000	
			225,000
			$2,253,117
n. stock Corporation $36,896,200.00 (4%)			1,475,848
			$3,728,965

In the event of earnings of the combined companies not g sufficient to meet all the bond interests and dividend re- ements, the earnings of either company would be applied he first instance to the interest and dividend charges on own bonds and preferred stock. The surplus remaining r all these charges have been met would then be avail- for other disbursements in order of priority. Thus the d interest and preferred dividends on either of the sub- aries in a lean year for that particular subsidiary could be l out of the surplus profits of the other subsidiary.

Mr. Mark Workman, one of the directors of the Dominion el Corporation, who has just returned from a trip abroad, cules the story that the Steel Corporation is to issue $2,- ,000 preferred stock. "There will be no issue of preferred res," said Mr. Workman. "That is certain. The new ncing will probably be arranged through the sale of de- ture stock or bonds, which will be very much cheaper than ing preferred. Nothing definite, however, will be done in respect until the return of Mr. Plummer." He also de- red that there was no likelihood of a dividend being cut or sed.

OTTAWA LIGHT, HEAT AND POWER

Attracts Attention at Montreal—New Stock Issue— Company's Capital and Earnings

Monetary Times Office,

Montreal, May 22nd.

One of the features of the week in the local stock exchange was the sudden jump which took place Wednesday afternoon in the price of the stock of the Ottawa Light, Heat and Power Company. This stock has lately been selling at around 179 to 180, which is 10 to 12 points lower than the high mark reached a couple of months ago when there was talk of increased disbursements coming to the shareholders. This was confirmed at the time of the annual meeting of the company when it was announced that there would be an increase in the capital and that shareholders would receive rights to subscribe to the new stock at par. In addition to this it was announced that instead of paying a dividend of 7 per cent. and a bonus of 1 per cent. annually the dividend would be increased to a straight 8 per cent. It was assumed also that the bonus would be increased.

New Stock Issue.

In explanation of the advance a story from Ottawa was to the effect that at a session of the directors, held at Ottawa, it had been decided to make a new issue of approximately $800,000 of stock, at par, to shareholders. Payments for the stock are, it is understood, to extend over the year.

There was a rumor on the street also, to the effect that the directors were favorable to the payment of a 1 per cent. bonus on July 1st. This rumor receives confirmation in the fact that the prediction was made at the time of the annual meeting that the bonus would hereafter be 1 per cent. half-yearly instead of 1 per cent. yearly. The disbursements on the present capital would consequently figure out about as follows:—

1912 7 per cent. dividends plus 1 per cent. bonus, total, 8 per cent.	$158,752
1913 8 per cent. dividends plus 2 per cent. bonus, total, 10 per cent.	$198,440

Capital and Earnings.

The issued capital of the company at the end of last year amounted to $1,984,400. The authorized capital was $2,000,000. In December last, however, the company obtained the right to increase its capital by $3,000,000, making a total authorized capital of $5,000,000. Out of this total the new issue of approximately $800,000 will be made.

It would seem that the ratio of new stock to old would be about two shares in every five old.

At the recent selling price of 180, this will give rights in Ottawa Power in value of about $22; and at the recent high price of 190 to 191 the right would be worth considerably more.

Ottawa Power Company has been showing excellent results of late. It is the holding company for the Ottawa Gas and the Ottawa Electric Company. The earnings of these concerns last year showed a very considerable increase, the following being their net income:

Ottawa Electric	$243,425	Income over 1911,	$27,542
Ottawa Gas Company .	54,617	Income over 1911,	1,760
	$298,042		$29,302

DEATH OF MR. J. MACKENZIE

Mr. J. Mackenzie, a well-known and esteemed Toronto banker, died on Monday last in the Wellesley Hospital, Toronto. Mr. Mackenzie's banking career extended over thirty years. Entering the Imperial Bank's service as a junior at St, Thomas in 1882, Mr. Mackenzie advanced to other positions, being located at Ingersoll in 1887; he then received an appointment in the Toronto office, where he rose to be assistant to Mr. O. F. Rice, the manager, which position he has filled for eleven years.

Mr. George W. Yarker, manager of the Toronto Clearing House, interrupted the regular procedure, to pay a warm tribute of respect to the memory of the late Mr. Mackenzie, "Mr. Mackenzie was a very capable banker," said Mr. Yarker, "and the charm of his manner and the cordiality of his disposition, made it most pleasant to associate or do business with him."

The number of directors of Messrs. Murray-Kay, Limited, Toronto, has been decreased from ten to eight.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

VI.

Points to be Considered in Investments

BY M. P. LANGSTAFF, A.I.A., F.A.S.

Having considered the advisability of investing in the various classes of securities, I will now deal with certain points to be kept in view when the merits of investments are being considered. Firstly, then, as to mortgages on real estate whatever class, whether city, town, village or farm:

1. Law usually limits the amount of the loan to, say, 60 per cent. of the value of the property. This value should be determined by an experienced appraiser.

2. The character and financial position of the borrower are always of prime importance.

3. The instalment feature stipulating for an annual repayment on account of the principal is often introduced, as any decrease which may take place in the value of the security is thus more or less counteracted.

4. In view of a possible foreclosure, determine the rental value of the property, in order that the company may know what revenue it could derive therefrom. This rental value should be sufficient to provide for payment of the interest and principal of the loan.

5. In case of foreclosure dispose of the property at the first favorable opportunity. Difficulty of managing the property, and possible depreciation are thus avoided as well as the forced and hurried sale necessary as the time limit allowed by the law approaches.

6. It is not a good policy to encourage progressive loans, i.e., when building is in progress of construction.

Question of Renewals.

7. Constant watchfulness and periodical inspection should be maintained not merely when a renewal is asked for, but throughout the whole period of the loan.

8. When a renewal is asked for, the whole question of the loan should be reconsidered.

9. See that the loan is a first mortgage on the property, free of all other liens and encumbrances, that the title is clear, all taxes paid, and that no judgments are registered against the owner.

10. Adequate fire insurance protection must be provided.

11. See that taxes are paid promptly as they fall due.

12. Certain states and provinces tax interest on investments, and this fact should be taken into account when arranging for the rate of interest.

13. A company should not grant loans for amounts so large that they would be seriously crippled or hampered in case of loss. Cyclones will happen in other places besides Regina; and earthquakes sometimes occur outside of San Francisco.

14. Investments of this kind often require constant supervision, and the company must determine whether they can be made as well at a distance from head office as they can under the eyes of the management.

15. It is of particular importance that loans by way of mortgages on real estate should be well distributed, otherwise depreciation of values in a particular section would cause serious loss.

16. The borrower should not be allowed to fall into arrears in respect to interest payments.

City Mortgages.

Now as to city mortgages: A pamphlet by Parsons, entitled "Elements of Safety in City Mortgages," deals with this subject. A brief synopsis of his paper follows:—

(1) Avoid those states whose laws are distinctly unfavorable to the lender.

(2) Select carefully from the standpoint of location and natural resources, the cities in which loans are to be made.

(3) Avoid "boom" towns. Do not invest in a city until it has a fair population and a reasonably accurate forecast of future growth may be obtained.

(4) Exclude such sections of a city as are retrograding in value and locations which, owing to topographical defects or nuisances, are undesirable.

(5) Avoid vacant land and all property devoted to special use.

(6) Broadly speaking, loans should be confined—in cities of moderate size at least—to those classes of property in general demand; such as retail business property, office buildings, and detached rental property, with exceptions in the case of loans, for a reasonable percentage of the value, upon modern and well-located wholesale property, and substantially built and well-arranged flat or apartment houses in the larger cities, provided, however, the disproportion between land and building values is not too great.

(7) Keep in personal contact with the cities in which loans are to be made. Frequent visits to the field of operations are essential and a systematic recording of the real estate and mortgage transactions therein, is necessary.

(8) A comparative study of rentals and values in similarly situated cities of equal size is of the utmost importance in order that tendencies towards inflation in individual cases may be made apparent and avoided.

(9) Intelligent and responsible local representatives are a necessity; men who have lived for a number of years in their respective localities, and who have kept themselves informed upon real estate values and mortgage conditions.

Net Income Over Period of Years.

(10) The question of the net income over a period of years is one of the greatest importance. While there are exceptions to the rule, in all cities there is usually an agreed income basis upon which all improved property aside from high-priced residences, is sold. So that with the income basis in mind upon which a given class of property changes hands, the value ascribed to it should not exceed a figure upon which the net rentals have paid such a return over a period of years. The return which a purchaser is willing to accept is affected of course, by the anticipated appreciation or depreciation of the neighborhood.

(11) The mistake should not be made of assuming that, because a certain amount of money has been paid for or expended upon a property, the value is equal to that sum, or that a property having at one time been worth a certain amount is worth that sum at the present time, or will be so necessarily in the future. For safety, a property should reasonably approximate the character and value of its surroundings; for loaning purposes, an expensive residence in a neighborhood of small cottages is of but slightly more value than its humbler neighbors, and a retail store on a quiet residence street may be almost valueless. With the growth of a city, constant shifts and changes are taking place, which, while enhancing the value of certain sections, depreciate and render undesirable other locations. It is true that, aside from times of great activity, or of unusual depression, the price paid for a property is the best indication of its value. Moreover, the great majority of buildings are suited to their surroundings. It is the exceptional conditions, however, under which losses occur, that must be guarded against.

(12) In all but the largest cities, it is not considered conservative to lend higher than 50 per cent. of a careful valuation of the property.

(13) The instalment principle of repayment of loans is recommended.

(14) The moral hazard is an important factor in this as in other forms of business. The physical security for a mortgage loan, however, should at all times be adequate aside from the personal bond.

(15) A constant and intelligent watchfulness is imperative.

He concludes by saying "To those whose loans are confined to a moderate percentage of the value of property [illegible] universal demand located in improving sections of growing cities, and who will observe the other fundamental principles herein briefly set forth, the changing conditions of business need be less matters of concern than in any other field of investment.

Farm Mortgages.

In considering farm mortgages the following points must be borne in mind:

(1) Good farm property in a favorable section fluctuates very little in value, but crop failures must be guarded against. See that there is proper rotation of crops, and up-to-date methods of farming.

(2) Reliable and experienced agents must be selected.

(3) Consider the nature of the soil, the climate, the class of crops raised, the nearness to market, churches, schools, transportation facilities, and sufficiency of farm tools.

(4) The moral hazard. What is the farmer's past record as a producer and a saver, and the reason for his needing the loan?

(5) It is of the utmost importance to ascertain the ready market value—not in boom times—of similar lands in the same locality.

(6) Although buildings may add materially to the value of the farm, yet that is not where the earning capacity lies and this fact should be taken into account in determining the proportion of the whole value which should be lent.

(7) Unimproved land should not be lent upon. A farm in a productive state is always readily marketable, and a conservative valuation of such, which ignores local and unjustified rises in market value, leaves an ample margin of safety as a protection to the investor.

(8) The collection of interest under farm mortgages is ften difficult. One year's interest may be in arrears to be ade up by the bumper crops of the succeeding years. While ore latitude has to be allowed to the borrower here than nder, say, city loans, yet the interest should not be allowed fall too far into arrears.

own and Village Mortgages.

Generally speaking, mortgages in towns or villages are ot as safe as those on city property or on farm lands. Town d village properties are subject to the success or otherwise the district surrounding them. In the event of a forced quidation, it is difficult to sell them at anything like their al value, and thus the holder of a foreclosed mortgage ay have the property lying idle on his hands for years. hile a farm in a productive district is always readily arketable, the land in a town adjacent to such a farm may most difficult to dispose of. The above remarks do not, course, apply to growing and progressive towns.

MUTUAL LIFE OF CANADA'S FIRST INVESTMENT

Those readers of The Monetary Times who have been fol-ving the series of articles on "Investment of Life Insurance mpany's Funds," will see from the following paragraphs ken from an interesting, illustrated and descriptive booklet aring the caption, The Story of the Mutual Life of Canada; w a Canadian company made its first investment. Before oo the Mutual Life Assurance Company of Canada was own as the Ontario Mutual Life Assurance Company, and its early days the young company's first investment, was advance of $5,000 at 8 per cent. secured by a mortgage on two hundred acre farm, in the County of Wellington, Ont. ie loan was issued in the year 1873, and repaid in 1894 when mortgage was released. From this time forward loans on farm lands became a favorite source of revenue and by end of the year 1912 investments of this nature aggregated 1.051,716.

The first municipal debenture was bought from the town Guelph in the same year, 1873, and resulted in earning for company at least 8 per cent. half-yearly.

Such were the first investment steps taken by the Ontario itual.

◆

IN THE INSURANCE ARENA

In proportion to the population, Saskatchewan is well pplied with insurance companies. Statistics gathered by . Arthur E. Fisher, recently appointed insurance commis-ner, go to show that there are 85 fire insurance companies, life insurance companies, and 33 insurance companies of general nature, such as health and accident, doing business Saskatchewan, making a total of 162.

Insurance on all city of Regina buildings will be placed the city council in the near future. The commissioners ve been instructed to arrange with the various companies ving representatives in Regina, for insurance on the vari-s buildings as follows:

City Hall, $25,000; contents, $10,000; power house, 8,000; machinery, etc., $130,000; market building, $5,-; city storehouse, $3,500; contents, $25,000; grandstand Dominion Park, $1,500; stables, $1,500; contents, $2,-; car barns, $19,000; exhibition buildings, $130,000; mp house at Boggy Creek, $1,000; two pumps, $6,000; gina warehouse, $13,000; eight shacks, $800; horses, 4,200; rolling stock, $112,000; health and relief equip-nt, $1,000; works equipment, $2,000; nurses' home, furni-e, $1,000; fire halls, No. 3 and 4, $14,000; equipment, ,000—total, $538,000.

The Canada Hail Insurance Company has received a minion license, authorizing it to transact hail insurance oughout Canada. Mr. W. J. Wilcox, Winnipeg, has been pointed chief agent

A license has been issued to the Canadian Surety Com-ny, for the transaction throughout Canada of guarantee urance. Mr. William H. Hall, Toronto, has been appoint- chief agent.

The Home Bank of Canada will open a temporary branch ice at 1157 Yonge Street, Toronto. The bank will erect new building on its own site this summer.

VALUE OF LIFE INSURANCE

XIII.

Lucrative Investment

By C. A. HASTINGS.

The two main objects of saving are:

(1) In the event of early demise, to leave something behind.

(2) To provide something for old age or infirmity.

Experience shows that 95% of men do not take out large enough policies to meet these ends, and so they try to make up for it by "additional savings," because there is hardly a man who realizes that a premium is a savings—is a putting on one side—and not an expense. I propose to point out how these "additional savings" can be most advantageously turned to account, and I refer more particularly to those men whose incomes are fixed and not to those men whose incomes fluctuate.

A Concrete Example.

I will take a concrete example (to illustrate how a small annual saving can grow), of a healthy man, 25 years of age, who purchases for an annual premium of say $270, a $10,000 endowment assurance policy maturing in thirty years. To begin with, whatever that man is worth alive, the moment he has paid the first $270, he is worth $10,000 dead, as against $270 invested in any other conceivable way. Secondly, he is protected to the tune of $10,000 for thirty whole years. Thirdly, looking at it at the very worst end of this investment, from the viewpoint of the assured, which would be, should he die immediately after the thirtieth year, by which time he will have made all payments, then he would have paid $8,100 by yearly instalments and his estate would receive $10,000 spot cash. I merely mention this as being the worst that could happen, because should the assured die before the thirtieth year, he would have paid this amount $8,100, less by $270 for each year his death occurred prior to the thirtieth year.

Now his benefits do not end here. If the assured prefers not to take the cash, i.e., $10,000, he may—if he wishes—buy an annuity, and it will be found that for a total sum of $8,100 saved in thirty years, he has created for himself an estate of $10,000, or an annuity of $750 per annum—7½ per cent. on the face value of his policy.

Moreover, it must be borne in mind, that during the whole period of thirty years his estate has been protected for $10,000; he has never undergone, during that period, any danger of that amount diminishing, and the premiums he has paid have been fully protected. Are not these benefits substantial? Does it not prove the money-making power of an assurance company, when compared to that of an individual?

A Life Office is an Investment Trust.

It is a simple reason why life assurance is so sound. Policyholders are those who are above the average physique —for they have passed a strict examination of their bodies and family history—and there are thousands of them; therefore, by this process the individual is protected against the financial effects of premature decease. Now, this individual is one of several thousands who are "banking" their funds in one colossal sinking fund which is handled for their benefit—of course, some are handled better than others—still, there is no getting away from the fact that the assurance protection, plus the investment, makes a life office an investment trust and something more.

The following articles in this series have already appeared:—

CIVIC PROGRESS IS SHOWN

Moose Jaw Gets Industries—Agricultural Conditions—Medicine Hat's Progress

(Staff Correspondence).

Moose Jaw, May 19th.

Wheat is everywhere showing green, and so far has escaped any set-back. In agricultural spheres a good crop is looked for, and much benefit will be derived from such a result. The financial stringency, low wheat prices, etc., has forced the farmers to economize, and when the wheat has been sold, considerable numbers of debts will be liquidated and a brighter era should ensure for agriculture and commerce generally.

Real estate is somewhat quiet, though the unsatisfactory elements have been eliminated and legitimate dealers have benefited by their disappearance.

As mentioned in recent issues of The Monetary Times, Moose Jaw is attracting considerable interest from industrial concerns.

Industries are Locating.

The Metzger Seed and Oil Company, of Toledo, being the principal industry recently to decide on Moose Jaw as its location, one or two other industries are also completing arrangements to do so.

The Moose Jaw Citizens' Hotel Company is being promoted by Mr. W. L. Brackett, of Messrs. W. L. Brackett Company, Limited. The officers of the company are: W. E. Seaborn, president; J. R. Green, vice-president; Richard Loney, treasurer, and W. L. Brackett, secretary and managing director, and the directors include A. B. Chamberlain, of the firm of Bertrand and Chamberlin, architects, of Minneapolis and Moose Jaw, and W. B. Willoughby.

Moose Jaw investors are to raise the necessary $200,000 to build the million dollar hotel. Four dollars being outside capital for every dollar invested locally. The hotel is to be completed by the end of 1914, and will be twelve stories in height.

Progress Shown at Medicine Hat.

Medicine Hat is a city that has shown marked progress during the past year. Many new buildings have been erected during the past year. This year the city is going to spend almost a million dollars in improvements. The citizens are voting this week on whether the street railway shall be municipally owned or the charter granted to private interests.

It is estimated at the continued rate of progress being maintained by the city the population will soon be nearing twenty thousand.

◆

STERLING BANK

The Sterling Bank's annual statement reveals a favorable year's banking operations and shows profits amounting to $113,400, which with $76,536 brought forward, made a total of $189,937. Dividends amounted to $62,276, and $30,000 were added to the contingent account, leaving a balance of $97,660. The bank's reserve fund amounts to $300,000. Deposits aggregate $6,505,733, of which $1,650,296 are non-interest bearing.

Much publicity has been given to banking practice in Canada during the last few months, and the following remarks of Mr. G. T. Somers, president of the Sterling Bank, are of interest just at the period when the Bank Act has been presented at Ottawa for its third reading.

Mr. G. T. Somers, the president, in moving the adoption of the report of the bank, drew attention to the question of bank inspection to be settled with consideration of the bank act now before parliament.

"While we know," he remarked, "that no external inspection can be as thorough as our own, we believe in the theory of an independent audit and think the present proposal before the house to be the most workable and satisfactory yet devised, and believe it will be productive of good results."

As to the future outlook, Mr. Somers opined that monetary conditions have been greatly disturbed for some time, and caution is most necessary to avoid over-extension of credits, but the future of this country is assured, and the present check of business will do no harm. In any event, our position entitles us to contemplate the year ahead with equanimity and confidence.

The Cuthbertson Bond Company is the name of a new financial corporation recently formed at Fort William, Ont. The principals of the company are Messrs. J. C. Murray, A. C. [illegible], A. A. Vickers, A. Sear and C. L. Sherrean.

NEW BRUNSWICK'S COMMERCIAL ACTIVITIES

Construction Work is Active—Port of St. John—British Firm Forms Subsidiary Company

(Special Correspondence).

St. John, N.B., May 21st.

The outlook in the province of New Brunswick is bright. The farmers have been enabled to begin seeding operations from one to two weeks earlier than usual. While there is fear that some of the logs may be left in the streams, it is certain that most of them will be brought safely to the mills; and, as the price of lumber is high and advancing, and the demand is very active, this promises to be an excellent year for those engaged in the lumber industry. Many crews of men are engaged on the construction of the St. John Valley Railway and the branch from Fredericton to the coal fields in Queen's County. The Canadian Pacific Railway has taken over the line from the coal fields to Norton on the Intercolonial Railway, and will operate the whole line through to Fredericton as soon as the Fredericton branch is completed this summer. General construction work in the province is active, and the reports from the various towns of the province show that some small new industries are being added here and there.

Steamship Traffic at St. John.

The steamship traffic at the port of St. John has largely increased in the last five years. Figures submitted by the Canadian Pacific Railway show that the imports have more than doubled in that period, while there has been a steady and rapid increase in the exports. The number of steamship sailings was larger during the past winter than ever before, and there would have been more but for the congestion at West St. John during the latter part of the winter. Superintendent Downie of this division of the Canadian Pacific Railway says that the traffic will double in the next five years, and it is absolutely necessary to provide additional wharf and warehouse accommodation at West St. John for next winter. Tenders have been called for one additional wharf, but it cannot be completed this year and a delegation has pressed upon the government at Ottawa the need of other action to prevent such congestion as was experienced during the past season.

Banks are Building.

The Bank of British North America has begun the erection of its new building at Market Square, and the Merchants Bank the complete remodelling of a building for its use on Prince William Street. The Canadian Bank of Commerce has opened a branch at West St. John, and the Royal Bank will erect a building for its north end branch. Many other buildings are also being erected.

The provincial government has approved of the regulations for a town planning commission at St. John, and the city council will now appoint such a commission, which will have control of the laying of the city as it expands, and will have a town planning expert to direct the work.

St. John board of trade is in correspondence with other boards in Quebec and Ontario, and with the railways, in an effort to arrange for an excursion of manufacturers and other business men to the Maritime Provinces during the latter part of June. The proposal is that the excursionists take a special train from Montreal on a certain day and come through to Fredericton and down the river to St. John, making side trips through the provinces and returning at their leisure.

The Molassine Company of Canada, with $250,000 capital, has been organized and has bought out the business of L. C. Prime and Company of St. John. A factory for the manufacture of the company's product will be established in St. John. The company has factories in England, Australia, South Africa, France and Germany.—H. T. H.

◆

LA BANQUE NATIONALE

The profits of La Banque Nationale, shown by the annual statement, equalled $302,304, as against $293,564 last year, an increase of $8,740. This is equal to 15.1 on average paid-up capital compared with 14.6 last year. With the balance from last year of $92,091, there was a sum equal to $394,396 available for disbursement. In addition to dividends at 8 per cent., $150,000 was transferred to reserve and $10,000 to pension fund, leaving a balance of $74,396 carried forward.

Notice deposits increased from $11,572,432 to $13,205,289, while current loans increased from $13,167,850 to $15,399,746. Notes in circulation amounted to $1,938,632, against $1,905,527 a year ago. Liquid assets showed a decrease of $31,600, and the ratio to liabilities equal 37 per cent., as compared with 42 per cent. a year ago. The bank's reserve now amounts to $1,550,000, or 77.5 per cent. of paid up capital.

DOMINION'S SUPPLEMENTARY ESTIMATES

arbors, Rivers, Roads and Canals Receive Attention —Provision for Parcel Post Officials

The supplementary estimates as tabled total $23,470,316.- bringing the total for the year up to $202,622,499.65. This, king the usual allowance for unexpended appropriations, ould mean an expenditure of about $183,000,000. The estites total $17,328,809.98 on consolidated fund account and 141,506.67 on capital.

The votes include $1,500,000 for highways, an increase half a million; $4,000,000 for terminal elevators, $500,000 Intercolonial Railway branches, $3,000 for the Scott Merial Fund, $100,000 for experimental farms.

ney For Roads.

The question of the terminus of the Trent Valley Canal the Georgian Bay is settled by a vote of $250,000 towards work via the Severn, with an outlet near Midland and Port Nicoll. This is expected to be expended this year.

The amounts as proposed to be apportioned under the ghways Bill run from $527,201 for Ontario and $418,449 for ebec to $19,584 for Prince Edward Island. Besides there an appropriation of $25,000 for organization and payment staff.

Militia items, which total $438,200, include $100,000 more annual drill and $50,000 for school teachers' courses in ining.

There are numerous appropriations under the head of il government to provide for increases in pay and personnel the civil service, and for customs and inland revenue in the tside service.

rbors and Rivers.

Three and a half millions additional is asked for harbors d rivers, including half a million each for dry-docks at lifax and Esquimalt; $200,000 more for Port Arthur and rt William; half a million each for further harbor works at John, Vancouver, Victoria, and Toronto, and $600,000 ther for Victoria Harbor.

Miscellaneous items include $5,000 for monument to the roes of the Long Sault; $7,500 for Champlain monument Orillia; $4,866 towards the building fund of the Royal Geoaphical Society, England; $2,500 towards Chrysler's Farm ntennial celebration; $20,000 for expenses of marriage erence to Supreme Court and Privy Council; $5,600 to pay inspectors or supervisors of the parcels-post system; $40,- for the patrol of the northern waters of Canada.

◆

NEW APPRAISAL COMPANY

An appraisal is a statement of plant and equipment, carely described, priced at current rates and costs, and deeciated in detail. It is compiled in such a manner that a m can readily ascertain either the reproductive or presenty value of any section in the plant, from the largest build- to the smallest tool. The value to a manufacturing firm an appraisal furnished by a disinterested party and comed by experts can be readily recognized. In case of fire he able to find the amount that he would require to-day, as ainst, say twelve years ago, to rebuild his plant, or part his plant. The values he can find in his invoice for any secn of the plant, being figured on current prices.

In case of a loan, mortgage, or a bank requiring a stateent, he has in hand an invoice covering his plant and equipent.

The Dominion Appraisal Company has been organized th offices at Toronto, to carry out such appraisals, and purse undertaking detailed and condensed forms of appraisals. e company's mechanical department is under the direction Mr. J. W. A. Miller, who has had considerable practical rkshop and draughting office experience in machine shops England and Canada. He has for the last six years been gaged entirely in appraisal work by the Canadian Apaisal Company, of Montreal, then by the American Apaisal Company, of Milwaukee, Wis., and again latterly by e Canadian Appraisal Company, and is familiar with all deils connected with the mechanical department of the busiss.

The architectural or building department is under Mr. W. arbour's direction, who has had wide experience pertaining buildings, plans and quantity surveying. For several years has been with the Canadian Appraisal Company, Montreal, ring which time he has made appraisals all over the Doinion, and is thoroughly conversant with Canadian condions and methods. Quantity surveying and estimating is other feature of this company's work.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Virden, Man.—Until May 26th for $10,000 5 per cent. 20-year municipal hall debentures. W. Whiteford, secretary-treasurer.

Chaplin, Sask.—The village will borrow $2,000 for permanent improvements. H. S. G. Columbine, secretary-treasurer.

London, Ont.—Until June 2nd for $764,500 debentures. J. S. Bell, city treasurer. (Official advertisement appears on another page).

Last Mountain Valley R. M., No. 250, Sask.—Until June 1st for $10,000 6 per cent. 20-year debentures. A. Graham, secretary-treasurer.

Mount Royal, Que.—An issue of $250,000 for improvements in the Canadian Northern Railway Model City is expected to be made shortly.

Souris, Man.—Until May 31st for $54,000 5 per cent. 30-year debentures. J. W. Breakey, secretary-treasurer. (Official advertisement appears on another page).

Brighton, Ont.—Until May 31st for $50,000 5 per cent. 30-year waterworks debentures. Tom C. Lockwood, town clerk. (Official advertisement appears on another page).

Beaverton, Ont.—Until June 5th for $2,000 5 per cent. 20-year sidewalk and roadways debentures. C. A. Paterson, clerk. (Official advertisement appears on another page).

Milton Rural Municipality, No. 292, Sask.—The municipality has been authorized to borrow $8,000 for permanent improvements. L. W. Atkinson, secretary-treasurer, Merid.

Russell Township, Ont.—Until May 31st for $10,000 5 per cent. 20-year bridge debentures. F. J. Larocque, treasurer, St. Onge. (Official advertisement appears on another page).

Forest, Ont.—Until May 28th, for $20,000 5 per cent. 30-year electric light debentures. G. E. McIntosh, chairman, Finance Committee. (Official advertisement appears on another page).

Dalhousie, N.B.—Until June 10th for $30,000 5 per cent. 30-year waterworks and electric light debentures. A. J. LeBlanc, town clerk. (Official advertisement appears on another page.)

Swift Current S.D. No. 167, Sask.—Until May 25th for $20,000 20-year 8 per cent. debentures. J. T. Dodds, secretary-treasurer, Swift Current. (Official advertisement appears on another page).

Montreal, Que.—Until May 26th for $200,000 5 per cent. 20-year debentures of the Hochelaga School Commission. Wilfred Desjardins, secretary-treasurer, Hochelaga School Commission, Montreal.

Rudy Municipality, No. 284, Sask.—Until June 19th for $10,000 6 per cent. 20-year roads and bridges debentures. J. B. Stoehr, secretary-treasurer, Glenside. (Official advertisement appears on another page).

Battleford, Sask.—Until June 2nd for $25,000 30-year 6 per cent. debentures of St. Vital, of Battleford Catholic S.D. No. 11. J. D. Noel, secretary-treasurer. (Official advertisement appears on another page).

Montreal, Que.—Until June 12th for $500,000 4½ per cent. 30-year bonds of the Protestant Board of School Commissioners. C. J. Binmore, treasurer, 197 Peel Street, Montreal. (Official advertisement appears on another page.)

St. Catharines, Ont.—Until May 26th for $235,273.99 4½ per cent. 15, 20 and 30-year, waterworks, sewers, fire hall, gas extension and local improvement debentures. W. A. Mittleberger, city treasurer. (Official advertisement appears on another page).

Brandon, Man.—Until June 2nd for the following 5 per cent. debentures:—$12,000 10-year city hall improvement; $17,000 20-year land purchases; $3,927.33 20-year roadway; $61,313.98 20-year street paving; $30,656.99 20-year street paving; $21,509.11 20-year sidewalk; $41,901.52 30-year sewerage; and $26,618 street lighting 20-year. H. Brown, city clerk. (Official advertisement appears on another page).

◆

A resolution has been presented in the Commons by Hon. L. P. Pelletier, Postmaster-General, and passed by the House, marking the first step towards establishing a parcel post system in Canada. The resolution that was passed endorses the principle of establishing a parcel post system, and authorizes the appointment of two officers and supervisors at salaries of $2,800 each, with an annual increase to a maximum of $3,500. Mr. Pelletier, in introducing the resolution, said that he was not yet ready to explain the details of the bill founded thereon, and would defer until later any declaration as to what was really planned. The bill is only pro forma.

BRITISH COLUMBIA

Situation in General—Coal Strike Affects Nanaimo—Many Developments Taking Place

(Staff correspondence.)

Vancouver, May 17.

While those engaged in commercial lines report that there has been somewhat of a falling off during the past week or two, general indications are that conditions are sound and that progress, though perhaps retarded, is being made. Prevailing financial conditions throughout the world has had a direct effect on business in British Columbia. Just at present the lumbering industry is beginning to feel the effect, for with tight money many buildings proposed are being held back for the present.

Things have not so far advanced, however, that the situation is depressing either in one particular line or as a whole, except perhaps in real estate sub-divisions. Even if buildings are not to be erected this summer as was anticipated earlier in the year, it will not mean that such proposals have been abandoned. In many cases permits have been issued, and when conditions are more favorable will be completed.

Railway Traffic is Increasing.

It is announced that the Canadian Pacific Railway will continue one more train to the coast, being that on the run between Winnipeg and Moose Jaw. It will mean another train also to the east as far as Winnipeg. Then, too demand is being made for another traffic bridge across the Fraser River at New Westminster, the argument being that the present structure, now used by railways and vehicles, is not sufficient for the needs. It is pointed out that with the Canadian Northern Railway in operation, the railway tracks will be almost in constant use. If another bridge is built by the government it will be further down the river, at Annacis Island. Customs reports of imports and exports also show that the increases are as great in percentage as formerly and greater in actual figures. With such a basis of fact, it may be safely argued that development is along safe and sure lines.

Governments and Natural Resources.

The prospects are that the coal famine next winter will be somewhat acute, for with the cessation of labor at the mines of the Western Fuel Company on Vancouver Island, even tugs have to get their coal from Seattle. It is being suggested that the government should exercise some control in the matter of the exploitation of the natural resources of the country. As it is, the conflict between capital and labor is continuous, particularly in the mining industry. In the present instance, the men went out on May 1st, and a few days after voted to return to work. To show their strength, the company shut down its entire plant, ostensibly to teach the men by cutting off their supplies that the company was not to be trifled with. In the meanwhile, while the men show their independence by going on strike and the company retaliates by closing up the works, the public suffers. Not only is there an acute shortage of coal, even for summer time, but in Nanaimo conditions are depressing. In no town of the province was there a better outlook a couple of months ago, but with the cutting off of a payroll of well on for $300,000 a month, the difference is marked. It is strongly contended that either the provincial or federal government should take steps to prevent sudden cessation in industries of this kind, on which the general public depend in one way or another. Petition is being made that the duty on coal be relaxed as long as the strike is in progress, for it is a hardship to import this article from the United States, let alone pay an impost.

Developments are Varied.

Announcement is made this week at Ottawa by Hon. George H. Perley that the government will erect an elevator on the coast. It is presumed that this will be built on Burrard Inlet, though whether it will be in Vancouver proper is yet to be definitely decided. The city, however, welcomes any addition to its shipping facilities, whether it be on Burrard Inlet in the city or at some other point. It all means greater activity in the Greater Vancouver, which extends from Burrard Inlet to the Fraser River, and from Point Grey to the Pitt River.

On Vancouver Island the Salvation Army has what is called the Coombs' colony, named after Commissioner Coombs. It consists of fifteen farms, each of twenty acres, [illegible] of which are cleared and barns and houses erected. The terms of payment are reasonable, with payments spread over ten years. All these farms are taken up, except one, and [illegible] is in hand for the disposal of the other. This [illegible] experimental project on the part of the Army [illegible] has been successful. Incidentally the Army in helping people is doing just what is required in British Columbia. The location is thirty miles from Nanaimo, on the line of the Esquimalt and Nanaimo Railway, and there is also a good highway from Nanaimo to the colony.

Dredging Company Formed.

The Northern Dredging Company, Limited, is a new concern with its head offices in Vancouver. It has been formed with a large capital to undertake contracts from municipalities, the feature of their operations being that the company will buy the bonds themselves if the market is favorable, and go ahead with the work.

Capital both in Eastern and Western capital is interested, those in the East being represented by Mr. John A. McDougall, of Ottawa, who has been chosen vice-president and general manager. Mr. W. B. Ryan, of Victoria, will look after the interests of Western shareholders.

This week the first raw sugar from Cuba reached the refinery in Vancouver. The raw article has in the past been brought from Java and the Philippines and from the Fiji Islands, where the British Columbia Sugar Refinery Company has a plantation and a mill.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended May 16th:—Buffalo, 65,900; Penna. Can., 50,900; Cobalt Lake, 63,686; La Rose, 85,775; York, Ont. Silver Mine, 40,000; O'Brien, 64,930; Cobalt Townsite, 81,732; Dominion Reduction, 84,000; McKinley-Darragh, 303,360; Temiskaming, 60,290; Nipissing, 127,129; total, 1,027,702 pounds or 513 tons. The total shipments since January 1st are now 15,052,771 pounds, or 7,526 pounds.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,50 tons.

◆

PRICES STILL TEND UPWARD

The labor department's index number of wholesale prices stood at 136.3 for April as compared with 135.9 in March, and 136.0 in April, 1912. The chief increases occurred in western grains, animals and meats, earthenware, paints and oils. There were increases in eggs, fresh fish, fruits and vegetables, cotton, brooms and raw rubber. Grains and fodder, dairy products, fruits and vegetables were lower than a year ago, but most of the other groups were higher.

In retail prices there was a general decline in eggs, and an upward movement in meats, especially in pork products. Butter, milk and cheese were also downward. Coal was reduced for the summer in some localities. Rentals were strongly upward in several cities.

◆

TRADE DISPUTES DURING APRIL

While the actual number of trade disputes in existence during April was greater than in the preceding month and exceeded by twelve that of the corresponding month of last year, the number of working days lost to employees thereby was not as great as during April, 1912. The industries most affected by disputes in April, according to the Labor Gazette, were mining, building and the clothing trades. The dispute of coal and metalliferous miners in British Columbia, pr viously begun, continued, as did also the strike of gold mi ers at Porcupine. The most serious disputes in the buildi trades involved painters at Winnipeg and miscellaneous e ployees at Nelson, B.C. In the clothing trades more tha 2,000 garment workers at Hamilton were thrown out of wor by a dispute which lasted about two weeks. Business con tions were considerably affected in Montreal and Toronto b short strikes of teamsters. Although more than twenty n disputes occurred during April a satisfactory feature was th fact that in nearly every case a settlement was soon reache the majority of the disputes being strikes called to enforce d mands for increased wages.

◆

Letters of incorporation under the laws of Ontario hav been granted Messrs. J. C. Murray, A. C. Moffat, A. A. Vi ers, A. Sear and C. J. Sherraen, of Fort William, for a com pany to be known as the Cuthbertson Bond Company, deali in stocks and bonds, debentures and other securities of co porations, governments and municipalities.

AMONG THE WORLD'S FINANCIERS

ıny New Issues in London—The International Markets —Money and Interests in the Dominion

Underwriters have suddenly decided to make another test the investment situation, says a cable from London. Our rkets are being literally swamped with new issues. Those t have just been announced include the Great Northern ilway, £750,000 preference, plus £500,000 deferred; the nstrong Whitworth Company, £1,000,000 preference shares; ı. Beardmore & Company, £1,000,000 preference, and the tish American Tobacco Company, with an issue of £1,000,-
.

A part of the £6,000,000 issue of Hungarian two-year es are being offered here at about a 5½ per cent. basis, and ›lock of £350,000 Province of Saskatchewan yearly notes e been privately placed, yielding 4¾ per cent.

An issue of $2,500,000 6 per cent. cumulative $100 shares the Dominion Steel Corporation.

Arrangements are being made also for the underwriting ıearly $2,500,000 worth of 4½ per cent. debentures at 95 for municipality of Victoria, B.C.

The underwriters have taken about 66 per cent. of the of Montreal loan of £1,430,600 4½ per cent. registered ck. The Bank of Montreal regarded the result as fairly isfactory, seeing how few loans do better in the present rket conditions. The general opinion is, however, states cable, that the city is unwise to create such a huge float- indebtedness, which necessitated two issues in such rapid cession.

The underwriters of the Durban, Natal, 4 per cent. issue $1,750,000 have been left with two-thirds of it on their ıds.

th Sides of the Atlantic.

The international money market will have the somewhat ısual experience this week of two big loans being brought simultaneously on both sides of the water, states the Wall eet Journal. In New York, the $45,000,000 city ıd sale is offered, while over in Europe the inese loan of $125,000,000 comes out. This is to be ided among the five powers concerned, as follows: Eng- d $37,500,000, Paris $37,500,000, Berlin $30,000,000, ssia $12,500,000, and Belgium $7,500,000.

Thus from both sides of the water there will be a heavy nand on the money markets. The question arises will there any cross-currents in the movement of credits on account these two large loans, and will the foreign exchange market much affected thereby? In other words, to what extent l the American investor be interested in the Chinese loan, d how much will Europe participate in New York City's ıd offering?

In view of the present condition of the investment market London it is doubtful whether the foreign participation to- ›rrow will be quite as pleasing as on former occasions. wever, the interest return this time may prove attractive foreigners. It is understood that Holland intends to be a ger bidder.

As far as the foreign exchange market is concerned the e for demand sterling is at present just about at the parity exchange, so that the position of this market will not oper- either for or against the European purchases. This is metimes quite a consideration; as the risk of exchange will en influence the foreign participations, either one way or other.

ınadian Pacific's Issue Carefully Handled.

In view of the anxiety that has been expressed over the ely effect upon the money market of circulation in Canada the new sixty million stock issue now being paid in, Sir ıomas Shaughnessy, before sailing on Friday, gave assur- ce that the funds would be carefully handled, and that the ıst possible disturbance would be caused to the Canadian ırket.

Canadian bankers, he said, could be relied upon to make ch use of the funds as will best meet conditions of trade d commerce. The men who dictate the Canadian banking licy are men of such sound judgment that whether the pital at their disposal be small or large, they will act with ution and foresight for the best interests of trade and the mmunity they serve.

The action of the banks in shutting down on wildcat real tate speculation has my entire approval, though I do not ink there has been anyting like the general inflation of land lues in Western Canada that has been talked of. The per- anent increase in land values is due to the ever-increasing ımigration that has taken place, and this has been more an enough to repay every cent that has been borrowed by Dominion.

The Canadian Car and Foundry Company has made a further issue of $900,000 of 7 per cent. cumulative preferred stock.

The Royal Securities Corporation has purchased this for issue in London.

Preferred stock to the amount of $50,000 is being offered to Shareholders of the Harvey Knitting Company in the proportion of one share for every two shares of preferred now held.

As forecasted at the last annual meeting of the Ottawa Light, Heat & Power Company a short time ago, the directors at a meeting held this week authorized an issue of $800,000 additional stock, which will increase the capital stock from $2,000,000 to $2,800,000. Permission to increase the stock of the company was given by the Dominion Government recently.

The extra capital is to be used to build and equip the new gas plant in Ottawa East, and also to cover the cost of the expensive additions and improvements being made to the electric lighting and power plants in the city.

The new stock will be issued at par to the shareholders of record of June 20th of this year. It will be called in five instalments, payable every two months. The first call will be made on July 15th next.

Messrs. Peabody, Houghteling and Company, Chicago, are making an issue of $175,000 first mortgage 6 per cent. gold serial bonds of the Chicago, Duluth and Georgian Bay Transit Company of Chicago. The bonds are secured by a first mortgage upon the steel steamship "North American," built especially for passenger service, and which is to be delivered this month.

The Chicago, Duluth and Georgian Bay Transit Company will not have to depend upon, nor derive its business solely from Chicago and points through Chicago, states the prospectus. It will tap at Duluth the lake traffic from St. Paul, Minneapolis and the Northwestern States. Behind Port Arthur is Winnipeg and the immense Canadian Northwest. Collingwood is the best port for passenger traffic on Georgian Bay, and is the natural outlet for Western Ontario.

Companies Merge.

"The Canada Glass Corporation, Limited," will probably be the name of the new company whose organization is to take over the Diamond Glass Company. In addition to Diamond Glass Company, the Sydenham Glass Company and the Canadian Glass Company will be included in the combination.

The purchase of the old companies and the organization of the new company have practically been completed by the firm of Messrs. C. Meredith and Company, Limited. A few details are yet to be arranged, but these are of a formal description.

The new company will have a bond issue of $2,000,000 and an authorized capital stock of $8,000,000. The stock will be divided as follows:—

	Authorized.	Issued.
Preferred	$3,000,000	$2,600,000
Common	5,000,000	4,250,000

The shares of the new company have all been disposed of by Messrs. C. Meredith and Company, Limited, the greater portion going to London, and the bond issue has also been sold. A public issue of the securities will be made later in London, and they will be listed there, but it is understood that no public issue will be made in Canada.

Despite the experiences French investors have had in Canada, there are still some seeking invstments here.

Mayor Lavallee, of Montreal, has received a letter from the Credit Immobilier Franco-Canadian asking if the city's latest loan has been made, and what would be the attitude in the city in the event of the Credit Immobilier submitting a tender. The letter adds that the inquiry is being made at the request of a number of French capitalists.

◆

The history of transportation is practically the history of the evolution of man and advancement of civilization. Moses is said to have been interested in transportation, having contracted to transport the children of Israel from the land of Egypt to the Land of Promise, and it is reported that considerable difficulty was experienced with washouts. Coming down to more recent times, in Western Canada we find the stage, the mule train and the Red River cart, until about thirty years ago the pioneer railway, the Canadian Pacific, was constructed, since which time distance has practically been cancelled, until to-day we have in Canada about 27,000 miles of railway over half of which is west of the Great Lakes. The railway companies in Western Canada today have an army of about 110,000 officials and employees, which means that fully 350,000 people, a no small proportion of the population make their living out of the railways.—Mr. D. C. McDonald, at Retailers' Convention, Regina.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Belmont, Ont.—May 10—House of Mr. Watson Parks.

Peterborough, Ont.—May 12—Hunter Street bridge, damaged.

Oso Township, Ont.—May 11—House of Mr. Richard McVeigh, destroyed.

Southampton, Ont.—May 16—Goderich Lumber Company's sawmill, destroyed.

REGINA FINANCIER ON DEMAND FOR CAPITAL

"There is a difference in the London market from two years ago," said Mr. F. J. James, of the well-known financial house of Messrs. Nay and James, Regina, in an interview with The Monetary Times on his return from an extended visit to England and the Continent. "The world-wide demand for capital is greater; other countries beside Canada are competitors, and more will have to be paid for the money that is required. The English investor wants Canadian investments, but under existing conditions he is investigating and selecting those that have sound and attractive features."

In England, there is a growing knowledge of the Dominion, the location of its cities, etc. "Regina," said Mr. James, "was well known, and its recent loan was favorably spoken of in financial circles.

"One thing was especially noticeable on the return trip, and that was the superior class of emigrant that is leaving England to make his home in this land.

"From reports I have just received from Regina," remarked this Western gentleman, "circumstances prevailing there are satisfactory, and much progress and expansion will take place during this year."

Mr. James is also a director of the Saskatchewan Mortgage Corporation, the satisfactory annual report of which was recently issued, and which is meeting with continued success in its operations.

UNITED INVESTORS LIMITED

Head Office - - - WINNIPEG

CAPITAL $1,000,000

President
RICHARD D. WAUGH
Ex-Mayor City of Winnipeg

Vice-President and Managing Director
ALBERT H. OAKES
President 1912 Winnipeg Real Estate Exchange
Manager Oakes-Gray Realty Co.

Secretary-Treasurer THOMAS E. MOFFAT

Directors

Controller J. W. COCKBURN; E. R. CHAPMAN, Barrister; JOSEPH GRAY, Capitalist, Minneapolis; FREDK. W. MOORE, Treasurer Grain Growers' Grain Co.; DUNCAN MARSHALL, Retired Farmer, Clearwater, Man.

The "UNITED INVESTORS, LIMITED," was first incorporated in January 1912, with a capital stock of $250,000. The greater part of this stock was taken up during the ensuing twelve months.

At the first Annual Meeting held on January 8th last, the Shareholders voted to increase the capital stock to $1,000,000, by authorizing the issue of $450,000 worth of additional common or ordinary stock and $300,000 worth of 7 per cent. preferred stock to be divided into 7,500 shares, par value $100 each; but the common or ordinary shares to be sold at a premium of $10.00.

THIS STOCK IS NOW OFFERED FOR PUBLIC SUBSCRIPTION

Management The Corporation is managed by Directors elected annually by the Shareholders. The present Board is composed of prominent and successful business men, who are large Shareholders.

No Bonus Stock In the formation of this Company no bonus stock in any form was allowed. Every stock certificate will have been paid for in hard cash at one hundred cents on the dollar.

No salaries are paid to any officers or directors, and the Company pays no office rent.

What the "United Investors, Limited," Offers - -

1. The free advice of nine experienced and reputable business men, all of whom are large Shareholders. Their interests are identical with those of the smallest Shareholder.

2. The opportunity to enrich yourself, not only in one real estate deal, but on a dozen or more at the same time.

3. A share in certain "hidden" profits. Profits for which as yet no credit has been taken in the Profit and Loss Account.

THESE ARE—(a) "Park Manor" subdivision. Estimated profits $140,000.00. (b) Properties bought for $205,914.32, upon which $121,591.33 is still owing, but which are valued in December, 1912, at $274,790.00 by the Winnipeg Real Estate Exchange Valuation Committee.

4. An interest in a Company which had organization expenses of only $578.60.

5. If you become a Shareholder, you participate in all the profits and other advantages of the Company. You are offered an opportunity to become a partner in a "going concern" which offers you an interest in profits already accumulated—a Company which has passed beyond the experimental stage—a Company the future of which is assured—a Company for the Shareholder, small and large.

How to Buy "United Investors, Limited," Shares

You can buy any amount from one share up. You can pay on full or on easy instalments, without interest, and every payment participates fully in profits.

You can own one common share by paying $30.00 cash and the balance in four equal, consecutive semi-annual payments.

You can own one hundred common shares by paying $3,000.00 cash and paying $2,000.00 every six months for two years.

You can buy the Preferred Shares by paying $20.00 per share cash with application, and the balance in four semi-annual payments.

THIS IS GOOD BUSINESS

Put some of your money in Winnipeg, the billion-and-a-half-dollar-bank-clearing-city—the city with the largest annual bank clearings for its size on the continent.

Postal card will bring Prospectus, Auditors' Report and full information.

F. W. BROUGHALL, General Manager.
Toronto, April 30, 1913.

I have examined the General Balance Sheet as at April 30, 1913, and compared it with the Head Office Books at Toronto, and the certified returns from the Branches, and, in my opinion, this is a correct and a conservative statement of the condition of the Bank as at that date.

SHERMAN E. TOWNSEND,
Chartered Accountant.

In moving the adoption of the report the President, Mr. G. T. Somers, said:—

It is my intention to confine my remarks more particularly to a consideration of our own affairs as outlined in the report which you have just heard.

The profits amount to $113,400.87, equal to 10.92 per cent. on our average paid-up capital, and provide sufficient for the dividends of $62,276.19, leaving the ample sum of $51,124.68 for other purposes. Following the conservative policy adopted last year, $30,000 of this sum has been appropriated for reduction of bank premises and other assets, and the balance, amounting to $21,124.68, has been added to Profit and Loss Account, bringing this up to the substantial sum of $97,660.92. This, with our Rest Account of $300,000, provides added protection for our shareholders of $397,660.92, or over 35 per cent. of our paid-up capital.

PREMISES.

The opening of branches in Saskatchewan, at Regina and Piapot, and at Yonge and Carlton Streets, Toronto, was done after careful consideration, and you will be pleased to know that this expansion has been well justified, the business exceeding our expectations.

The new premises acquired in Montreal and Winnipeg, of which you were advised last year, have proven satisfactory. The business at these points has been excellent.

It was also deemed advisable to improve the position at St. Catharines, and to this end a site was obtained, and a good, substantial office was erected.

It is our policy to continue the expansion of the bank carefully, opening branches at such points as, after thorough investigation, seem desirable, and at such times as our resources will permit.

Our premises account now stands at $303,805.77, and we believe this to be a conservative valuation.

If you will now refer to the General Statement you will find the deposits total $6,505,733.73, an increase for the year of about $1,200,000, which is most encouraging, in view of the monetary conditions during the past year, and we take it as an indication of the confidence in which the institution is held.

Our notes in circulation are $944,015. A year or two ago it was a problem to keep our circulation out. The reverse is the case now; our business has expanded to such an extent that we have difficulty in supplying the demand.

You will note that our cash assets represent approximately 24 per cent. of our liabilities to the public, and that our readily available assets of $3,431,492.90 equal over 45 per cent. of the above liabilities, and we feel that our general resources are in excellent condition to meet any demand.

Our total assets have increased from $7,893,375.89 to $9,099,533.94.

The general expansion of our business has been considerable, and most satisfactory, and we feel that you have every reason to be pleased with the results.

The revision of the Bank Act is now before Parliament, and the important question of bank inspection is to receive final consideration. It has been a most difficult matter to extract from the mass of evidence submitted a method which in practice will prove efficient.

While we know that no external inspection can be as thorough as our own, we believe in the theory of an independent audit, and think the present proposal before the House to be the most workable and satisfactory yet devised, and believe it will be productive of good results.

Your directors, being in sympathy with this idea, appointed Mr. Sherman E. Townsend, chartered accountant, to audit the statement now before you, and you will find his certificate appended thereto, and we will now ask the shareholders to appoint their auditor for the ensuing year.

In regard to the future of the bank, I feel that the present policy of conservatism should be rigidly maintained, as it is to this policy I attribute our successful position to-day. Monetary conditions have been greatly disturbed for some time, and caution is most necessary to avoid over-extension of credits, but the future of this country is assured, and the present check on business will do no harm. In any event, our position entitles us to contemplate the year ahead with equanimity and confidence.

We have now nearly 2,000 shareholders, and I wish again to draw your attention to the value of active co-operation between yourselves and the officials of the bank, and to thank you for your aid in the past, and ask for its continuance.

In conclusion, we wish to place on record our appreciation of the services of the staff, whose loyalty and efficiency has made possible the excellent showing in our statement.

Among those present at the meeting were: Alexander Mackenzie, R. W. Eaton, A. E. Kirkpatrick, W. F. Maclean, M.P., G. T. Somers, W. K. George, E. B. Ryckman, K.C., J. H. Francis of Thornhill, Thomas Reid, Edwin J. Howes, Noel Marshall, C. W. Kerr, Sidney Jones, Hiram Keffer of Maple, H. Wilberforce Aikins, M.D., G.O. Somers, Wm. Dineen, A. H. Walker, Hugh McKinnon of Star, E. W. Wright.

THE MERCHANTS' BANK OF CANADA

PROCEEDINGS AT THE FIFTIETH ANNUAL MEETING OF SHAREHOLDERS

The fiftieth annual meeting of the Merchants' Bank of Canada was held yesterday in the board room of the head offices in Montreal. The chair was taken at 12 noon by Sir H. Montagu Allan, the President. Others in attendance were: K. W. Blackwell, F. Orr Lewis, Andrew A. Allan, C. C. Ballantyne, A. J. Dawes, Farquhar Robertson, George L. Cains and Alfred B. Evans, E. F. Hebden, John Patterson, A. Piddington, Edward Fiske, W. H. Dixon, George Hague, C. R. Black, W. B. Blackader, A. Haig Sims, T. E. Merrett, D. C Macarow, D. A. Lewis, J. M. Kilbourn and H. B. Loucks. Mr. J. M. Kilbourn was appointed secretary of the meeting, and the minutes of the last annual meeting were taken as read.

The Annual Report.

The report of the directors was read by the President, as follows:—

"I have pleasure in submitting the Report of the Bank as at 30th April, 1913, together with Profit and Loss Account.

"You are aware that the date of the Annual Meeting was changed by vote of the shareholders in December last, and that from this on the Annual Meeting will take place in May. We have thought it well, in view of only a portion of a year being covered, to make no provision on account of Bank Premises or the Officers' Pension Fund, but to carry the balance forward in Profit and Loss Account, to be dealt with a year hence. This procedure commended itself to the Board, and I hope will be satisfactory to you.

"All the capital subscribed has now been paid up. There are still some shares remaining to be disposed of, but your Board have not found a convenient time for dealing with these. It may be that during the coming year the shares will be placed, when those shareholders interested will receive any premium obtained over the issue price.

"Since November last we have opened the following Branches: Athabasca Avenue (Edmonton), Alberta; Sandwich, Ontario; and Three Rivers, P.Q.; and also Sub-offices at Ford City and Calabogie, Ontario; and Napierville and Quyon, P.Q. We have closed the following Sub-offices: Ryley and Big Valley, Alberta; and Desboro, Ontario.

"The staff continue to perform their duties entirely satisfactorily."

THE FINANCIAL STATEMENT.

Statement of the result of the business of the Bank for the five months ending 30th April, 1913:—

The Net Profits, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$533,653.53

		$80,573,899.08

E. F. HEBDEN,
General Manager.

In moving the adoption of the report, the President said that owing to the statement being for the term of five months only, it was impossible to make the usual comparisons with the business of the preceding year. The motion for the adoption of the report was seconded by Mr. K. W. Blackwell.

Mr. Hebden, the General Manager, was called upon by Sir Montagu Allan before the motion was put to the meeting. Mr. Hebden said that as the meeting was really pro forma to comply with the Act in order to bring the Annual Meeting round to May hereafter, perhaps nothing need be said by him on this occasion in view of the short period covered.

The report was then adopted.

On motion of Mr. C. R. Black, seconded by Mr. Edward Fiske, Messrs. A. Piddington and J. Patterson were appointed scrutineers for the election of directors.

Mr. A. Haig Sims moved, and Mr. W. H. Dixon seconded, that the scrutineers cast one ballot for the following gentlemen: Sir H. Montagu Allan, K. W. Blackwell, Thomas Long, Alex. Barnet, F. Orr Lewis, Andrew A. Allan, C. C allantyne, A. J. Dawes, F. Howard Wilson, Farquhar obertson, George L. Cains and Alfred B. Evans. The mo- on was carried and these directors were declared re-elected.

Mr. George Hague, the former general manager of the ank, spoke briefly of the new banking Act, which he be- eved to be in the main a satisfactory measure. It might ave been better, he said, but the banking profession might e thankful that it was no worse. He felt assured that the erchants' Bank need never fear any scrutiny into its affairs y independent investigators. Mr. Hague suggested that the inister of Finance be urged to appoint a sub-department Finance under the charge of a skilled and experienced anker, whose duty it should be to advise upon new applica- ons for bank charters and to carefully scrutinize the monthly nk statements. Such an innovation, he held, would do much prevent such unfortunate affairs as the Farmers Bank and e Banque de St. Jean failures.

A vote of thanks to the President and the Directors for their lued services, and also to the General Manager and the aff of the Bank was moved by Mr. A. Haig Sims, seconded y Mr. W. B. Blackader.

The motion was carried, and Sir Montagu Allan, in acknowledging the thanks of the shareholders, said that the Bank was indeed blessed with a good staff. He knew of no bank which was more fortunate in having a staff of employees who take a deep interest in their work and the progress of the institution, one evidence of their interest being the long periods for which they maintained their connection with the Bank. The staff were really, he said, more entitled to credit than were the directors, for the latter simply laid down the laws, while the staff had the harder task of carrying them out.

Mr. Hebden, the General Manager, in expressing his thanks to Messrs. Sims and Blackader for their kind reference to the staff and to himself, said that he desired to endorse what the President had remarked regarding the staff—namely, that they are a very excellent body of men, hard workers withal and enthusiastic in the Bank's service and devoted to its interests.

This concluded the business of the meeting, and the adjournment was carried. At a subsequent special meeting of the directors, Sir H. Montagu Allan was re-elected as President and Mr. K. W. Blackwell as Vice-President.

THE BANK ACT

The Bank Act has been given its third reading in the ouse of Commons.

By order of the Board.
G. H. BALFOUR,
General Manager

Winnipeg April 10th, 1913.

CALGARY MAY BE CENTRE FOR MEAT PACKING

A proposal to make Calgary the meat packing centre of Western Canada by establishing great union stock yards, operated by the three transcontinental railways, now that the Canadian Northern and Grand Trunk Pacific lines are laid to the city, has awakened civic interest. Calgary is the city of Western Canada through which more live stock passes than any other place except Winnipeg. The Livestock Associations all have their headquarters there. The activity in the live stock industry is exemplified in the fact that upwards of 100,000 head of breeding stock were imported into the province last year.

Soon the effect of the efforts to produce more stock will be apparent, for although Alberta has had for many years a world-wide reputation as a cattle country, the work of so many interests during the past two years, directed towards increasing the production, will in a year or two more be apparent in the very largely increased offerings on the market. To prepare for this the stockyard scheme is put forward.

Every indication is that the big railway companies will regard the scheme favorably as they are all anxious to develop the stock raising industry of Alberta and encourage mixed farming.

The plan in brief is to have the city expropriate the land necessary for the big stockyards, with the understanding that the Canadian Pacific will put in the 30 acres which that railway already uses for stockyard purposes, and nearby are some additional 50 acres which the city might expropriate. At the present time the owners ask about $6,000 an acre for the land, but the city officials say it can be secured much cheaper by expropriation proceedings.

Traffic rights would be granted to the Grand Trunk Pacific and the Canadian Northern to operate their stock trains into these yards, and the yards probably placed under the control of a city commission.

In connection with these yards, large abattoirs and packing facilities would be arranged and every effort made to afford farmers the greatest convenience in disposing of their stock along the lines followed in the union stockyards in Chicago which have made that city the greatest centre of animal industry and packing on the American continent.

DEBENTURES FOR SALE

TOWN OF DALHOUSIE

PROVINCE OF NEW BRUNSWICK

$30,000.00 Debentures for Sale.

The undersigned will receive tenders up to 10th June next r sixty (60) debentures of the Town of Dalhousie of $500.00 ch, dated 1st June, A.D. 1913, bearing five (5) per cent. erest and payable at the end of thirty years. J. B. STOEHR,
Secretary-Treasurer,
Rudy Municipality, No. 284, Glenside, Sask.

TENDERS FOR DEBENTURES

CITY OF ST. CATHARINES, ONTARIO

SEALED TENDERS will be received by the undersigned up to the Twenty-sixth day of May, 1913, for the purchase of $235,273.99 Debentures of the City of St. Catharines, bearing interest at the rate of Four and one-half per cent. per annum payable semi-annually, at the Imperial Bank of Canada, in the City of Toronto.

The principal of the Debentures is divided as follows:—

For Water Works		$ 61,800 00	30 years from	13 January 1913.
" Trunk Sewers		45,000 00	"	3 September 1912.
" Fire Hall		12,000 00	20 "	30 January 1913.
" Gas Extension		7,000.00	"	" " "
		125,800 00		
Local Improvements	$ 54,398.56		20 years from	May 1913.
"	55,075 43	109,473.99	15 "	" "
Total ...		$235,273.99		

Of the above, $125,800.00 are ready for delivery and the balance will be ready about the tenth of August, 1913. Tenders to include the accrued interest from dates mentioned.

Any further particulars can be obtained by applying to

W. A. MITTLEBERGER,
City Treasurer.

DEBENTURES FOR SALE

Tenders will be received up to June 2nd, 1913, for $25,000.00 30-year 6 per cent. debentures of St. Vital, of Battleford Catholic Public School District, No. 11, Battleford, Saskatchewan, repayable in equal annual instalments of principal and interest combined.

J. D. NOEL, Secretary-Treasurer.

Battleford, Sask.

DEBENTURES FOR SALE

SALE BY TENDER OF PART OF COBALT STATION GROUNDS (EXCEPTING MINERALS) BY THE TIMISKAMING & NORTHERN ONTARIO RAILWAY COMMISSION.

Notice is hereby given that sealed tenders addressed to the undersigned and endorsed on the envelope "Tenders for Surface Rights, Cobalt," will be received up to 12 o'clock noon of Saturday, the 31st May, 1913, for the purchase of that part of the Cobalt Station Grounds of the Timiskaming and Northern Ontario Railway Commission (excepting thereout the minerals and mining rights granted to J. P. Dickson and A. Rosenthal by a certain lease, dated the 20th day of October, 1908, and now held by The Cobalt Townsite Mining Company, Limited), part of which said lands is at present occupied by The Imperial Bank of Canada at Cobalt, as a site for its banking offices, containing one-tenth of an acre, more or less.

In case a tender is accepted the purchase money shall be payable one-third cash, one-third one year, and one-third two years, with six per cent. interest from date of acceptance of tender.

In case the purchaser shall fail to pay the purchase money within the time limited as aforesaid the Commission shall thereupon, or at any time thereafter, be entitled to cancel the sale and to retain all moneys paid as and by way of agreed and liquidated damages.

Upon payment of the purchase money in full the purchaser shall be entitled to a transfer of said lands, subject to an existing lease of part of said lands, dated the 30th day of September, 1910, which said last mentioned lease shall be assigned by the Commission to the said purchaser, who shall covenant to assume the same and to observe all the covenants, provisos and agreements therein contained.

Copies of the Plan, showing the lands to be sold, may be seen upon application to A. J. McGee, Secretary-Treasurer, Timiskaming and Northern Ontario Railway Commission, 25 Toronto Street, Toronto.

The Commission reserves the right to withdraw all or any part of said lands from sale.

The highest or any tender not necessarily accepted.

Further particulars may be had on application to the undersigned.

Dated at Toronto this 6th day of May, A.D. 1913.

A. J. M'GEE,
Secretary-Treasurer,
Timiskaming & Northern Ontario Railway Commission,
25 Toronto Street, Toronto.

TOWN OF SOURIS

SEWER DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned will be received up to six o'clock p.m., May 31st, 1913, for the purchase of $54,000, 30-year debentures with coupons attached dated June 5th, 1912, bearing 5 per cent. interest, payable in annual instalments of principal and interest. The highest or any tenders not necessarily accepted.

J. W. BREAKEY,
Souris, Man. Secretary-Treasurer.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

CANADA'S BANK ACT

Committee of the Whole House to Discuss Bill—Cattle and Hogs—Registration of Liens

Hon. Mr. White reported to the house of commons that the bank bill had not been substantially modified from the form in which it was originally introduced. The principal changes were as follows:

The provision in the bill for audit had been supplemented by the further provision that auditors be selected from a list of forty names by the general managers of the chartered banks, subject to veto by the minister. The shareholders will select their auditors from the list.

Further provision had been made for the register of liens which the new act authorizes banks to take upon threshed grain and on cattle.

Slight modifications had been made in the clauses regulating rates of interest, rates of exchange, and agency charges.

Provision had been made under which the treasury board was to provide regulations for the sterilizing of bank notes.

Safeguards had been provided over the period between the incorporation of a bank and the issue of the treasury certificate.

Provision had been made by which bank officials would be liable for any corruption in making loans.

The interpretation clause at the outset involved a lengthy discussion by the western members, who objected to the fact that the term "cattle," upon which the banks could make loans, did not include hogs.

Hon. Mr. White asked that the matter stand until the clause in question was reached. If it were then found possible to define the word "ranches" it might be possible to meet Mr. Oliver's contention.

It was decided to proceed with the non-contentious clauses, as far as possible, and some thirty were passed with practically no discussion. Mr. Carvell, however, objected to the clause which permits a bank to loan money on its own stock. He pointed out that this was a right not given to the ordinary public. Hon. Mr. Emmerson also maintained that the clause should be struck out.

Registration of Liens.

Mr. Aikins argued that the section regarding registration of liens should be struck out. It was quite consistent with the principles of the bank act that farmers should be advanced money on their threshed grain in granaries. Farmers would be saved time if they were not compelled to haul their grain to storage centres, and they should not be compelled to part with their grain at inconvenient seasons.

Mr. White replied that the banking and commerce committee had held that liens should be registered, though he was not convinced on that point himself. Banks should have the right, he said, to take liens on cattle, and the section had been put in the act to make the right clear. It had been a principle under the act for 40 years that banks should look rather to personal security in the case of the farmer or the retailer, but the case was different with the wholesaler. It would be unfortunate if the banks really became chattel mortgagees of the personal property of farmers. The proper principle was to have loans made on short term promissory notes.

Mr. Sinclair thought that there should be a definition of the term "rancher" in the act, but Mr. Bennett, Calgary, did not believe the word susceptible of exact statutory definition.

Sir Wilfrid Laurier warned the committee to avoid complications as to the distinction between the meaning of the two words "farmers" and "ranchers."

The Minister of Finance explained at a later sitting that the word "rancher," as inserted in the clause, was not sufficiently specific. According to the Standard dictionary it might include a person engaged in mixed farming, and this was not desired.

Mr. F. L. Schaffner (Souris) asked if the act was to permit a rancher and not a farmer to raise money on his live stock. Upon being told this was the intention, "then I must protest," he said. "There is no more reason why a rancher and not a farmer should have this privilege. We want to encourage mixed farming, and to allow a farmer to raise money on his cattle would be one way to give encouragement. I regret very much that the Minister has seen fit to take this action."

Bank Managers and Insurance.

Objection was renewed by Mr. F. B. Carvell (Carleton, N.B.) to the clause which gives banks a first lien on stock held by a shareholder, and requires that a shareholder shall discharge all his liabilities to the bank before he is allowed to transfer any of his shares. Hon. Mr. White explained that a shareholder would be required only to keep enough shares to cover his liabilities to the bank, and the clause passed.

The section prohibiting bank managers from engaging in the insurance business, which was inserted in committee at the instance of Mr. Carvell, was omitted.

The Minister of Finance suggested that the clause might be dropped, and that the Bankers' Association be asked to take steps to prevent abuse.

Bank Buildings.

Speaking on the clause which allows one bank to sell its assets to another, Hon. Frank Oliver maintained that the matter of combination of specially chartered and specially privileged institutions with another, should be in the hands of parliament and parliament alone. A combine of this sort should not take place without the authority of the people's representatives. The elimination of competition in banking should not be allowed by parliament. The clause was allowed to stand.

When the matter of banks acquiring and holding real estate came up, Hon. Mr. Emmerson moved an amendment to limit the amount that banks could invest in buildings to five per cent. of their combined capital and reserve fund, and that monthly statements of their real estate investments should be published. He said the banks should be legalized in the matter of purchasing real estate, but they should be limited well. The impression prevailed that banks were investing too much in their buildings, and they erected buildings, not only for their own use, but to enter into competition with private owners in leasing offices.

Hon. Mr. White replied that up to the present it was the intention that banks should hold realty for their own occupation, and for that alone, but it was a difficult matter to deal with. It was regarded as an unsound principle that banks should invest money in fixed holdings; they should rather keep their money in circulation.

As for placing a limit on the amount banks should invest in buildings, Mr. White saw a difficulty in placing a valuation on such structures as the Bank of Montreal and the Bank of Commerce on St. James Street, Montreal.

Hon. Frank Oliver said that it was parliament's duty to say just how far the banks could go in using the money people deposited with them.

Call Loans Were Innocent.

After several members had spoken along this line, Hon. Mr. White stated that he would propose an amendment which should be approved by Hon. Mr. Emmerson—namely, that a fair and true valuation of property be made to the minister of finance by all the banks in Canada in January of each year. This was adopted.

Major Sam. Sharpe reintroduced an amendment which had been voted down in the Banking Committee, to the effect that not more than ten per cent. of the paid-up capita of a bank should be loaned to foreign borrowers. He said when money was most needed in Canada the banks were sending it to New York on call loans. Hon. Mr. White explained that call loans were quite innocent. Banks could not put out all their money with commercial enterprises or they would go bankrupt in a week. They had to keep thirty or forty per cent. liquid or stored up. Loans of the kind which Mr. Sharpe complained of could be called in over night, and the bank was getting three or four per cent. on them. The amendment was not pressed.

The committee of the house debated over clause 91 o the act which was designed to place a limit of seven per cent upon the amount of interest a bank may recover upon a loan except in cases where higher rates of interest may have been accepted in advance by agreement between the borrower a the bank. The final decision reached was that clause 91 o the old or existing act should be reinserted with the amendment that the banks shall report quarterly in March, June September and December, to the finance department as the rates of interest they are charging in various parts Canada. The necessity for this somewhat ambiguous pr vision was stated to be due to the fact that the banks hav never observed the old clause and have, in sparsely settl districts and new and isolated towns, charged high rate and have been fortified in so doing by a judgment of th Privy Council.

It was generally admitted that banks must receive mo than seven per cent. in some cases, and that borrowers wou be willing to pay more for the purpose of getting mon when it was absolutely required. Several members wer favorable to striking out the clause entirely. But the ma jority of the committee deemed it advisable to stipulate th amount that could be recoverable in cases where there w no agreement between the borrower and the bank, and whe the interest had not been deducted when the loan wa granted.

After this clause was disposed of a few changes wer made in the wording of various clauses in the act.

The bill was then reported for its third reading.
